In accordance with this requirement, notice is given that the Secretary intends to make available under a grantback arrangement to the SEA an amount of $50,221.99, which is 75 percent of the funds the Department has recovered as a result of the SEA's final audit determinations. The Secretary bases his intention to enter into a grantback arrangement under section 456 of GEPA on his determinations outlined in Part E of this notice, and payment by the SEA of all funds owed to the Department as a result of the final audit determinations.

G. Terms and Conditions Under Which Payment Under the Grantback Arrangement Will Be Made

Section 456(b) of GEPA provides that any payments made under a grantback arrangement shall be subject to the terms and conditions that the Secretary deems necessary to accomplish the purposes of the affected program. The SEA agrees to comply with the following terms and conditions under which

payment under the grantback arrangement will be made:

(1) The SEA will spend the funds awarded under the grantback in accordance with—

(a) All applicable statutory and regulatory requirements;

(b) The plans that the SEA submitted and any amendments to those plans that are approved by the Secretary; and

(c) The budgets that were submitted with the plans and any amendments to the budgets that are approved by the Secretary.

(2) In accordance with section 456(c) of GEPA and the SEA's plans, all funds received under the grantback arrangement will be expended by August 31, 1985.

(3) The SEA, on behalf of the LEAs, must, not later than January 1, 1986, submit a report to the Secretary which indicates that the funds awarded under the grantback have been spent in accordance with the approved budgets.

(4) Separate accounting records must be maintained documenting the expenditures of funds awarded under the grantback arrangement.

Invitation To Comment

The Secretary invites public comments on this notice of intent to award funds under a grantback arrangement to the Tennessee SEA on behalf of the Anderson Public Schools and Dyersburg City Schools. Interested persons may send written comments to Dr. A. Bruce Gaarder at the address at the beginning of this notice. All comments must be received on or before May 28, 1985.

BILLING CODE 4000–01–M

National Board of the Fund for the Improvement of Postsecondary Education; Meeting

AGENCY: National Board of the Fund for the Improvement of Postsecondary Education.

ACTION: Notice of Closed Meeting.

SUMMARY: This notice sets forth the proposed agenda of a forthcoming meeting of the National Board of the Fund for the Improvement of Postsecondary Education. This notice also describes the functions of the Board. Notice of this meeting is required under section 10(a) of the Federal Advisory Committee Act.

DATES: May 19, 1985 at 12:00 p.m. through May 21, 1985 at 2:00 p.m.

ADDRESS: Airlie House, Airlie, Virginia.

FOR FURTHER INFORMATION CONTACT: Sven Groennings, Director, Fund for the Improvement of Postsecondary Education, 7th and D Streets, S.W., Washington, D.C. 20202 (202–245–8091).

SUPPLEMENTARY INFORMATION: The National Board of the Fund for the Improvement of Postsecondary Education is established under section 1001 of the Higher Education Amendments of 1980, Title X (20 U.S.C. 1135a–1). The National Board of the Fund is established to "advise the Secretary and the Director of the Fund for the Improvement of Postsecondary Education . . . on the selection of projects under consideration for support by the Fund in its competitions."

The meeting of the National Board is closed to the public. The meeting is for the sole purpose of reviewing and evaluating grant applications submitted to the Fund under the Comprehensive Program.

The meeting of the National Board of the Fund will be closed to the public from 12:00 p.m., May 19 until the conclusion of the agenda, approximately 2:00 p.m., May 21 for review, discussion or consideration of proposals submitted to the Fund for grant awards. The meeting will be closed under the authority of section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. Appendix 2) and under subsections (4) and (6) of 5 U.S.C. Appendix 2) and under subsections (4) and (6) of 5 U.S.C. 552b(c) (Pub. L. 94–409). Discussions of the applications and the qualifications of proposed staff may disclose commercial or financial information which is privileged or confidential and will tuch upon matters that would constitute a clearly unwarranted invasion of personal privacy if conducted in open session.

A summary of the activities at the closed session and related matters which are informative to the public consistent with the policy of Title 5 U.S.C. 552b will be available to the public within fourteen days of the meeting.

Records are kept of all Board proceedings, and are available for public inspection at the office of the Fund for the Improvement of Postsecondary Education, Room 3100, Regional Office Building, 7th and D Streets, S.W., Washington, D.C. 20202 from the hours of 8:00 a.m. to 4:30 p.m.

Dated: April 18, 1985.

Edward M. Elmendorf,

Assistant Secretary for Postsecondary Education.

DEPARTMENT OF ENERGY

Cooperative Agreement; Combustion/Emissions Research (Pittsfield Facility) New York State Energy Research and Development Authority (NYSERDA)

Summary

The Department of Energy announces that, pursuant to 10 CFR 600.7(b), eligibility for a cooperative agreement has been restricted to NYSERDA to perform research to determine the generalized relationships between municipal solid waste (MSW) combustion variables, MSW properties (moisture and organic/inorganic chlorine content) and specific products of the MSW Combustion process (CO, CO_2, O_2, PCDD, PCDF, SO_x, NO_x, THC, HCl, etc.).

Background

Airborne emissions of polychlorinated dibenzo-dioxins (PCDD) and furans (PCDF) are one of the most controversial environmental issues associated with municipal solid waste (MSW) incineration, and represent a significant potential barrier to implementation of incineration technology. PCDD and PCDF can be produced as a result of incomplete combustion of MSW, but little is known about the incinerator design and operating conditions which cause these compounds to be formed and which minimize or eliminate their discharge. The project focuses on determining the generalized relationships between the incinerator combustion variables, refuse quality (moisture and inorganic/organic chlorine content) and the products of combustion (including PCDD and PCDF).

This project is being conducted under the auspices of the ASME Dioxin Committee, and is being sponsored by a number of different States, a Federal agency (DOE) and various other governmental organizations. VICON management has agreed to allow all necessary testing for environmental emissions to be conducted at their Pittsfield, Massachusetts facility. Thus, major *planning* decisions regarding the project will be made by a group comprised of the American Society of Mechanical Engineers (ASME) Dioxin Test Sub-Committee (designated by the ASME Dioxin Committee), the co-

funding organizations, and VICON management.

The funding provided by DOE will be used to co-sponsor an RFP (with various other organizations) that will be issued by NYSERDA. The process for selection of the contractor to perform the required research will be done under NYSERDA competitive procurement guidelines which are similar to DOE's.

Solicitation Number: DE–FC01–85CE30838.

Scope of Project

The proposed research program provides a reasoned approach towards the resolution of major environmental questions regarding resource recovery mass-burning technology.

The proposed research is intended to be completed by November, 1985. Since environmental emissions from resource recovery facilities have recently come under public scrutiny, the acquisition of useful research data in this area is of utmost importance to the industry at this time.

For further information contact: Christopher A. Kouts, CE–323, U.S. Department of Energy, Room 5H078, 1000 Independence Avenue SW., Forrestal Building, Washington, D.C. 20585, (202) 252–1697.

Issued in Washington, D.C. on April 18, 1985.

James R. Higgins,

Director, Contract Operations Division B–1, Office of Procurement Operations.

BILLING CODE 6450–01–M

Office of the Secretary

National Petroleum Council; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: National Petroleum Council.

Date and time: Wednesday, May 22, 1985, starting at 9:30 a.m.

Place: Madison Hotel, Dolley Madison Ballroom, Fifteenth and M Street N.W., Washington, D.C.

Contact: Carolyn B. Klym, U.S. Department of Energy, Office of Oil, Gas, Shale and Coal Liquids, Mail Stop F–31, D–122, GTN, Washington, D.C. 20545, Telephone: 301–353–2709.

Purpose of The National Petroleum Council: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries.

Tenative Agenda

—Call to Order by Robert A. Mosbacher, Chairman, National Petroleum Council.
—Remarks by the Honorable John S. Herrington, Secetary of Energy.
—Reports of Study Committees of the National Petroleum Council:
—Progress report of the Committee on U.S. Petroleum Refining, John K. McKinley, Chairman.
—Consideration of Administrative Matters.
—Discussion of Any Other Business Brought Before the National Petroleum Council.
—Public Comment—10 minute rule.
—Adjournment.

Public Participation

The meeting is open to the public. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Carolyn B. Klym at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda.

Transcripts

Available for public review and copying at the Public Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C., between 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C. on April 19, 1985.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

Procurement and Assistance Management Directorate

AGENCY: U.S. Department of Energy (DOE).

ACTION: Notice of restriction of eligibility for grant award.

SUMMARY: DOE announces that, pursuant to 10 CFR 600.7(b), it intends to award on a restricted eligibility basis a continuation grant to the National Academy of Sciences in support of the National Research Council, Commission on Physical Sciences, Mathematics and Resources Geophysics Research Forum.

Project Scope—The National Academy of Sciences, through the Commission of Physical Sciences, Mathematics and Resources Geophysics Research Forum, is to continue to provide guidance to ensure scientific integrity of a geophysics film series being produced. Eligibility for this continuation award is restricted to the National Academy of Sciences, charted by Congress to conduct scientific research for the Government, to permit continuance of efforts initiated several years ago.

FOR FURTHER INFORMATION CONTACT: James P. Beiriger, MA–452.1, U.S. Department of Energy, Office of Procurement Operations, 1000 Independence Avenue SW., Washington, D.C. 20585, Telephone (202) 252–1024.

Issued in Washington, D.C. on April 19, 1985.

Ben Goldman,

Director, Contract Operations, Division "A", Office of Procurement Operations.

BILLING CODE 6450–01–M

Economic Regulatory Administration

[ERA Docket No. 81–32–NG]

Midwestern Gas Transmission Co.; Final Order Granting Amendments to Authorization To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Issuance of Opinion and Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice that on April 18, 1985, the ERA Administrator issued an opinion and order amending Midwestern Gas Transmission Company's (Midwestern) authorization to import natural gas from Canada for its northern marketing area. The order extends the term of Midwestern's import authorization through October 31, 1992, with an additional year to take quantities of gas paid for but not delivered during the term of the authorization. The order amends the maximum daily and annual volumes of gas that can be imported. The order also approves the amended pricing and take provisions Midwestern negotiated with its Canadian supplier, TransCanada PipeLines Limited.

The text of the opinion and order follows.

FOR FURTHER INFORMATION CONTACT:

Edward J. Peters, Jr. (Natural Gas Division, Office of Fuels Programs), Economic Regulatory Administration, Forrestal Building, Room GA–007, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252–8162.

Diane J. Stubbs (Office of General Counsel, Natural Gas and Mineral Leasing), U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252–6667.

Issued in Washington, D.C., on April 19, 1985.

James W. Workman,

Director, Office of Fuels Program, Economic Regulatory Administration.

In the matter of Midwestern Gas Transmission Company, ERA Docket No. 81–32–NG, Final Order Granting Amendments to Authorization to Import Natural Gas From Canada, DOE/ERA Opinion and Order No. *57A*.

April 18, 1985.

I. Background

On July 12, 1984, in DOE/ERA Opinion and Order No. 57 (Order No. 57), the Economic Regulatory Administration (ERA) conditionally extended the term of the Midwestern Gas Transmission Company's (Midwestern) existing authorization to import Canadian natural gas from TransCanada PipeLines Limited (TransCanada) subject to submission of an amendment by June 1, 1985, demonstrating that the import arrangement is competitive and not inconsistent with the public interest.[1]

In Order No. 57, the ERA amended Midwestern's existing import authorization to extend the term of the authorization to October 31, 1992, and allowed an additional year, until October 31, 1993, to import any quantities of gas paid for but not taken during the term. Order No. 57 also amended Midwestern's existing gas import volume authorization to permit Midwestern to import from Canada a maximum of 222,360 Mcf per day through October 31, 1990, a maximum of 148,518 Mcf per day for the contract year commencing November 1, 1990, and a maximum of 74,259 Mcf per day for the contract year commencing November 1, 1991, in accordance with the provisions of its contract No. 1, as amended.[2] The order established as maximum annual contract quantities 74,000 MMcf through October 31, 1990, 49,284 MMcf from November 1, 1990, through October 31, 1991, and 24,644 MMcf from November 1, 1991, through October 31, 1992.

The contract amendments authorized in Order No. 57 gave Midwestern the right, subject to certain notice provisions, to reduce the daily contract quantity by as much as 51,945 Mcf effective November 1, 1984, 50,590 Mcf effective November 1, 1985, and up to the outstanding contract quantity effective December 15, 1985. Further, the amendments allowed Midwestern to reduce its current obligation to purchase minimum volumes from a minimum annual quantity equal to 75 percent of the daily contract quantity to 50 percent of the annual contract quantity for each of the three consecutive contract years for the three contracts (Nos. 1, 2 and 3) ending October 31, 1985. Also, effective November 1, 1983, the payment obligation would be 50 percent of the minimum annual quantity at contract prices. Take-or-pay payments by Midwestern may be deferred for four years upon payment of interest on the amount due and Midwestern has make-up rights concerning the take-or-pay volumes of gas.

These amendments, preserved by the conditional order, contribute to greater flexibility in Midwestern's import arrangement. However, since negotiations on the import price and pricing provisions had not been completed, Order No. 57 was conditioned, at Midwestern's request, on Midwestern furnishing to the ERA by June 1, 1985, an acceptable demonstration that its import arrangement had been amended so as to be competitive and market-responsive within the meaning of the Department of energy's gas import policy guidelines.[3]

On January 25, 1985, Midwestern filed an application to remove the condition from Order No. 57 based upon the provisions of agreements executed on October 31, 1984 (the October agreement) and on November 16, 1984 (the November agreement) amending contract No. 1 with TransCanada. Midwestern stated that the October agreement mirrors the contract amendment submitted with its second amendment to its import applications filed on February 21, 1984, and incorporates into contract No. 1 all the provisions approved by the ERA in Order No. 57.

The November agreement became effective November 1, 1984, and supercedes those provisions in the October agreement pertaining to pricing and minimum takes which were operative only for the period between November 1, 1982, and October 31, 1984. In the November agreement Midwestern and TransCanada agreed to restructure their contract price as permitted by Canada's new export pricing policy. Midwestern now has a two-part demand-commodity pricing formula.

The monthly demand charge will be $15.20834 (U.S.) per Mcf of the daily contract quantity. This represents about $.50 (U.S.) of the price for each Mcf of purchased gas at 100 percent of daily contract quantity and about $.71 per Mcf at 70 percent of daily contract quantity. This demand charge will be adjusted on a monthly basis for contract years starting November 1, 1985, and thereafter, to reflect changes in allowable transportation costs of the gas to the Canadian border which comprise the demand charge.

The following table shows the commodity charge which varies seasonally based on load factor and differentiation between volumes of gas purchased for resale to ANR Pipeline Company (ANR), Midwestern's largest customer which has other sources of gas, and gas purchased to meet Midwestern's other requirements.

Daily takes as percent of daily contract quantity	Summer commodity charge (per MMBtu)	Winter commodity charge (per MMBtu)
For Gas Purchased for Resale to ANR Under Rate Schedule CD–2		
Up to 70 percent	$2.63	$2.63
70 to 80	2.80	3.34
80 to 100	2.80	4.25
For Gas Purchased for Other Requirements		
Up to 70 percent	$2.63	$2.63
70 to 100	2.80	3.34
Supplemental daily volumes		4.25

Combining the commodity charge of $2.63 with $.71 (the demand charge at 70 percent load factor) produces a 70 percent load factor price of $3.34 per Mcf for gas purchased after November 1, 1984, compared to $4.40 per Mcf prior to the November agreement. The new commodity charges are subject to adjustment to the extent that the contractually defined Alternate Fuels Price Index (based on gas and fuel oil

[1] *Midwestern Gas Transmission Company*, DOE/ERA Opinion and Order No. 57, issued July 12, 1984 (1 ERA ¶ 70.568).

[2] Contract No. 1 is Midwestern's underlying supply contract. Without extension, it will expire December 15, 1985. Midwestern also imports, under separate authorizations lesser volumes of gas from TransCanada under Contract Nos. 2, 3 and 4, which extend further in time and involve different terms. Contracts 1, 2 and 3 are affected by the instant application and contract amendments.

[3] 49 FR 6684, February 22, 1984.

prices in Midwestern's marketing area) varies by more than five percent from a base price for October 1984.

In addition to the change in the pricing provisions, Midwestern cites the following contract changes which help make the amended import arrangement more market-competitive and flexible:

1. Either party may require that the pricing and price adjustment provisions (except for certain components of the demand charge factor) for any contract year be determined by renegotiation or, failing agreement, by arbitration.

2. Commencing November 1, 1984, there are no take-and-pay or take-or-pay provisions.

3. Midwestern can apply over 50 percent of the annual contract quantity to make up presently accumulated take-or-pay obligations, and additionally is allowed a two-for-one makeup for takes in excess of 70 percent.

On February 26, 1985, the ERA issued a procedural order providing all parties the opportunity to comment and request additional procedures on all aspects of the amended import arrangement with respect to the competitiveness of the new pricing provisions and conformance with the other criteria in the Department of Energy's import policy guidelines.

II. Response to Procedural Order

One response was received. It was from Inter-City Gas Corporation (Inter-City). Inter-City stated that Midwestern's pricing amendments will be beneficial and effect a fairly substantial price reduction for gas supplies it purchases from Midwestern. Although Inter-City urged even more effective price competition between Canadian natural gas and the mix of fuels available in its market area, it concluded that the amended pricing provisions represent a positive step in the positive step in the right direction and bring Midwestern's price closer to those of alternative fuels in the area. Inter-City urged the ERA to approve Midwestern's application.

III. Decision

Midwestern's application to remove the condition from Order No. 57 has been evaluated to determine if the import arrangement as amended meets the public interest requirements of section 3 of the Natural Gas Act. Under section 3, an import is to be authorized unless there is a finding that it "will not be consistent with the public interest." [4] The Administrator is guided by the Department of Energy's stated policy relating to the regulation of natural gas imports.[5] The guidelines prescribed in the policy statement emphasize that the competitiveness of an import arrangement in the markets served is the primary consideration for meeting the public interest test.

The pricing provisions negotiated by Midwestern in its contracts with TransCanada substantially reduce the price of the imported gas and provide a mechanism for scheduled review and adjustment of the two-part, demand-commodity pricing structure. These conform to the intent of the competitiveness requirement of the guidelines. The renegotiated pricing provisions coupled with the amendments approved in Order No. 57 give Midwestern a competitive and market-responsive long-term import arrangement.

Furthermore, only one response to ERA's request for comments was filed. This was by Inter-City, a customer of Midwestern, who actively supports the amendment. The fact that no unfavorable comments were received from any party indicates that the parties are satisfied with the proposed extension of the amended import arrangement.

After taking into consideration all information in the record of this proceeding, it is concluded that the condition in Order No. 57 has been met—that Midwestern has demonstrated that its import arrangement, as now structured, is competitive and market-responsive and should continue so over the term. Therefore, granting the extension as amended is not inconsistent with the public interest.

Order

For the reason set forth above, pursuant to section 3 of the Natural Gas Act, it is ordered that:

A. The import authorization previously issued by the Federal Power Commission to Midwestern Gas Transmission Company (Midwestern) under consolidated Docket Nos. G–18313, G–18314, G–18315, and G–18316 on October 31, 1959 (22 FPC 775), is hereby amended to extend the authorization to October 31, 1992. Additional authority is granted, commencing on November 1, 1992, and ending on October 31, 1993, to import quantities of gas paid for but not taken during the term of this authorization.

B. The authorization issued to Midwestern under Docket No. G–18314, on August 10, 1965 (34 FPC 457), is hereby amended to permit Midwestern to import from Canada a maximum of 222,360 Mcf per day through October 31, 1990; a maximum of 148,518 Mcf per day for the contract year commencing November 1, 1990, and a maximum of 74,259 Mcf per day for the contract year commencing November 1, 1991, in accordance with the provisions of its contract No. 1, as amended. The maximum annual contract quantity shall be 74,000 MMcf through October 31, 1990, 49,284 MMcf from November 1, 1990, through October 31, 1991, and 24,644 MMcf from November 1, 1991, through October 31, 1992.

C. The orders referenced in ordering paragraphs A and B above are further amended to incorporate Midwestern's October 31, 1984, and November 16, 1984, agreements revising its gas purchase contract Nos. 1, 2, and 3 with TransCanada PipeLines Limited.

D. With respect to the natural gas authorized to be imported, Midwestern shall file with the ERA in the month following each calendar quarter, quarterly reports showing, by month, the quantities of gas imported and the average price paid per MMBtu for both the demand and commodity components.

Issued in Washington, D.C., April 18, 1985.

Rayburn Hanzlik,

Administrator, Economic Regulatory Administration.

BILLING CODE 6450–01–M

[Docket No. ERA–FC–85–005; OFP Case No. 61052–9267–21, 22, 23–22]

Cogeneration Technology and Development Co.; Acceptance of Petition for Exemption and Availability of Certification

AGENCY: Economic Regulatory Administration, Energy.

ACTION: Notice of Acceptance of Petition for Exemption and Availability of Certification by Cogeneration Technology and Development Company.

SUMMARY: On March 11, 1985, Cogeneration Technology and Development Company (CTDC), filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent exemption for a proposed electric powerplant to be located in Rifle (Garfield County), Colorado, from the prohibitions of Title II of the Powerplant

---

[4] 15 U.S.C. 717b.

[5] *See supra* note 3.

and Industrial Fuel Use of 1978 (42 U.S.C. 8301 *et seq.*) ("FUA" or "the Act"). Title II of FUA prohibits both the use of petroleum and natural gas as a primary energy source in any new powerplant and the construction of any such facility without the capability to use an alternate fuel as a primary energy source. Final rules setting forth criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA are found in 10 CFR Parts 500, 501, and 503. Final rules governing the exemption were revised on June 25, 1982 (47 FR 29209, July 6, 1982).

The proposed powerplant for which the petition was filed will be three natural-gas-fired combustion turbine generators, one condensing steam turbine-generator and a dual fuel engine, which together will produce 76 megawatts (76 MW) net of electricity. Using exhaust from the gas turbines, the waste heat boilers will generate both the high pressure steam for the condensing steam turbine and the hot water for the year-round heating of a greenhouse complex for the production of greenhouse crops. The greenhouse complex will be owned and operated by CTDC or leased to another entity. It will be on the same site as the powerplant. The electricity produced will be sold to the Public Service Company of Colorado.

The proposed facility is a qualifying cogeneration facility within the terms of section 210 of the Public Utility Regulatory Policies Act of 1978 ("PURPA"), 16 U.S.C. 824a–3 and is a "powerplant" within the terms of the regulations promulgated under the Powerplant and Industrial Fuel Use Act of 1978 (10 CFR 500.2). However, CTDC is petitioning for an exemption based on 10 CFR 503.32 "Lack of alternative fuel supply at a cost which does not substantially exceed the cost of using imported petroleum."

ERA has determined that the petition appears to include sufficient evidence to support an ERA determination on the exemption request and it is therefore accepted pursuant to 10 CFR 501.3. A review of the petition is provided in the **SUPPLEMENTARY INFORMATION** section below.

As provided for in sections 701 (c) and (d) of FUA and 10 CFR 501.31 and 501.33, interested persons are invited to submit written comments in regard to this petition and any interested person may submit a written request that ERA convene a public hearing.

The public file containing a copy of this Notice of Acceptance and Availability of Certification as well as other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E–190, Washington, D.C. 20585, from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays.

ERA will issue a final order granting or denying the petition for exemption from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless ERA extends such period. Notice of any such extension, together with a statement of reasons therefor, would be published in the **Federal Register.**

DATES: Written comments are due on or before June 10, 1985. A request for a public hearing must be made within this same 45-day period.

ADDRESSES: Fifteen copies of written comments or a request for a public hearing shall be submitted to: Case Control Unit, Office of Fuels Programs, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585. Docket No. ERA–FC–85–005 should be printed on the outside of the envelope and the document contained therein.

FOR FURTHER INFORMATION CONTACT:

George G. Blackmore, Office of Fuels Programs, Economic Regulatory Administration, Room GA–045, 1000 Independence Avenue, SW., Washington, D.C. 20585, Telephone (202)252–1251

Steven E. Ferguson, Office of the General Counsel, Department of Energy, Forrestal Building, Room 6A–113, 1000 Independence Avenue, SW., Washington, D.C. 20585, Telephone (202)252–6947.

SUPPLEMENTARY INFORMATION: Section 212(a)(1)(A)(ii) of the Act provides for a permanent exemption due to lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. To qualify the petitioner must certify that:

(1) A good faith effort has been made to obtain an adequate and reliable supply of an alternate fuel for use as a primary energy source of the quality and quantity necessary to conform with the design and operational requirements of the proposed unit;

(2) The cost of using such a supply would substantially exceed the cost of using imported petroleum as a primary energy source during the useful life of the proposed unit as defined in § 503.6 (cost calculation) of the regulations;

(3) No alternate power supply exists, as required under § 503.8 of the regulations;

(4) Use of mixtures is not feasible, as required under § 503.9 of the regulations; and

(5) Alternative sites are not available, as required under § 503.11 of the regulations.

In accordance with the evidentiary requirements of § 503.32(b) (and in addition to the certifications discussed above), CTDC has included as part of its petition:

1. Exhibits containing the basis for the certifications described above; and

2. An environmental impact analysis, as required under 10 CFR 503.13.

In processing this exemption request, ERA will comply with the requirements of the National Environmental Policy Act of 1969 (NEPA); the Council on Environmental Quality's implementing regulations, 40 CFR Part 1500 *et seq.*; and DOE's guidelines implementing those regulations, published at 45 FR 20694, March 28, 1980. NEPA compliance may involve the preparation of (1) an Environmental Impact Statement (EIS); (2) an Environmental Assessment; or (3) a memorandum to the file finding that the grant of the requested exemption would not be considered a major Federal action significantly affecting the quality of the environment. If an EIS is determined to be required, ERA will publish a Notice of Intent to prepare an EIS in the **Federal Register** as soon as practicable. No final action will be taken on the exemption petition until ERA's NEPA compliance has been completed.

The acceptance of the petition by ERA does not constitute a determination that CTDC is entitled to the exemption requested. That determination will be based on the entire record of this proceeding, including any comments received during the public comment period provided for in this notice.

Issued in Washington, D.C. on April 18, 1985.

Robert L. Davies,

Director, Coal and Electricity Division, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Energy Information Administration

Agency Forms Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, Energy.

ACTION: Notice of submission of request for clearance to the Office of Management and Budget.

SUMMARY: The Department of Energy (DOE) has submitted the following collections to the Office of Management and Budget (OMB) for approval under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The listing does not contain information collection requirements contained in regulations which are to be submitted under 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by DOE.

Each entry contains the following information and is listed by the DOE sponsoring office: (1) The form number; (2) Form title; (3) Type of request, e.g., new, revision, or extension; (4) Frequency of collection; (5) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefits; (6) Type of respondent; (7) An estimate of the number of respondents; (8) Annual respondent burden, i.e., an estimate of the total number of hours needed to fill out the forms; and (9) A brief abstract describing the proposed collection.

DATE: Last Notice published Friday, April 5, 1985 (50 FR 13649).

FOR FURTHER INFORMATION CONTACT:

John Gross, Director, Data Collection Servcies Division, (DCSD), Energy Information Administration, M.S. 1H-023, Forrestal Building, 1000 Independence Ave., SW, Washington, DC 20585, (202) 252-2308

Vartkes Broussalian, Deparment of Energy Desk Officer, Office of Management and Budget, 726 Jackson Place, NW, Washington, DC 20503, (202) 395-7313.

SUPPLEMENTARY INFORMATION: Copies of proposed collections and supporting documents may be obtained from Mr. Gross. Comments and questions about the items on this list should be directed to the OMB reviewer for the appropriate agency as shown above.

If you anticipate commenting on a form, but find that time to prepare these comments will prevent you from submitting comments promptly, you should advise the OMB reviewer of your intent as early as possible.

Issued in Washington, D.C. April 19, 1985.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. ER 85-341-000]

Vermont Yankee Nuclear Power Corp.; Filing

April 23, 1985

Take notice that on March 5, 1985, Vermont Yankee Nuclear Power Corporation (Vermont Yankee) tendered for filing, pursuant to the terms of a settlement approved by the Commission in Docket Nos. ER83-342-000 and ER83-343-000, a revised schedule for collections of charges relating to the decommissioning of the Vermont Yankee nuclear facility.

Vermont Yankee states that under the terms of the settlement it proposes to adjust its schedule of annual collections to accumulate a fund to cover the expenses of decommissioning the Vermont Yankee nuclear generating facility. Vermont Yankee states that the revised schedule is based upon differences in inflation and fund earnings from those projected at the time the level of annual collections was established. Vermont Yankee states that

under the revised schedule annual collections from its customers will be reduced by $185,000.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 1, 1985. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP-180674; FRL-2824-4]

Arkansas and Tennessee; Receipt of Applications for Specific Exemptions To Use Imazaquin To Control Sicklepod on Soybeans; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received specific exemption requests from the Arkansas State Plant Board and the Tennessee Department of Agriculture (hereafter referred to individually by state name or collectively as "Applicants") for use of the unregistered product Scepter to control sicklepod in soybeans. Scepter, manufactured by the American Cyanamid Company, contains the unregistered active ingredient imazaquin. EPA is soliciting comment before making the decision whether or not to grant these specific exemptions.

DATE: Comments must be received on or before April 29, 1985.

ADDRESS: Three copies of written comments, bearing the identifying notation "OPP-180674," should be submitted by mail to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information (CBI)." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for inspection in Rm. 236 at the address given above from 8 a.m. to 4 p.m., Monday through Friday excluding legal holidays.

FOR FURTHER INFORMATION:

By mail: Jack E. Housenger, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 716C, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-1192).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicants have requested the Administrator to issue specific exemptions to permit the use of unregistered herbicide, imazaquin, manufactured as Sceptor, to control sicklepod in soybeans. Information in accordance with 40 CFR Part 166 was submitted as part of these requests.

The Applicants have requested a maximum of two applications of Sceptor; one as a preplant incorporated or preemergence treatment and one as an early post-emergence over-the-top treatment. A maximum of 0.125 pound of active ingredient is proposed to be applied per acre per application. A 90-day pre-harvest interval is proposed and no treated plants or straw will be fed to livestock. Applications are proposed to commence immediately continue through July.

Arkansas has requested authorization to treat a maximum of 400,000 acres of soybeans with a maximum of 66,600 gallons of Sceptor. Tennessee expects that no more than 150,000 acres of soybeans will require treatment. Applications are proposed to be made using either air or ground equipment.

The Applicants anticipate yield losses averaging 20 to 30 percent due to sicklepod infestations. Losses as high as 50 percent were reported in some research trials. Both of the Applicants anticipate substantial yield losses resulting in significant economic losses without the proposed use of Scepter.

Arkansas and Tennessee claim that emergency conditions will exist due to the unavailability of a registered pesticide which will adequately control sicklepod in soybeans. Although a number of registered herbicides are currently available (including metribuzin, vernolate, alachlor, norflurazon, 2,4-DB and linuron) for this use, the Applicants claim that they are not effective on certain soil types, are dependent on adequate moisture for activation, or cannot be applied when no-till or conservation tillage is employed or when fields are solid-seeded. Toxaphene is effective for this use on these soil types and has been used in the past to control sicklepod under section 24(c) registrations. However, stocks of toxaphene are not adequate to deal with the situation this year. [The use of toxaphene on soybeans for sicklepod control was cancelled, however, an existing stock provision allows use to continue until December 31, 1986. However, stocks have already been depleted.] If there were adequate supplies of toxaphene, the use of Scepter would not be necessary.

This notice does not constitute a decision by EPA on the application itself. It is the Agency's policy to solicit public comment on applications involving unregistered active ingredients. Accordingly, interested persons may submit written views on this subject to the Program Management and Support Division at the address above. The comments must be received on or before April 29, 1985 and should bear the identifying notation "OPP-180674." All written comments filed pursuant to this will be available for public inspection in Rm. 236, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The comment period has been shortened in order to allow the Agency to make a decision regarding the applications prior to the time use of Scepter is needed to commence (May 1).

The Agency, accordingly, will review and consider all comments received during the comment period in determining whether to issue the emergency exemptions requested by the Arkansas State Plant Board and the Tennessee Department of Agriculture.

Dated: April 17, 1985.

Robert V. Brown,

Acting Director, Registration Division.

[FR Doc. 85-9995 Filed 4-24-85; 8:45 am]

BILLING CODE 6560-50-M

[OPTS-59187A; FRL-2824-2]

Certain Chemicals; Approval of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for a test marketing exemption (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA), TME-85-29. The test marketing conditions are described below.

EFFECTIVE DATE: April 17, 1985.

FOR FURTHER INFORMATION CONTACT: Eileen Gibson, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-613B, 401 M St., SW., Washington, DC. 20460, (202-382-2260).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import a new chemical substances for test purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substance for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury.

EPA hereby approves TME-85-29. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions (if any) specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME-85-29. A bill of lading accompanying each shipment must state that use of the substance is restricted to that approved in the TME. In addition, the Company shall maintain the following records until five years after the dates they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. The applicant must maintain records of the quantity of the TME substance produced and must make these records available to EPA upon request.

2. The applicant must maintain records of the dates of shipment to each customer and the quantities supplied in each shipment, and must make these records available to EPA upon request.

3. The applicant must maintain a copy of the bill of lading that accompanies each shipment of the TME substance.

T85-29

Date of Receipt: March 8, 1985.

Notice of Receipt: March 22, 1985 (50 FR 11559).

Applicant: Confidential.

Chemical: (G) Sodium salt of a lower alkynol sulfonic acid.

Use: (G) Metal finishing.

Production Volume: 1000 kg/yr.

Number of Customers: Confidential.

Worker Exposure: Confidential.

Test Marketing Period: One year.

Commencing on: April 17, 1985.

Risk Assessment: EPA identified no significant health or environmental concerns. Therefore, the test market substance will not present any unreasonable risk of injury to health or the environment.

Public Comments: None.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its findings that the marketing activities will not present any unreasonable risk of injury to health or the environment.

Dated: April 17, 1985.

Don R. Clay,

Director, Office of Toxic Substances.

[FR Doc. 85-9996 Filed 4-24-85; 8:45 am]

BILLING CODE 6560-50-M

[OPP-180675; FRL-2824-5]

South Dakota Department of Agriculture; Receipt of Application for Emergency Exemption To Use 2-Methoxy-N-(2-Oxo-1,3-Oxazolin-3-Yl)-Acet-2',6'-Xylidine; Solicitation of Public Comment

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: EPA has received a request for an emergency exemption from the South Dakota Department of Agriculture (hereafter referred to as the "Applicant") to use the active ingredient 2-methoxy-N-(2-oxo-1,3-oxazolin-3-yl)-acet-2',6'-xylidine, (Oxadixyl, ISO Approved; formulated by Gustafson Corp. as Anchor 25% Dust Fungicide) to control downy mildew on 140,000 acres of sunflowers in South Dakota. It is the Agency's poilicy to solicit public comment on applications involving active ingredients which have no registered end uses. Accordingly, EPA is soliciting comment before making the decision whether or not to grant the exemption.

DATE: Comments must be received on or before May 9, 1985.

ADDRESS: Three copies of written comments, bearing the identifying notation "OPP-180675," should be submitted by mail to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information (CBI)." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for inspection in Rm. 236 at the address given above from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail:

Libby Welch, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.
Office location and telephone number: Rm. 716A, Crystal Mall 2, 1921 Jefferson Davis Highway, Arlington, VA, (703–557–1192).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (17 U.S.C. 136p), the Administrator may, at his discretion, except a State agency from any provision of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption to permit the use of 2-methoxy-N-(2-oxo-1,3-oxazolin-3-yl)-acet-2', 6'-xylidine), available as Anchor 25% Dust Fungicide from Gustafson Corp., to control downy mildew caused by the *Plasmopara halstedii* on 140,000 acres of sunflowers grown in South Dakota. Information in accordance with 40 CFR Part 166 was submitted as part of this request.

The Applicant indicates that downy mildew is not adequately controlled by existing cultural methods or registered pesticides, and all commercial sunflower hybrids are susceptible to the new races of downy mildew.

The Applicant indicates that the only two fungicides which are curently registered for use on sunflowers, Maneb and Captan, are not effective as downy mildew control agents. The Applicant estimates the crop value of 140,000 acres of sunflowers to be $18,480,000. The Applicant states that yield reductions caused by downy mildew will reach 0.5%. Thus the economic benefit, based on information provided by the Applicant, from the use of Anchor would be a total of $924,000.

Anchor will be applied at a maximum rate of 1.0 ounce of active ingredient per hundred weight of seed. A maximum of one application will be made. A total of 96,250 pounds of active ingredient will be required to treat the seed necessary to plant 140,000 acres of sunflowers. Anchor will be applied primarily by individual growers at time of planting. Applications would be made from May 1 through July 1, 1985.

This notice does not constitute a decision by EPA on the application itself. Interested persons may submit written views on this subject to the Program Management and Support Division at the address above. The comments must be received on or before May 9, 1985 and should bear the identifying notation "OPP/80675." All written comments filed pursuant to this notice will be available for public inspection in Rm. 236, Crystal Mall No. 2 at the address given above, from 8 a.m. to 4 p.m., Monday through Firday, except legal holidays.

The Agency, accordingly, will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by South Dakota.

Dated: April 16, 1985.

Robert V. Brown,

Acting Director, Registration Division.

BILLING CODE 6560–50–M

FEDERAL MARITIME COMMISSION

[Docket No. 85–12]

Application of the Loyalty Contract Provisions of the Shipping Act of 1984 to a Proposed Tariff Rule on Refunds; Filing of Petition for Declaratory Order

Notice is given that a petition for declaratory order has been filed by the Trans-Pacific Freight Conference of Japan/Korea and Japan/Korea-Atlantic & Gulf Freight Conference, and their member lines, seeking that the Commission determine that a rule for tariff refunds as described in their petition, would not constitute a "loyalty contract" within the meaning of section 3(14) of the Shipping Act of 1984.

Interested persons may inspect and obtain a copy of the petition at the Washington Office of the Federal Maritime Commission, 1100 L Street, NW., Room 11101. Interested persons may submit replies to the Acting Secretary, Federal Maritime Commission, Washington, D.C. 20573 on or before May 24, 1985. An original and fifteen copies of such replies shall be submitted and a copy thereof served on the filing party, Charles F. Warren, Warren & Associates, P.C., Suite 525, 1100 Connecticut Avenue, NW., Washington, D.C. 20573. Replies shall contain the complete factual and legal presentation of the replying party as to the desired resolution of the petition.

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

April 19, 1985.

Background

Notice is hereby given of final approval of proposed information collection(s) by the Board of Governors of the Federal Reserve System (Board) under OMB delegated authority, as per 5 CFR 1320.9 (OMB Regulations on Controlling Paperwork Burdens on the Public).

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Cynthia Glassman—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202–452–3829)

OMB Desk Officer—Robert Neal—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503 (202–395–6880).

Proposal to approve under OMB delegated authority the extension with revision of the following reports:

1. Report title: Regulations K reporting requirements

Agency form number: FR K–1

OMB Docket number: 7100–0107

Frequency: On occasion

Reporters: Member banks, bank holding companies, Edge corporations

Small businesses are not affected.

General description of report:

This information collection is mandatory (12 U.S.C. 601–604(a); 611–631; 1843(c)(13); 1843(c)(14); and 1844(c)) and is given confidential treatment if the applying organization believes the information will qualify for a FOIA exemption.

The FR K–1 is a compilation of all the applications and prior notification requirements in Regulation K that pertain to the formation of Edge and Agreement Corporations and the international and foreign activities of U.S. banking organizations, including those of national banks, Agreement Corporations, Edge Corporations and bank holding companies.

Board of Governors of the Federal Reserve System, April 19, 1985.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

Bankers Trust New York Corp.; Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21.(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediately inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 16, 1985.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Bankers Trust New York Corporation*, New York, New York; to engage *de novo* through its subsidiary, BT USA, Inc., New York, New York, in making or acquiring, for its own account or for the account others, loans and other extensions of credit, secured and unsecured, to individuals and businesses including but not limited to consumer lending, residential and non-residential real estate lending and commercial lending; servicing loans and other extensions of credits; and the sale of credit-related life and accident and health insurance by licensed agents or brokers, as required, and the sale of mortgage life and mortgage disability insurance directly related to the extension of mortgage loans.

Board of Governors of the Federal Reserve System, April 19, 1985.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

Vernon Bank Corp., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 17, 1985.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Vernon Bank Corporation*, Vernon, New York; to become a bank holding company by acquiring 100 percent of the voting shares of The National Bank of Vernon, Vernon, New York. Comments on this application must be received not later than May 15, 1985.

B. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W. Atlanta, Georgia 30303:

1. *St. Martin Bancshares, Inc.*, St. Martinville, Louisiana; to become a bank holding company by acquiring 80 percent of the voting shares of St. Martin Bank and Trust Company, St. Martinville, Louisiana.

C. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *St. Charles Bancshares, Inc.*, St. Charles, Minnesota; to acquire 99.5 percent of the voting shares of First National Bank of Blooming Prairie, Blooming Prairie, Minnesota.

D. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President)

400 South Akard Street, Dallas, Texas 75222:

1. *Lee County Bancshares, Inc.*, Giddings, Texas; to become a bank holding company by acquiring 80 percent of the voting shares of Lee County National Bank, Giddings, Texas.

2. *The Plains Corporation*, Lubbock, Texas; to acquire 100 percent of the voting shares of Lockney Bancshares, Inc., Lockney, Texas, thereby indirectly acquiring First National Bank in Lockney, Lockney, Texas.

Board of Governors of the Federal Reserve System, April 19 1985.

William W. Wiles,

Secretary of the Board.

[FR Doc. 85-9940 Filed 4-24-85; 8:45 am]

BILLING CODE 6210-01-M

CBT Corp.; Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 17, 1985.

A. **Federal Reserve Bank of Boston** (Richard E. Randall, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *CBT Corporation*, Hartford, Connecticut; to engage *de novo* through its subsidiary, Constitution Capital Management Co., Hartford, Connecticut, in providing portfolio investment advice to others, furnishing general economic information and advice, general economic statistical forecasting services and industry studies and serving as investment advisor as defined in section 2(a)(20) of the Investment Company Act of 1940 to investment companies registered under the Act, but not as sponsor, organizer or manager of open-end investment companies.

Board of Governors of the Federal Reserve System, April 22, 1985.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 85-10068 Filed 4-24-85; 8:45 am]

BILLING CODE 6210-01-M

Elston Corp., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 20, 1985.

A. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Elston Corporation*, Crawfordsville, Indiana; to acquire 24.9 percent of the voting shares or assets of Lizton Financial Corporation, Lizton, Indiana, thereby indirectly acquiring State Bank of Lizton, Lizton, Indiana.

B. **Federal Reserve Bank of St. Louis** (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Salem Community Bancorp, Inc.*, Salem, Illinois; to become a bank holding company by acquiring 80 percent of the voting shares of Community State Bank, Salem, Illinois.

Board of Governors of the Federal Reserve System, April 22, 1985.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Information Collection Trade Practices; Advertising Automobiles

AGENCY: Federal Trade Commission.

ACTION: Application to OMB under the Paperwork Reduction Act, (44 U.S.C. 3501 *et seq.*) for review of a voluntary consumer survey.

SUMMARY: The FTC is requesting OMB review under 5 CFR 1320.14 of a questionnaire to be used to obtain information about consumers' interpretation of certan advertising and promotional materials. After preliminary screening, 600 consumers will be asked to review and respond to questions about a portfolio of six print ads.

DATES: Comments on this request for OMB review must be submitted on or before May 28, 1985.

ADDRESSES: Send comments to Mr. Don Arbuckle, Office of Information Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3228, Washington, D.C. Copies of the application may be obtained from: Public Reference Branch, Room 130, Federal Trade Commission, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: Thomas J. Maronick, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580 (202) 523-4810.

Dated: April 19, 1985.

John H. Carley,

General Counsel.

BILLING CODE 6750-21-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 85D-0108]

Draft Guideline for Submitting Supporting Documentation in Drug Applications for the Manufacture of Drug Substances

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft guideline for the submission of supporting documentation in drug applications for the manufacture of drug substances. FDA is making the draft guideline available for public comment to assist it in developing a final guideline. The draft guideline is intended to furnish pharmaceutical manufacturers with guidance in submitting to FDA adequate information on the production and control of new drug substances.

The guideline, when issued in final form, may be relied on by pharmaceutical manufacturers when submitting supporting documentation on the preparation of the new drug substance in investigational new drug applications (IND's), abbreviated new drug applications (ANDA's), and new drug applications (NDA's). The draft guideline was prepared by FDA's Center for Drugs and Biologics.

DATE: Comments by July 24, 1985.

ADDRESSES: Requests for a copy of the draft guideline and written comments regarding the draft guideline to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Buford L. Poet, Center for Drugs and Biologics (HFN-102), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4330.

SUPPLEMENTARY INFORMATION: In the final rule revising the procedures governing the review and approval of new drug and antibiotic marketing applications, published in the **Federal Register** of February 22, 1985 (50 FR 7452), and in the proposed revisions of the investigational new drug regulations, published in the **Federal Register** of June 9, 1983 (48 FR 26720), FDA stated that it intended to expand the use of guidelines to provide assistance in implementing those regulations.

In this notice, FDA is announcing the availability of the fifth of the new draft guidelines. The notice of availability for the first draft guideline, the submission of supporting documentation for packaging of human drugs and biologics, was published in the **Federal Register** of February 1, 1984 (49 FR 4040). The notices of availability of the second and third draft guidelines, the submission of supporting documentation for stability studies of human drugs and biologics and the submission of supportive analytical data for methods validation in new drug applications, were published in the **Federal Register** of May 7, 1984 (49 FR 19412, 19413). The notice of availability of the fourth draft guideline, the submission of supportive documentation for the manufacture of finished dosage forms is published elsewhere in this issue of the **Federal Register**.

This draft guideline is intended to provide pharmaceutical manufacturers with guidance in submitting supporting documentation in drug applications on the method of preparation of the drug substance and on the control testing used to monitor the drug substance's identity, strength, quality, and purity. A description of the methods of preparation and process controls is required to be included in IND's, ANDA's, and NDA's.

FDA is making this draft guideline available for public comment before making it the formal position of the agency. If, following the receipt of comments, the agency concludes that the draft guideline, as revised, reflects acceptable criteria for use in submitting supporting documentation in drug applications for the manufacture of drug substances, the guideline will be made final, and FDA will announce its availability under 21 CFR 10.90(b).

Section 10.90(b) provides for the use of guidelines to establish procedures of general applicability that are not legal requirements but are acceptable to the agency. A person who follows a guideline can be assured that his or her conduct will be acceptable to the agency. A person may also choose to use alternative procedures even though they are not provided for in the guideline. A person who chooses to do so may discuss the matter further with the agency to prevent an expenditure of money and effort for work that the agency may later determine to be unacceptable. Therefore, interested persons are encouraged to use this opportunity to submit comments on the draft guideline if they have suggestions for its revision.

The proposed investigational new drug regulations incorporated the policy objective of limiting FDA regulation of Phase 1 investigations primarily to safety concerns to ensure that research subjects are not exposed to unreasonable risk. In the proposal, the agency stated that it intended to limit the scope of chemistry-related submissions to that which is necessary to support the scope and duration of the proposed human testing. In keeping with these goals, FDA specifically solicits comments on the nature and extent of supportive documentation for the manufacture of drug substances needed to support Phase 1 investigations.

Interested persons may, on or before July 24, 1985, submit written comments on the draft guideline to the Dockets Management Branch (address above). These comments will be considered in determining whether amendments to, or revisions of, the draft guideline are warranted. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The draft guideline and received comments may be seen in the Dockets Management Branch Between 9 a.m. and 4 p.m., Monday through Friday. Requests for a single copy of the draft guideline should be sent to the Dockets Management Branch.

Dated: April 19, 1985.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs

[FR Doc. 85-9953 Filed 4-24-85; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 85D-0078]

Draft Guideline for Submitting Supporting Documentation for the Manufacture of Finished Dosage Forms

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft guideline for the submission of supporting documentation for the manufacture of finished dosage forms. FDA is making the draft guideline available for public comment to assist it in developing a final guideline. The guideline is intended to furnish pharmaceutical manufacturers with guidance in submitting to FDA

supporting documentation on the manufacturing and testing of finished dosage forms. The guideline, when issued in final form, may be relied on by manufacturers when submitting supporting documentation for the manufacture of finished dosage forms in investigational and new drug applications. The draft guideline was prepared by FDA's Center for Drugs and Biologics.

DATE: Comments by July 23, 1985.

ADDRESS: Requests for a copy of the draft guideline and written comments regarding the draft guideline to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Buford L. Poet, Center for Drugs and Biologics (HFN–102), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4330.

SUPPLEMENTARY INFORMATION: In the revisions of the new drug and antibiotic regulations, published in the **Federal Register** of February 22, 1985 (50 FR 7452), and in the proposed revisions of the investigational new drug regulations, published in the **Federal Register** of June 9, 1983 (48 FR 26720), FDA stated that it intended to expand the use of guidelines to provide assistance in implementing those regulations.

In this notice, FDA is announcing the availability of the fourth of the new draft guidelines. The notice of availability for the first draft guideline, the submission of supporting documentation for packaging of human drugs and biologics, was published in the **Federal Register** on February 1, 1984 (49 FR 4040). The notices of availability of the second and third draft guidelines, the submission of supporting documentation for stability studies of human drugs and biologics and the submission of supportive analytical data for methods validation in new drug application, were published in the **Federal Register** of May 7, 1984 (49 FR 19412, 19413). A notice of availability of a fifth draft guideline, submitting supporting documentation in drug application for the manufacture of drug substances, is published elsewhere in this issue of the **Federal Register**.

This draft guideline is intended to provide pharmaceutical manufacturers with guidance in submitting to FDA supporting documentation on the manufacturing process and the accompanying quality control system for raw materials, in-process materials, and the finished dosage form suitable for administration. The supporting documentation relates to the identity, strength, quality, and purity of the dosage form and the procedures for assuring that all batches manufactured conform to the appropriate specifications.

FDA is making the draft guideline available for public comment before making it the formal position of the agency. If, following the receipt of comments, the agency concludes that the draft guideline, as revised, reflects acceptable criteria for use in submitting supporting documentation for the manufacture of finished dosage forms, the guideline will be made final, and FDA will announce its availability under 21 CFR 10.90(b).

Section 10.90(b) provides for the use of guidelines to establish procedures of general applicability that are not legal requirements but are acceptable to the agency. A person who follows a guideline can be assured that his or her conduct will be acceptable to the agency. A person may also choose to use alternative procedures even though they are not provided for in the guideline. A person who chooses to do so may discuss the matter further with the agency to prevent expenditures of money and effort for work that the agency may later determine to be unacceptable.

The proposed investigational new drug regulations incorporated the policy objective of limiting FDA regulations of Phase 1 investigations primarily to safety concerns to ensure that research subjects are not exposed to unreasonable risk. In the proposal, the agency stated that it intended to limit the scope of chemistry related submissions to that which is necessary to support the scope and duration of the proposed human testing. In keeping with these goals, FDA specifically solicits comments on the nature and extent of supporting documentation for the manufacture of finished dosage forms needed to support Phase 1 investigations.

Interested persons may, on or before (July 23, 1985, submit written comments on the draft guidelines to the Dockets Management Branch (address above). These comments will be considered in determining whether amendments to, or revisions of, the draft guideline are warranted. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The draft guideline and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday. Requests for a single copy of the draft guideline should be sent to the Dockets Management Branch.

Dated: April 19, 1985.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160–01–M

[Docket No. 84N–0368]

Preservative-Free Morphine Preparation for Epidural Use for Treatment of Severe Chronic Pain; Invitation To Submit a New Drug Application

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has established the Office of Orphan Products Development to identify and facilitate the availability of products useful in treating or diagnosing uncommon diseases. This office promotes the availability of products for common diseases where commercial sponsorship of the products is either lacking or is not totally committed to obtaining marketing approval. By this notice, the Office of Orphan Products Development invites submission of a new drug application (NDA) for a preservative-free morphine preparation in a concentration of 50 milligrams per milliliter (mg/mL) for epidural use for treatment of severe chronic pain which responds inadequately to systemic analgesic therapy or when epidural administration is considered preferable to systemic administration.

FOR FURTHER INFORMATION CONTACT: Roger Gregorio, Office of Orphan Products Development (HF–35), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4903.

SUPPLEMENTARY INFORMATION:

Preservative-Free Morphine for Intraspinal Use

The doses of systemically administered analgesics required for amelioration of severe chronic pain frequently leave the patient somnolent and unable to interact with the environment; moreover, the development of tolerance may result in inadequate pain relief even with very high dose levels.

In the past decade the presence of spinal cord opiate receptors was demonstrated in animals, and microgram doses of intraspinally administered morphine were shown to

inhibit nociceptive neurons, increase the pain threshold, and produce spinal segmental analgesia. Clinical investigations have demonstrated that intraspinal (epidural or intrathecal) administration of morphine produces marked and long lasting relief in patients suffering from severe chronic pain, and at much smaller dosage than that required for systemic use. Additional advantages of the intraspinal route are lack of depression of cognitive, sensory, and motor functions, so that the patients were frequently able to live independently with minimal health care supervision and to participate in normal activities within the limits of their underlying disease. Pharmacokinetic studies and dose-response studies in normal subjects with experimental pain and in patients with acute and chronic pain have provided a scientific approach to individual dosing needs and to avoidance of adverse respiratory, cardiovascular, and neurological effects of morphine.

Several medication systems involving partially or completely implanted intraspinal catheters with or without attachment to reservoirs or microinfusion pumps have been developed to facilitate optimum intermittent or continuous intraspinal infusion of morphine. FDA believes that preservative-free high concentration morphine preparations suitable for long-term intraspinal infusion may be beneficial for certain patients with severe chronic pain. FDA has also been requested by clinical investigators and medical device manufacturers to facilitate the development and marketing of such morphine preparations.

The proposed morphine 50 mg/mL for epidural use in severe chronic pain is considered a product for treatment of an uncommon condition: There were 440,620 total deaths due to cancer in 1983 in the United States, of which 179,100 were due to types of cancer most commonly associated with pain below the diaphragm (cancer of digestive organs, peritoneum—112,910; cancer of reproductive organs—47,880; urinary tract cancers—18,310)—NCHS, Monthly Vital Statistics Report 32, September 21, 1984. Available published and unpublished data indicate that the target subpopulation of patients with chronic pain expected to benefit from epidural morphine is primarily patients with malignancies in these areas. Patients with chronic pain of nonmalignant origin would comprise only a small additional fraction of the target population. Of the approximately 200,000 patients with lower region chronic pain, only a fraction would be candidates for continuous administration of morphine by the intraspinal route.

FDA advises that if orphan drug designation for the specific indication described in this notice is requested by a sponsor and granted under section 526 of the Orphan Drug Act, the sponsor would be eligible for benefits under the Act. Interim guidelines concerning requesting orphan designation are available from Roger Gregorio at the Office of Orphan Products Development (address above).

Morphine for Intrathecal Administration

FDA's Anesthetic and Life Support Drugs Advisory Committee met on April 10, 1985, to consider use of intrathecal administration of morphine in concentrations greater than the currently marketed 1 mg/mL preservative-free morphine. Based upon the results of clinical experience presented by several experts in the field, the Committee recommended that an NDA be considered for a 25 mg/mL concentration for intrathecal use in patients with refractory pain due to malignancy. FDA will entertain submission of such an NDA but it has not itself had an opportunity to review the data supporting the aforementioned concentration and use.

Morphine for Epidural Administration

FDA finds that there are sufficient data available in the published literature to invite submission of an NDA for preservative-free morphine in a concentration of 50 mg/mL (2 mL/ampule and 10 mL/ampule) for epidural use for treatment of severe chronic pain. It should be noted that the proposed 50 mg/mL morphine preparation should not be injected directly into the epidural space. The preparation is intended for dilution prior to administration, in accord with the patient's dosage requirement and the nature of the delivery system to be used. Direct clinical administration of a 50 mg/mL concentration in the epidural space would be considered investigational, and would require submission of an investigational exemption to assess its safety, including the reliability and chemical compatibility of any delivery system that might be designed for use with this high concentration of morphine.

The effectiveness of morphine for relief of pain is well known. The purpose of the requested NDA submission is to provide (1) data on appropriate dosage for safe and effective use by the epidural route in treatment of chronic pain and (2) manufacturing information on the dosage form intended for marketing.

Examples of published preclinical data that would support approval of an NDA for preservative-free morphine for epidural administration in treatment of chronic pain are as follows:

Yaksh (Ref. 1) published a comprehensive review of the principles of drug action involved in spinal opiate analgesia. In addition to reports of basic research in opiate receptors, the 230 published references listed in this paper include extensive data on pharmacology and toxicology of intraspinal morphine as well as interaction with opiate antagonists in several species including primates. Review and analysis of pertinent individual reports of such data would help support an NDA for use of epidural morphine in chronic pain.

Examples of published clinical data that would help support approval of an NDA for preservative-free morphine for epidural administration in treatment of severe chronic pain are as follows:

Effective Dosage

Behar et al. (Ref. 2) treated 10 patients (6 chronic, 4 acute pain) with epidural morphine 2 mg given one to three times daily for 2 to 3 days, interspersed with injections of bupivacaine or saline placebo. All patients experienced decreased pain within 2 to 3 minutes, maximum relief in 1 to 15 minutes, and duration of relief of 6 to 24 hours following morphine injection. Of the six patients with chronic pain, three reported 100 percent pain relief and three 50 percent relief. Two of three patients had slight pain relief, only at rest, after saline injection. Magora et al. (Ref. 3) treated 98 patients with severe pain (medical, surgical, obstetrical), including 16 cancer patients, with morphine 2 mg by repeat epidural injection (30 patients) and by indwelling epidural catheter (68 patients) for periods up to 8 days. Onset of effect occurred in 8 to 10 minutes, became maximal in 15 to 20 minutes and persisted 4 to 36 (average 8) hours. Overall effect was good in 56 percent (complete pain relief); fair in 23.5 percent (partial relief); poor in 20 percent (little or no relief). Twelve good and 4 fair results occurred in the 16 cancer patients. Effects were similar in patients with similar pain disorders, but differed widely between groups with different disorders. Coombs et al. (Ref. 4) treated seven cancer patients with refractory pain with morphine via implanted epidural catheter and microinfusion pump. Results included a trend toward increasing doses for adequate pain relief, e.g., mean 4 ±4.3

mg/day at 6 weeks increased to 8.9 ±10.8 mg/day at 12 weeks, with two of seven patients requiring 30 mg/day. There were no adverse effects reported. The patients characteristically slept and ate better. Crawford et al. (Ref. 5) reported the results of a retrospective survey of 105 patients with chronic pain in 8 major anesthesia departments in Denmark. The patients were treated with extradural opiates (morphine in 90; buprenorphine in 12; both drugs in 3) for 7 to 283 (mean 65) days, primarily as outpatients. Morphine 4 to 30 mg (mean 12.6 ±4.8 mg) per day, usually in 3 divided doses, was administered via implanted epidural catheter to 90 patients. Satisfactory pain relief with epidural opiates alone was reported by 70 patients; and an additional 21 patients required supplementary analgesics. Transient side effects in 62 patients receiving only epidural morphine included: Urinary retention in 3, nausea and vomiting in 6, dizziness in 2, constipation in 2, tolerance in 11. Postmortem histopathology of the dura mater in 10 patients treated for 14 to 182 days showed no treatment-related abnormalities.

Examples of studies providing supportive evidence of appropriate dosage include: Howard et al. (Ref. 6), Findler et al. (Ref. 7), Poletti et al. (Ref. 8), Zenz et al. (Ref. 9), Chrubasik (Ref 10), and Delhaas (Ref. 11).

Adverse Effects

The papers listed under *Effective Dosage* (above) and *Pharmacokinetics* (below) contain information about side effects experienced by some patients. The following papers primarily involve reports of severe adverse reactions that emphasize the need for careful dosage adjustment and prolonged monitoring; in addition, they describe treatment of these reactions. The most serious side effects have included respiratory depression (Christensen (Ref. 12)) and urinary retention (Peterson (Ref. 13)). The incidence of these and other adverse effects has been described in Reiz et al. (Ref. 14) and Gustafson et al. (Ref. 15). In addition, Reiz et al. compared the incidence of adverse effects following epidural and intravenous morphine.

Pharmacokinetics/Clinical Pharmacology

Bromage et al. (Ref. 16) compared effects of morphine, 10 mg I.V. and epidurally, in six male volunteers. Nordberg et al. (Ref. 17) compared dose-response effects and plasma and CSF pharmacokinetics of epidural morphine, 2, 4, and 6 mg in 20 postoperative patients. Jorgensen et al. (Ref. 18) compared cerebrospinal fluid and plasma levels of epidural and intrathecal morphine in six surgical patients. Useful supportive information may be found in Chauvin et al. (Ref. 19), Thompson et al. (Ref. 20), and Torda et al. (Ref. 21).

The following information should be submitted in an NDA:

1. Manufacturing controls information.

2. Pertinent published or unpublished reports of the effects of epidural morphine in animals.

3. Pertinent published and unpublished reports, with appropriate summary and analysis, of the effects of epidural morphine in patients with severe chronic pain. Published and unpublished reports concerning pharmacokinetic studies and dose-response effects should be included.

4. Draft labeling to include appropriate warning information, methods of treatment of adverse effects, detailed information on the technique of epidural administration, and appropriate dilution methods.

5. For purposes of providing adequate labeling, information on the chemical and functional compatibility and appropriateness of the NDA sponsor's morphine preparation with various solutions used for dilution and with several pumps and catheters available for epidural administration.

Pharmacokinetic studies of the applicant's drug are not required if the drug is labeled with instructions for appropriate dilution for bolus use and use by continuous epidural infusion when such instructions are based upon published and unpublished data supporting safe and effective use at the recommended concentrations. Use of the product at higher concentrations for treatment of chronic pain would be considered investigational and may require appropriate studies to establish both plasma and CSF profiles of morphine in conjunction with the specific delivery system to be used.

Bioavailability studies of the applicant's drug are not required for the following reasons:

Dosage titration is used in each patient to obtain optimum analgesia.

Under 21 CFR 320.22(e) FDA may waive a requirement for submission of in vivo bioavailability data when such action is compatible with the public health. The product to be marketed must meet existing manufacturing standards, and products of this nature have been tested in patients with severe chronic pain and found to be sufficiently bioavailable to provide effective pain relief. This relief occurs with doses that are lower when given epidurally than when given parenterally.

Special Packaging Requirement

Because of the potential dangers of administration of the 50 mg/mL product undiluted, FDA will require that the product be packaged in such a way as to emphasize the need for dilution.

FDA will be pleased to meet with potential sponsors to discuss the data and requirements. Manufacturers interested in submitting an NDA should contact Roger Gregorio (address above).

Colorado; Craig District Grazing Advisory Board Meeting

Notice is hereby given in accordance with Pub. L. 92-463, that a meeting of the Craig District Grazing Advisory Board will be held June 13 and 14, 1985 at the White River Resource Area office of the Bureau of Land Management, P.O. Box 928, Highway 64, Meeker, Colorado. The meeting will convene at 10:00 a.m.

The meeting will consist of a short discussion of old business and any other concerns brought forth by the public, followed by a tour of range improvement work in the White River Resource Area.

The meeting is open to the public. Interested persons may make oral statements to the board between 10:00 a.m. and 11:00 a.m., June 13, 1985, or file written statements for the board's consideration. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Dated: April 16, 1985.

BILLING CODE 4310-30-M

Montana; Proposed Reinstatement of Terminated Oil and Gas Lease

Under the provisions of Pub.L. 97–451, a petition for reinstatement of oil and gas lease M 44406, Lewis & Clark County, Montana was timely filed and accompanied by the required rental accruing from the date of termination.

No valid lease has been issued affecting the lands. The lessee has agreed to new lease terms for rentals and royalties at rates of $5 per acre and 16⅔% respectively. Payment of a $500 administration fee has been made.

Having met all the requirements for reinstatement of the lease as set out in Sec. 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease, effective as of the date of termination, subject to the original terms and conditions of the lease, the increased rental and royalty rates cited above, and reimbursement for cost of publication of this Notice.

Dated: April 12, 1985.

Judith I. Reed,

Acting Chief, Fluids Adjudication Section.

BILLING CODE 4310-22-M

Planning Activity; Amendment to Great Falls Resource Area

AGENCY: Lewistown District Office, Great Falls Resource Area Office.

ACTION: Notice of Planning Activity—Amendment to Great Falls Resource Area Portion of the Headwaters Resource Area Resource Management Plan.

SUMMARY: 1. The proposed planning action will pursue a category 1 planning amendment to the Great Falls Resource Area portion of the Headwaters Resource Management Plan (RMP). This amendment is for the purpose of considering a special designation for an area of critical environmental concern (ACEC) for approximately 1,000 acres of public land obtained through a land exchange (Realty Action M–59763) which was consummated after completion of the final Headwaters RMP (October, 1983) and subsequent Record of Decision (July, 1984). This amendment is modest in nature as it will involve only one issue and will address only a portion of the resource area.

The acreage acquired through this land exchange contains significant scenic, recreational, and wildlife resources that are of special worth and involve more than local significance. The criteria for an ACEC designation specifies (1) *relevance* and (2) *importance* as found in 43 CFR 1610.7–2 appears to be met.

2. The geographic area to be planned is located on the Rocky Mountain Front, Teton County, Montana. Specifically, the land under consideration is located in PMM T. 24 N., R. 8 W., Section 5, 6, 7, and 8 in management unit 01 of the existing resource management plan.

3. The main issue involved in this amendment is related to special designations and how the land should be managed with regard to a special designation. Principal considerations include the effects that a special designation would have in providing additional management emphasis for the protection of important surface resources (principally wildlife and recreation) and resource development opportunities. The decisions needed include:

a. Should all, portions, or none of the acquired acreage receive special designation?

b. How should the area be managed once given special designation of if given special designation?

c. Given the special designations available to the BLM, which type of special designation would be most appropriate under the ACEC concept?

4. The disciplines to be represented on the interdisciplinary team for the environmental analysis are:

a. Wildlife Biologist
b. Range Conservationist
c. Recreation/Cultural Specialists
d. Geologist

5. The public will be invited to participate in selection of planning criteria, scoping, defining alternatives, and reviewing the environmental assessment.

6. No meetings are scheduled at this time, as meetings are set, they will be announced in the local media.

7. For further information on this planning action contact: Nancy Cotner, Area Manager, USDI Bureau of Land Management, Great Falls Resource Area, P.O. Box 2865, Great Falls, MT 59403.

8. All relevant planning documents are located at the above address and are available for public inspection and information at the same address during normal working hours (7:45 a.m.–4:30 p.m.).

Dated: April 18, 1985.

Glenn W. Freeman,

District Manager.

The lands described above comprise 58,680.27 acres, more or less, in Cochise County

The above described lands will be segregated from entry under the mining laws, except the mineral leasing laws, effective upon publication of this notice in the **Federal Register.** The segregative effect will terminate upon issuance of patent to the State of Arizona or upon expiration of two years from the effective date, or by publiction of a Notice of Termination by the Authorized Officer, whichever comes first.

Final determination on disposal will await completion of an environmental analysis.

DATE: For a period of 45 days from date of publiction in the **Federal Register** interested parties may submit comments to the Safford District Manager, 425 E. 4th Street, Safford, Arizona 85546.

SUPPLEMENTARY INFORMATION: Detailed informtion concerning the exchange is available at the Safford District Office.

Dated: April 16, 1985.

Lester K. Rosenkrance,

Distict Manager;

[A-9272]

Realty Action, Public Land Sale; Coconino County, AZ

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Realty Action—Sale, Public Lands in Coconino County, Arizona.

SUMMARY: The following described public land has been identified as suitable for disposal under sections 203(a) and 209(a) of the Federal Land Policy and Management Act of October 21, 1976 (90 Stat. 2750, 43 U.S.C. 1713 and 90 Stat. 2757, 43 U.S.C. 1719). The land will be offered for sale at not less than the appraised fair market value indicated below.

Gila and Salt River Meridian, Coconino County, Arizona

T. 27 N., R. 9 E.,
Sec. 6, lots 3 thru 10, inclusive, SE¼NW¼, E½SW¼, N½SE¼, and SE¼SE¼.

Containing 463.46 acres, more or less, at a Fair Market Value of $93,000.00.

A mineral report has indicated that the federal minerals, with the exception of oil and gas, have no known mineral value. The declared high bidder will therefore be required to submit a $50.00 non-returnable filing fee for the acquisition of the mineral estate. Oil and gas will be reserved to the United States.

The method of sale will be by sealed bid. Sealed bids must be received in the BLM Kingman Resource Area Office, 2475 Beverly Avenue, Kingman, Arizona 86401, not later than 4:30 p.m. on Monday, June 24, 1985. Bids must be accompanied by not less than ten percent (10%) of the bid price. Should the land not be sold by close of business June 24, 1985, it will be available for purchase over-the-counter at the above location and at the BLM Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

The land will be patented subject to the following terms and conditions:

1. Reserving to the United States a right-of-way thereon for ditches and canals constructed by the authority of the United States, pursuant to the Act of August 30, 1890 (26 Stat. 391; U.S.C. 945).

2. Reserving to the United States all the oil and gas in the land, and to it or persons authorized by it, the right to prospect for, mine, and remove the same.

3. Reserving to the United States a right-of-way for highway purposes as provided under the authority of the Act of November 9, 1921 (PHX-086841).

4. Reserving to the United States a right-of-way for electric transmission line purposes as provided under the authority of the Act of October 21, 1976 (AR-012874).

5. Subject to such rights for road right-of-way purposes as provided under the authority of the Act of October 21, 1976 (A-17505).

6. Subject to such rights for electric line right-of-way purposes as provided under the authority of the Act of October 21, 1976 (AR-032475).

7. Subject to such rights for telephone line right-of-way purposes as provided under the authority of the Act of October 21, 1976 (AR-034623).

8. Subject to such rights for pipeline and oxidation pond right-of-ways as provided under the authority of the Act of October 21, 1976 (A-10861).

As provided in 43 CFR 2711.1-2(d), the public lands described herein shall be segregated to the extent that they will not be subject to appropriation under the public land laws, including the mining laws, but not the mineral leasing laws. Any subsequent application shall not be accepted, shall not be considered as filed and shall be returned to the applicant. This segregative effect shall terminate upon issuance of patent or other document of conveyance to such lands, upon publication in the **Federal Register** of a termination of the segregation or 270 days from the date of this publication, whichever occurs first.

Additional information concerning these parcels, terms and conditions of the sale, and bidding instructions may be obtained by calling the Kingman Resource Area Manager at (602) 757-3161, or by writing the BLM Kingman Resource Area Office, 2475 Beverly Avenue, Kingman, Arizona 86401.

For a period of forty-five (45) days from the date of this Notice, interested parties may submit comments regarding the proposed action to the Phoenix District Manager, 2015 West Deer Valley Road, Phoenix, Arizona 85027. Objections will be reviewed by the District Manager who may sustain, vacate, or modify this Realty Action. In the absence of any objections, this Realty Action will become the final determination of the Department of Interior.

Dated: April 19, 1985.

Marlyn V. Jones,

District Manager.

BILLING CODE 4310-HC-M

Realty Action; Recreation and Public Purpose Sale; Public Land In Gulf County, FL

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action—R & PP Sale; Public Lands Gulf County, Florida.

SUMMARY: The following described lands have been examined and are classified as suitable for sale under the Recreation and Public Purpose Act of 1926 (44 Stat. 741), as amended.

Tallahassee Meridian, Florida

T. 6 S., R. 11 W.,
Sec. 31: Lot 10 (40.00).

The Gulf County, Board of County Commissioners proposes to use this 40-acre tract for a recreational park and historic memorial. They will construct a fishing pier, parking lot, restrooms, picnic pavillion, hiking trail and a memorial to Le Moyn de Chateauque and Fort Creve Coeur, the southernmost outpost of New France.

It has been determined that the proposed use is in the public's best interest, and is consistent with the policy of the Bureau of Land Management.

The patent will be subject to all valid existing rights and reservation of record.

Publication of this Notice will segregate the subject land from all appropriation under the public land laws; but not the mineral leasing laws. This segregation will terminate upon

issuance of patent, or 270 days from the date of this Notice or upon publication of a Notice of Termination. Detailed information concerning the sale including the environmental assessment and land report, is available for review at the BLM office listed below.

For a period of 45 days after the date of issuance of this notice, the public and interested parties may submit comments to the District Manager, Jackson District Office, P.O. Box 1148, Jackson, Mississippi 39213. Comments will be evaluated by the District Manager, who may vacate or modify this Realty Action. In the absence of any action by the District Manager, this Realty Action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Douglas Jones (601) 960–4405.

Donald L. Libbey,

District Manager

BILLING CODE 4310–GJ–M

[W–8465]

Wyoming; Proposed Reinstatement of Terminated Oil and Gas Lease

Pursuant to the provisions of Pub. L. 97–451, 96 Stat. 2462–2466, and Regulation 43 CFR 3108.2–3(a)(b)(1), a petition for reinstatement of oil and gas lease W–48465 for lands in Sweetwater County, Wyoming was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $5.00 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500.00 administrative fee and $106.25 to reimburse the Department for the cost of this **Federal Register** notice. The lessee has met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease W–48465 effective January 1, 1985, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Andrew L. Tarshis,

Chief, Leasing Section.

Containing 48,459.51 acres, more or less.

Final determination on disposal will await completion of an environmental analysis.

In exchange for these lands the United States will acquire presently undescribed lands throughout the State.

In accordance with the regulations of 43 CFR 2201.1(b) publication of this Notice will segregate the public lands, as described in this Notice, from appropriation under the public land laws, including the mining laws, but not the mineral leasing laws or Geothermal Steam Act.

The segregation of the above-described lands shall terminate upon issuance of a document conveying such lands or upon publication in the **Federal Register** of a notice of termination of the segregation; or the expiration of two years from the date of publication, whichever occurs first.

For a period of forty-five (45) days from the date shown below interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Dated: April 19, 1985.

Marlyn V. Jones,

District Manager.

BILLING CODE 4310-32-M

Bureau of Reclamation

Quarterly Status Tabulation of Water Service and Repayment Contract Negotiations; Proposed Contractual Actions Pending Through June 1985

Pursuant to section 226 of the Reclamation Reform Act of 1982 (96 Stat. 1273), and to § 426.20 of the rules and regulations published in the **Federal Register** December 6, 1983, Vol. 48, page 54785, the Bureau of Reclamation will publish notice of proposed or amendatory repayment contract actions or any contract for the delivery of irrigation water in newspapers of general circulation in the affected area at least 60 days prior to contract execution. The Bureau of Reclamation announcements of irrigation contract actions will be published in newspapers of general circulation in the areas determined by the Bureau of Reclamation to be affected by the proposed action. Announcements may be in the form of news releases, legal notices, official letters, memorandums, or other forms of written material. Meetings, workshops, and/or hearings may also be used, as appropriate, to provide local publicity. The public participation requirements do not apply to proposed contracts for the sale of surplus or interim irrigation water for a term of 1 year or less. The Secretary or the district may invite the public to observe any contract proceedings. All public participation procedures will be coordinated with those involved in complying with the National Environmental Policy Act if the Bureau determines that the contract action may or will have "significant" environmental effects.

Pursuant to the "Final Revised Public Participation Procedures" for water service and repayment contract negotiations, published in the **Federal Register** February 22, 1982, Vol. 47, page 7763, a tabulation is provided below of all proposed contractual actions in each of the seven Reclamation regions. Each proposed action listed is, or is expected to be, in some stage of the contract negotiation process during April, May, or June of 1985. When contract negotiations are completed, and prior to execution, each proposed contract form must be approved by the Secretary, or pursuant to delegated or redelegated

authority, the Commissioner of Reclamation or one of the Regional Directors. In some instances, congressional review and approval of a report, water rate, or other terms and conditions of the contract may be involved. The identity of the approving officer and other information pertaining to a specified contract proposed may be obtained by calling or writing the appropriate regional office at the addresses and telephone numbers given for each region.

This notice is one of a variety of means being used to inform the public about proposed contractual actions. Individual notice of intent to negotiate, and other appropriate announcements, are made in the **Federal Register** for those actions found to have widespread public interest. When this is the case, the date of publication is given.

Acronym Definitions Used Herein

(FR) **Federal Register**
(ID) Irrigation District
(IDD) Irrigation and Drainage District
(M&I) Municipal and Industrial
(D&MC) Drainage and Minor Construction
(R&B) Rehabilitation and Betterment
(O&M) Operation and Maintenance

(CVP) Central Valley Project
(P–SMBP) Pick-Sloan Missouri Basin Program
(CRSP) Colorado River Storage Project
(SRPA) Small Reclamation Projects Act

PACIFIC NORTHWEST REGION: Bureau of Reclamation, 550 West Fort Street, Box 043, Boise, ID 83724, telephone (208) 334–9011.

1. Boise Cascade Corporation, Columbia Basin Project, Washington; Industrial water service contract; 250 acre-feet; FR notice published April 7, 1980, Vol. 45, page 23531.

2. Boise Project Board of Control, Boise Project, Idaho-Oregon; Irrigation repayment contract; 22,800 acre-feet of stored water in Arrowrock Reservoir.

3. Brewster Flat ID, Chief Joseph Dam Project, Washington; Amendatory repayment contract; Land reclassification of approximately 360 acres to irrigable; Repayment obligation to increase by $189,000.

4. Individual irrigators, M&I, and miscellaneous water users, Pacific Northwest Region, Idaho, Oregon and Washington; Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5 years; Long-term contracts for similar service for up to 1,000 acre-feet of water annually.

5. Rogue River Basin water users, Rogue River Basin Project, Oregon; Water service contracts; $5 per acre-foot or $20 minimum per annum, not to exceed 320 acres or 1,000 acre-feet of water per contractor for terms up to 40 years.

6. Willamette Basin water users, Willamette Basin Project, Oregon; Water service contracts; $1.25 per acre-foot or $20 minimum per annum, not to exceed 320 acres or 1,000 acre-feet of water annually per contractor for terms up to 40 years.

7. Washington Water Power Company, Inc., Columbia Basin Project, Washington; Industrial water service contract; 32,000 acre-feet of water per year from Franklin D. Roosevelt Lake for the proposed Creston Powerplant; FR notice published December 11, 1982, Vol. 46, page 60658.

8. Cascade Reservoir water users, Boise Project, Idaho; Irrigation repayment contracts; 57,251 acre-feet of stored water in Cascade Reservoir.

9. Boise Water Corporation, Boise Project, Idaho; Short-term (2 years) M&I water service contract; up to 5,000 acre-feet annually from stored water in Lucky Peak Reservoir.

10. Thirty-one Jackson Lake Dam Spaceholders, Minidoka Project, Idaho-Wyoming; Repayment of costs associated with Safety-of-Dams modifications to Jackson Lake Dam.

11. ID's and similar water user entities; Amendatory repayment and water service contracts; Purpose is to conform to the Reclamation Reform Act of 1982 (Pub. L. 97–293).

12. Greater Wenatchee ID, Chief Joseph Dam Project Washington; SRPA loan repayment contract; $6,669,000 proposed obligation.

MID-PACIFIC REGION: Bureau of Reclamation, (Federal Office Building) 2800 Cottage Way, Sacramento, CA 95825, telephone (916) 484–4680.

1. 2047 Drain Water Users Association, CVP, California; Water right settlement contract.

2. Tuolumne Regional Water District, CVP, California; Water service contract; 3,200 acre-feet from New Melones Reservoir.

3. Calaveras County Water District, CVP, California; Water service contract; 500 acre-feet from New Melones Reservoir; FR notice published February 5, 1982, Vol. 47, page 5473.

4. Individual irrigators, M&I, and miscellaneous water users, Mid-Pacific Region, California, Oregon, and Nevada; Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5 years; Long-term contracts for similar service for up to 1,000 acre-feet of water annually.

5. Mountain Gate Community Services District, CVP, California; Amendatory water service contract providing for increased M&I use to the community of Mountain Gate.

6. Pacheco Water District, CVP, California; Amendatory water service contract providing for a change in point of delivery from Delta-Mendota Canal to the San Luis Canal.

7. El Dorado ID, Sly Park Unit, CVP, California; D&MC contract to allow the District to accomplish the construction work with the remaining funds from the distribution system contract.

8. South San Joaquin ID and Oakdale ID, CVP, California; Operating agreement for conjunctive operation of New Melones Dam and Reservoir on the Stanislaus River; FR notice published June 6, 1979, Vol. 44 page 32483.

9. San Luis Water District, CVP, California; Amendatory water service contract providing for a change in point of delivery from Delta-Mendota Canal to the San Luis Canal.

10. Mid-Valley Water Authority, CVP, California; Temporary water supplies up to 100,000 acre-feet.

11. Solano ID, Solano Project, California; Amendatory loan repayment contract providing for reconveyance and M&I water supply delivery.

12. City of Avenal, CVP, California; Amendment of existing water service contract to provide for furnishing project power to city canalside relift facilities and change the point of diversion.

13. Yuba County Water Agency, South County Irrigation Project, SRPA, California; Loan repayment contract, $18,500,000 proposed obligation.

14. ID's and similar water user entities; Amendatory repayment and water service contracts, including the amending of approximately ten SRPA contracts; Purpose is to conform to the Reclamation Reform Act of 1982 (Pub. L. 97–293).

15. United Water Conservation District, SRPA, California; Loan repayment contract, $18,730,000 proposed obligation.

16. State of Hawaii, Molokai Project, SRPA; Contract amendment to provide for use of facilities for M&I purposes.

17. Shasta Dam Area Public Utility District, CVP, California; Amendatory water service contract providing for increased M&I use to the district.

18. State of California, CVP, California, contract(s) for, (1) sale of interim water to the Department of Water Resources for use by the State Water Project Contractors, and (2) acquisition of conveyance capacity in the California Aqueduct for use by the CVP, as comtemplated in the current

draft of the Coordinated Operations Agreement.

19. City of Lindsay, Friant Division, CVP, California; M&I water service contract for 2,500 acre-feet of class 1 water.

20. Pixley ID, SRPA, California; Loan repayment contract, $12,300,000 proposed obligation.

21. Century Ranch Water Company, Inc., CVP, California; Orland exchange, M&I, and water right settlement contract.

22. Kaiser Development Company, CVP, California; Sacramento River water right contract; Suspension of agricultural contract and execution of M&I contract.

23. El Dorado ID, Sly Park Unit, CVP, California; Amend the Unit 4 portion of its existing repayment contract to pay interest on actual M&I use.

UPPER COLORADO REGION: Bureau of Reclamation, P.O. Box 11568 (125 South State Street), Salt Lake City, UT 84147, telephone (801) 524–5435.

1. Individual irrigators, M&I, and miscellaneous water users, Upper Colorado Region, Utah, Wyoming, Colorado, and New Mexico; Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5 years; Long-term contracts for similar service for up to 1,000 acre-feet of water annually.

2. Fontenelle Dam (Chevron) State of Wyoming, Seedskadee Project, Wyoming; Water sales contract for 22,500 acre-feet per year for industrial use. Environmental Impact Statement under preparation; approval pending outcome and compliance with Section 7, Endangered Species Act.

3. Animas-La Plata Conservancy District, Animas-La Plata Project, Colorado; Water service contract; 9,200 acre-feet per year for M&I use; 72,200 acre-feet per year for irrigation.

4. La Plata Conservancy District, Animas-La Plata Project, New Mexico; Water service contract; 16,000 acre-feet per year for irrigation.

5. City of Farmington, Animas-La Plata Project, New Mexico; M&I water service contract; 19,700 acre-feet per year.

6. City of Aztec, Animas-La Plata Project, New Mexico; M&I water service contract; 5,800 acre-feet per year.

7. City of Bloomfield, Animas-La Plata Project, New Mexico; M&I water service contract; 5,300 acre-feet per year.

8. Central Utah Project, Bonneville Unit, Utah; Supplemental M&I repayment contract for 94,100 acre-feet per year; FR notice published August 22, 1980, Vol. 45, No. 165, page 56199.

9. Central Utah Project, Bonneville Unit, Utah; $34,000,000 D&MC Contract—Duchesne River Area Canals rehabilitation to meet 1987 construction commitment. Repayment covered under executed repayment contract and by CRSP power revenues.

10. Dorchester Coal Company, Blue Mesa Reservoir, Colorado, Colorado River Storage Project; M&I water service contract, 400 acre-feet per year, for 40 years.

11. South Weber Water Improvement District, Weber Basin Project, Utah; Amendatory SRPA contract to extend payout period from 21 years to 40 years.

12. State of Wyoming, Seedskadee Project, Wyoming; Contract for repayment of reimbursable cost associated with the modification of Fontenelle Dam pursuant to the Reclamation Safety of Dams Amendments of 1984 (Pub. L. 98–404).

13. Miscellaneous water users, Upper Colorado Region, Blue Mesa Reservoir, Colorado River Storage Project, Colorado, M&I uses, 20-acre feet and less for 20–40 years.

14. ID's and similar water user entities; Amendatory repayment and water service contracts; Purpose is to conform to the Reclamation Reform Act of 1982 (Pub. L. 97–293).

15. M&I water users, Navajo Unit, Colorado River Storage Project, New Mexico; Negotiable repayment of reimbursable costs associated with the modification of Navajo Dam pursuant to the Reclamation Safety of Dam Act Amendment of 1984 (Pub. L. 98–404).

16. Bonneville Unit, Central Utah Project, Utah; Two repayment contracts for repayment of Jordan Aqueduct with Salt Lake County Water Conservancy District and the Metropolitan Water District.

LOWER COLORADO REGION: Bureau of Reclamation, P.O. Box 427 (Nevada Highway and Park Street), Boulder City, NV 89005, telephone (702) 293–8536.

1. Wellton-Mohawk Irrigation and Drainage District, Gila Project, Arizona; Amendatory D&MC contract for improvement for the Gila River within the district's boundaries; $6,000,000 of Federal funds to be utilized on a nonreimbursable basis pursuant to Pub. L. 98–396, August 21, 1984.

2. Agricultural and M&I water users, CAP, Arizona; Water service subcontracts; A certain percent of available supply for irrigation entities and up to 640,000 acre-feet per year for M&I use.

3. Elsinore Valley Municipal Water District, Elsinore, California; Contract for the repayment of a $7,158,000 SRPA loan.

4. Agricultural and M&I water users, CAP, Arizona; Contracts for repayment of Federal expenditures for construciton of distribution systems.

5. Contracts with 5 agricultural entities located near the Colorado River in Arizona; Boulder Canyon Project; Water service contracts for up to 1,920 acre-feet per year total.

6. Gila River Indian Community, CAP, Arizona; Water service contract; Contract for delivery of up to 173,100 acre-feet per year.

7. Yuma-Mesa IDD, North Gila Valley ID, and Yuma ID, Gila Project, Arizona; Amendatory and supplemental contracts to conform to the provisions of Pub. L. 98–530.

8. Hillander "C" ID, Colorado River Basin Salinity Control Project, Yuma, Arizona; 5-year contract for 4,000 acre-feet per year from the Protective and Regulatory Pumping Unit.

9. Sunset Mobile Home Park, Boulder Canyon Project, Arizona; M&I water service contract for delivery of 30 acre-feet of water per year pursuant to recommendation of Arizona Department of Water Resources.

10. ID's and similar water user entities; Amendatory repayment and water service contracts; Purpose is to conform to the Reclamation Reform Act of 1982 (Pub. L. 97–293).

11. Rancho California Water District, Temecula, California; Contract for the repayment of a $20,940,000 SRPA loan.

12. Yuma County Water Users' Association, Valley Division, Yuma Project, Arizona; Amendatory contract for the advancement of $1,500,000 to the association by the United States on a nonreimbursement basis for the construction of new headquarters facilities and accompanying relocation costs.

13. Ak-Chin Indian Community, Maricopa, Arizona; Supplemental contract in accordance with the provisions of Pub. L. 98–530.

14. City of Needles, Needles, California; Contract for up to 2,000 acre-feet per year of surplus water from the Colorado River, permanent contract to be activated only during periods when surplus flows are available.

SOUTHWEST REGION: Bureau of Reclamation, Commerce Building, Suite 201, 714 South Tyler, Amarillo, TX 79101, telephone (806) 378–5430.

1. Fort Cobb Reservoir Master Conservancy District, Washita Basin Project, Oklahoma; Amendatory repayment contract to convert 4,700 acre-feet of irrigation water to M&I use.

2. Foss Reservoir Master Conservancy District, Washita Basin Project,

Oklahoma; Amendatory repayment contract for remedial work.

3. Vermejo Conservancy District, Vermejo Project, New Mexico; Amendatory contract to relieve the district of further repayment obligation, presently exceeding $2 million, pursuant to Pub. L. 96–550).

4. Lavaca-Navidad River Authority, Palmetto Bend Project, Texas; Amendatory repayment contract to provide for increased payment for recreation.

5. Tom Green County Water Improvement District No. 1, San Angelo Project, Texas; Amendatory repayment contract to defer payment of construction charges associated with the 1984 crop year due to the nonavailability of irrigation water for use by the District's water users.

6. Hidalgo County Irrigation District No. 1, Lower Rio Grande Valley, Texas; Supplemental SRPA loan contract for approximately $13,205,000. The contracting process is dependent upon final approval of the supplemental loan report.

7. ID's and similar water user entities; Amendatory repayment and water service contracts; Purpose is to conform with the Reclamation Reform Act of 1982 (Pub. L. 97–293).

UPPER MISSOURI REGION: Bureau of Reclamation, P.O. Box 2553, Federal Building, 316 North 26th Street, Billings, Montana 59103, Telephone (406) 657–6413.

1. Individual irrigators, M&I, and miscellaneous water users, Upper Missouri Region, Montana, Wyoming, North Dakota, and South Dakota; Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5 years; Long-term contracts for similar service for up to 1,000 acre-feet of water annually.

2. Nokota Company, Lake Sakakawea, P-SMBP, North Dakota; Industrial water service contract; Up to 16,800 acre-feet of water annually; FR notice published May 5, 1982,Vol. 47, Page 19472.

3. Fort Shaw ID, Sun River Project, Montana; R&B loan repayment contract; Up to $1.5 million.

4. ID's and similar water user entities; Amendatory repayment and water service contracts; Purpose is to conform to the Reclamation Reform Act of 1982 (Pub. L. 97–293).

5. Oahe Unit, P-SMBP, South Dakota; Cancellation of master contract and participating and security contracts in accordance with Pub. L. 97–273 with South Dakota Board of Water and Natural Resources, Spink County and West Brown Irrigation Districts.

LOWER MISSOURI REGION: Bureau of Reclamation, P.O. Box 25247 (Building 20, Denver Federal Center), Denver, Colorado 80225, telephone (303) 234–3327.

1. H&RW ID, Frenchman-Cambridge Unit, P–SMBP, Nebraska; Amendatory water service contract; $1,200,000 outstanding.

2. Almena ID No. 5, Almena Unit, P–SMBP, Kansas; Deferment of repayment obligation for 1985.

3. Purgatoire River Water Conservancy District, Trinidad Project, Colorado; Amendatory repayment contract for extension of the development period and revision of the repayment determination methodology; FR notice published August 6, 1982, Vol. 47, page 34206.

4. Corn Creek ID, Earl Michael, Glendo Unit, P–SMBP Wyoming, and Nebraska; Irrigation water service contracts.

5. Webster ID No. 4, Webster Unit, P–SMBP, Kansas; Irrigation water service and repayment contract amendment to adjust payment due to reduced water supply, $970,816 outstanding.

6. Green Mountain Reservoir, Colorado-Big Thompson Project; Proposed contract negotiations for sale of water from the marketable yield to water users within the Colorado River drainage of western Colorado.

7. Individual irrigators, M&I, and miscellaneous water users, Lower Missouri Region, Southeastern Wyoming, Colorado, Nebraska, and northern Kansas; Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5 years; Long-term contracts for similar service for up to 1,000 acre-feet of water annually.

8. Ruedi Reservoir, Fryingpan-Arkansas Project, Colorado; Second round of proposed contract negotiations for sale of water from the regulatory capacity of Ruedi Reservoir.

9. ID's similar water user entities; Amendatory repayment and water service contracts; Purpose is to conform to the Reclamation Reform Act of 1982 (Pub. L. 97–293).

10. Lower South Platte Water Conservancy District, Central Colorado Water Conservancy District, and the Colorado Water Resources and Power Development Authority, P–SMBP, Narrows Unit, Colorado; Water service contracts for repayment of costs and cost sharing agreement.

11. Kirwin ID No. 1, Kirwin Unit, P–SMBP, Kansas; Deferment of repayment obligation for 1985.

12. Amity Mutual Irrigation Company, Colorado; SRPA loan repayment contract; $4,223,000 proposed loan obligation.

13. Kirwin ID No. 1, Kirwin Unit, P–SMBP, Kansas; Irrigation water service and repayment contract and Emergency Drought Act loan contract amendment to adjust payments due to reduced water supply, $866,231 outstanding.

14. Cedar Bluff ID No. 6, Cedar Bluff Unit, P–SMBP, Kansas; Deferment of repayment obligation for 1985.

15. Webster ID No. 4, Webster Unit, P–SMBP, Kansas; Deferment of repayment obligation for 1985.

16. Fryingpan-Arkansas Project, Colorado; East Slope Storage system consisting of Pueblo, Twin Lakes, and Turquoise Reservoir; Contract negotiations for long term storage contracts.

17. Twin Loups Reclamation District, P–SMBP; D&MC contract for correction of initial construction deficiencies and monitoring during initial filling, priming and puddling activities of the project. Proposed contract to be $500,000.

18. Farwell Irrigation District, Nebraska; Request for deferment of repayment obligation for 1985.

Opportunity for public participation and receipt of comments on contract proposals will be facilitated by a adherence to the following procedures:

(1) Only persons authorized to act on behalf of the contracting entities may negotiate the terms and conditions of a specific contract proposal.

(2) Advance notice of meetings or hearings will be furnished to those parties that have made a timely written request for such notice to the appropriate regional or project office of the Bureau of Reclamation.

(3) All written correspondence regarding proposed contracts will be made available to the general public pursuant to the terms and procedures of the Freedom of Information Act (80 Stat. 383) as amended.

(4) Written comments on a proposed contract or contract action must be submitted to the appropriate Bureau of Reclamation officials at locations and within time limits set forth in the advance public notices.

(5) All written comments received and testimony presented at any public hearings will be reviewed and summarized by the appropriate regional office for use by the contract approving authority.

(6) Copies of specific proposed contracts may be obtained from the appropriate Regional Director or his designated public contact as they become available for review and comment.

(7) In the event modifications are made in the form of proposed contract, the appropriate Regional Director shall determine whether republication of the notice and/or extension of the 60-day comment period is necessary.

Factors which shall be considered in making such a determination shall include, but are not limited to: (i) The significance of the impact(s) of the modification and (ii) the public interest which has been expressed over the course of the negotiations. As a minimum, the Regional Director shall furnish revised contracts to all parties which requested the contract in response to the initial public notice.

Dated: April 19, 1985.

Robert A. Olson,

Acting Commissioner of Reclamation.

BILLING CODE 4310-09-M

Fish and Wildlife Service

Receipt of Application for Permit

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

Applicant: Harold D. Taylor, Norman, OK, PRT-692109.

The applicant requests a permit to import the personal sport-hunted trophy of a bontebok (*Damaliscus dorcas dorcas*) culled from a ranch in South Africa for the purpose of enhancement of propagation of the herd.

Applicant: Joe Bills Reynolds, Oklahoma City, OK, PRT-692113.

The applicant requests a permit to import the personal sport-hunted trophy or a bontebok (*Damaliscus dorcas dorcas*) culled from a ranch in South Africa for the purpose of enhancement of propagation of the herd.

Applicant: Francisco Jose Vilella, Baton Rouge, LA, PRT-692143.

The applicant requests a permit to take (capture, handle, mark, radio-tag and release) up to 24 adults and eggs from up to 40 nests of the Puerto Rican whip-poor-will (*Caprimulgus noctitherius*) for the purpose of scientific research.

Applicant: Horst Schmudde, Colt's Neck, NJ, PRT-692139.

The applicant requests a permit to purchase in interstate commerce one pair of Hawaiian geese [*Nesochen (=Branta) sandvicensis*] from Charles Nugent, Kimbolton, OH, for the purpose of enhancement of propagation.

Applicant: Ken Wilson, Tarzana, CA, PRT-692303.

The applicant requests a permit to import the personal sport-hunted trophy of a bontebok (*Damaliscus dorcas dorcas*) culled from a ranch in South Africa for the purpose of enhancement of propagation of the herd.

Applicant: Pohnpei Marine Resources Department, Pohnpei, Micronesia, PRT-692627.

The applicant requests a permit to tag 50 adult female hawksbill turtles (*Eretmochelys imbricata*) on Oroluk Atoll, for the purpose of scientific research.

Applicant: San Diego Zoo, San Diego, CA, PRT-692596.

The applicant requests a permit to import a captive-born male Przewalski's horse (*Equus przewalskii*) from the Tierpark Hellabrumm, Munich, West Germany, for the purpose of enhancement of propagation.

Applicant: International Animal Exchange, Ferndale, MI, PRT-692775.

The applicant requests a permits to purchase in interstate commerce 2 captive-born Siamese crocodiles (*Crocodylus siamensis*) from the Sedgwick County Zoo, Wichita, KS and export them to Seoul Grand Park Zoo, Seoul, Korea, for enhancement of propagation.

Applicant: International Animal Exchange, Ferndale, MI, PRT-692717.

The applicant requests a permit to purchase in interstate commerce one pair of captive-born ocelots (*Felis pardalis*) from the Central Florida Zoological Park, Lake Monroe, FL and export them to the Chiba Zoological Park, Japan, for enhancement of propagation.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 am to 4:15 pm) Room 611, 1000 North Glebe Road, Arlington, Virginia 22201, or by writing to the Director, U.S. Fish and Wildlife Service of the above address.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate PRT number when submitting comments.

Dated: April 19, 1985.

R.K. Robinson,

Chief, Branch of Permits, Federal Wildlife Permit Office.

Geological Survey

Advisory Committee on Water Data for Public Use; Renewal

The Secretary of the Interior has approved the renewal of the Charter of the Advisory Committee on Water Data for Public Use.

The Committee, representing the interests of the non-Federal community, advises the Department of the Interior, through the Geological Survey, on (a) plans, policies, and procedures related to water data acquisition activities and related programs, on (b) the effectiveness of those programs in meeting the national water data needs, and on (c) activities pursuant to the implementation of Office of Management and Budget Circular A-67.

Further information regarding this renewal may be obtained from Porter Ward, Chief, Office of Water Data Coordination, Reston, Virginia 22092, (703) 860-6931.

Dated: April 17, 1984.

Dallas L. Peck,

Director.

BILLING CODE 4310-31-M

Minerals Management Service

Development Operations Coordination Document, ODECO Oil and Gas Co.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that ODECO Oil and Gas Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS 074, Block 20, South Pelto Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Dulac, Louisiana.

DATE: The subject DOCD was deemed submitted on April 15, 1985.

ADDRESS: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Ms. Angie D. Gobert; Minerals Management Service; Gulf of Mexico

OCS Region; Rules and Production; Plans, Platform and Pipeline Section; Exploration/Development Plans Units; Phone (504) 838–0876.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected states, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: April 15, 1985.

John L. Rankin,

Regional Director, Gulf of Mexico OCS Region.

Environmental Documents Prepared for Proposed Oil and Gas Operations on the Alaska Outer Continental Shelf

ACTION: Notice of availability of environmental documents prepared for Outer Continental Shelf (OCS) mineral prelease and exploration proposals on the Alaska OCS.

SUMMARY: The Minerals Management Service (MMS), in accordance with Federal regulations (40 CFR 1501.4 and 1506.6) that implement the National Environmental Policy Act (NEPA), announces the availability of NEPA-related environmental assessments (EA's) and findings of no significant impact (FONSI's) prepared by the MMS for the following oil and gas prelease and exploration activities proposed on the Alaska OCS. The listing includes all proposals for which environmental documents were prepared by the Alaska OCS Region in the 3-month period preceding this notice.

Activity/Operator

Exploration Drilling Program for Bering Sea, Navarin Basin (Sale 83 area) ARCO Alaska, Inc. as operator for itself and others.

Location

ARCO is proposing to drill up to 23 exploratory wells. Subsequent wells will depend upon the results of drilling, testing, and evaluation of the initial well. The location of ARCO's leases is described as follows:

LEASE AND BLOCK NUMBERS

Lease	Block
0578	594
0586	637
0587	638
0588	639
0596	681
0597	682
0608	959

Exploration Drilling Program for Bering Sea, St. George Basin (Sale 70) Marathon Oil Company, as operator for itself and others.

Location

Marathon is proposing to drill up to 15 exploratory wells. Subsequent wells will depend upon the results of drilling, testing, and evaluation of the initial well. The location of Marathon's leases is described as follows:

LEASE AND BLOCK NUMBERS

Lease	Block
Y 0486	386
0488	431
0498	535
0499	536
0521	721
0525	760

Environmental Assessment

No. AK 85–03.

Fonsi Date

March 21, 1985.

SUPPLEMENTARY INFORMATION: The MMS prepares Environmental Assessments (EA's) and FONSI's for proposals which related to exploration for oil and gas resources on the Alaska Outer Continental Shelf (OCS).

The EA's examine the potential environmental effects of activities described in the proposals and present MMS conclusions regarding the significance of those effects. The EA's are used as a basis for determining whether or not approval of the proposals constitute major Federal actions that significantly affect the quality of the human environment in the sense of NEPA section 102(2)(C). A FONSI is prepared in those instances where the MMS finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis of that finding and includes a summary or copy of the EA.

The FONSI and associated EA for the activity listed above are available for public inspection between the hours of 7:30 a.m. and 4:30 p.m., Monday through Friday at: Minerals Management Service, Alaska OCS Region Library, 949 East 36th Avenue, Room 502, Anchorage, Alaska 99508, Phone: (907) 261–4435.

Persons interested in reviwing specific environmental documents, or obtaining information about EA's and FONSI's prepared for activities on the Alaska OCS, are encouraged to contact the above listed MMS office.

This notice constitutes the public notice of availability of environmental document required under the NEPA regulations.

Rodney A. Smith,

Acting Regional Director, Alaska OCS Region.

BILLING CODE 4310-MR-M

Oil and Gas and Sulphur Operations in the Outer Continental Shelf; Chevron U.S.A. Inc.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document.

SUMMARY: This Notice announces that Chevron U.S.A. Inc., Unit Operator of the South Bay Marchand Federal Unit Agreement No. 14–08–001–3915, submitted on March 28, 1985, a proposed Development Operations Coordination Document describing the activities it proposes to conduct on the South Bay Marchand Federal unit.

The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the plan and that it is available for public review at the offices of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 N. Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Minerals Management Service, Records Management Section, Room 143, open weekdays 9:00 a.m. to 3:30 p.m., 3301 N. Causeway Blvd., Metairie, Louisiana 70002, phone (504) 838–0519.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in the proposed development operations coordination document available to affected States, executives of affected local governments, and other interested parties became effective on December 13, 1979 (44 FR 53685). Those practices and procedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: April 18, 1985.

Oil and Gas and Sulfur Operations on the Outer Continental Shelf; Receipt of Proposed Development and Production Plan; Cities Service Oil and Gas Corp.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of receipt of a proposed development and production plan.

SUMMARY: Notice is hereby given that Cities Service Oil and Gas Corporation has submitted a Development and Production Plan describing the activities it proposes to conduct as operator of Lease OCS–P 0409, offshore California. The purpose of this Notice is to inform the public that the Minerals Management Service (MMS) is considering approval of the plan and that it is available for public review and comment.

DATES: The plan may be reviewed weekdays, 8:00 a.m. to 3:00 p.m. Written comments must be received or postmarked by June 21, 1985.

ADDRESSES: The plan is available for public review at the Office of the Regional Director, Pacific OCS Region, Minerals Management Service, Room 160, 1340 West Sixth Street, Los Angeles, California 90017. Written comments may be mailed or hand-delivered to the same address.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas W. Dunaway, Regional Supervisor, Office of Field Operations, Pacific OCS Region, (213) 688–2083.

SUPPLEMENTARY INFORMATION: Section 25 of the Outer Continental Shelf Lands Act, 43 U.S.C. 1351, requires the MMS to make any development and production plans available for public review. Regulation 30 CFR 250.34 provides for the publication of a Notice that such a plan is available for review.

National Park Service

Upper Delaware Citizens Advisory Council; Meeting

AGENCY: National Park Service; Upper Delaware Citizens Advisory Council, Interior.

ACTION: Notice of Meeting.

SUMMARY: This notice sets forth the date of the forthcoming meeting of the Upper Delaware Citizens Advisory Council. Notice of this meeting is required under the Federal Advisory Committee Act.

DATE: April 26, 1985, 7:00 p.m.

ADDRESS: Town of Tusten, Narrowsburg, New York.

FOR FURTHER INFORMATION CONTACT: John T. Hutzky, Superintendent, Upper Delaware National Scenic and Recreational River, Drawer C, Narrowsburg, N.Y. 12764–0159, (717) 729–7135.

SUPPLEMENTARY INFORMATION: The Advisory Council was established under section 704(f) of the National Parks and Recreation Act of 1978, Pub. L. 95–625, 16 U.S.C. 1274 note, to encourage maximum public involvement in the development and implementation of the plans and programs authorized by the Act. The Council is to meet and report to the Delaware River Basin Commission, the Secretary of the Interior, and the Governors of New York and Pennsylvania in the preparation of a management plan and on programs which relate to land and water use in the Upper Delaware region. The agenda for the meeting will include items regarding continuance of discussion of requirements for a river management plan. The meeting will be open to the public. Any member of the public may file with the Council a written statement concerning agenda items. The statement should be addressed to the Council c/o Upper Delaware National Scenic and Recreational River, Drawer C, Narrowsburg, N.Y. 12764–0159. Minutes of meeting will be available for inspection four weeks after the meeting at the permanent headquarters of the Upper Delaware National and Recreational River, River Road, 1¾ miles north of Narrowsburg, N.Y., Damascus Township, Pennsylvania.

Dated: April 18, 1985.

Anthony M. Corbisiero,

Acting Regional Director, Mid-Atlantic Region.

BILLING CODE 4310–70–M

DEPARTMENT OF LABOR

Office of Pension and Welfare Benefit Programs

[Application No. D–5108 et al.]

Proposed Exemptions; Bartlemay & Associates, Inc., Money Purchase Pension Plan and Trust, et al.

AGENCY: Pension and Welfare Benefit Programs, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this **Federal Register** Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESSES: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 26, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the

proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Bartlemay & Associates, Inc., Money Purchase Pension Plan and Trust (the Plan) Located in Richmond, Indiana

[Application Nos. D–5108 and D–5968]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406(b) (1) and (2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply, effective January 13, 1975, to the purchase by the Plan of an interest in a land holding real estate partnership (BCJ Realty Interest) from Louis M. Jaffe (Jaffe) for $39,000 and the sale of the BCJ Realty Interest to I.V. Bartlemay (Bartlemay) on December 29, 1984 for $69,340 in cash, provided that the amounts paid and received by the Plan were not greater than or less than (respectively) the fair market values on the respective dates of acquisition and sale.

Effective Date: If the exemption is granted, the effective date will be January 13, 1975.

Summary of Facts and Representations

1. The Plan is a money purchase pension plan established by Bartlemay & Associates Inc. (the Employer) effective December 31, 1969. The Second National Bank of Richmond, Indiana (Second National) was designated as trustee. Second National served as trustee of the Plan until January 13, 1975, at which time the assets were transferred to the First National Bank of Richmond, Indiana (First National). First National served as trustee of the Plan until October 15, 1980, at which time it was succeeded by Robbin Myers an employee and stockholder of the Employer. The Plan was terminated effective December 31, 1981; however, the trust continues to exist for the payment of benefits. No plan presently exists to terminate the trust. The Plan has three participants: Bartlemay, the principal shareholder of the Employer, his brother and son-in-law. Since the Plan has been terminated there will be no additional participants.

2. From the Plan's inception investments had been made in equity securities in which the investment performance had been less than satisfactory. Accordingly, it was decided in the fall of 1974 that the Plan should seek out alternative forms of investment. During September of 1974 the Plan agreed to purchase a 50% interest in a parcel of developed real estate, which was subject to a long term commercial lease, from Jaffe an unrelated party. Second National analyzed the investment and purchased it on behalf of the Plan on October 4, 1974. At about the same time Jaffe approached the Plan about the purchase of another real estate investment, namely the BCJ Realty Interest which was currently on the market for $39,000. Jaffe had first offered to sell the BCJ Realty Interest to his partners who declined to accept his offer. While the Plan was considering Jaffe's offer, the Board of Directors of the Employer decided to change the trustee of the Plan and contacted First National about assuming that responsibility. Investment in the BCJ Realty Interest was presented to First National who advised that it appeared to be a prudent investment for the Plan. First National agreed that, when formally appointed, it would purchase the BCJ Realty Interest for the Plan.

3. BCJ Realty, an Indiana general partnership, was established for the purpose of acquiring real estate, constructing improvements thereon and leasing the same. The partnership agreement was executed June 25, 1971 and its assets on the date of sale consisted of a parcel of real estate, located in Richmond, Indiana, subject to long term net commercial leases with Goodyear Tire and Rubber Co. and a franchise of Long John Silver restaurants. Both tenants were deemed to be stable and both were unrelated to Jaffe, the Employer or any shareholder of the Employer. The purchase price of $39,000 was determined to be reasonable on the basis of several generally recognized economic indicators: (a) Projected cash return on investment after debt service and expenses, using an anticipated 8.7% return as being an acceptable rate of return at the time of purchase; (b) equity in the underlying real estate by referencing the original construction costs less mortgage debt at the time of purchase and by capitalizing anticipated rents; and (c) residual values of the properties through 1989 when the mortgage debt will be retired. In conjunction with the transfer of assets to the successor trustee, First National, counsel was employed to draft a memorandum of agreement (the Agreement) evidencing the deal that had been struck between Jaffe and the Plan. A draft of the Agreement was completed on December 8, 1974. Jaffe signed the Agreement and obtained the approval of his partners in BCJ Realty but administrative delays in the transfer of plan assets to the successor trustee-First National delayed the execution of the Agreement by First National on behalf of the Plan until January 13, 1975 (the 1975 Transaction).

4. Between the date that the parties reached an understanding as to the terms of the sale of BCJ Realty Interest and the final execution of the Agreement, two events intervened which resulted in the need to file the subject application for administrative relief. On November 16, 1974, Jaffe married Bartlemay's daughter and thus became a party in interest with respect to the Plan on January 1, 1975, the effective date of the prohibited transaction provisions of the Act. Jaffe, although a son-in-law of Bartlemay (and a party in interest under section 3(14)(F) of the Act), was an independent businessman who dealt with the Plan in an arm's-length manner. The price paid by the Plan for the BCJ Realty Interest was the same price at which the investment had been offered to third parties. None of the parties to the transaction had any reason to believe that such transaction was a violation of any federal or state statute. The Employer is a manufacturer's representative and looked to its attorneys, CPA's and bank trust departments to handle the legal and tax implications of operating its retirement plans.

5. On March 2, 1982, an application for determination with respect to the termination of the Plan was filed with the Internal Revenue Service (the IRS) in Cincinnati, Ohio. After an exchange of correspondence between the IRS and the Employer involving the real estate holdings of the Plan, the IRS notified the Employer by a letter dated August 10, 1983, indicating that the 1975 Transaction ". . . appears to be a prohibited transaction." The Employer retained counsel to develop an exemption application which was submitted to the Department on December 29, 1983.

6. In December of 1984, fiduciaries of the Plan determined it in the best interests of the participants to diversify the assets of the Plan by selling some of its existing real estate holdings. Because of the current problems surrounding the acquisition of the BCJ Realty Interest,

the unsettled outcome of the pending exemption application and the potential tax liability to Jaffe, the BCJ Realty Interest was selected as the most appropriate asset to be disposed of. An appraisal of BCJ Realty was made by Mr. Jay Allardt (Allardt) of the American United Appraisal Company. Allardt, who represents himself to be independent of and unrelated to Bartlemay, the Employer or the Plan, has given an opinion that as of December 26, 1984 BCJ Realty had a market value of $290,000 subject to an outstanding mortgage of $81,981. Based on this valuation the BCJ Realty Interest was determined to have a fair market value of $69,340. In that the BCJ Realty Interest was a minority interest, it was first offered to the other partners in BCJ Realty who declined to purchase the Plan's interest at the appraised price but agreed to consent to the sale if a purchaser could be found. It was the opinion of the Plan fiduciaries that seeking a prospective purchaser on the open market would be a time consuming process. To resolve the Plan's dilemma Bartlemay offered to purchase the BCJ Realty Interest for cash. The Plan accepted the offer and sold the BCJ Realty Interest to Bartlemay on December 29, 1984 (the 1984 Transaction) for $69,340 cash.

7. In summary, the applicant represents that the subject transaction meet the criteria of section 408(a) of the Act because: (a)(1) The 1975 Transaction was a written affirmation of an agreement reached between unrelated parties in 1974 and based on a price represented to be fair market value. (2) First National, a fiduciary of the Plan and not subject to influence by any party to the sale, reviewed the proposed transaction and agreed to execute the required documents on behalf of the Plan. (3) BCJ Realty has as assets two long-term commercial leases with unrelated parties which produced a positive income stream for any investor; and (b) the 1984 Transaction was a sale transaction for cash based on an independent appraisal intended to provide the Plan with a better diversified portfolio and permit a final resolution of the problems created by the Plan acquisition of the BCJ Realty Interest by the 1975 Transaction.

Ted McWilliams, Inc., Profit Sharing Plan (the Plan) Located in Pittsburgh, Pennsylvania

[Application No. D-5236]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406(b) (1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of sections 4975(c)(1) (A) through (E) of the Code shall not apply to the lease of certain real property by the Plan to Ted McWilliams, Inc. (the Plan Sponsor) for a ten-year period beginning July 1, 1984, provided that the terms of the lease are as favorable to the Plan as those the Plan could obtain in a similar transaction with an unrelated party.

Effective Date: If the proposed exemption is granted, it will be effective on July 1, 1984.

Summary of Facts and Representations

1. The Plan is a profit sharing plan with 76 participants. The Plan had total assets of $8,675,216 as of December 31, 1983. The trustees of the Plan (the Trustees) are Theodore McWilliams (McWilliams) the principal stockholder, director and officer of the Plan Sponsor, and Eugene F.P. Kelly, a director and officer of the Plan Sponsor. The Plan Sponsor is an automobile dealership.

2. There are three parcels of real property involved in the proposed exemption:

Parcel I—Parcel I is owned by the Plan. It is located at 3475 Penn Highway, Pittsburgh, Pennsylvania. Parcel I was purchased by McWilliams on February 21, 1963 from Mr. and Mrs. George Beech (the Beeches), who are unrelated parties. Parcel I was then subleased to the Plan Sponsor. On June 27, 1967, McWilliams conveyed Parcel I to Potter Investment Company (Potter), a Pennsylvania corporation whose sole shareholder was the Plan. Potter leased Parcel I to the Plan Sponsor by lease dated December 31, 1969 for a 12-year period beginning on January 1, 1970 and ending on December 31, 1982. Potter then liquidated and pursuant to the Plan of Liquidation, conveyed Parcel I to its sole shareholder, the Plan on June 1, 1976. Parcel I continues to be leased to the Plan Sponsor pursuant to a lease renewal which became effective on January 1, 1983 between the Plan and the Plan Sponsor.

Parcel II—Parcel II is located at 3499 Penn Highway, Pittsburgh, Pennsylvania and consists of approximately 12 acres. Parcel II is improved with a showroom, a trailer and garage. It was leased to McWilliams from the Beeches pursuant to a lease which was dated May 13, 1964. The original term of this lease was ten years, but it has subsequently been renewed. This lease has been assigned by McWilliams to the Plan pursuant to an assignment which was dated November 29, 1968. Under the terms of the assignment, McWilliams assigned all of his rights, title and interest in Parcel II to the Plan. Rental payments are made from the Plan directly to the Beeches. The Plan then subleased Parcel II to the Plan Sponsor pursuant to a sublease which became effective January 1, 1970.

Parcel III—Parcel III is located at 3601 Penn Highway, Pittsburgh, Pennsylvania, and consists of approximately 1½ acres. It was leased to McWilliams from the Beeches on September 15, 1965. Parcel III was then assigned to the Plan pursuant to an assignment dated November 29, 1968. The Plan subleased Parcel III to the Plan Sponsor pursuant to a lease which became effective on January 1, 1970. The original term of this lease was 9½ years, but has been subsequently renewed.

The applicant represents the leases of Parcels I, II, and III were covered by the statutory exemption contained in section 414 of the Act.[1]

3. Parcels I, II, and III (collectively, the Property) are now being used by the Plan Sponsor for its business operations. An independent appraisal of the Property performed by Kelly-Reilly Associates (the Appraiser), an independent real estate appraisal firm located in Monroeville, Pennsylvania, has established the fair market value of the Property at $2,700,000 as of December 31, 1983. The appraiser has determined that the fair market rental value of the Property is $283,000 per annum as of December 31, 1983. The Property represents approximately 31 percent of the total assets of the Plan. The applicant represents that before June 30, 1987, the value of the Property will equal 25 percent or less of the Plan's total investment portfolio.

4. The applicant proposes that the Plan lease the Property to the Plan Sponsor (the Lease) for a term of 10 years, beginning July 1, 1984, with rental adjustments every two years to reflect the then fair market rental value of the

[1] The Department expresses no opinion as to the applicability of section 414 in this instance.

Property. The proposed rental rate for the Property is $300,000 per annum. This proposed rental rate exceeds the fair market rental value of the Property as determined by the Appraiser. The Plan Sponsor will pay all utilities and services related to the Property during the term of the Lease. The Plan Sponsor will also maintain policies of public liability insurance against claims for personal injury, death or property damage for the Property during the Lease term.

5. In May of 1984 Commercial Realty Marketing, Inc. (Commercial Realty) was appointed as the independent Fiduciary for one Plan. Commercial Realty, a corporation which has no association with the Plan Sponsor, reviewed the Lease and the Plan's investment portfolio and determined that it was in the best interests of the Plan and its participants and beneficiaries. On December 6, 1984, Richard R. Carr, Esquire, was appointed to serve as the independent fiduciary for the Lease (the Independent Fiduciary), replacing Commercial Realty. The Independent Fiduciary represents that he is not associated in any manner with the Plan or the Plan Sponsor. He is licensed as a real estate broker and is licensed to practice law in the Commonwealth of Pennsylvania. He represents that he has specialized in pension matters and is familiar with the fiduciary standards set forth in the Act. The Independent Fiduciary represents that he has reviewed the Lease and the Plan's investment portfolio and that as a result of his review, has determined that the Lease is in the best interests of the Plan and compliments the Plan's investment portfolio.

6. The Independent Fiduciary represents that the Lease is in the best interests of the Plan because:

(a) The Lease generates an 11 percent return each year for the Plan, with a small risk factor involved;

(b) There is enough cash in the Plan to pay any reasonably anticipated distribution for the next five years; and

(c) The rent to be received by the Plan is in excess of the fair market rental value of the Property.

7. The Independent Fiduciary further represents that he will enforce all of the terms of the Lease including the rental adjustments every two years to reflect the fair market value of the Property. He will also assure the collection of all the rents and the enforcement of all of the convenants and conditions as set forth in the Lease.

8. In summary, the applicant represents that the proposed transaction meets the statutory criteria of section 408(a) of the Act because:

(1) The fair market rental value of the Property has been established by an independent appraisal;

(2) The Plan will receive in excess of the fair market rental value of the Property during the Lease;

(3) The Independent Fiduciary will collect rents and enforce the covenants and conditions of the Lease; and

(4) The Independent Fiduciary has determined that all of the terms of the Lease are in the interests of and protective of the Plan and its participants and beneficiaries.

Tax Consequences of Transaction

The Department of the Treasury has determined that if a transaction between a qualified employee benefit plan and its sponsoring employer (or affiliate thereof) results in the plan either paying less than or receiving more than fair market value such excess may be considered to be a contribution by the sponsoring employer to the plan and therefore must be examined under applicable provisions of the Internal Revenue Code, including sections 401(a)(4), 404 and 415.

For Further Information Contact: Ms. Linda Hamilton of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Neurosurgical Associates of Roanoke, Inc. Defined Benefit Plan A (the Plan) Located in Roanoke, Virginia

[Application No. D–5702]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the proposed sale by the Plan of a certain parcel of improved real property and personal property (the Property) to Dr. Ward W. Stevens (Dr. Stevens), a disqualified person with respect to the Plan, for cash in the amount of $232,587.39 provided that this amount is the fair market value of the Property at the time of sale.[2]

[2] Since Dr. Stevens owns 100% of the beneficial interest of the sponsor of the Plan and is the only Plan participant there is no jurisdiction under Title I of the Act pursuant to 29 CFR 2510 3–3(b). However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

For Further Information Contact: Ms. Linda Hamilton of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Summary of Facts and Representations

1. The Plan is a defined benefit plan which as of November 30, 1984, had total assets of approximately $677,945. The trustees of the Plan are Dr. Stevens and his wife, Mrs. Stevens. As a part of its assets, the Plan owns the Property which consists of a mountain resort home and the fixtures and furnishings therein.

2. Dr. Stevens is requesting an exemption which will permit the sale of the Property by the Plan to himself for cash in the amount of $232,587.39. It is represented that the Plan purchased the improved real property on March 31, 1983, at an original cost of $199,540.79. Mr. Samuel B. Wells, an independent appraiser with twenty years experience and with no connections to either Dr. Stevens, Neurosurgical Associates of Roanoke, Inc., the sponsor of the Plan, the Wintergreen Company, or the Plan, represents that as of February 8, 1984, the improved real property had a fair market value of $212,500. In addition, the applicant states that Dr. Stevens will pay an additional amount of $20,087.39 which represents the original cost to the Plan for the fixtures and furnishings. It is represented that the sale of the Property to Dr. Stevens will permit the Plan to diversify its investments and allow the Plan to liquidate the real property holding of the Plan which comprises approximately 40% of the Plan's assets. All closing costs and fees will be paid by the purchaser. In addition, the applicant asserts that denial of the request for exemption would result in the Plan's suffering an economic loss because of the "soft" rental market existing in the area. The applicant indicates that since the Property was placed in service, the Property has generated approximately $800 to $1,000 per month of net rental income which represents a 5% per annum return on the Plan's ownership interest in the Property.[3]

[3] There have been only two weekends in 1984 of personal use by Dr. Stevens since the Property was placed in service. Dr. Stevens represents both trips were mainly for the purpose of checking on the condition of the Property. Dr. Stevens did not pay rent to the Plan on those two occasions. Dr. Stevens represents that as a condition of this exemption he will file the applicable 5330 forms with the Internal Revenue Service and will pay all applicable excise tax, fair market rent, and interest on such rent with regard to Dr. Stevens' use of the Property on the two weekends in 1984.

3. In summary, the applicant represents that the transaction satisfies the criteria of section 4975(c)(2) of the Code as follows: (1) The sales price of the Property consists of the greater of the actual construction cost of the Property or the appraised value on the date of sale as established by an independent appraiser plus the original cost to the Plan of the fixtures and furnishings; (2) the Plan will be able to diversify its investments and liquidate its real estate holdings; (3) the Plan will pay no commission on the sale of the Property; (4) Dr. Stevens is the only participant in the Plan.

For Further Information Contact: Ms. Angelena C. Le Blanc of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 19th day of April, 1985.

Elliot I. Daniel,

Acting Assistant Administrator for Regulations and Interpretations, Office of Pension and Welfare Benefit Programs, U.S. Department of Labor.

BILLING CODE 4510-29-M

LIBRARY OF CONGRESS

American Folklife Center, Board of Trustees; Meeting

In accordance with Pub. L. 94-463, the Board of Trustees of the American Folklife Center announces its meeting to be held in Washington, D.C. on Wednesday, May 29, from 9:30 a.m. to 4:30 p.m. in the Whittall Room of the Library of Congress. The meeting will be open to the public. It is suggested that persons planning to attend this meeting as observers contact Ray Dockstader, American Folklife Center (202) 287-6590.

The American Folklife Center was created by the U.S. Congress with passage of Pub. L 94-201, the American Folklife Preservation Act, in 1976. The Center is directed to "Preserve and present American folklife" through programs of research, documentation, archival preservation, live presentation, exhibition, publications, dissemination, training, and other activities involving the many folk cultural traditions of the United States. The Center is under the general guidance of a Board of Trustees composed of members from Federal agencies and private life widely recognized for their interest in American folk traditions and arts.

The Center is structured with a small core group of versatile professionals who both carry out programs themselves and oversee projects done by contract by others. In the brief period of the Center's operation it has energetically carried out its mandate with programs that provide coordination, assistance, and model projects for the field of American folklife.

Raymond L. Dockstader,

Deputy Director, American Folklife Center.

BILLING CODE 0000-00-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 35-23666; 70-7098]

Columbus and Southern Ohio Electric Co.; Proposed Issuance and Sale of First Mortgage Bonds

April 19, 1985.

Columbus and Southern Ohio Electric Company ("CSO"), a subsidiary of American Electric Power Company, Inc. ("AEP"), a registered holding company, has filed a declaration with this Commission pursuant to sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50 thereunder.

CSO proposes to issue and sell prior to December 31, 1985, up to $60 million aggregate principal amount of its First Mortgage Bonds ("Bonds"), in one or more new series, each such series having a maturity of not less than 5 years and not more than 30 years. The interest rate and the price to be paid to CSO for the Bonds (which shall not be less than 99 percent, and not more than 102.75 percent of the principal amount) will be determined at the time of the sale or sales by competitive bidding in accordance with Rule 50 of the Act. CSO may employ alternative competitive bidding procedures in accordance with the Commission's statement of policy set forth in HCAR No. 22623, September 2, 1982.

If market conditions should not be propitious for the sale of the Bonds on a competitive bidding basis, CSO proposes, subject to further authorization by the Commission, either to place the Bonds privately with institutional investors or to negotiate with underwriters for the sale of the Bonds. The interest rate and price, if authorized by the Commission, would be determined by negotiation in each such instance with institutional investors or with underwriters for the sale of the Bonds. If CSO determines to issue the Bonds in more than one series, CSO may wish to sell one or more series on a competitive bidding basis and one or more series on a negotiated basis, with variable maturity dates to be determined at that time.

It is expected that the terms of the Bonds will preclude CSO from redeeming any such Bond at a regular redemption price prior to five years subsequent to the first day of the month in which the Bonds of that series are first authenticated and delivered, if such redemption is for the purpose of refunding such Bond through the use, directly or indirectly, of borrowed funds

at an effective interest cost of less than the effective interest cost to the Company of such Bonds.

The proceeds from the sale of the Bonds will be deposited with the Trustee under the Mortgage, to be used to repay, on July 1, 1985, CSO's maturing $45 million principal amount of First Morgage Bonds, 7⅝% Series, and to repay short term indebtedness.

The declaration and any further amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by May 15, 1985, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the proposal, as filed or as it may be amended, may be authorized.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

[FR Doc. 85-9970 Filed 4-24-85; 8:45 am]

BILLING CODE 8010-01-M

[Release No. IC-14477; 812-6057]

Gotabanken and Gotabanken Inc.; Application

April 19, 1985.

Notice is hereby given that Gotabanken ("Bank"), a commercial bank organized under the laws of Sweden, and its wholly-owned subsidiary Gotabanken Inc. ("Issuer") (collectively, "Applicants"), Milbank, Tweed, Hadely & McCloy, One Chase Manhattan Plaza, New York, New York 10005, filed an application on February 12, 1985, for an order of the Commission, pursuant to section 6(c) of the Investment Company Act of 1940 ("Act"), exempting Applicants from all provisions of the Act in connection with the proposed issuance and sale of commercial paper in the United States. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the text of the pertinent statutory provisions.

Applicants state that the Bank's registered office is located at Ostra Hamngatan 16, Goteburg, Sweden, and that it is one of the larger commercial banks in Sweden. The Bank operates on an international scale: it maintains 166 branches in Sweden, has representative offices in Hong Kong and Singapore, and has subsidiary banks in Luxembourg and London and an ownership interest in a bank in Paris. The Bank is a privately-owned banking institution with its capital shares distributed among 16,000 shareholders. At December 31, 1983, total consolidated assets of the Bank were just over $4.1 billion; deposits, certificates of deposit and amounts due to Swedish and foreign banks were $2.84 billion, and shareholder equity was $70.6 million.

As a commercial bank, the Bank is active in corporate business domestically and overseas while also extensively involved in retail banking at home. The Bank's principal business consists of making loans and receiving deposits, but through subsidiaries it also engages in real estate financing and provides factoring and leasing services.

The Bank represents that it is subject to detailed regulation by Swedish banking authorities pursuant to a regulatory framework that is comparable in many respects to the regulation of United States commercial banks. In general, Swedish bank regulation is primarily supervised by the Bank Inspection Board ("Board") pursuant to the Swedish Banking Companies Act (1955), and regulated by Sveriges Riksbank (the "Riksbank"), the Central Bank of Sweden. Among other things, the Swedish Banking Act imposes minimal capital requirements and prohibits subordinated loans and unsecured investments in real estate. Compliance with the Swedish Banking Act is supervised by the Board, which prescribes accounting principles to be followed by banks, requires them to submit monthly statements of financial condition, and conduct periodic inspections. Further, under the Swedish Banking Act, the Board is granted various enforcement powers and may in exceptional cases actively intervene in management decisions if deemed necessary to enforce the Swedish Banking Act or to preserve the solvency of a bank. The Riksbank supervises banking activities in Sweden; it determines liquidity and cash-reserve requirements, imposes restrictions on interest rates charged, establishes general and specific investment requirements, and imposes limitations on the issuance of securities.

Applicants further state that the Issuer was organized under the laws of Delaware on January 28, 1985, to serve as a financial vehicle for the Bank and will issue commercial paper guaranteed by the Bank. It is represented that the only business to be conducted by the Issuer will be the issuance of commercial paper notes, the proceeds of which will be placed on short-term deposit with, or loaned to, the Bank and its other subsidiaries. These deposits, or loans, with interest, would be withdrawn by, or repaid to, the Issuer, as the case may be, to the extent necessary to pay maturing commercial paper notes. Payment of principal and interest on these securities will be guaranteed by the Bank. Since the sole business of the Issuer will be the issuance of commercial paper and the making of loans to the Bank and its other subsidiaries, substantially all of the Issuer's assets will consist of bank deposits with, or amounts receivable from, the Bank.

The Issuer proposes to offer, issue and sell in the United States guaranteed commercial paper ("Notes") in bearer form and denominated in United States dollars. It is intended that the Notes will be sold without registration under the Securities Act of 1933 ("Securities Act") in reliance upon an opinion of the Bank's United States counsel that the Notes and guarantees will qualify for the exemption from the registration requirements of the Securities Act provided for certain short-term commercial paper by section 3(a)(3) thereof. The Notes will not be issued or sold until the Bank has received such an opinion letter. The Bank does not request Commission review or approval of the aforementioned opinion letter. The Notes will be issued in minimum denominations of $100,000, will mature not more than 270 days from the date of issuance, and will not be payable on demand or include any provisions for extensions, renewal, or automatic "roll-over" at the option of either the holders, the Issuer, or the Bank. The Notes will rank *pari passu* among themselves and equally with all other unsecured indebtedness of the Issuer and superior to the rights of shareholders. The Notes are intended to be of prime quality and of the type eligible for discounting by a Federal Reserve Bank. The presently proposed, and any future, issuance of Notes by the Issuer will be conditioned upon the receipt of, prior to issuance, of one of the three highest investment grade ratings from at least one of the nationally-recognized statistical rating organizations, and the Bank's United

States counsel will have certified that such a rating has been received.

It is further stated that the Notes will have the unconditional guarantee of the Bank, endorsed on the Notes. As a result, a holder or the Notes of the Issuer will be the holder of obligations of the Bank, i.e., guarantees which will rank *pari passu* with all other unsecured indebtedness of the Bank, including liability to depositors, and ahead of shareholders and holders of subordinated debt. The proceeds of the sale of the Notes (to the extent not applied to the repayment of maturing Notes or to the payment of current expenses) will be placed on short-term deposit with, or loaned to the Bank and its subsidiaries, and will thus be made available to the Bank and its subsidiaries to be used for "current transactions" within the meaning of section 3(a)(3) of the Securities Act. These deposits, or loans, with interest, would be withdrawn by, or repaid to, the Issuer, as the case may be, as required to make timely payment on maturing Notes.

The Notes will be placed by one or more dealers, or placement agents, in the above minimum denominations, with institutional investors and other entities and individuals in the United States who regularly purchase commercial paper. While an announcement of the issuance of the Notes may be made as a matter of public record, the Notes will not be advertised or otherwise offered for sale to the general public. The Bank represents that the aggregate principal amount of the Notes to be outstanding at any time is not expected to exceed $150,000,000.

The Bank agrees to secure an undertaking from the dealer, or dealers, or placement agent, or agents that it will provide each offeree who has indicated an interest in the Notes then being offered, and prior to any sale of such Notes to such offeree, with (i) a memorandum describing the business of the Bank and the Issuer, and (ii) the most recent publicly available fiscal year-end balance sheet and income statement. Such memoranda will be updated as promptly as practicable to reflect material changes in the Bank's and the Issuer's financial status, and will be at least as comprehensive as those customarily used in offering prime quality commercial paper in the United States.

The Bank further represents that any future offerings of the Issuer's or the Bank's securities in the United States will be done on the basis of disclosure documents at least as comprehensive in their description of the Bank and the Issuer as those used in the presently proposed offering. The Bank consents to any order granting the relief requested being expressly conditioned upon the Bank's compliance with the above undertakings regarding disclosure documents. The Bank further represents that any such future offering in the United States will be made pursuant to either a registration statement under the Securities Act, or an applicable exemption from registration under the Securities Act. In any such offering for which no registration is required pursuant to the Securities Act, disclosure documents will be provided to each offeree who has indicated an interest in the securities then being offered prior to any sale of such securities to such offeree.

The Bank states that it will appoint, and will cause the Issue to appoint, one or more banks in the United States as authorized agent for itself and the Issuer, to issuer and pay the Notes from time to time on behalf of the Bank and the Issuer. The Bank will also appoint an agent to accept any process which may be served in any action based on the Notes, or the guarantee, and instituted in any state or federal court in New York City by the holder of any Notes. The Bank represents that it will expressly accept and cause the Issuer to expressly accept the jurisdiction of any state or federal court in the City and State of New York in respect of any such action. Such appointment of an authorized agent to accept service of process and such consent to jurisdiction will be irrevocable until all amounts due and to become due in repect of the Notes have been paid by the Issuer or the Bank.

The Bank represents that it will similarly consent, and will cause the Issuer to consent, to jurisdiction of state and federal courts in New York City and the Bank will appoint, and will cause the Issuer to appoint, an agent for service of process in suits arising from any future offerings of securities that it or the Issuer may make in the United States, which offerings the Bank states will be limited to debt securities. The Bank represents that it and the Issuer will be subject to suit in any other court in the United States which would have jurisdiction because of the manner of the offering of the Notes or otherwise. In such instances, the authorized agent will neither be a trustee for the Noteholders, nor will it have any responsibility or duty to act for such holders as would a trustee.

The Bank and the Issuer further represent that prior to any future offering of their debt securities, such securities will have received one of the three highest investment grade ratings from at lease one nationally-recognized United States firm engaging in statistical rating and that the United States counsel to such offeror of debt securities shall have certified that such rating has been so received; provided, however, that no such rating shall be required to be obtained if in the opinion of such counsel, after taking into account the doctrine of integration for the purpose thereof, an exemption from registration is available with respect to such issue under section 4(2) of the Securities Act.

Applicants state that absent an exemption the Bank would be denied ready access to the credit markets in the United States, a result both inequitable and indirect conflict with the objectives of the International Banking Act of 1978. The Bank asserts that an exemptive order is both necessary and appropriate because it would afford foreign banks access to a source of U.S. dollars which is necessary in view of their activities in the Eurodollar market, and because it would benefit U.S. investors by making available additional opportunities for investment in short-term, prime quality securities.

Applicants further assert that the rationale for granting an exemptive order pursuant to section 6(c) of the Act to the Bank extends to the Issuer as well because of the direct-subsidiary relationship between them. It is stated that the purchase of the Issuer's Notes will be the equivalent of the purchase of obligations of the Bank because of the Bank's unconditional guarantee.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 13, 1985, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for the request, and the specific issues of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Divisio of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-21963; File No. S7-820]

Options Price Reporting Plan; Immediate Effectiveness of Amendment

On April 1, 1985, the participants in the "Options Price Reporting Authority" ("OPRA") submitted to the Commission, pursuant to Rule 11Aa3-2 under the Securities Exchange Act of 1934 ("Act"), an amendment to the "Plan for Reporting for Consolidated Options Last Sale Reports and Quotation Information,"[1] which was submitted to the Commission pursuant to section 11A(a)(3)(B) of the Act ("OPRA Plan").[2]

I. Description of the Amendment

OPRA proposes to establish a non-professional subscriber information fee which will permit individual investors to receive current options last sale and quotation information via vendor-provided information services at a much lower access charge than the current OPRA subscriber fee. OPRA indicates that the new fee will be available only to individual investors who use the information for personal, non-business, investment activities and who are not employed in securities or commodities-related businesses. OPRA indicates that subscribers who do not qualify for the non-professional subscriber fee will continue to have access to current options information upon payment of OPRA's regular Subscriber Fee. The proposed non-professional subscriber fee is a flat monthly rate of $2.00. Although the Amendment is intended to become effective upon filing, OPRA does not intend to implement its non-professional subscriber arrangements until May 1, 1985, with the intervening time period to be devoted to obtaining signatures of vendors on revised forms of vendor agreements, and distributing the new non-professional subscriber agreements.

II Purpose of the Amendment

OPRA indicates that the purpose of the proposed Non-professional Subscriber Information Fee is to broaden the dissemination of current options last sale and quotation information by permitting individual investors to become OPRA subscribers at a special, low monthly charge. Further, OPRA states that the new fee is available only to those who qualify, as described above, in order to protect the revenues that OPRA collects from its professional subscribers and that are necessary to defray a portion of the exchanges' costs of collecting, consolidating, processing, and disseminating options information.

III. Manner of Implementation of the Amendment

The proposed new fee will be implemented by adopting a new Non-professional Subscriber Application and Agreement,[3] and by amending the OPRA Vendor Agreement to permit Vendors to provide current options information to approve non-professional subscribers.[4] The amendments to the Vendor Agreement also impose upon vendors responsibility for obtaining and approving completed Non-professional Subcriber Applications and Agreements and for paying the Non-professional Subscriber Information Fee to OPRA on behalf of their customers who qualify for this fee. Billing and collection of the new fee from individual investors will also be the responsibility of vendors.

IV. Request for Comment

Pursuant to Rule 11Aa3-2(c)(3) under the Act, the amendment became effective upon filing with the Commission. The Commission, however, may summarily abrogate the amendment within 60 days of its filing and require refiling and approval of the amendment by Commission order pursuant to Rule 11Aa3-2(c)(2), if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, perfect the mechanisms of, a national market system, or otherwise in furtherance of the purposes of the Act. In order to assist the Commission in determining whether to abrogate the amendment and to require refiling and further review, interested persons are invited to submit their comments to John Wheeler, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549, within 21 days from the date of publication of this notice in the **Federal Register**. All communications should refer to File No. S7-820.

For the Commission, by the Division of Market Regulation pursuant to delegated authority, 17 CFR 200.30-3(a)(27).

Dated: April 19, 1985.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-21966; SR-NYSE-85-16]

Self-Regulatory Organizations; New York Stock Exchange, Inc., Filing of and Order Approving Proposed Rule Change on an Accelerated Basis; Relating to Proposed Changes in NYSE Rules 451 and 455 Concerning a Surcharge, Which May Be Charged by Member Organizations of Issuers, in Connection With Proxy Solicitations, for the Purpose of Recouping Direct and Indirect Expenses Associated With Start-up Costs.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 18, 1985, the New York Stock Exchange, Inc. ("NYSE") filed with the Securities and Exchange Commission the proposed rules changes described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rules changes from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rules Changes

The proposed rules changes amend Supplementary Material to Rule 451 and Supplementary Material to Rule 465 of the Exchange Rules concerning a proxy solicitation surcharge payable by issuers in connection with Rules 14b-1(c) and 17a-3(a)(9)(ii) under the Securities Exchange Act of 1934. The surcharge will be 20¢ for each set of proxy material, i.e., proxy statement and form of proxy (not including follow-up mailings), mailed in connection with the issuer's next annual meeting held after March 28, 1985.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rules Changes

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rules and discussed any comments it received on the proposed rules changes. The text of these statements may be examined at

---

[1] *See Securities Exchange Act Release No. 17638 (March 18, 1981).*

[2] The Commission previously, by order, granted registration to OPRA as a securities information processor. At that time, OPRA's functions were limited to the collection and dissemination of options last sale reports. *See* Securities Exchange Act Release No. 12035 (January 22, 1976), 41 FR 4369. In order to comply with the procedures of Rule 11Aa3-2 applicable to the establishment of fees of exclusive securities processors, OPRA has filed this fee as a Plan amendment under the Rule.

[3] *See* Exhibit A of OPRA's submission filed April 1, 1985, ("Plan Amendment").

[4] *Id.* Exhibit B.

the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant of such statements.

(A) Self-regulatory Organization's Statement of the Purpose of and, Statutory Basis for, the Proposed Rules Changes

(1) Purpose

The purpose of this rules filing is to revise the text of the Supplementary Material to Rule 451 and the Supplementary Material to Rule 465 to: (a) Conform to the rules changes establishing the proxy surcharge as approved by the Commission on March 28, 1985 (see Release No. 34-21900); and (b) clarify the date of applicability of the proxy surcharge.

The Board of Directors of the Exchange at its January 3, 1985 meeting approved the proposed rules changes to establish a proxy surcharge of $.20 per proxy to be charged for ". . . each of the next two annual meeting proxy solicitations. . .", subject to approval by the Commission. The amendments were intended to recoup direct and indirect expenses associated with start-up costs to be incurred by member organizations to comply with Rules 14b–1(c) and 17a–3(a)(9)(ii) under the Securities Exchange Act of 1934. Further, the recouping of member organizations' costs is a primary consideration in the establishment and implementation of the new system to improve the process by which issuers may identify and communicate with their security holders whose securities are held in nominee name through broker-dealers envisioned by Rule 14b–1(C). At the time the Board acted, January 3, 1985, the annual meeting proxy season had not actively commenced and it was anticipated that the proposed rules changes would receive approval by the Commission in time to apply to the millions of proxies traditionally forwarded during March for annual meetings to be held during the peak of the proxy season, April and May. On January 17, 1985, the Exchange Filed a Form 19b–4 (File No. SR–NYSE–85–2) concerning those rules changes.

On March 14, 1985, as the result of a request from the staff of the Securities and Exchange Commission for further supporting evidence of anticipated start-up costs required before acting upon the second stage of the proposed surcharge and in view of the need to begin instituting the surcharge as soon as possible, the Exchange urged that the Commission approve the first stage of the surcharge and agreed to amend Rules 451 and 465 as necessary prior to the implementation of the second stage in order to reflect the Commission's final decision.[1]

By March 28, 1985, the date the Commission approved the rules changes to cover the first stage $.20 surcharge, broker-dealers had already passed a peak mailing period, the latter two weeks of March. As a result, the amount reimbursed to broker-dealers would be significantly reduced unless the surcharge is assessed on the basis of annual meetings held after March 28, 1985, rather than on the basis of proxies mailed after that date. Representatives of both the issuer group and the broker-dealer community agree that the annual meeting date was intended to govern the billing of the surcharge.

(2) Basis

The statutory basis for the proposed rules changes is section 6(b)(5) of the Securities Exchange Act of 1934 as amended ("the Act") which, among other things, requires Exchange rules to be designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers, or to regulate by virtue of any authority conferred by this title matters not related to the purposes of this title or the administration of the Exchange.

In addition, the rules changes are intended to enhance the requirements of Rules 17a–3(a)(9)(ii) and 14b–1(c) under the Securities Exchange Act of 1934 concerning the reimbursement to brokers of costs associated with those rules, including start-up and overhead costs.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The proposed rules changes will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Any burden on competition is offset by the benefits of making available information as to non-objecting beneficial owners in compliance with SEC Rules.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rules Changes Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments concerning these rules changes.

III. Date of Effectiveness of the Proposed Rule Changes and Timing for Commission Action

The NYSE has requested that the proposed rule change be given accelerated effectiveness pursuant to section 19(b)(2) of the Act because the peak of the annual meeting season commences in April and accelerated approval will allow orderly billing and collection of the surcharge.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and in particular, the requirements of Section 6 and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that the purpose of the proposed rule change is to permit broker-dealers to recoup expenses associated with start-up costs incurred by NYSE member organizations to comply with Rules 14b–1(c) and 17a–3(a)(9)(ii) under the Act, and that such recoupment for the 1985 "proxy season" would be significantly reduced if broker-dealers could not impose the $.20 surcharge for proxy materials mailed prior to March 28, 1985 (the date of Commission approval of the proxy surcharge)[2] for meetings to be held after March 28, 1985. The proposed rule change is primarily technical in nature, and would permit NYSE member organizations to more fully recoup expenses incurred in connection with 1985 proxy solicitations. In addition, accelerated approval of the proposed rule change will permit more timely billing and collection procedures by NYSE member organizations with respect to the proxy surcharge.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 5th Street NW.,

[1] *See* letter from James E. Buck, Secretary, NYSE, to Michael Cavalier, Branch Chief, Division of Market Regulation, SEC, dated March 14, 1985

[2] Securities Exchange Act Release No. 21900, March 28, 1985; 50 FR 13297, April 3, 1985 (File No. SR–NYSE–85–2)

Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rules changes that are filed with the Commission, and all written communication relating to the proposed rules changes between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Branch, 450 5th Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the NYSE.

All submissions should refer to the file number in the caption above and should be submitted by May 16, 1985.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 19, 1985.

John Wheeler,

Secretary.

OES Advisory Committee; Partially Closed Meeting

The OES Advisory Committee will meet on May 15, 1985 at the National Academy of Sciences, 2101 Constitution Ave., NW., from 9:00 a.m. until 3:30 p.m. to discuss the Vienna Ozone Convention, acid rain studies, early warning systems for famine, international health strategies, the OES Action Plan, funding for UNFPA, the U.S. MAB program, and foreign policy implications of the space station. The sessions from 9:00 a.m. to 10:30 a.m. and from 1:30 p.m. to 3:30 p.m. will be open to the public.

That portion of the OES Advisory Committee meeting from 10:45 a.m. to 11:45 a.m. will not be open to the public inasmuch as the discussion will involve classified material. Accordingly, the determination has been made to close this session pursuant to section 10(d) of the Federal Advisory Committee Act, 5 U.S.C. App. I, S10(d) and 5 U.S.C. 552b (c)(1) and (c)(9).

Requests for further information on the meeting should be directed to Mr. Clement, U.S. Department of State, Washington, D.C. 20520. Mr. Clement can be reached by telephone on (202) 632-2764.

Dated: April 19, 1985.

Harry R. Marshall, Jr.,

Deputy Assistant Secretary for Oceans and International Environmental and Scientific Affairs.

Paperwork Reduction Act of 1980; Forms Under Review by the Office of Management and Budget

AGENCY: Tennessee Valley Authority.

ACTION: Forms under review by the Office of Management and Budget.

SUMMARY: The Tennesee Valley Authority (TVA) has sent to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

Requests for information, including copies of the forms proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be directed to the Agency Clearance Officer and also to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: Desk Officer for Tennessee Valley Authority, 395–7313.

Agency Clearance Officer: Mark R. Winter, Tennessee Valley Authority, 100 Lupton Building, Chattanooga, TN 37401; (615) 751–2524, FTS 858–2524.

Type of Request: Regular Submission
Title of Information Collection: Storage Water Heater Program Specification and Work Completion Form
Frequency of Use: On Occasion
Type of Affected Public: Individuals
Small Businesses or Organizations Affected: No
Federal Budget Functional Category Code: 271
Estimated Number of Annual Responses: 1,000
Estimated Total Annual Burden Hours: 217
Need For and Use of Information:

The Storage Water Heater Program is designed to encourage installation of storage water heaters to reduce TVA's future peak demand for electricity.

This collection is the minimum information required to administer the Storage Water Heater Program, provide for quality assurance, develop marketing data and strategy, and maintain program checks and balances.

Dated: April 15, 1985.

John W. Thompson,

Manager of Corporate Services, Senior Agency Official.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 85–031]

Rules of the Road Advisory Council; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. I) notice is hereby given of a meeting of the Rules of the Road Advisory Council. The meeting will be held on Thursday and Friday, June 6 and 7, 1985, at the Marriot Copley Hotel/Copley Place, 110 Huntington Avenue, Boston, Massachusetts. On both days the meeting is scheduled to begin at 8:30 a.m. and end at 4:30 p.m. The agenda for the meeting consists of the following items:

1. International Maritime Organization and COLREG Matters.
2. Coast Guard Status Reports and Information Items:

(a) Amendment of Inland Rule 24(i) and Rule 14.

(b) Bridge-to-Bridge Radiotelephone on the Great Lakes, exemption to the Bridge-to-Bridge Radiotelephone Act and amendment to the U.S./Canadian Great Lakes Agreement.

(c) Divers Flag.

(d) Enforcement of Channel 16 Requirements and FCC changes.

(e) Operation of Channel 22 in U.S. ports.

(f) Amendment of Rule 3(g)(v), 27(b) and 27(f).

(g) Demarcation Line update.

(h) Written warnings for violation of 33 CFR 88.05.

(i) Fishing Vessel Safety Guide.

3. Discussion of the term "efficient sound signal" (Rule 33(b)).
4. Revision of Inlkand Rule 24.
5. Warning signals for vessels leaking dangerous substances.
6. Vertical sector light requirements for unmanned barges.
7. Western Rivers/Specificed waters by the Secretary—

(a) To include rew Rule 14(d) on specified waters as published in 33 CFR 89.25.

(b) Discussion on amending the definition of "Western Rivers" to include the waters specified in 33 CFR 89.25.

Attendance is open to the public. With advance notice, members of the public may present oral statements at the meeting. Persons wishing to present oral statements should notify the Acting Executive Director no later than the day before the meeting. Any member of the public may present a written statement to the council at any time.

Additional information may be obtained from: Lieutenant Commander Charles K. Bell, Acting Executive Director, Rules of the Road Advisory Council, U.S. Coast Guard (G–NSR–3/14), Washington, D.C. 20593. Telephone (202) 245–0108.

Dated: April 17, 1985

BILLING CODE 4910–14–M

Federal Highway Administration

Environmental Impact Statement; Fulton-DeKalb Counties, Georgia

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Fulton and DeKalb Counties, Georgia.

FOR FURTHER INFORMATION CONTACT: David H. Densmore, Development Engineer, Federal Highway Administration, Suite 300, 1720 Peachtree Street NW., Atlanta, Georgia 30367, telephone (404) 881–4750, or Peter Malphurs, State Environmental/

Location Engineer, Georgia Department of Transportation, 65 Aviation Circle, Atlanta, Georgia 30336, telephone (404) 696-4634.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Georgia Department of Transportation (Georgia DOT) will prepare an environmental impact statement (EIS) on a proposal to widen the existing I-20 in Atlanta from Hill Street eastward through the Columbia Drive interchange, for an approximate distance of 8.7 miles.

Presently I-20 within the project limits has three travel lanes in each direction. The median consists of concrete curb and gutter with guardrail down the center. All of the cross streets pass over I-20. There are interchanges at Hill Street, Boulevard, Moreland Avenue, Maynard Terrace, Glenwood Avenue, Flat Shoals Road (2), Gresham Road, Candler Road, and Columbia Drive. There are overpasses for Cherokee Avenue, A & WP Railroad and Lloyd Road.

The proposed project would add two 12-foot concrete travel lanes, paved shoulders and median barrier in each direction for the entire lenth of the projet. All overpass bridges would have to be replaced to provide minimum clearance.

Alternatives under consideration include: (1) Taking no action; and (2) constructing the two additional 12-foot travel lanes and shoulders in each direction for the length of the project area.

Letter describing the proposed action and soliciting comments have been sent to appropriate Federal, State and local agencies, and to private organizations and citizens who have previously expressed interest in this proposal. Formal scoping meetings on the proposed project have been held by Georgia DOT for input on the local level. These meetings will be on-going throughout project development. Additional scoping for input from State and Federal agencies is not planned at this time. A public hearing will be held after preparation of a draft EIS. Public notice will be given of the time and place of the hearing.

To ensure that the full range of issues related to this proposed project are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

The Catalog of Federal Domestic Assistance Program Number is 20.205, *Highway Research, Planning and Construction.* The provisions of OMB Circular No. A-95 regarding State and local clearinghouse review of Federal and Federally assisted programs and projects apply to this program.

Issued on: April 17, 1985.

David H. Densmore,

Development Engineer.

[FR Doc. 85-10056 Filed 4-24-84; 8:45 am]

BILLING CODE 4910-22-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Dept. Circ. Public Debt Series—No. 11-85]

Treasury Notes of April 30, 1987, Series U-1987

April 18, 1985.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $9,000,000,000 of United States securities, designated Treasury Notes of April 30, 1987, Series U-1987 (CUSIP No. 912827 SC 7), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the Notes may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The Notes will be dated April 30, 1985, and will accrue interest from that date, payable on a semiannual basis on October 31, 1985, and each subsequent 6 months on April 30 and October 31 through the date that the principal becomes payable. They will mature April 30, 1987, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next-succeeding business day.

2.2. The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. Notes in registered definitive form will be issued in denominations of $5,000, $10,000, $100,000, and $1,000,000. Notes in book-entry form will be issued in multiples of those amounts. Notes will not be issued in bearer form.

2.5. Denominational exchanges of registered definitive Notes, exchanges of Notes between registered definitive and book-entry forms, and transfer will be permitted.

2.6. The Department of the Treasury's general regulations governing United States securities apply to the Notes offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20239, prior to 1:00 p.m., Eastern Standard time, Wednesday, April 24, 1985. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, April 23, 1985, and received no later than Tuesday, April 30, 1985.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $5,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the

Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.500. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of prices per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in section 3.5 must be made or completed on or before Tuesday, April 30, 1985. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Friday, April 26, 1985. In addition, Treasury Tax and Loan Note Option Depositaries may make payment for the Notes allotted for their own accounts and for accounts of customers by credit to their Treasury Tax and Loan Note Accounts on or before Tuesday, April 30, 1985. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted are not required to be assigned if the new Notes are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new Notes are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (Notes offered by this circular) in the name of (name and taxpayer identifying number)". Specific instructions for the issuance and delivery of the new Notes, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment must be delivered at the expense and risk of the holder.

5.4. Registered definitive Notes will not be issued if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (e.g., an individual's social security number or an employer identification number) is not furnished. Delivery of the Notes in registered definitive form will be made after the requested form of registration has been validated, the registered interest account has been established, and the Notes have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, to issue and deliver the Notes on full-paid allotments, and to maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

Carole Jones Dineen,

Fiscal Assistant Secretary.

BILLING CODE 4810-40-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Implementation of Modifications in Specialty Steel Import Relief

AGENCY: Notice.

SUMMARY: This notice establishes country allocations of the quotas presently applicable to imports of certain specialty steel and makes modifications in the Tariff Schedules of the United States to implement changes in the import relief. The notice provides separate allocations within the stainless steel bar, stainless steel wire rod, and alloy tool steel categories for Brazil, and within the stainless steel bar category for the Republic of Korea.

EFFECTIVE DATE: April 20, 1985.

FOR FURTHER INFORMATION CONTACT: Maria T. Springer, United States Trade Representative, (202) 395–4946.

SUPPLEMENTARY INFORMATION: Presidential Proclamation 5074 of July 19, 1983 (48 FR 33233), provided for the temporary imposition of increased tariffs and quantitative restrictions on certain stainless steel and alloy tool steel imported into the United States, pursuant to section 203 of the Trade Act of 1974.

Proclamation 5074 authorizes the U.S. Trade Representative to take such actions and perform such functions for the United States as may be necessary to administer and implement the relief, including negotiating orderly marketing agreements and allocating quota quantities on a country-by-country basis. The U.S. Trade Representative is also authorized to make modifications in the Tariff Schedules of the United States (TSUS) headnote or items proclaimed by the President in order to implement such actions.

Pursuant to the above authority, the U.S. Trade Representative has determined that the quota quantity should be reallocated to provide country allocations for certain steel products for Brazil and the Republic of Korea.

In conformity with the above, subpart A, part 2 of the Appendix to the TSUS is modified as follows:

(1) Item 926.11 is modified to add to the country allocations, in alphabetical order, "Brazil" and the "Republic of Korea", and also to add corresponding quota quantities of "850" short tons and "730" short tons, respectively, for the period April 20, 1985 through July 19, 1985. Item 925.11 is further modified by changing the quota quantity for "Other" countries to "541" short tons for that same restraint period.

(2) Item 926.16 is modified to add "Brazil" to the country allocations, and also to add a corresponding quota quantity of "550" short tons for the period April 20, 1985 through July 19, 1985. Item 926.16 is further modified by changing the quota quantity for "Other" countries to "1,610" short tons for that same restraint period.

(3) Item 926.21 is modified to add "Brazil" to the country allocations, and also to add a corresponding quota quantity of "550" short tons for the period April 20, 1985 through July 19, 1985. Item 926.21 is further modified by changing the quota quantity for "Other" countries to "1,337" for that same restaint period.

William E. Brock,

United States Trade Representative.

BILLING CODE 3190-01-M

VETERANS ADMINISTRATION

Advisory Committee on Former Prisoners of War; Meeting

The Veterans Administration gives notice under Pub. L. 92–463, section 10(a)(2) that a meeting of the Advisory Committee on Former Prisoners of War will be held at the Veterans Administration Central Ofice, 810 Vermont Avenue, NW, Washington, DC 20420, on June 17 and 18, 1985. The purpose of the Committee is to consult with and advise the Administrator of Veterans' Affairs on the administration of benefits under title 38, United States Code, for veterans who are former prisoners of war and on the need of such veterans for compensation, health care, and rehabilitation.

The meeting will convene at 9 a.m. both days in the Omar N. Bradley Conference Room. This meeting will be open to the public up to the seating capacity of the room. Because this capacity is limited, it will be necessary for those wishing to attend to contact Miss Linda Gardner, Administrative Assistant to the Chief Benefits Director, Veterans Administration Central Office (phone 202/389–2455) prior to June 7, 1985.

Members of the public may direct questions or submit prepared statemenis for review by the Committee in advance of the meeting, in writing only, to Mr. H.B. Mars, Deputy Director, Compensation and Pension Service, Department of Veterans Benefits, Room 400, Veterans Administration Central Office. Submitted material must be received at least five days prior to the meeting. Such members of the public may be asked to clarify submitted material prior to consideration by the Committee.

Summary minutes of the meeting and rosters of the Committee members may be obtained from Miss Linda Gardner at the aforementioned address.

Dated: April 17, 1985.

By direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

[FR Doc. 85–10011 Filed 4–24–85; 8:45 am]

BILLING CODE 8320-01-M

Career Development Committee; Availability of Annual Report

Under section 10(d) of Pub. L. 92–463 (Federal Advisory Committee Act) notice is hereby given that the Annual Report for the calendar year 1984 has been issued for the Veterans Administration, Medical Research Service, Career Development Committee.

The report summarizes the activities of the committee on matters related to the review and evaluation of Career Development applications. It is available for public inspection at two locations:

Library of Congress, Serial and Government Publications Reading Room LM 133, Madison Building, Washington, DC 20540

and

Veterans Administration, Medical Research Service, Career Development Program, Room 757, 810 Vermont Avenue, NW, Washington, DC 20420.

Dated: April 17, 1985.

By direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

[FR Doc. 85–10004 Filed 4–24–85; 8:45 am]

BILLING CODE 8320-01-M

Cooperative Studies Evaluation Committee; Meeting

The Veterans Administration gives notice under Public law 92–463 that a meeting of the Cooperative Studies Evaluation Committee, authorized by 38 U.S.C. 4101, will be held at the Holiday Inn Thomas Circle, Massachusetts Ave., at Thomas Circle, NW, Washington, DC 20005, on June 4, 1985. The meeting will be for the purpose of reviewing proposed cooperative studies and advising the Veterans Administration on the relevance and feasibility of the studies, the adequacy of the protocols, and the scientific validity and propriety of technical details, including protection of human subjects. The Committee advises the Director, Medical Research

Service, through the Chief of the Cooperative Studies Program, on its findings.

The meeting will be open to the public up to the seating capacity of the room from 7:30 to 8:00 a.m., on June 4, to discuss the general status of the program. To assure adequate accommodations, those who plan to attend should contact Dr. Ping C. Huang, Coordinator, Cooperative Studies Evaluation Committee, Veterans Administration Central Office, Washington, DC (202–389–3702), prior to May 24, 1985.

The meeting will be closed from 8:00 a.m. to 5:30 p.m. on June 4, for consideration of specific proposals in accordance with provisions set forth in subsection 10(d) of Pub. L. 92–463, as amended by section 5(c) of Pub. L. 94–409, and subsection (c)(6) and (c)(9)(B) of section 552b, title 5, United States Code. During this portion of the meeting, discussions and decisions will deal with qualifications of personnel conducting the studies and the medical records of patients who are study subjects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Additionally, premature disclosure of the Committee's recommendations would likely frustrate implementation of final proposed actions.

Dated: April 17, 1985.
By direction of the Administrator.

Rosa Maria Fontanez,
Committee Management Officer.
[FR Doc. 85–10003 Filed 4–24–85; 8:45 am]
BILLING CODE 8320–01–M

Scientific Review and Evaluation Board for Rehabilitation Research and Development; Meeting

In accordance with Pub. L. 92–463, the Veterans Administration gives notice of a meeting of the Scientific Review and Evaluation Board for Rehabilitation Research and Development. This meeting will convene at the Dupont Plaza Hotel, 1500 New Hampshire Avenue, NW, Washington, DC 20036, July 8 through 10, 1985, beginning at 9 a.m. on Monday. The propose of the meeting is to review rehabilitation research and development applications for scientific and technical merit and to make recommendations to the Director, Rehabilitation Research and Development Service regarding their funding.

The meeting will be open to the public (to the seating capacity of the room) at the start of the July 8th session for approximately one hour to cover administrative matters and to discuss the general status of the program and the administrative details of the review process. During the closed session, the Board will be reviewing research and development applications. This review involves oral comments, discussion of site visits, staff and consultant critiques of research protocols, and similar analytical documents that necessitate the consideration of the personal qualifications, performance and competence of individual research investigators. Disclosure of such information would constitute a clearly unwarranted invasion of personal privacy. Proprietary data from contractors and private firms will also be presented and this information should not be disclosed in a public session. Premature disclosure of Board recommendations would be likely to significantly frustrate implementation of final proposed actions. Thus, the closing is in accordance with section 552b, Subsections (c)(4), (c)(6), and (c)(9)(B), Title 5, United States Code and the determination of the Administrator of Veterans Affairs under Section 10(d) of Public Law 92–463 as amended by Section 5(c) of Pub. L. 94–409.

Due to the limited seating capacity of the room those who plan to attend the open session should contract Dr. Larry P. Turner, Administrative Officer, Rehabilitation Research and Development Service, Veterans Administration Central Office, 810 Vermont Avenue, NW, Washington, DC 20420 (Phone: (202) 389–5177) at least 5 days before the meeting.

Dated: April 17, 1985.
By Direction of the Administrator.

Rosa Maria Fontanez,
Committee Management Officer.

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Tuesday, April 30, 1985, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Application for consent to merge, establish four branches and redesignate the main office:

SouthTrust Bank of Coosa County, Goodwater, Alabama, an insured State nonmember bank, for consent to merge, under its charter and with the title "SouthTrust Bank of Central Alabama," with Alexander City Bank, Alexander City, Alabama, to establish the four offices of Alexander City Bank as branches of the resultant bank, and to redesignate the present main office of Alexander City Bank as the main office of the resultant bank.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 461,212-SR—Citizens Bank, Tillar, Arkansas
Case No. 46,213-NR—Ranchlander National Bank, Melvin, Texas

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications, requests, or actions involving administrative enforcement proceedings approved by the Director or an Associate Director of the Division of Bank Supervision and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Report of the Director, Division of Liquidation:

Memorandum re: Quarterly Report of Actions Approved Under Delegated Authority as of September 30, 1984.

Discussion Agenda:

Memorandum and resolution re: Proposed amendments to Part 332 of the Corporation's rules and regulations, entitled "Powers Inconsistent with Purposes of Federal Deposit Insurance Law," which amendments will govern insured banks' direct and indirect involvement in insurance, real estate, and guarantor or surety activities.

Memorandum and resolution re: Petition for Public hearing on proposed amendments to Part 332.

Memorandum and resolution re: Issurance of a Statement of Policy Regarding Disclosure by the FDIC of Statutory Enforcement Actions which policy provides for disclosure and publication of all final orders issued by the Corporation under its statutory enforcement authority.

Memorandum and resolution re: Solicitation of comment on two proposed alternatives for increasing market discipline for FDIC-insured banks and thereby increasing the safe and sound operation of banks and decreasing the risk to the deposit insurance fund: (1) modification of the deposit payoff procedures and (2) increased capital requirements.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, NW., Washington, D.C.

Request for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: April 23, 1985.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary

4

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5

U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Tuesday, April 30, 1985, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Application for Federal deposit insurance:

Utah Financial Thrift and Loan, an operating noninsured industrial loan company located at 4626 Highland Drive, Salt Lake City, Utah.

Application for consent to convert into a non-FDIC-insured institution:

First American Bank and Trust, North Palm Beach, Florida.

Request for financial assistance pursuant to section 13(c) of the Federal Deposit Insurance Act:

Name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii)).

Memorandum regarding the Corporation's assistance agreement with an insured bank under section 13 of the Federal Deposit Insurance Act.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street NW., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: April 23, 1985.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

5

FEDERAL DEPOSIT INSURANCE CORPORATION

Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act", (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 2:30 p.m. on Monday, April 22, 1985, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Mr. John F. Downey, acting in the place and stead of Director C.T. Conover (Comptroller of the Currency), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Application of First Community Bank, Whitehall, Ohio, an insured State nonmember bank, for consent to acquire certain assets of and assume the liability to pay certain deposits made in the East Broad Street office of First State Savings & Loan Company, Whitehall, Ohio, a non-federally-insured institution.

Application of Capital Bank, North Bay Village, Florida, an insured State nonmember bank, for consent to merge, under its charter and title, with Central Bank, Delray Beach, Florida, and for consent to establish the sole office of Central Bank as a branch of the resultant bank.

Notice of acquisition of control: First Beverly Bank, Beverly Hills, California.

The Board further determined, by the same majority vote, that no earlier notice of these changes in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Dated: April 23, 1985

Federal Deposit Insurance Corporation.

Part II

Department of the Treasury

Internal Revenue Service

26 CFR Parts 1 and 602

Income Taxes; Questions and Answers Relating to Domestic Matters Under Section 338 of the Internal Revenue Code of 1954; Temporary Regulations and Proposed Rule

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 602

[T.D. 8021]

Income Taxes; Questions and Answers Relating to Domestic Matters Under Section 338 of the Internal Revenue Code of 1954; Temporary Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations relating to miscellaneous domestic matters under section 338 of the Internal Revenue Code of 1954 ("Code"), as added by the Tax Equity and Fiscal Responsibility Act of 1982 ("TEFRA") and as amended by the Technical Corrections Act of 1982 ("TCA") and the Tax Reform Act of 1984 ("TRA"). The temporary regulations provide guidance to domestic taxpayers subject to the provisions of section 338. The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking in the proposed rules section of this issue of the **Federal Register**.

DATE: These regulations are effective April 25, 1985. These temporary regulations generally apply to stock acquisitions made after August 31, 1982.

FOR FURTHER INFORMATION CONTACT: Duane H. Pellervo of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3458, not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

This document adds new temporary regulations § 1.338–4T to Part 1 of Title 26 of the Code of Federal Regulations ("CFR"). This document also amends temporary regulations §§ 1.338–1T and 1.338–2T, which were published as T.D. 7942 in the **Federal Register** on February 8, 1984 (49 FR 4722), and which were amended and redesignated (as §§ 1.338–1TR and 1.338–2T) by temporary regulations published as T.D. 7975 in the **Federal Register** on September 6, 1984 (49 FR 35086). Finally, this document amends the table of OMB control numbers in Part 602 of Title 26 of the CFR to reflect the OMB control number assigned to § 1.338–4T.

Substantially all of new § 1.338–4T is in the form of questions and answers, and provides guidance on a broad range of domestic issues under section 338 of the Code, as added by section 224 of TEFRA (Pub. L. No. 97–248; 96 Stat. 485) and as amended by section 306(a)(8) of the TCA (Pub. L. No. 97–448; 96 Stat. 2402) and section 712(k) of the TRA (Pub. L. No. 98–369; 98 Stat. 946). The temporary regulations added and amended by this document will remain in effect until superseded by later temporary or final regulations relating to these matters.

Temporary Extension of Time To Make Section 338, Election Expires on August 23, 1985

Temporary regulations under section 338 were published as T.D. 7942 in the **Federal Register** on February 8, 1984 (49 FR 4722), and were amended and redesignated by temporary regulations published as T.D. 7975 in the **Federal Register** on September 6, 1984 (49 FR 35086). Temporary regulations §§ 1.338–1T through 1.338–3T. Temporary regulations § 1.338–1T provides that elections under section 338 for acquisitions occurring after August 31, 1982, need not be filed before the later of (1) the 60th day after the date of publication of temporary regulations § 1.338–4T or (2) the otherwise applicable due date. Section 1.338–1T(c). The extension also applies to the following provisions in those temporary regulations: Sections 1.338–1T(f)(7)(ii) and 1.338–2T(e)(6) (time to select taxable year of new target); §§ 1.338–1T(h) and 1.338–2T(h) (waiver of certain additions to tax and times to act); and § 1.338–1T(j)(2) (perfecting declaration relating to elections under section 338 made notwithstanding suspension applicable to certain corporations). This document contains temporary regulations § 1.338–4T. Because of the length and complexity of temporary regulations § 1.339–4T, however, the due dates specified above are extended by this document to a date not earlier than the 120th day after the date of publication of this document, *i.e.*, August 23, 1985. A special suspension of time to make an election under section 338 for foreign targets and certain other corporations that may be affected by future regulations under section 338(h)(6)(B) remains in affect. See § 1.338–1T(j)(1).

Operation of Section 338

Section 338 generally provides that, if a corporation ("target") is acquired by another corporation ("purchasing corporation") in a qualified stock purchase, the purchasing corporation may elect (or may be deemed to elect under certain consistency rules) to have the target treated as if it: (1) Sold all of its assets (as "old target") at fair market value at the close of the day on which the qualified stock purchase occurred ("acquisition date") and (2) purchased those assets as a new corporation ("new target") at the beginning of the following day for an amount generally equal to the price paid by the purchasing corporation for target stock plus liabilities of target and other relevant items. Section 338 (a) and (b). The deemed sale of assets by old target generally is governed by the nonrecognition rule of section 337. The application of section 337 is limited by section 338(c)(1), however, if the maximum percentage (by value) of target stock held by the purchasing corporation during a one-year period beginning on the acquisition date is less than 100 percent. In general, the tax attributes of old target are not available to new target. The net effect of a section 338 election is that the purchasing corporation obtains a basis in target assets that generally reflects the price it paid for target stock. Under former section 334(b)(2), which was repealed when section 338 was enacted, it was necessary to liquidate target in order to obtain similar treatment.

In order to prevent certain abuses, section 338 contains elaborate consistency rules that operate to force, or prohibit, the application of section 338 to certain acquisitions. Section 338 (e) and (f). In order to prevent a corporation from selectively obtaining, from the same affiliated group, both assets at a cost basis and tax attributes, the asset consistency rule of section 338(e) may require a deemed section 338 election to be made for a target if the purchasing corporation acquires, at any time during the consistency period (as defined in section 338(h)(4)) applicable to target, assets of target or its target affiliate (as defined in section 338(h)(6)). Exceptions to the asset consistency rule are contained in section 338(e)(2), which excepts sales in the ordinary course of the transferor's trade or business, acquisitions in which the transferee's basis is measured wholly by reference to the transferor's basis, and acquisitions occurring before September 1, 1982. Authority is provided in section 338(e)(2)(D) for regulations to permit exceptions for other asset acquisitions that meet "such conditions as such regulations may provide."

Under the stock consistency rules of section 338(f), a corporation that, within a specified period, makes qualified stock purchases of two or more corporations from, generally, the same affiliated group will be subject to section 338 treatment for all such corporations or for none of them. Section 338(i) grants the

Secretary broad authority to prevent circumvention of the consistency rules.

Overview of Temporary Regulations § 1.338–4T

These temporary regulations provide guidance on a broad range of issues under section 338. These temporary regulations deal principally with domestic aspects of section 338. Regulations dealing with international aspects of section 338 are the topic of a separate regulations project to be published in the near future.

Section 1.338–4T(c) of the temporary regulations contains questions and answers relating primarily to the qualified stock purchase requirement. Section 1.338–4T(d) deals with the effect of post-acquisition events (*e.g.*, a disposition of purchasing corporation or target) on the eligibility of target for a section 338 election and with the requirement for a corporate purchaser.

Section 1.338–4T(e) provides guidance on the application of the stock consistency rules of section 338(f).

Section 1.338–4T(f) provides guidance on the application of the asset consistency rule of section 338(e)(1). Rules are provided in § 1.338–4T for the application of a number of exceptions to the asset consistency rule, including an exception for sales in the ordinary course of the transferor's trade or business (section 338(e)(2)(A)) and an exception for acquisitions in which the transferee's basis is determined wholly by reference to the transferor's basis (section 338(e)(2)(B)). A number of exceptions also are provided under the regulatory authority granted in section 338(e)(2)(D), including an exception for *de minimis* asset acquisitions. Also under the authority of section 338(e)(2)(D), § 1.338–4T(f) provides rules for making a protective carryover basis election ("protective carryover election"), pursuant to which a deemed election under section 338(e)(1) may be avoided. Section 1.338–4T(f) also describes the circumstances under which a carryover basis election by affirmative action ("affirmative action carryover election") is made. The rules relating to the carryover basis election exception are described in more detail later in this preamble.

Special consistency rules are provided in § 1.338–4T(g). Pursuant to § 1.338–4T(g)(1), the consistency period specified in section 338(h)(4)(A) and the 12-month acquisition period specified in section 338(h)(1) will be extended in certain cases. Section 1.338–4T(g)(2) contains detailed rules designed to prevent avoidance of the consistency rules through the device of causing third parties not included in the P group to buy assets of target or a target affiliate (or stock in target or a target affiliate).

Guidance on the calculation of the aggregate price at which old target is deemed to sell all of its assets in the deemed sale under section 338 is provided in § 1.338–4T(h). The deemed sale price is significant because it is used to measure certain tax liabilities of target that result from the deemed sale and that are included in the total amount that is allocated as basis among the assets of new target. Regulatory authority is provided in section 338(h)(11) to devise an elective formula for determining the deemed sale price that takes into account liabilities of target and other relevant items. The sample formula is provided in § 1.338–4T(h).

Section 1.338–4T(j) provides general guidance on the calculation of the total amount to be allocated as basis among the assets of new target. Among other matters, guidance on making the election described in section 338(b)(3) (relating to an election to adjust the basis of nonrecently purchased target stock) is provided in § 1.338–4T(j). Although section 338(b)(5) grants regulatory authority for determining how the aggregate deemed purchase amount is to be allocated among the assets of the target, these temporary regulations generally do not address that issue. That issue is the topic of a separate regulations project to be published in the near future.

Section 1.338–4T(k) provides guidance on miscellaneous matters affecting old T. Among other matters, basic guidance on the operation of section 338(h) (10), (12), and (15) is provided here. Section 338(h)(10) provides an elective procedure whereby the seller of target in certain cases may treat the stock sale as an asset sale. Section 338(h)(12) permits the nonrecognition rule of section 337 to apply in certain cases to actual asset sales made by the target before its acquisition date. Section 338(h)(15) permits several targets acquired from the same consolidated return group on the same acquisition date to file a combined deemed sale return.

Section 1.338–4T(l) provides guidance on miscellaneous matters affecting new T, including the effect of a section 338 election on employment taxes and employee plans.

Carryover Basis Election and Deemed Election

Relationship Between Carryover Basis Election and Deemed Election Under Section 338(e)(1)

The purchasing corporation ("P") generally may make an election under section 338(g) ("express election") with respect to its qualified stock purchase of the stock of target ("T") at any time during the period ending on the 15th day of the 9th month beginning after the month in which the acquisition date occurs. If, however, P wishes to avoid making a section 338 election for T, that objective can be achieved with certainty under the temporary regulations by filing a protective carryover election for T under § 1.338–4T(f)(6) before the close of the period within which to make an express election for T. In no case will a deemed election under section 338(e)(1) be imposed if the protective carryover election is made.

If the P group makes a tainted asset acquisition and neither a section 338 election nor a protective carryover election is made for T, then the tainted asset acquisition by a member of the P group will cause an affirmative action carryover election for T under the temporary regulations. An asset acquisition is a tainted asset acquisition if it is described in section 338(e)(1) and is not subject to an exception (other than the carryover basis election exception) to section 338(e)(1). The District Director may override the affirmative action carryover election and cause a deemed election under section 338(e)(1) for T, however, if that result is appropriate to carry out the purposes of the consistency rules of section 338 (e), (f), or (i). These rules were designed to encourage timely elections (either protective carryover elections or express elections) and to minimize or eliminate plans to circumvent the consistency rules.

Effect of Carryover Basis Election

A purchasing corporation that makes a carryover basis election (either a protective or an affirmative action carryover election) is bound by all of the terms and conditions imposed by these temporary regulations with respect to tainted asset acquisitions, as are all of the corporations that are members of the purchasing corporation's affiliated group. The terms and conditions generally are designed to eliminate circumvention of the consistency rules of section 338 (e), (f), or (i) that otherwise could result from a tainted asset acquisition. The basic consequence of a carryover basis election is that the P group member acquiring an asset in a tainted asset acquisition takes a carryover basis in that asset. This consequence was specifically contemplated in the legislative history of the Tax Reform Act of 1984, which expanded the grant of regulatory authority provided in sections

338(e)(2)(D) and (i). See H.R. Rep. No. 861, 98th Cong., 2d Sess. 1221 (1984) (Conference Report).

The most significant effect of a carryover basis in the transferred asset is that the same increment of gain with respect to that asset potentially will be taxed twice, *i.e.*, once to the corporation selling the asset to the P group member and again to the P group member upon a subsequent disposition of the asset. In order to ameliorate this result, yet without permitting circumvention of the consistency rules, the temporary regulations provide limited relief (depending upon the fact situation) from the carryover basis consequence in the three basic fact situations in which a tainted asset acquisition occurs.

First, if the transferor of the asset in a tainted asset acquisition is not a member of the P group at the time of the tainted asset acquisition, then relief is provided if, within a specified period, the transferee P group member ("P") transfers the asset in a qualifying transaction to another P group member ("P1") in which P holds stock. The relief in such a case takes the form of an increase in P's basis in P1 stock, generally in an amount equal to the excess of P's basis in the transferred asset absent the carryover basis election over P's carryover basis in that asset. Such excess is only added on the first transfer; subsequent transfers of the tainted asset do not result in similar relief. This relief in the form of stock basis is available only in connection with a *protective* carryover election.

Second, if the transferor of the asset in a tainted asset acquisition is a member of the P group at the time of the tainted asset acquisition but does not join in a consolidated return with the transferee P group member for the year of the asset acquisition, then relief is provided if an offset prohibition election is made. The principal consequences of an offset prohibition election are that: (1) The transferee P group member takes a basis in the asset that is determined without regard to the carryover basis election and (2) the transferor's gain on the transfer cannot be offset by any deductions of the transferor and the tax attributable to that gain cannot be offset by certain credits of the transferor. Several other special rules also apply. The offset prohibition election can be made only in connection with a *protective* carryover election.

Third, if the transferor of the asset in a tainted asset acquisition is a member of the P group at the time of the asset acquisition and also joins in a consolidated return with the transferee P group member for the year of the asset acquisition, then relief is provided in the form of a general adherence to the principles of the consolidated return regulations governing deferred intercompany transactions. Although, under the consolidated return regulations, the transferee P group member therefore may obtain a cost basis in the transferred asset, the rules governing deferral and restoration of the transferor P group member's gain in the acquisition generally ensure that the P group as a whole obtains no benefit from the cost basis. The principal exception provided by these temporary regulations to the consolidated return regulations applies if deferred gain in the tainted asset acquisition is restored because the transferor ceases to be a member of the P group. In such a case, the consolidiated return restoration rules may not operate effectively to ensure that the principles of the consistency rules are not avoided. Thus, these temporary regulations alter these rules. The transferee P group member's basis in the acquired asset is reduced by the amount of the restored deferred gain unless an offset prohibition election applies to the acquisition. Again, such offset prohibition election can be made only in connection with a protective carryover election. The principal consequences of an offset prohibition election in the consolidated return context are that: (1) The basis in the acquired asset is not reduced and (2) the restored deferred gain that otherwise is the measure of the step-down cannot be offset by any deductions of the P group and the tax attributable to that gain cannot be offset by certain credits of the P group. Several other special rules also apply.

Comments Requested Regarding Effect of Contingent Payments and Liabilities

This document does not deal with the effect of contingent payments and liabilities on the calculation of either the deemed sale price or the total amount to be allocated as basis among the assets of new target. No inference as to the Treasury's position on these matters should be drawn from the contents of these temporary regulations. Comments are invited as to the appropriate treatment of such payments and liabilities.

Appropriate Amendments to Regulations Under Affected Sections To Be Made

If the rules in these temporary regulations that relate to sections of the Code other than section 338 are issued in the form of final regulations, the appropriate regulations sections will be amended to reflect those rules (see, *e.g.*, the regulations under sections 48, 79, 83, 168, and 304).

Amendments to §§ 1.338–1T and 1.338–2T

Section 1.338–1T is amended by this document to reflect the fact that the due date for making a section 338 election is a date no earlier than August 23, 1985. (A special suspension of time to make an election under section 338 for foreign targets and certain other corporations that may be affected by future regulations under section 338(h)(6)(B) remains in effect. See § 1.338–1T(j)(1). In addition, § 1.338–1T(e) is amended to reflect new procedure requirements and to provided additional time within which to satisfy the requirements specified therein. Finally, several additional amendments are made to conform §§ 1.338–1T and 1.338–2T with the provisions of § 1.338–4T.

Question and Answer Format

As noted above, substantially all of new § 1.338–4T is presented in the form of questions and answers. The questions and answers are not intended to address comprehensively all of the issues raised by section 338. Taxpayers may rely on these questions and answers, which the Internal Revenue Service will follow in resolving issues arising under section 338. No inference should be drawn, however, regarding questions not expressly raised and answered.

Regulatory Flexibility Act; Executive Order 12291; and Paperwork Reduction Act of 1980

A general notice of proposed rulemaking is not required by 5 U.S.C. 553 for temporary regulations. Accordingly, these temporary regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6). The Commissioner of Internal Revenue has determined that this temporary rule is not a major rule as defined in Executive Order 12291 and that regulatory impact analysis therefore is not required. The collection of information contained in these regulations has been submitted to the Office of Management and Budget in accordance with the requirements of the Paperwork Reduction Act of 1980. These requirements have been approved by OMB (Control number 1545–0702).

Drafting Information

The principal author of these temporary regulations is Duane H. Pellervo of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other

offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

List of Subjects

26 CFR 1.301–1–1.383–3

Income taxes, Corporations, Corporate distributions, Corporate adjustments, Reorganizations.

26 CFR Part 602

Reporting and record keeping requirements.

Adoption of Amendments to the Regulations

Accordingly, Part 1 and 602 of Title 26 of the Code of Federal Regulations are amended as follows:

Paragraph 1. A new § 1.338–4T is added immediately after § 1.338–3T to read as follows:

§ 1.338–4T Questions and answers relating to miscellaneous issues under section 338 (temporary).

(a) *Introduction*—(1) *Effective date.* Except as otherwise provided in this section, this section applies to stock acquisitions for which the acquisition date (determined without section 224 (d)(5) of TEFRA) occurs after August 31, 1982.

(2) *Scope of regulations.* This section provides guidance on a broad range of issues under section 338. This section deals principally with domestic aspects of section 338. For foreign aspects, see § 1.338–5T (to be published).

(3) *Outline of topics.* In order to facilitate the use of this section, this paragraph (a) (3) lists the paragraphs, subparagraphs, and subdivisions contained in this section.

(a) Introduction.
- (1) Effective date.
- (2) Scope of regulations.
- (3) Outline of topics.
- (4) Cross-reference of Code provisions to provisions in this section.

(b) Nomenclature and definitions.
- (1) Nomenclature.
- (2) Definitions in section 338(h) and § 1.338–1T.
- (3) Affected target.
- (4) Original target.
- (5) Consistency period.
- (6) Domestic corporation.
- (7) Section 338 election.
- (8) Express election.
- (9) Deemed election.
- (10) Related persons.

(c) Qualified stock purchase and miscellaneous related rules.
- (1) Purchase requirement of section 338(h)(3).
- (2) Date of purchase from certain related persons.
- (3) Qualified stock purchase, deemed election, and acquisition date for tiered targets.
- (4) Effect of redemptions.
- (5) Effect of section 304.

(d) Effect of post-acquisition events on eligiblility of T for section 338 election; requirement of purchasing corporation.

(e) Application of the stock consistency rules of section 338(f).

(f) Application of the asset consistency rule of section 338(e).
- (1) Introduction and general operating rules.
  - (i) Introduction.
  - (ii) General operating rules.
- (3) Exception of section 338(e)(2)(A) for acquisitions in ordinary course of trade or business.
- (4) Exception of section 338(e)(2)(B) for acquisitions in which transferee's basis in acquired assets is measured wholly by reference to transferor's basis.
- (5) Certain transactions excepted under section 338(e)(2)(D).
- (6) Carryover basis election exception under section 338(e)(2)(D) and (i).
  - (i) Introduction.
  - (A) Overview.
  - (B) Cross-reference.
  - (ii) Procedure for making protective carryover election and affirmative action carryover election.
  - (iii) Corporations and acquistions subject to protective or affirmative action carryover election.
  - (iv) Consequences of protective or affirmative action carryover election.
- (7) De minimis exception under section 338 (e)(2)(D).

(g) Special consistency rules.
- (1) Extension of consistency period and 12-month acquisition period in certain cases.
- (2) Asset or stock acquisition by non-P group member considered an acquisition by P group member in certain cases.

(h) Determination of section 338(a)(1) deemed sale price.
- (1) Introduction.
- (2) Definitions.
  - (i) ADSP.
  - (ii) Elective ADSP formula.
  - (iii) Allocable ADSP amount.
  - (iv) Recapture gain.
  - (v) Section 338(c)(1) percentage.
- (3) Determination of ADSP.

(i) [Reserved]

(j) Determination of basis of target assets after section 338 election.
- (1) Introduction.
- (2) Determination of adjusted grossed-up basis.

(k) Miscellaneous matters affecting the final return of old T.
- (1) Application of section 337 to deemed sale of assets.
- (2) Application of section 338(h)(10).
- (3) Effect of sections 382(a) and 168(d)(92)(B) on old T's final return.
- (4) Application of § 1.1502–76(c) to old T's final return.
- (5) Effect on old T's final return of plan to abate section 338(c)(1) amounts.
- (6) (Combined deemed sale return under section 338 (h)(15).

(l) Miscellaneous matters affecting new T.
- (1) Effect of old T liabilities.
- (2) Availability of investment tax credit; recovery deductions.
- (3) Effect of acquisition of partnership interest in deemed purchase under section 338(a)(2).
- (4) Employment taxes; employee plans.

(4) *Cross-reference of Code provisions to provisions in this section.* The following tables cross-reference provisions of the Code to subunits of this section in which those Code provisions are dealt with in a significant manner. A Code provision may be cross-referenced to a subunit of this section even though that Code provision is not specifically cited in the section subunit. These tables are not intended to provide an exhaustive cross-reference of Code provisions.

3301	(l)(4)

(b) *Nomenclature and definitions.* For purposes of this section (and except as otherwise provided in this section)—

(1) *Nomenclature*—(i) P is a domestic corporation that directly purchases all of the outstanding stock in a second domestic corporation.

(ii) T is the domestic corporation the stock of which is purchased by P. T has only one class of stock outstanding.

(iii) P1, P2, etc., are domestic corporations that are members of the P group.

(iv) The P group is an affiliated group (as defined in section 338(h)(5)) that includes one or more P corporations as members.

(v) T1, T2, etc., are domestic corporations that are target affiliates of T. Those corporations (T1, T2, etc.) have only one class of stock outstanding, and also may be targets. None of the stock of those corporations is owned by T.

(vi) S is a domestic corporation (unrelated to P and B) that owns all of the outstanding stock of T prior to the purchase of T stock by P. (S is referred to in cases in which it is appropriate to consider the effects of having all of the outstanding stock of T owned by a domestic corporation.)

(vii) A is an individual (unrelated to P and B) who is a U.S. resident or citizen and who owns all of the outstanding stock of T prior to the purchase of T stock by P. (A is referred to in cases in which it is appropriate to consider the effects of having all of the outstanding stock of T owned by an individual who is a U.S. resident or citizen. Ownership of the stock of T by A and ownership of the stock of T by S are mutually exclusive circumstances.)

(viii) B is an individual (unrelated to T, S, and A) who is a U.S. resident or citizen and who owns all of the outstanding stock of P.

(2) *Definitions in section 338(h) and § 1.338–1T.* The definitions in section 338 (h) and § 1.338–1T also apply to this section.

(3) *Affected target.* A corporation is an "affected target" if a deemed election would occur for that corporation in the event of a section 338 election for T.

(4) *Original target.* A corporation ("X") is an "original target" if there exists no previously acquired target as to which a section 338 election would cause a deemed election under section 338(f)(1) for X. If two corporations are acquired at the same time, either corporation (but not both) may be considered by the purchasing corporation as the original target.

(5) *Consistency period.* The "consistency period" is the period described in section 338(h)(4)(A) unless extended pursuant to paragraph (g)(1) *Answer 1* of this section.

(6) *Domestic corporation.* A "domestic corporation" is a corporation (i) that is created or organized in the United States or under the law of the United States or of any State and (ii) that is not a DISC, a corporation described in section 934(b) or 1248(e), or a corporation to which an election under section 936 applies.

(7) *Section 338 election.* A "section 338 election" is an election to apply section 338(a) to a target. A section 338 election is either an express election or a deemed election.

(8) *Express election.* An "express election" is a section 338 election made for the original target by filing a statement of section 338 election (Form 8023) pursuant to § 1.338–1T(c).

(9) *Deemed election.* A "deemed election" is a section 338 election that is not an express election. A deemed election is made under the authority of section 338 (e), (f), or (i) or under the authority of more than one of those provisions. If an express election for the original target causes a section 338 election by reason of section 338(f)(1) for another target, that other target is considered subject to a deemed election. A statement of section 338 election (Form 8023) need not be filed for that other target, but that other target may be required to be included in a schedule attached to the statement of section 338 election filed for the original target. See § 1.338–1T (c) and (e).

(10) *Related persons.* Two persons are related to each other if stock in a corporation owned by one such person would be attributed under section 318(a) (other than paragraph (4) thereof) to the other, or vice versa.

(c) *Qualified stock purchase and miscellaneous related rules*—(1) *Purchase requirement of section 338(h)(3).* The purpose of this paragraph (c)(1) is to provide guidance on whether particular stock acquisitions qualify as purchases under section 338(h)(3). It is assumed in each question and answer that no exception to the purchase requirement is potentially applicable other than the exception discussed in the particular question and answer.

Question 1: If P acquires T stock from S solely for cash in a transaction with respect to which S does not recognize gain or loss pursuant to section 337, has P acquired that T stock by purchase?

Answer 1: Yes. Such an acquisition of stock is not excepted from the definition of purchase under the regulatory authority in section 338(h)(3)(A)(ii).

Question 2: If P acquires T stock from S solely for cash in a transaction with respect to which S recognizes its income under the installment method, has P acquired that T stock by purchase?

Answer 2: Yes. Such an acquisition of stock is not excepted from the definition of purchase under the regulatory authority in section 338(h)(3)A)(ii).

Question 3: If P acquires T stock from S solely for cash and if S is a foreign person that is not required to pay United States income tax on the disposition of the T stock, has P acquired that T stock by purchase?

Answer 3: Yes. Such an acquisition of stock is not excepted from the definition of purchase under the regulatory authority in section 338(h)(3)(A)(ii).

Question 4: Assume that P owns less than 50 percent in value of the stock of S and that S owns 100 percent of the only class of T stock. If P acquires all of the T stock from S in a distribution with respect to P's S stock or in a redemption of P's S stock, has P acquired that T stock by purchase?

Answer 4: (i) *Distribution with respect to which section 311(d)(1) applies.* If P acquires the T stock in a distribution with respect to which S recognizes gain under section 311(d)(1), then P has acquired that T stock by purchase.

(ii) *Distributions with respect to which section 311(d)(1) does not apply*—(A) *Fair market value of T stock does not exceed its adjusted basis in the hands of S.* If P acquires the T stock in a distribution to which sections 301–307 apply and if the fair market value of the T stock does not exceed its adjusted basis in the hands of S (so that section 311(d)(1) does not apply to the distribution), then P has acquired that T stock by purchase. This result applies

even though S realizes but does not recognize a loss, since such an acquisition of stock is not excepted from the definition of purchase under the regulatory authority in section 338(h)(3)(A)(ii).

(B) *Fair market value of T stock exceeds its adjusted basis in the hands of S.* Under the authority of section 338(h)(3)(A)(ii), if (*1*) P acquires the T stock in a distribution to which sections 301–307 apply, (*2*) the fair market value of the T stock exceeds its adjusted basis in the hands of S, and (*3*) section 311(d)(1) does not apply to the distribution, then P has not acquired that T stock by purchase.

Example (1). P owns less than 50 percent in value of the stock of S, and S owns all of the stock of T. The stock of T has a fair market value of $1,000, and S's basis in that stock is $400. On November 1, 1986, S distributes all of the stock of T to P in a redemption qualifying under section 302(a) of the S stock held by P. S recognizes a gain of $600 on the distribution pursuant to section 311(d)(1). Accordingly, P has acquired the T stock by purchase under section 338(h)(3).

Example (2). Assume the same facts as in *Example (1),* except that S's basis in the T stock is $1,400. The result is the same.

Example (3). Assume the same facts as in *Example (1),* except that the distribution is a dividend distribution rather than a distribution in redemption of S stock. S recognizes a gain of $600 on the distribution pursuant to section 311(d)(1). Accordingly, P has acquired the T stock by purchase under section 338(h)(3).

Example (4). Assume the same facts as in *Example (3),* except that the distribution occurs on January 1, 1984. S does not recognize a gain on the distribution under section 311(d)(1). P has not acquired the T stock by purchase under section 338(h)3).

(2) *Date of purchase from certain related persons.*

Question: If T stock acquired by P from a related corporation is treated as purchased stock by reason of section 338(h)(3)(C) (relating to certain stock acquisitions from related corporations), what is the date on which P is considered to have acquired that stock for purposes of satisfying the requirement of section 388(d)(3) that stock included in the qualified stock purchase must be acquired during the 12-month acquisition period?

Answer: If T stock acquired by P from a related corporation ("R") is treated as purchased by P by reason of section 338(h)(3)(C), then, solely for purposes of determining whether the 12-month acquistion period requirement for a qualified stock purchase is satisfied, to the extent such T stock is considered owned by P under section 318(a) (other than paragraph (4) thereof) immediately before the acquisition from R by reason of P's ownership of stock in R ("attributed T stock"), that attributed T stock is considered to have been acquired by P on the day on which P is first considered to own that stock rather than on the day on which P actually acquires that stock from R. If the date on which that T stock is considered to have been acquired by P precedes the date of P's actual purchase by more than 12 months, that stock cannot be taken into account for purposes of determining whether a qualified stock purchase has occurred unless, in the particular case, the 12-month acquisition period is extended pursuant to paragraph (g)(1) *Answer 2* of this section. If shares of attributed T stock owned by R are first considered to be owned by P on more than one date, then the attributed T shares purchased by P are deemed to be the T shares that are considered owned by P on the earliest date first, to the extent thereof, and then on the next earliest date.

Example (1). (i) On January 1, 1984, P purchases 75 percent in value of the stock of S. On that date, S owns 4 of the 100 shares of T's only class of outstanding stock. On June 1, 1984, S acquires an additional 16 shares of T stock. On December 1, 1984, P purchases 70 shares of T stock from an unrelated person and 12 of the 20 shares of T stock held by S.

(ii) Of the 12 shares of T stock purchased by P from S on December 1, 1984, 3 of those shares are deemed to have been acquired by P on January 1, 1984, the date on which 3 of the 4 shares of T stock held by S on that date were first considered owned by P under section 318(a) (other than paragraph (4) thereof), *i.e.*, 4×.75. Section 338(h) (1) and (3)(C)(i). The remaining 9 shares of T stock purchased by P from S on December 1, 1984, are deemed to have been acquired by P on June 1, 1984, the date on which an additional 12 of the 20 shares of T stock owned by S on that date were first considered owned by P under section 318 (a) (other than paragraph (4) thereof), *i.e.*, (20×.75)−3. Because stock acquisitions by P sufficient for a qualified stock purchase of T occur within a 12-month period (*i.e.*, 3 shares constructively on January 1, 1984, 9 shares constructively on June 1, 1984, and 70 shares actually on December 1, 1984), a qualified stock purchase is made on December 1, 1984.

Example (2). (i) On February 1, 1983, P acquires 25 percent in value of the stock of S from B (the sole shareholder of P). That S stock is not acquired by purchase. See section 338(h)(3)(A)(iii). On that date, S owns 4 of the 100 shares of T's only class of outstanding stock. On June 1, 1983, P purchases an additional 25 percent in value of the stock of S, and on January 1, 1984, P purchases another 25 percent in value of the stock of S. On June 1, 1984, S acquires an additional 16 shares of T stock. On December 1, 1984, P purchases 68 shares of T stock from an unrelated person and 12 of the 20 shares of T stock held by S.

(ii) Of the 12 shares of T stock purchased by P from S on December 1, 1984, 2 of those shares are deemed to have been acquired by P on June 1, 1983, the date on which 2 of the 4 shares of T stock held by S on that date were first considered owned by P under section 318(a) (other than paragraph (4) thereof), *i.e.*, 4×.5. For purposes of this attribution, the S stock need not be acquired by P by purchase. See section 338(h)(1). (By contrast, the acquisition of T stock by P from S will not qualify as a purchase unless P has acquired at least 50 percent in value of S stock by purchase. Section 338(h)(3)(C)(ii).) Of the remaining 10 shares of T stock purchased by P from S on December 1, 1984, 1 of those shares is deemed to have been acquired by P on January 1, 1984, the date on which an additional 1 share of the 4 shares of T stock held by S on that date was first considered owned by P under section 318(a) (other than paragraph (4) thereof), *i.e.*, (4×.75)−2. The remaining 9 shares of T stock purchased by P from S on December 1, 1984, are deemed to have been acquired by P on June 1, 1984, the date on which an additional 12 shares of T stock held by S on that date were first considered owned by P under section 318(a) (other than paragraph (4) thereof), *i.e.*, (20×.75)−3. Because a qualified stock purchase of T by P is made on December 1, 1984, only if all 12 shares of T stock purchased by P from S on that date are considered acquired during a 12-month period ending on that date (so that, in conjunction with the 68 shares of T stock P purchased on that date from the unrelated person, 80 of T's 100 shares are acquired by P during a 12-month period) and because 2 of those 12 shares are considered to have been acquired by P more than 12 months before December 1, 1984 (*i.e.*, on June 1, 1983), a qualified stock purchase is not made. (In appropriate cases, however, the 12-month period within which the qualified stock purchase must be made will be extended pursuant to paragraph (g)(1) *Answer 2* of this section.)

Example (3). Assume the same facts as in *Example (2),* except that on February 1, 1983, P acquires 25 percent in value of the stock of S by purchase. The result is the same as in *Example (2).*

(3) *Qualified stock purchase, deemed election, and acquisition date for tiered targets.*

Question 1: Assuming that T owns 80 percent of the only class of outstanding T1 stock, and that P purchases 80 percent of the only class of outstanding T stock in a qualified stock purchase, will T have made both a qualified stock purchase of T1 stock and a deemed election for T1 if P makes a valid express election for T?

Answer 1: Yes. By reason of P's express election for T, old T is deemed to sell T's assets and new T is deemed to purchase those assets. Under section 338(h)(3)(B), this deemed purchase of 80 percent of the T1 stock by new T is a purchase by new T for purposes of section 338(d)(3), and thus constitutes a qualified stock purchase of T1 stock. Accordingly, the express election for T

also causes a deemed election for T1 (a target affiliate of T) under section 338(f)(1) since, under section 338(h)(8), purchases by members of the same affiliated group (here P and new T) are treated as if made by one corporation. For guidance in a case in which a qualified stock purchase of T stock is effected in part by a redemption by T (on the acquisition date of T) in which T distributes the stock of its subsidiary, see paragraph (c)(4) *Answer Example (3)* of this section.

Question 2: Under the facts of *Question 1* of this paragraph (c)(3), what is the acquisition date of T1?

Answer 2: Under the authority of section 338(h)(3)(B), the acquisition date of T1 is the same day as the acquisition date of T, the corporation the stock of which is actually purchased (rather than deemed purchased pursuant to section 338(h)(3)(B)). However, the deemed sale and purchase of T1's assets is considered to take place instantaneously after the deemed sale and purchase of T's assets.

Question 3: Assume the facts of *Question 1* of this paragraph (c)(3). Assume in addition that T1 owns 80 percent of the only class of T2 stock. What is the acquisition date of T2?

Answer 3: Under the principles of *Answer 1* of this paragraph (c)(3), T1 is deemed to make a qualified stock purchase of T2 stock and the deemed election for T1 under section 338(f)(1) causes a deemed election for T2 (also under section 338(f)(1)). The acquisition date of T2 is the same day as the acquisition date of T, the corporation the stock of which is actually purchased (rather than deemed purchased pursuant to section 338(h)(3)(B)). However, the deemed sale and purchase of T2's assets is considered to take place instantaneously after the deemed sale and purchase of T1's assets.

Example (1). T is the common parent of an affiliated group that files consolidated returns. The group consists of T, T1, and T2. T owns 80 percent of the only class of outstanding T1 stock and T1 owns 80 percent of the only class of outstanding T2 stock. On September 10, 1984, P purchases all of the outstanding T stock and makes an express election for T. Pursuant to *Answer (1)* of this paragraph (c)(3), new T's deemed purchase of the stock of T1 constitutes a qualified stock purchase of T1 stock by new T, and the section 338 election for T also applies to T1 by reason of section 338(f)(1). Similarly, new T1 is deemed to have made a qualified stock purchase of T2 stock, for which a deemed election also is made. The acquisition date of T1 and T2 is September 10, 1984, *i.e.*, the acquisition date of T, the stock of which was actually purchased. The T group's final consolidated return for the period ending at the close of September 10, 1984, will include any items resulting from the deemed asset sales of old T, old T1, and old T2 (all of the deemed sales of which are treated as occurring on that date). See § 1.338-1T(f)(2)(ii).

Example (2). A owns all 100 shares of T's only class of outstanding stock. T owns 50 of the 100 shares of X's only class of outstanding stock. The other 50 shares of X stock are owned by corporation Y, which is unrelated to A, T, or P. On January 1, 1985, P acquires all of the stock of T in a qualified stock purchase and makes an express election for T. On December 1, 1985, P acquires by purchase the 50 shares of X stock held by Y. A qualified stock purchase of X stock is made on December 1, 1985, since the deemed purchase of 50 shares of X stock by new T by reason of the express election for T and the actual purchase of 50 shares of X stock by P are treated as purchases made by one corporation. Section 338(h)(8). For purposes of determining whether those purchases occur within a 12-month acquisition period as required by section 338(d)(3), the X stock T is deemed to purchase is deemed purchased on the acquisition date of T, *i.e.*, January 1, 1985.

(4) *Effect of redemptions.*

Question: May the requirements for a qualified stock purchase under section 338(d)(3) be satisfied through a combination of T stock purchases by P and redemptions by T?

Answer: Yes. (i) *Redemptions from persons unrelated to P.* A qualified stock purchase is made on the first day on which the percentage ownership requirements of section 338(d)(3) are satisfied by reference to T stock that is both (A) held on that day by P and (B) purchased by P during the 12-month acquisition period ending on that day ("qualifying target stock"). That day is the "acquisition date" within the meaning of section 338(h)(2). T stock redemptions from persons unrelated to P that occur at any time before the close of the 12-month acquisition period (whether before or after the beginning of that period and whether before or after the purchase of any T stock by P) are taken into account as reductions in T's outstanding stock for purposes of determining whether T stock purchased by P in the 12-month acquisition period satisfies the percentage ownership requirements of section 338(d)(3).

(ii) *Redemptions from P or related persons during 12-month acquisition period*—(A) *General rule.* For purposes of the percentage ownership requirements of section 338(d)(3), a redemption of T stock during the 12-month acquisition period from P or from any person related to P is not taken into account as a reduction in T's outstanding stock.

(B) *Exception for certain redemptions from related persons.* A redemption of T stock during the 12-month acquisition period from a person related to P will be taken into account as a reduction in T's outstanding stock to the extent of the purchased stock amount. The "purchased stock amount" is the portion of the redeemed stock that could have been purchased by P from the related person on the day of the redemption (by reason of section 338(h)(3)(C)) and that, in the event of such a purchase, would have been qualifying target stock with respect to the 12-month acquisition period. See paragraph (c)(2) of this section.

Example (1). A owns all 100 shares of T's only class of outstanding stock. On January 1, 1984, P purchases 40 shares of T stock from A. On July 1, 1984, T redeems 25 shares from A. On December 1, 1984, P purchases 20 shares of T stock from A. A qualified stock purchase is made by P on December 1, 1984, since, within a 12-month period ending on that date, the 60 shares of T stock purchased by P satisfy the percentage ownership requirements of section 338(d)(3), *i.e.*, 80 percent, 60/75 shares, determined by taking into account the redemption of 25 shares.

Example (2). Assume the same facts as in *Example (1)*, except that P purchases 60 shares on January 1, 1984, and none on December 1, 1984. A qualified stock purchase is made by P on July 1, 1984, since that is the first day on which T stock purchased by P within the preceding 12-month period satisfies the percentage ownership requirements of section 338(d)(3), *i.e.*, 80 percent, 60/75 shares, determined by taking into account the redemption of 25 shares.

Example (3). Assume the same facts as in *Example (2).* Assume further that T distributes to A all of the stock of T's wholly-owned subsidiary, T1, in the redemption on July 1, 1984, and that P makes an express election with respect to its qualified stock purchase of T stock. The acquisition date of T is July 1, 1984. Although T held all of the stock of T1 on that date a qualified stock purchase and deemed election are not considered made for T1 by reason of the express election for T. In order for a deemed election to be made for T1, T must hold the T1 stock when T's deemed sale of assets occurs pursuant to section 338(a). The deemed sale of assets is considered that last transaction of old T at the close of the acquisition date. Accordingly, T1 stock actually disposed of by T on the acquisition date is not included in the deemed sale and purchase of assets pursuant to section 338(a). Thus, as qualified stock purchase and deemed election are not made for T1. See paragraph (c)(3) *Answer 1* of this section and § 1.338-1T(f).

Example (4). A owns all 100 shares of T's only class of outstanding stock. On January 1, 1984, T redeems 25 of those shares. On February 1, 1984, P purchases 30 shares of T stock from A, and on January 15, 1985, P purchases another 30 shares. A qualified stock purchase is made by P on January 15, 1985, since T stock held by P on that date that was purchased during the preceding 12 months satisfies, on that date, the percentage

ownership requirements of section 338(d)(3), *i.e.*, 80 percent, 60/75 shares, determined by taking into account the redemption of 25 shares. It is irrelevant that the redemption necessary for this result occurred before the 12-month acquisition period.

Example (5). Assume the same facts as in *Example (4)*, except that the redemption occurs on April 1, 1985. Assume further that the 12-month acquisition period is not extended. A qualified stock purchase is not made by P on April 1, 1985. This result obtains because the percentage ownership requirements of section 338(d)(3) are not satisfied on that date by reference to T stock held on that date that was purchased during the preceding 12 months, since such stock represents only 40 percent of the T stock, *i.e.*, 30/75 shares, determined by taking into account the redemption of 25 shares.

Example (6). On December 15, 1983, T redeems 30 percent of its only class of outstanding stock from P. The redeemed stock was held by P for several years and constituted the total interest of P in T. On December 1, 1984, P purchases the remaining outstanding stock of T from A. A qualified stock purchase is not made by P on December 1, 1984, since, for purposes of the percentage ownership requirements of section 338(d)(3), the redemption on December 15, 1983, is not taken into account as a reduction in T's outstanding stock.

Example (7). (i) X and T each have outstanding 100 shares of a single class of stock. On January 1, 1985, P purchases 60 shares of X stock. On that date, X owns 40 shares of T stock. On April 1, 1985, T redeems the 40 shares of T stock held by X and P purchases the remaining 60 shares of T stock from an unrelated person. Assume that the 12-month acquisition period is not extended.

(ii) For purposes of the percentage ownership requirements of section 338(d)(3), the redemption of T stock from X (a person related to P) is taken into account as a reduction in T's outstanding stock to the extent of the purchased stock amount. Under these facts, all 40 of the redeemed shares contitute the purchased stock amount since (A) P could have acquired those 40 shares from X on the day of the redemption by purchase (by reason of section 338(h)(3)(C)(i)), and (B) those 40 shares, in the event of such a purchase, would have been qualifying target stock with respect to the 12-month period ending on April 1, 1985. If P had acquired the 40 shares of T stock from X by purchase on the day of the redemption, April 1, 1985, then, for purposes of the 12-month acquisition period, 24 of those 40 shares of T stock would have been considered purchased by P on January 1, 1985, and the remaining 16 shares would have been considered purchased by P on April 1, 1985. See paragraph (c)(2) of this section. Accordingly, a qualified stock purchase is made by P on April 1, 1985, since the 60 shares of T stock purchased by P on that date satisfy, as of that date, the percentage ownership requirements of section 338(d)(3), *i.e.*, 100 percent, 60/60 shares, determined by taking into account the redemption of 40 shares.

(5) *Effect of section 304.*

Question: If A, the owner of 20 percent of T's only class of outstanding stock, transfers that stock to P solely in exchange for all the stock of P, and if, pursuant to the same transaction, P, solely in exchange for cash, acquires the remaining 80 percent of T's stock from the other T shareholder, B, that is unrelated to A, will section 304(a)(1) apply to preclude a qualified stock purchase of T stock by P?

Answer: No. (i) *Background*—(A) *Operation of section 304(a)(1).* Under section 304(a)(1), if one or more persons that control each of two corporations transfer stock in one of those corporations ("issuing corporation") to the other of those corporation ("acquiring corporation") in return for property, then those persons will be treated as having received that property as a distribution in redemption of the acquiring corporation's stock. If section 304(a)(1) applies to a person's transfer of issuing corporation's stock, the acquiring corporation is treated as receiving that person's issuing corporation stock as a contribution to the acquiring corporation's capital and, because the acquiring corporation's basis in the issuing corporation's stock is determined by reference to the transferor's basis under section 362(a) and § 1.304–2(a), the issuing corporation's stock is not considered purchased (within the meaning of section 338(h)(3)) by the acquiring corporation. See section 338(h)(3)(A)(i). This result obtains whether or not section 302 (a) or (d) applies to the person's section 304(a)(1) deemed distribution in redemption of the acquiring corporation's stock.

(B) *Control requirement in general.* Section 304(c)(1) provides that, for purposes of section 304, control means the ownership of stock possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote or at least 50 percent of the total value of shares of all classes of stock. Section 304(c)(3) makes section 318(a) (relating to constructive ownership of stock), as modified by section 304(c)(3)(B), applicable to section 304 for purposes of determining control under section 304(c)(1).

(ii) *Effect of section 304(c)(2)(B)*—(A) *In general.* In determining whether the control test with respect to both the issuing and acquiring corporations is satisfied, section 304(a)(1) considers only the person or persons that (*1*) control the issuing corporation before the transaction, (*2*) transfer issuing corporation stock to the acquiring corporation for property, and (*3*) control the acquiring corporation thereafter. Section 317 defines property to include money, securities, and any other property except stock (or stock rights) in the distributing corporation. However, section 304(c)(2)(B) provides a special rule to extend the relevant group of persons to be tested for control of both the issuing and acquiring corporations to include the person or persons that do not acquire property, but rather solely stock from the acquiring corporation in the transaction. Section 304(c)(2)(B) provides that if two or more persons in control of the issuing corporation transfer stock of such corporation to the acquiring corporation, and if the transferors are in control of the acquiring corporation after the transfer, then the person or persons in control of each corporation will include each of those transferors. Because the purpose of section 304(c)(2)(B) was to include in the relevant control group the person or persons that retain or acquire in the transaction acquiring corporation stock, only the person or persons transferring stock of the issuing corporation that retain or acquire any proprietary interest in the acquiring corporation will be taken into account for purposes of applying section 304(c)(2)(B).

(B) *Application of section 304(c)(2)(B) to facts in question.* Under the facts set forth in the question in this paragraph (c)(5), while both A and B were in control of T (the issuing corporation) before the transaction and both A and B transferred T stock to P (the acquiring corporation), section 304 (c)(2)(B) and (a)(1) will not apply to B since B did not retain or acquire any proprietary interest in P in the transaction. Section 304(a)(1) also does not apply to A since A (or a control group of P and T of which A was a member) did not control T before the transaction. Accordingly, the acquisition by P of the 80 percent stock interest in T constitutes a qualified stock purchase.

(d) *Effect of post-acquisition events on eligibility of T for section 338 election; requirement of purchasing corporation.*

Question 1: May P make an express or deemed election for T after T is liquidated, merged into another corporation, or otherwise disposed of by P?

Answer 1: Yes, provided that, under the facts and circumstances, P is considered for tax purposes as the purchaser of the T stock.

Example (1). On January 1, 1985, P purchases all of the stock of T in a qualified stock purchase. On June 1, 1985, P sells all of the stock of T to an unrelated person. Assuming that P is considered for tax purposes as the purchaser of the T stock, P remains eligible, after June 1, 1985, to make a section 338 election for T.

Example (2). On January 1, 1985, P purchases all of the stock of T in a qualified stock purchase. On that date, T owns all of the stock of T1. On March 1, 1985, T sells all of the stock of T1 to an unrelated person. On April 1, 1985, P makes an express election for T. Notwithstanding that the stock of T1 previously was sold on March 1, 1985, the express election for T on April 1, 1985, results in a qualified stock purchase by T of T1 on January 1, 1985, and a deemed election is made for T1 under section 338(f)(1) as a result of P's express election for T. See paragraph (c)(3) *Answer 1* of this section. The result is the same if P transfers both T and T1 on February 1, 1985, and whether or not the transfer is characterized as a dividend, a reorganization under section 368, or a taxable sale, provided that P is considered for tax purposes as the purchaser of the T stock.

Question 2: May an express or deemed election be made for T after P is liquidated or merged into another corporation in a transaction described in section 381(a)?

Answer 2: Yes, provided that, under the facts and circumstances, P is considered for tax purposes as the purchaser of the T stock. The acquiring corporation in the section 381(a) transaction may make a section 338 election for T.

Question 3: Assume that P exchanges cash for all of the stock of new subsidiary N. N thereafter merges with and into T, and pursuant to the merger T shareholders receive cash in exchange for all of their T stock. If, under the circumstances, the step-transaction doctrine properly is applied to disregard the existence of N for tax purposes, will P be considered to have made a qualified stock purchase of T stock?

Answer 3: Yes. If the existence of N properly is disregarded for tax purposes under these circumstances, then P is deemed to have acquired the T stock directly from the T shareholders for cash. The acquisition described in this *Question 3* and *Answer 3*, commonly called a "reverse subsidiary cash merger," will be a qualified stock purchase by P if all of the requirements of a qualified stock purchase are satisfied. The result would be the same if P contributed other property (such as P stock) as well as cash to N, provided that the use of such other property in the acquisition would not cause the acquisition to qualify as a reorganization under section 368.

Question 4: May an individual make a qualified stock purchase of T stock?

Answer 4: No. Section 338(d)(3) requires, as a condition of a qualified stock purchase, that there be a corporate purchaser of the stock of T.

Question 5: Assume that individual B contributes cash for all of the stock of new corporation P and that P thereafter transfers cash to the shareholders of T for all of the stock of T. If P either merges downstream into T or liquidates, has a qualified stock purchase of T stock been made?

Answer 5: Yes, provided that, under the facts and circumstances, P is considered for tax purposes as the purchaser of the T stock.

(e) *Application of the stock consistency rules of section 338(f).* This paragraph (e) provides general guidance on the operation of section 338(f). For special consistency rules issued under the authority of section 338 (e)(3), (h)(4)(B), and (i), see paragraph (g) of this section.

Question 1: Assume that S owns directly all of the stock of T and T1, that P makes a qualified stock purchase of T stock, and that, after the acquisition date of T but within T's consistency period, P makes a qualified stock purchase of T1 stock. If no section 338 election has been made for T so that T1 is not already subject to a deemed election under section 338(f)(1), may P make an express election for T1?

Answer 1: No. Under section 338(f)(2), the express election must be made for T, the original target. An express election made for T will cause a deemed election under section 338(f)(1) for T1. If P makes qualified stock purchases of the stock of T and T1 at the same time, the express election may be made for either target (but not both), and that election will cause a deemed election under section 338(f)(1) for the other target. For guidance on making the express election and complying with related requirements (*e.g.*, inclusion of schedule of corporations subject to the express election by reason of section 338(f)(1), attachments to T returns, etc.), see § 1.338–1T.

Question 2: If P makes qualified stock purchases of the stock of T and T1 on January 1, 1985, and November 1, 1986, respectively, will T1 be affected by a section 338 election for T (or by the absence of such an election for T)?

Answer 2: No. The acquisition date of T1 must occur during T's consistency period in order for T1 to be subject to section 338(f) (1) and (2) by reason of the status of T. Under section 338(h)(4)(A)(iii), T's consistency period normally will end at the close of the one-year period beginning on January 2, 1985 (the day after the acquisition date of T). It is irrelevent that the beginning of T1's consistency period overlaps with the end of T's consistency period. Thus, assuming that T's consistency period is not extended, the section 338 election for T will not cause a deemed election under section 338(f)(1) for T1, and the absence of a section 338 election for T will not bar an express election for T1 by reason of section 338(f)(2).

Question 3: Would the answer to *Question 2* of this paragraph (e) be different if (i) P also makes a qualified stock purchase of T2 stock on December 15, 1985, (ii) T2 is a target affiliate of T, and (iii) T1 is a target affiliate of T2?

Answer 3: Yes. T1 will be affected by a section 338 election for T (or by the absence of such an election for T). This result follows because T2 is a target affiliate of T and is acquired by P during T's consistency period. Similarly, T1 is a target affiliate of T2 and is acquired by P during T2's consistency period. Thus, a section 338 election for T causes a deemed election under section 338(f)(1) for T2, which in turn causes a deemed election under section 338(f)(1) for T1. Similarly, under section 338(f)(2), the absence of a section 338 election for T bars an express election for T2, which in turn bars an express election for T1.

Question 4: Assume that P makes a qualified stock purchase of all of the stock of T from S and thereafter, within one year, also makes a qualified stock purchase of all of the stock of X from Y. Assume further that S and Y are and always have been unrelated corporations that respectively have held all of the stock of T and X since those corporations were organized. If P makes a valid section 338 election for T, is a deemed election under section 338(f)(1) made for X?

Answer 4: No. A deemed election is made for X only if X is a target affiliate of T. Under section 338(h)(6)(A), X is a target affiliate of T only if, at any time during so much of T's consistency period as ends on the acquisition date of T, X and T were members of an affiliated group that had the same common parent. Even though X and T are both members of the P group after the acquisition date of X, X is not a target affiliate of T because X was not a member of the P group during so much of T's consistency period as ends on the acquisition date of T. Even if the acquisition date of X were the same as the acquisition date of T, X would not be a target affiliate of T and T would not be a target affiliate of X under these facts.

(f) *Application of the asset consistency rule of section 338(e)*—(1) *Introduction and general operating rules*—(i) *Introduction.* This paragraph (f) provides general guidance on the operation of section 338(e). For special consistency rules issued under the authority of section 338(e)(3), (h)(4)(B), and (i), see paragraph (g) of this section.

(ii) *General operating rules.*

Question 1: Under what circumstances will a deemed election

under section 338(e)(1) be made by P with respect to its qualified stock purchase of T stock?

Answer 1: Under the authority of section 338 (e)(2)(D) and (i), a deemed election under section 338(e)(1) will be made by P with respect to its qualified stock purchase of T stock *only* if the District Director determines, in connection with the examination of a return that would be affected by a deemed election for T, that—

(i) P (or another member of the P group) has acquired an asset of T (or a target affiliate of T) during T's consistency period in an acquisition that is described in section 338(e)(1) and that is not subject to an exception (other than the carryover basis election exception of paragraph (f)(6) of this section) to section 338(e)(1),

(ii) Neither a section 338 election nor a protective carryover election under paragraph (f)(6)(ii) *Answer 1* of this section is made by P with respect to T, and

(iii) A deemed election for T, in lieu of the affirmative action carryover election for T under paragraph (f)(6)(ii) *Answer 3* of this section, is appropriate to carry out the purposes of the consistency rules of section 338(e), (f), or (i) (see paragraph (f)(6)(i)(A) and (ii) *Answer 3 Example (1)).*

Question 2: Will section 338(f)(2) apply to bar the District Director's determination of a deemed election under section 338(e)(1) for T1 if—

(i) P makes a qualified stock purchase of T stock,

(ii) After the acquisition date of T but within T's consistency period, P makes a qualified stock purchase of the stock of T1, target affiliate of T,

(iii) No section 338 election has been made for T so that T1 is not already subject to a deemed election under section 338(f)(1), and

(iv) P acquires an asset from T1 during T1's consistency period but after the close of T's consistency period in an acquisition that is described in section 338(e)(1) and that is not subject to an exception (other than the carryover basis election exception of paragraph: (f)(6) of this section) to section 338(e)(1)?

Answer 2: No. Section 338(f)(2) will not bar the District Director's determination of a deemed election under section 338(e)(1) for T1.

Question 3: Will the District Director's determination of a deemed election under section 338(e)(1) for T1 under the facts described in *Question 2* of this paragraph (f)(1)(ii) cause a deemed election for T?

Answer 3: Yes. Under the authority of section 338 (f)(1) and (i), T will be subject to a deemed election whenever the District Director determines that a deemed election under section 338(e)(1) is made for a later-acquired target (*i.e.*, a target acquired by the P group subsequent to the P group's acquisition of T), provided that a deemed election under section 338(f)(1) would be considered made for the later-acquired target if a section 338 election were made for T. It is irrelevant, for purposes of this *Answer 3*, whether the asset acquisition occurs before or after the period within which to make an express election for T or before or after the close of T's consistency period.

(2) *Asset acquisition by P (or another member of the P group) from T or T's target affiliate.*

Question 1: Is an asset acquisition by a future or a former member of the P group considered an asset acquisition by a member of the P group for purposes of section 338(e)(1)?

Answer 1: No, provided that the acquisition is not treated as made by a member of the P group under paragraph (g)(2) of this section.

Question 2: Is an asset acquisition by T after the acquisition date of T and while T is a member of the P group considered an asset acquisition by a member of the P group for purposes of section 338(e)(1)?

Answer 2: Yes. For purposes of determining whether an asset acquisition is made by a P group member, T is treated like any other P group member once it joins that group.

(3) *Exception of section 338(e)(2)(A) for acquisitions in ordinary course of trade or business.*

Question: Under what circumstances will an asset sale by T (or a target affiliate of T) ("selling corporation") to P (or another member of the P group) be subject to the exception to section 338(e)(1) provided by section 338(e)(2)(A) (relating to sales in the ordinary course of the selling corporation's trade or business)?

Answer: (i) *General rule.* An asset sale will be subject to the exception of section 338(e)(2)(A) if the sale is either customary for the selling corporation or a normal incident to the conduct of the trade or business in which that selling corporation is engaged. For purposes of applying this exception, all sales made by a selling corporation to members of the P group during T's consistency period will be aggregated and treated as a single sale by that selling corporation if, on the basis of all of the facts and circumstances, it appears that such sales were separated for the purpose of satisfying the ordinary course of trade or business exception. In addition, all sales by all of the selling corporations to members of the P group during the consistency period will be aggregated and treated as a single sale by each selling corporation for purposes of applying the ordinary course of trade or business exception to each such selling corporation if, on the basis of all of the facts and circumstances, it appears that some or all of the assets sold were dispersed among T and its target affiliates for the purpose of satisfying the ordinary course of trade or business exception.

(ii) *Customary for selling corporation.* The determination whether the sale is customary for the selling corporation is based on all of the facts and circumstances of the particular sale in light of the selling corporation's customary practice. Factors that must be considered in determining customary practice include the frequency and magnitude (both in terms of quantity and value) of prior sales of such property as well as the circumstances under which such prior sales occurred.

(iii) *Normal incident to trade or business.* In general, a sale is considered a normal incident to the conduct of the trade or business in which the selling corporation is engaged if, taking into consideration all of the facts and circumstances of the particular sale, it is one that reasonably would occur in the context of the ongoing business operations of a similarly situated company engaged in the same trade or business as the selling corporation.

Example (1). On January 1, 1985, P acquires all of the stock of T in a qualified stock purchase. T is a corporation engaged in the manufacture and sale of steel products. On April 1, 1985, P purchases steel girders from T for use in P's construction business. P makes no additional purchases from T (or from a target affiliate of T) during T's consistency period. T customarily sells girders in its business, and the magnitude of P's purchase is not unusual. The ordinary course of trade or business exception applies.

Example (2). (i) Assume the same facts as in *Example (1).* Assume in addition that T owns several tractor-trailers used to deliver its steel products. T has owned and operated these vehicles for four years. It is a general practice in T's industry to replace such vehicles after three or four years. T sells the tractor-trailers to P1 pursuant to T's standard procedure for disposing of and replacing used equipment. T promptly purchases new tractor-trailers and continues in the business of delivering steel products. In terms of both the sales price of the used equipment and the quantity, the sale to P1 is unexceptional.

(ii) While T may not be engaged in the business of selling tractor-trailers, the sale of the tractor-trailers to P1 is customary in its business. Accordingly, the ordinary course of trade or business exception applies.

Example (3). Assume the same facts as in Example (1). Assume in addition that a fire at one of T's plants destroys uninsured

machinery used in T's business, and that T sells the machinery to P as scrap for cash in an amount that exceeds T's adjusted basis in the machinery. Such a sale reasonably would occur in T's industry in the context of ongoing business operations in the event of a fire. Accordingly, the ordinary course of trade of business exception applies.

(4) *Exception of section 338(e)(2)(B) for acquisitions in which transferee's basis in acquired assets is measured wholly by reference to transferor's basis.*

Question 1: Does the exception to section 338 (e) (1) provided by section 338(e)(2)(B) apply if P (or any other member of the P group) acquires assets from T (or a target affiliate of T) in a reorganization as defined in section 368 under which the transferee P group member's basis in the transferred assets is governed by section 362(b)?

Answer 1: Yes, provided that the transferee's basis under section 362(b) in the transferred assets is determined wholly by reference to the adjusted basis of that property in the hands of the transferor. Thus, if the transferor recognizes gain on the transfer by reason of the receipt of property not permitted to be received without recognition of gain, the exception of section 338(e)(2)(B) will not apply to the acquisition.

Question 2: Does the exception to section 338(e)(1) provided by section 338(e)(2)(B) apply if P (or any other member of the P group) acquires assets from T (or a target affiliate of T) in a liquidation to which section 334(b)(1) applies?

Answer 2: Yes. The transferee of assets in a liquidation subject to section 334(b)(1) takes as its basis in the transferred assets the transferor's basis in those assets. Accordingly, the exception of section 338(e)(2)(B) applies.

Question 3: Does the exception to section 338(e)(1) provided by section 338(e)(2)(B) apply if P (or any other member of the P group) receives money or other property as a dividend distribution from T (or a target affiliate of T)?

Answer 3: (i) *Receipt of money in dividend distribution.* The exception of section 338(e)(2)(B) applies to the receipt of money (not including foreign currency) in a dividend distribution from T (or a target affiliate of T).

(ii) *Receipt of other property in dividend distribution*—(A) *Fair market value not greater than distributor's basis.* Although the exception of section 338(e)(2)(B) may not apply, an exception to section 338(e)(1) applies under the authority of section 338(e)(2)(D) to the receipt of property in a dividend distribution if the fair market value of that property is not greater than the distributing corporation's basis in that property.

(B) *Fair market value exceeds distributor's basis.* The exception of section 338(e)(2)(B) does not apply if the distributee's basis in property received in a dividend distribution exceeds the distributing corporation's basis in that property immediately before the distribution. The distributing corporation's basis will be exceeded, for example, if (*1*) section 311(d)(1), as amended by the Tax Reform Act of 1984 (Pub. L. No. 98–369; 96 Stat. 568), applies to the distribution or (*2*) the distributing corporation otherwise recognizes gain on the distribution (*e.g.*, under section 311 (b) or (c)). On the other hand, the distributee corporation's basis will not exceed the distributing corporation's basis, for example, if section 311(d)(1), as amended by the Tax Reform Act of 1984, does not apply to the distribution and the distributing corporation does not otherwise recognize gain on the distribution. In such a case, the exception of section 338(e)(2)(B) applies to the distribution.

Example. On January 1, 1985, P acquires all of the stock of T in a qualified stock purchase. P and T, which are calendar year taxpayers, do not join in a consolidated return for calendar year 1985. On June 1, 1985, T makes a divided distribution to P of raw land (held for investment) with a fair market value of $100,000 and a basis to T of $10,000. T recognizes a gain of $90,000 on the distribution pursuant to section 311(d)(1), as amended by the Tax Reform Act of 1984. Pursuant to section 301(d)(2), P's basis in the land is $100,000. Because P's basis exceeds T's basis in the land immediately before the distribution, the exception of section 338(e)(2)(B) does not apply.

Question 4: Does the exception to section 338(e)(1) provided by section 338(e)(2)(B) apply if (i) P (or any other member of the P group) ("acquiring member") acquires an asset from T (or a target affiliate of T) in exchange for an asset of that acquiring member ("exchange asset") and (ii) pursuant to section 1031(d), the acquiring member's basis in the acquired asset is determined by reference to that acquiring member's basis in the exchanged asset?

Answer 4: No. Section 338(e)(2)(B) requires that the acquiring P group member's basis in the asset acquired from T (or a target affiliate of T) be determined wholly by reference to the adjusted basis of that asset in the hands of the transferor.

(5) *Certain transactions excepted under section 338(e)(2)(D).*

Question: What acquisitions by P (or any other member of the P group) from T (or a target affiliate of T) or what arrangements between P (or any other member of the P group) and T (or a target affiliate of T) are subject to an exception to section 338(e)(1) under the authority of section 338(e)(2)(D)?

Answer: (i) *No step-up property.* The acquisition of property is subject to an exception to section 338(e)(1) under the authority of section 338(e)(2)(D) if the transferee's basis in that property is not greater than the transferor's basis immediately before the transfer.

(ii) *Target affiliate stock.* The acquisition of stock in a target affiliate of T is subject to an exception to section 338(e)(1) under the authority of section 338(e)(2)(D).

(iii) *T or target affiliate debt or other instruments.* The acquisition of debt of T or a target affiliate of T or the acquisition of a call option or warrant to acquire the stock or debt of T or a target affiliate of T is subject to an exception to section 338(e)(1) under the authority of section 338(e)(2)(D).

(iv) *Covenant not to compete.* A covenant not to compete that is separately allocable from other assets is subject to an exception to section 338(e)(1) under the authority of section 338(e)(2)(D).

(v) *Lease or license of tangible or intangible property.* The lease or license of tangible or intangible property is subject to an exception to section 338(e)(1) under the authority of section 338(e)(2)(D), provided that the transaction is not actually a sale for tax purposes of either the underlying property or the leasehold or license interest with respect to the property.

(vi) *Property by T after T's acquisition date.* The acquisition by P of property from T is subject to an exception to section 338(e)(1) under the authority of section 338(e)(2)(D) if (A) T acquired that property after T's acquisition date from a person other than a target affiliate of T and (B) T's basis in that property was not determined in whole or in part by reference to the adjusted basis of an asset held by T (or a target affiliate of T) on T's acquisition date.

Example (1). On January 1, 1985, P purchases all of the stock of T in a qualified stock purchase. On January 15, 1985, T purchases, for $60,000 in cash, a machine for use in its trade or business. On December 1, 1985, P purchases that machine from T for $65,000 in cash. P's acquisition of the machine from T is subject to the exception to section 338(e)(1) provided in this *Answer* (vi) under the authority of section 338(e)(2)(D).

Example (2). On January 1, 1985, P purchases all of the stock of T in a qualified stock purchase. On December 1, 1985, P purchases a storage tank from T for $65,000 in cash. The cost of the storage tank to T was $50,000. Of that $50,000, $32,000 represented

the price paid by T for raw materials used in constructing the storage tank. Those raw materials were held by T on T's acquisition date. The remaining $28,000 of T's $50,000 cost in the storage tank represented labor and other production costs. Assume that the exception of section 338(e)(2)(A), relating to sales in the ordinary course of the selling corporation's trade or business, does not apply. P's acquisition of the storage tank is not subject to the exception to section 338(e)(1) provided in the *Answer* (vi) under the authority of section 338(e)(2)(D), since T's basis in the property was determined in part by reference to the adjusted basis of assets (*i.e.*, the raw materials) held by T on T's acquisition date.

(vii) *Property subject to timely disposition.* The acquisition of property is subject to an exception to section 338(e)(1) under the authority of section 338(e)(2)(D) if the P group disposes of that property to an unrelated person that is not a target affiliate of T on or before the latest of the following three dates: (A) [120th day after date of publication of these regulations in the **Federal Register**], (B) the 90th day after the date on which the P group member acquires the property, or (C) the 90th day after the acquisition date of the original target.

(viii) *Other transactions.* The Internal Revenue Service may treat other transactions as subject to an exception 338(e)(1) under the authority of section 338(e)(2)(D).

(6) *Carryover basis election exception under section 338 (e)(2)(D) and (i)*—(i) *Introduction*—(A) *Overview.* If P makes a protective carryover basis election under this paragraph (f)(6) ("protective carryover election") with respect to its qualified stock purchase of T stock, then a tainted asset acquisition will in no case cause a deemed election under section 338(e)(1) for T. A "tainted asset acquisition" occurs if, during T's consistency period, a P group member acquires an asset of T (or a target affiliate of T) in an acquisition that is described in section 338(e)(1) and that is not subject to an exception (other than the carryover basis election exception of this paragraph (f)(6)) to section 338(e)(1). If the P group makes a tainted asset acquisition and neither a section 338 election nor a protective carryover election is made for T, then a tainted asset acquisition will cause a carryover basis election by affirmative action ("affirmative action carryover election") as of the later of the day of the tainted asset acquisition or the expiration of the period within which to make the protective carryover election for T. Pursuant to paragraph (f)(1)(ii) *Answer 1* of this section, however, the District Director in appropriate cases may cause T to be subject to a deemed election under section 338(e)(1) in lieu of the otherwise applicable affirmative action carryover election. Thus, the only certain way for the P group to avoid a deemed election under section 338(e)(1) for T in the event of a tainted asset acquisition is to make a timely protective carryover election. Apart from the District Director's authority to override an affirmative action carryover election and impose a deemed election under section 338(e)(1) in lieu thereof, the consequences of a protective carryover election and an affirmative action carryover election are identical, except that an offset prohibition election under this paragraph (f)(6) and the special increase in basis of transferee member stock under this paragraph (f)(6)(iv) *Answer 1* (i)(B) are available only if a *protective* carryover election is made. Unless otherwise indicated, any reference in this section to the carryover basis election exception of this paragraph (f)(6) is a reference to either the protective carryover election or the affirmative action carryover election.

(B) *Cross-references.* Subdivision (ii) of this paragraph (f)(6) explains how the protective carryover election and the affirmative action carryover election are made, subdivision (iii) of this paragraph (f)(6) describes the corporations and acquisitions to which those elections apply, and subdivision (iv) of this paragraph (f)(6) describes the consequences of those elections.

(ii) *Procedure for making protective carryover election and affirmative action carryover election.*

Question 1: How is the protective carryover election made for T?

Answer 1: (i) *Filing procedure.* The protective carryover election is made in the form of a statement of protective carryover election ("protective carryover election statement") filed with each Internal Revenue Service Center with which each corporation required to join in making the protective carryover election files its annual income tax return. The protective carryover election statement must be filed within the period during which an express election may be made for T.

(ii) *Corporations required to join in making protective carryover election.* Each corporation included in the P group at any time during so much of T's consistency period as ends on the day the protective carryover election statement is filed is required to join in making the protective election.

(iii) *Contents of protective carryover election statement*—(A) *General rule.* The protective carryover election statement must be identified prominently as a protective carryover election under § 1.338–4T(f)(6) and must contain the name, address, and employer identification number of T and of each other corporation required to join in making the election. In addition, the protective carryover election statement must contain the following declaration (or a substantially similar declaration): "EACH CORPORATION MAKING THIS ELECTION AGREES, WITH RESPECT TO ASSET ACQUISITIONS SUBJECT TO THE PROTECTIVE CARRYOVER ELECTION, TO BE BOUND BY THE TERMS AND CONDITIONS IMPOSED BY § 1.338–4T(f)(6) NOTWITHSTANDING ANY OTHER PROVISION OF THE INTERNAL REVENUE CODE (OR OTHER APPLICABLE STATUTE) OR THE REGULATIONS ISSUED THEREUNDER. EACH SUCH CORPORATION FURTHER AGREES TO CAUSE SUBSEQUENT P GROUP MEMBERS ACQUIRED DURING THE CONSISTENCY PERIOD OF ANY AFFECTED TARGET TO FILE A SUPPLEMENTAL STATEMENT." Finally, the protective carryover election statement must be signed, in the manner prescribed in § 1.338–1T(d)(1)(v) (for a statement of section 338 election), by a person authorized to make the protective carryover election on behalf of each corporation required to join in making the election.

(B) *Additional contents required for offset prohibition election.* If the P group wishes to make an offset prohibition election for T, the protective carryover election statement must contain, in addition to the material described in subdivision (iii)(A) of this *Answer 1*, a statement indicating that an offset prohibition election is made for T. For the consequences of an offset prohibition election, see *Answer 2* (ii) and *Answer 3* (iv) of paragraph (f)(6)(iv) of this section.

(C) *Schedule of information relating to targets subject to protective carryover election.* A schedule providing the information specified in this subdivision (C) ("required data") must be attached to the protective carryover election statement. Failure to attach the schedule, however, will not invalidate the protective carryover election. The schedule must contain the name, address, and employer identification number of each corporation that is an affected target as of the day the protective carryover election statement is filed. In addition, the schedule must—

(*1*) Disclose the fair market value of the consideration paid by the purchasing corporation for the stock T and each such affected target,

(*2*) Identify the portion of that consideration represented by the following components: (*i*) cash, (*ii*) purchase money debt, and (*iii*) other components of consideration (with each such other component separately stated), and

(*3*) Disclose the liabilities of T and each such affected target (as of the close of the particular target's acquisition date).

Question 2: What is the procedure for filing the supplemental statement referred to in *Answer 1* (iii)(A) of this paragraph (f)(6)(ii)?

Answer 2: (i) *Who must file.* The supplemental statement must be filed for any P group member that becomes a member during the consistency period of any affected target and after a protective carryover election statement for the P group has been filed. Failure to file the supplemental statement, however, will not invalidate the protective carryover election.

(ii) *Filing procedure.* The supplemental statement is filed with the Internal Revenue Service Center with which the P group member for which the supplemental statement is made files its annual income tax return and with each other Service Center with the protective carryover election statement was filed. The supplemental statement must be filed on or before the 15th day of the 9th calendar month beginning after the month in which the P group member for which the supplemental statement is made joined the P group.

(iii) *Contents of supplemental statement.* The supplemental statement must be identified prominently as a supplemental statement under § 1.338–4T(f)(6) and must contain the name, address, and employer identification number of the target for which the protective carryover election was made and of the P group member for which the supplemental statement is made. In addition, the supplemental statement must contain the declaration described in *Answer 1* (iii)(A) of this paragraph (f)(6)(ii) and must indicate that a copy of the previously filed protective carryover election statement is attached to and incorporated by reference as a part of the supplemental statement. Finally, the supplemental statement must be signed, in the manner prescribed in § 1.338–1T(d)(1)(v) (for a statement of section 338 election), by a person authorized to make the supplemental statement for the P group member for which the supplemental statement is made. A copy of the protective carryover election statement (and, if applicable, the schedule described in subdivision (iv) of this *Answer 2*) must be attached to the supplemental statement.

(iv) *Schedule of information relating to targets subject to protective carryover election.* The schedule described in *Answer 1* (iii)(C) of this paragraph (f)(6)(ii) must be attached to the supplemental statement. That schedule must include the required data for T and for each corporation that is an affected target as of the day the supplemental statement is filed. The schedule need not be attached to the supplemental statement if it would be identical to a schedule already received by each Service Center with which the supplemental statement is required to be filed.

Question 3: Under what circumstances is the affirmative action carryover election made for T?

Answer 3: (i) *General rule.* An affirmative action carryover election is made for T on the first day on which all of the following three requirements are satisfied:

(A) A P group member made a tainted asset acquisition.

(B) Neither a section 338 election nor a protective carryover election is made by P with respect to T.

(C) The time to make a protective carryover election for T has expired.

(ii) *Offset prohibition election and special increase in basis of transferee member stock inapplicable.* An offset prohibition election under this paragraph (f)(6) cannot be made and the special increase in basis of transferee member stock under this paragraph (f)(6)(iv) *Answer 1* (i)(B) is not available in connection with an affirmative action carryover election.

(iii) *Discretion of District Director to impose deemed election under section 338(e)(1) in lieu of affirmative action carryover election.* Under the circumstances described in paragraph (f)(1)(ii) *Answer 1* of this section, the District Director may override the affirmative action carryover election and impose a deemed election under section 338(e)(1) in lieu of that affirmative action carryover election.

Example (1). On January 1, 1985, P purchases all of the stock of T in a qualified stock purchase. P makes neither a section 338 election nor a protective carryover election for T. On December 15, 1985, P purchases an asset from T for cash in a tainted asset acquisition. Accordingly, an affirmative action carryover election is made for T on December 15, 1985. Under the circumstances described in paragraph (f)(1)(ii) *Answer 1* of this section, however, a deemed election under section 338(e)(1) will be made for T in lieu of the affirmative action carryover election if the District Director determines that such a deemed election is appropriate to carry out the purposes of the consistency rules of section 338 (e), (f), or (i).

Example (2). Assume the same facts as in *Example (1)*, except that the asset acquisition on December 15, 1985, is subject to an exception (other than the carryover basis election exception of this paragraph (f)(6)) to section 338(e)(1) (*e.g.*, the *de minimis* exception of paragraph (f)(7) of this section). An affirmative action carryover election is not made for T on December 15, 1985.

(iii) *Corporations and acquisitions subject to protective or affirmative action carryover election.*

Question 1: What targets and other P group members are subject to a protective or an affirmative action carryover election for T?

Answer 1: (i) *Targets subject to protective or affirmative action carryover election.* A protective or an affirmative action carryover election for T also applies to all affected targets.

(ii) *Other P group members subject to protective or affirmative action carryover election.* All other members of the P group, including members that join the group after the protective or affirmative action carryover election is made, are subject to the election.

Example. (i) T, T1, and T2 are wholly-owned, first-tier subsidiaries of S. On January 1, 1985, P purchases all of the stock of T in a qualified stock purchase. On April 1, 1985, S acquires a new wholly-owned subsidiary, Z. On June 15, 1985, P purchases all of the stock of T1 in a qualified stock purchase. On July 15, 1985, P purchases all of the stock of Z in a qualified stock purchase. On September 1, 1985, a protective carryover election is made for T. On August 1, 1986, P purchases all of the stock of T2 in a qualified stock purchase. All members of the P group are included in a single consolidated return.

(ii) The protective carryover election made for T also applies to T1 and Z, since T1 and Z are affected targets. Although Z is not a target affiliate of T and therefore would not directly be subject to a deemed election under section 338(f)(1) in the event of a section 338 election for T, Z is subject to the protective carryover election because a section 338 election for T indirectly would cause a deemed election for Z: A section 338 election for T would cause a deemed election under section 338(f)(1) for T1, and, since Z is a target affiliate of T1 and was acquired during T1's consistency period, the deemed election for T1 would cause a deemed election for Z. Assuming that the consistency periods for the targets are not extended pursuant to paragraph (g)(1) of this section, T2 is not subject to the protective carryover election, since a section 338 election for T would not cause a deemed election for T2.

Question 2: What asset acquisitions are subject to a protective or an affirmative action carryover election for T?

Answer 2: (i) *General rule.* An asset acquisition is subject to a protective or an affirmative action carryover election for T (*i.e.*, to the carryover basis election

exception) and therefore to the consequences imposed by this paragraph (f)(6), if—

(A) The asset is acquired by P (or another member of the P group) from T, an affected target, a target affiliate of T, or a target affiliate of an affected target, and

(B) With respect to T or any affected target, the acquisition is a tainted asset acquisition.

(ii) *Coordination with de minimis exception.* Notwithstanding that an asset acquisition is subject to the *de minimis* exception to section 338(e)(1) under paragraph (f)(7) of this section, that acquisition is subject to a protective or an affirmative action carryover election for T (and therefore to the consequences imposed by this paragraph (f)(6)).

(iv) *Consequences of protective or affirmative action carryover election.*

Question 1: What are the consequences of an unincluded company asset acquisition ("UCA acquisition"), *i.e.*, the acquisition of an asset by a P group member ("acquiring member") from T or a target affiliate of T ("U") in a case in which the acquisition (i) is subject to a protective or an affirmative action carryover election and (ii) occurs while U is not a member of the P group?

Answer 1: (i) *General rule*—(A) *Carryover basis to acquiring member.* For all purposes of the Code, the acquiring member's basis in an asset acquired in a UCA acquisition ("UCA asset") is the adjusted basis of that asset in the hands of U immediately before the transfer.

(B) *Special increase in basis of transferee member stock.* If the acquiring member in a UCA acquisition transfers the UCA asset to T or any other P group member ("transferee member") within the permissible transfer period (*1*) in a transaction to which section 351 applies, (*2*) as paid-in surplus, or (*3*) as a contribution to capital, then that acquiring member's basis in transferee member stock will be increased by the special adjustment amount. The "special adjustment amount" is the excess (if any) of the basis the acquiring member would have taken in the UCA asset absent subdivision (i)(A) of this *Answer 1* over the transferee member's basis in the asset immediately after the transfer. This increase for the special adjustment amount is made in addition to any other adjustment to the acquiring member's basis in its transferee member stock that (without this subdivision (i)(B)) results from the transfer to the transferee member.

(C) *Permissible transfer period.* The stock basis increase for the special adjustment amount is permitted only if the transfer to the transferee member occurs on or before the latest of the following three dates: (*1*) August 23, 1985, (*2*) the 90th day after the date on which the acquiring member acquires the UCA asset, or (*3*) the 15th day of the 9th month beginning after the month in which the acquisition date of the original target occurs.

(D) *Special increase in basis of transferee member stock applicable only if protective carryover election made.* The stock basis increase for the special adjustment amount is permitted only if the UCA acquisition is subject to a protective carryover election.

(ii) *Exception for transfer of UCA asset prior to U's acquisition date in certain cases.* If the UCA acquisition occurs in a taxable year of U that ends after U's acquisition date, then subdivision (i) of this *Answer 1* does not apply to that UCA acquisition, the UCA asset is considered an INA asset subject to *Answer 2* of this paragraph (f)(6)(iv), and gain on the transfer is considered INA gain subject to that *Answer 2.*

Example (1). (i) On January 1, 1985, P acquires all of the stock of T from S in a qualified stock purchase for $100,000. P makes a protective carryover election for T. On December 31, 1985, P purchases a machine from S in an asset acquisition that is subject to the protective carryover election. P pays $1,000 in cash for the machine and assumes a liability of $600 that encumbers the machine. S had an adjusted basis for the machine immediately before the transfer of $250. P immediately transfers the machine to T in a transaction governed by sections 351 and 357(c).

(ii) Pursuant to the protective carryover election, P's basis in the machine is $250, the adjusted basis of the machine in the hands of S. P recognizes a gain of $350 under section 357(c) on the transfer of the machine to T, *i.e.*, the excess of the $600 liability assumed over P's $250 basis in the machine. Thus, T's basis in the machine after the transfer is $600, *i.e.*, P's $250 basis in the machine plus P's $350 gain on the transfer to T. Section 362(a). Because P transfers the machine to T within the permissible transfer period, P's adjusted basis in T stock is increased by the special adjustment amount. The special adjustment amount is $1,000, since the basis P would have taken in the machine absent the protective carryover election ($1,600, *i.e.*, $1,000 cash paid plus the $600 liability assumed) exceeds by $1,000 T's basis in the machine immediately after the transfer ($600). Under these facts, no adjustment to P's basis in T stock other than the increase for the special adjustment amount is permitted. (Under section 358(a)(1), P's basis in T stock is increased by zero, *i.e.*, P's basis in the transferred machine ($250), plus P's recognized gain ($350), minus the liability assumed ($600).) Accordingly P's adjusted basis in T stock after the transfer to T is $101,000, *i.e.*, $100,000 + $1,000.

Example (2). Assume the same facts as in *Example (1).* Assume in addition that, immediately after P's transfer of the machine to T, T transfers the machine to its wholly-owned subsidiary, T1. No special increase in T's basis in T1 stock is permitted since T was not the acquiring member in the UCA acquisition within the meaning of this *Answer 1.*

Question 2: What are the consequences of an intercompany non-consolidated asset acquisition ("INA acquisition"), *i.e.*, the acquisition of an asset by a P group member ("acquiring member") from T or a target affiliate of T ("N") in a case in which the acquisition (i) is subject to a protective or an affirmative action carryover election and (ii) occurs while N is a member of the P group and during a taxable year for which N is not included in a consolidated return with the acquiring member?

Answer 2: (i) *Carryover basis to acquiring member.* For all purposes of the Code, the acquiring member's basis in an asset acquired in an INA acquisition ("INA asset") is the adjusted basis of that asset in the hands of N immediately before the transfer.

(ii) *Exception if INA acquisition is subject to offset prohibition election*—(A) *Offset prohibition for INA gain: carryover basis rule inapplicable.* For purposes of determining N's taxable income, gain recognized by N in an INA acquisition ("INA gain") may not be offset by any deductions of N for the taxable year if an offset prohibition election was made in a timely filed protective carryover election for T and if subdivision (iii) of this *Answer 2* does not apply ("offset prohibition"). The offset prohibition does not apply for purposes of calculating the earnings and profits of N (other than the earnings and profits reduction for N's tax liability.) If INA gain is subject to the offset prohibition, then the INA acquisition to which that INA gain relates is not subject to the carryover basis rule of subdivision (i) of this *Answer 2.*

(B) *Limitation on application of certain credits.* For purposes of determining the amount by which N's tax liability may be reduced by restricted credits in a taxable year in which there is INA gain subject to the offset prohibition, N's tax liability before reduction by restricted credits is calculated as if the INA gain were not income to N. "Restricted credits" are credits against tax described in part IV (other than subparts A and C thereof and section 27(a)) of subchapter A of chapter 1 of the Code (*i.e.*, sections

27(b), 28–30, and 38–41). For treatment of the foreign tax credit, see § 1.338–5T (to be published).

(C) *Character and timing of INA gain.* INA gain subject to the offset prohibition is ordinary income if the INA asset to which it relates is of a character that is subject to the allowance for depreciation, amortization, or depletion in the hands of the acquiring member. In addition, INA gain subject to the offset prohibition may not be recognized under the installment method.

(iii) *Subdivision (ii) inapplicable if gain realized by N is not required to be recognized.* If, pursuant to any provision of the Code (or other applicable statute) or the regulations thereunder (other than provisions relating to recognition of income under the installment method), all or a portion of the gain realized by N in an INA acquisition is not required to be recognized by N at the time of the acquisition, then—

(A) The carryover basis rule of subdivision (i) of this *Answer 2* applies to that INA acquisition notwithstanding an otherwise applicable offset prohibition election, and

(B) Subdivision (ii) of this *Answer 2* does not apply to that INA acquisition.

Question 3: What are the consequences of an intercompany consolidated asset acquisition ("ICA acquisition"), *i.e.*, the acquisition of an asset by a P group member ("acquiring member") from T or a target affiliate of T ("C") in a case in which the acquisition (i) is subject to a protective or an affirmative action carryover election and (ii) occurs while C is a member of the P group and during a taxable year for which C is included in a consolidated return with the acquiring member?

Answer 3: (i) *Consolidated return intercompany transaction rules generally apply.* Subject to the limitations of this *Answere 3*, § 1.1502–13 of the consolidated return regulations (relating to intercompany transactions) applies to an ICA acquisition.

(ii) *Periodic restoration limitation for property subject to depreciation, etc.*— (A) *General rule.* Under the periodic restoration limitation—

(*1*) The annual disregarded ICA gain amount is not taken into account as income in determining the separate taxable income of C (or of any other P group member) under § 1.1502–12 and

(*2*) The annual disregarded ICA deduction is not taken into account as a deduction in determining the separate taxable income of the acquiring member (or of any other P group member) under § 1.1502–12.

(B) *Annual disregarded ICA gain amount; annual disregarded ICA deduction.* The "annual disregarded ICA gain amount" is the deferred gain in an ICA acquisition that, absent this *Answer 3*, would be restored during the taxable year to C's income under § 1.1502–13(d) (relating to periodic restoration of deferred gain for property subject to depreciation, etc.). The "annual disregarded ICA deduction" is so much of the acquiring member's depreciation, amortization, or depletion deduction for the ICA asset as does not exceed the annual disregarded ICA gain amount with respect to that ICA asset.

(C) *Exceptions.* The periodic restoration limitation does not apply for purposes of calculating—

(*1*) The earnings and profits of P group members (other than the earnings and profits reduction for tax liability);

(*2*) The remaining balance of C's deferred gain in the ICA acquisition; and

(*3*) the acquiring member's adjusted basis in the asset acquired in the ICA acquisition.

(iii) *Limitations if C ceases to be a member and offset prohibition election does not apply*—(A) *In general.* The consequences of an ICA acquisition if C ceases to be a member of the P group are governed by this subdivision (iii) if an offset prohibition election was not made for T.

(B) *Application of periodic restoration limitation.* For the consolidated return year in which C ceases to be a member of the P group, the periodic restoration limitation of subdivision (ii) of this *Answer 3* applies to C and the acquiring member to the extent that there is an annual disregarded ICA gain amount for that taxable year.

(C) *Reduction in basis of ICA asset by amount of remaining ICA gain amount.* For all purposes of the Code, the acquiring member's basis in an asset acquired in an ICA acquisition ("ICA asset") is reduced by the remaining ICA gain amount. The "remaining ICA gain amount" is C's deferred gain with respect to the ICA asset that is restored to C's income by reason of § 1.1502–13(f)(1)(iii) because C ceases to be a member of the group.

(iv) *Limitations if C ceases to be a member and offset prohibition election applies*—(A) *In general.* The consequences of an ICA acquisition if C ceases to be a member of the P group are governed by this subdivision (iv) if an offset prohibition election was made in a timely filed protective carryover election for T.

(B) *Application of periodic restoration limitation.* Subdivision (iii)(B) of this *Answer 3* (relating to the application of the periodic restoration limitation for the taxable year in which C ceases to be a member of the P group) also applies to an ICA acquisition that is subject to this subdivision (iv).

(C) *Offset prohibition for remaining ICA gain amount; reduction in basis rule inapplicable.* For purposes of determining the P group's consolidated taxable income, the remaining ICA gain amount (as defined in subdivision (iii)(C) of this *Answer 3*) may not be offset by any deductions of any P group members for the taxable year if an offset prohibition election was made in a timely filed protective carryover election for T ("offset prohibition"). The offset prohibition does not apply for purposes of calculating the earnings and profits of P group members (other than the earnings and profits reduction for tax liability). If a remaining ICA gain amount is subject to the offset prohibition, then the ICA acquisition to which that remaining ICA gain amount relates is not subject to the reduction in basis rule of subdivision (iii)(C) of this *Answer 3*.

(D) *Limitation on application of certain credits.* For purposes of determining the amount by which the P group's consolidated tax liability may be reduced by restricted credits in a taxable year in which there is a remaining ICA gain amount subject to the offset prohibition, the P group's consolidated tax liability before reduction by restricted credits is calculated as if that remaining ICA gain amount were not income to the P group. "Restricted credits" are credits against tax described in part IV (other than subparts A and C thereof and section 27(a)) of subchapter A of chapter 1 of the Code (*i.e.*, sections 27(b), 28–30, and 38–41). For treatment of the foreign tax credit, see § 1.338–5T (to be published).

(E) *Character of remaining ICA gain amount.* A remaining ICA gain amount subject to the offset prohibition is ordinary income if the ICA asset to which it relates is of a character that is subject to the allowance for depreciation, amortization, or depletion in the hands of the acquiring member.

(F) *Remaining ICA gain amount not considered C's income for purposes of loss or credit carryovers from separate return limitation years.* For purposes of determining the amount of a loss or credit of C arising in a separate return limitation year of C (or of a predecessor of C) that may be included in the consolidated carryover of such losses or credits to the consolidated return year in which there is a remaining ICA gain amount subject to the offset prohibition, that remaining ICA gain amount is

considered an item of income of a P group member other than C.

(G) *Recapture of investment tax credit on ICA asset.* For purposes of investment tax credit recapture under § 1.1502–3(f)(2), the P group member acquiring an ICA asset from C is deemed to dispose of that asset not later than the day on which the remaining ICA gain amount with respect to that ICA asset is restored to C's income if that remaining ICA gain amount is subject to the offset prohibition.

(v) *Gain on ICA acquisition that is restored pursuant to § 1.1502–13(f)(1)(vii) considered a remaining ICA gain amount.* If C's deferred gain in an ICA acquisition is restored to C's income under § 1.1502–13(f)(1)(vii) because the P group files consolidated returns for fewer than three consecutive taxable years immediately preceding a separate return year of the common parent of the P group, then that restored deferred gain is considered a remaining ICA gain amount for purposes of applying this *Answer 3.*

(vi) *Limitations when gain in an ICA acquisition is not deferred*—(A) *General rule.* If gain in an ICA acquisition is not deferred under §1.1502–13 (*e.g.*, by reason of an election under § 1.1502–13(c)(3) not to defer gain on deferred intercompany transactions), then the provisions of *Answer 2* of this paragraph (f)(6)(iv) apply as if C were not included in a consolidated return with the acquiring member for the taxable year in which the asset acquisition occurs.

(B) *Recapture of investment tax credit when gain in an ICA acquisition is not deferred.* For purposes of investment tax credit recapture under § 1.1502–3(f)(2) in the case of an ICA acquisition with respect to which gain is not deferred under § 1.1502–13, the P group member acquiring the ICA asset from C is deemed to dispose of that asset not later than the day on which C ceases to be a member of the P group, provided that C ceases to be a member under circumstances that would cause the restoration of deferred gain under § 1.1502–13(f)(1)(iii) (had there been deferred gain subject to that restoration rule.)

Example (1). (i) In 1984, C, a calendar year corporation, sustains a $450 net operating loss that is not a net operating loss carryback to any preceding taxable year. On January 1, 1985, C purchases for $20,000 an item of intangible property with a remaining useful life as of that date of five years. The property has no salvage value. In its 1985 return, C reports an allowance for depreciation on the intangible property of $4,000 under the straight line method (*i.e.*, $20,000/5), thereby reducing its adjusted basis to $16,000. C's 1985 taxable income before the net operating loss deduction is $50. Accordingly, $50 of the 1984 net operating loss is allowed as a net operating loss carryover to 1985.

(ii) P, a calendar year common parent of an affiliated group that files consolidated returns, purchases all of the stock of C in a qualified stock purchase at the close of December 31, 1985, and makes a protective carryover election for C. An offset prohibition election is not made in the protective carryover election statement. See *Answer 1* (iii)(B) of paragraph (f)(6)(ii) of this section. On January 1, 1985, P purchases the intangible property from C in an ICA acquisition for $22,000. The ICA acquisition is a deferred intercompany transaction under § 1.1502–13, and C's $6,000 gain on the ICA acquisition (*i.e.*, $22,000 − $16,000) is a deferred gain. Absent this *Answer 3*, P would report, in the 1986 consolidated return, an allowance for depreciation on the intangible property ("ICA asset") of $5,500 under the straight line method, assuming a remaining useful life as of January 1, 1986, of four years and no salvage value, *i.e.*, $22,000/4. Similarly, absent this *Answer 3*, $1,500 of C's $6,000 deferred gain would be restored to C's income (as ordinary income) in 1986 by reason of P's $5,500 deduction, *i.e.*, $6,000 × $5,500/$22,000. See § 1.1502–13(c)(4)(ii) and (d)(1). Assume that, absent this *Answer 3*, C's separate taxable income under § 1.1502–12 for 1986 would be $1,500.

(iii) Pursuant to subdivision (ii)(A)(*1*) of this *Answer 3*, the $1,500 of deferred gain that, absent this *Answer 3*, would be restored to C's income in 1986 pursuant to § 1.150–13(d)(1) is an annual disregarded ICA gain amount that is not taken into account as income in determining C's separate taxable income under § 1.1502–12 for 1986. Thus, T's separate taxable income for 1986 is $0. In addition, under subdivision (ii)(A)(*2*) of this *Answer 3*, P's $5,500 deduction that, absent this *Answer 3*, would have caused the annual disregarded ICA gain amount of $1,500 to be restored to C's income in 1986 is not taken into account as a deduction in determining P's separate taxable income under § 1.1502–12 for 1986 to the extent of the annual disregarded ICA deduction of $1,500, *i.e.*, so much of the total $5,500 depreciation allowance as does not exceed the annual disregarded ICA gain amount of $1,500. Thus, P reports a deduction in 1986 with respect to the ICA asset of $4,000, *i.e.*, $5,500 − $1,500. P's adjusted basis in the ICA asset, however, is reduced by the entire $5,500 from $22,000 to $16,500. Because C's separate taxable income for 1986 is $0, none of C's net operating loss incurred in 1984, a separate return limitation year, can be a carryover to 1986, since C does not make a contribution to the P group's consolidated taxable income in 1986. See § 1.1502–21(c)(2). At the beginning of the following taxable year, the remaining balance of C's deferred gain in the ICA acquisition is $4,500, *i.e.*, $6,000 − $1,500.

Example (2). (i) Assume the same facts as in *Example (1).* Assume in addition that on January 1, 1987, an individual purchases all of the stock of C from P. Accordingly, all of C's remaining deferred gain in the ICA acquisition ($4,500) is restored to C's income in the P group's 1987 consolidated return by reason of § 1.1502–13(f)(1)(iii). Assume that C has no other items of income or deduction while a member of the P group during 1987. Thus, C's only item of income or loss for that period is the restored deferred gain of $4,500. Assume in addition that, absent this *Answer 3*, P's separate taxable income for 1987 would be a loss of $4,500, reflecting a deduction of $5,500 for the ICA asset, *i.e.*, $16,500/3. All other P group members break even for the year.

(ii) The $4,500 of deferred gain that is restored to C's income in 1987 by reason of § 1.1502–13(f)(1)(iii) is a remaining ICA gain amount. Because the ICA acquisition is not subject to an offset prohibition election, P must reduce its basis in the ICA asset by $4,500 (*i.e.*, by the remaining ICA gain amount) as of January 1, 1987. See subdivision (iii)(C) of this *Answer 3.* According, P's deduction in 1987 for the ICA asset is reduced by $1,500 from $5,500 to $4,000, *i.e.*, ($16,500 − $4,500)/3. P's separate taxable income for 1987, as adjusted for the basis adjustment, therefore is a loss of $3,000, *i.e.*, the loss of $4,500 (P's separate taxable income for 1987 absent this *Answer 3*), reduced by $1,500. The remaining ICA gain amount of $4,500 is income reported in the P group's 1987 consolidated return. Accordingly, the P's group's consolidated taxable income for 1987 (computed without the consolidated net operating loss deduction) is $1,500, *i.e.*, C's income of $4,500 minus P's loss of $3,000.

(iii) Since C's limitation under § 1.1502–21(c) exceeds $400, all of C's $400 net operating loss incurred in 1984, a separate return limitation year, may be included in the P group's consolidated net operating loss carryover to 1987. Assuming that no other net operating losses are available for inclusion in that carryover, the P group's consolidated taxable income for 1987 after reduction for that carryover is $1,100, *i.e.*, $1,500 minus $400.

Example (3). (i) Assume the same facts as in *Example (2)*, except that the ICA acquisition is subject to an offset prohibition election. All of the consequences described in *Example (1)* and *Example (2)* apply, except that P's adjusted basis in the ICA asset is not reduced as of January 1, 1987, by the remaining ICA gain amount and, as explained below, none of C's 1984 net operating loss is a carryover to 1987. In addition, four other potential consequences attend the ICA acquisition.

(ii) First, the remaining ICA gain amount of $4,500 is ordinary income to the P group that may not be offset by any deductions of C or any other P group member for 1987 (including C's $400 remaining portion of the net operating loss incurred in 1984). Thus, notwithstanding that the aggregate of taxable income and loss of P group members in 1987 is $0 (*i.e.*, C's income of $4,500 minus P's loss of $4,500), the P group is considered to have a consolidated taxable income in 1987 of $4,500 (the remaining ICA gain amount). See subdivision (iv)(C) of this *Answer 3.* In addition, however, the P group is considered to incur a consolidated net operating loss in 1987 of $4,500, *i.e.*, P's loss in 1987 of $4,500 that may not be used to offset C's remaining ICA gain amount of $4,500 because of the offset prohibition election. That consolidated

net operating loss may be applied to reduce income in other taxable years pursuant the applicable carryover and carryback rules.

(iii) Second, for purposes of determining the amount by which the P group's consolidated tax liability for 1987 may be *reduced* by restricted credits (as defined in subdivision (iv)(D) of this *Answer 3*), the P group's consolidated tax liability before reduction by any such restricted credits is calculated as if the remaining ICA gain amount of $4,500 were no income to the P group for 1987. Under these facts, the P group has no income (and therefore no pre-credit tax liability) in 1987 absent the remaining ICA gain amount. Thus, the P group's 1987 tax liability (before restricted credits) may not be reduced by restricted credits. Credits that, by reason of this *Answer 3*, cannot be applied to reduce the P group's consolidated tax liability in a taxable year in which there is a remaining ICA gain amount subject to the offset prohibition nevertheless may be applied to reduce tax liability in other taxable years pursuant to the applicable carryover and carryback rules for the particular credit.

(iv) Third, the remaining ICA gain amount is considered an item of income of a P group member other than C for purposes of determining the amount of a loss or credit of C arising in a separate return limitation year that may be included in the consolidated carryover of such a loss or credit to 1987. This rule is irrelevant under the facts of this *Example (3)*, however, since the P group's entire consolidated taxable income for 1987, $4,500, may be offset by no deductions otherwise available to the P group and since the P group's consolidated tax liability before restricted credits is a negative amount for purposes of restricted credit carryovers.

(v) Fourth, if the ICA asset were tangible property eligible for the investment tax credit, investment tax credit recapture could occur in 1987.

(7) *De minimis exception under section 338(e)(2)(D).*

Question 1: Does an exception to section 338(e)(1) apply under the authority of section 338(e)(2)(D) if P (or any other member of the P group) acquires a *de minimis* amount of assets from T (or a target affiliate of T)?

Answer 1: Yes.

Question 2: When does the *de minimis* exception apply?

Answer 2: (i) *General rule.* The *de minimis* exception applies only if the *de minimis* amount equals or exceeds the aggregate gross fair market value of all assets acquired in acquisitions that, with respect to T or any affected target, are described in section 338(e)(1) and are not subject to an exception to section 338(e)(1) (other than the carryover basis election exception of paragraph (f)(6) of this section or this *de minimis* exception). The "gross fair market value" of an asset is the fair market value of that asset without regard to liabilities. For the effect of a protective or an affirmative action carryover election on the *de minimis* exception, see paragraph (f)(6)(iii) *Answer 2* (ii) of this section.

(ii) *De minimis amount.* The *"de minimis* amount" is the lesser of (A) the sum of the five percent amounts for T and all affected targets or (B) $50,000. The "five percent amount" for a target (*i.e.*, either T or an affected target) is an amount equal to five percent of the sum of (A) the target's grossed-up stock basis and (B) the target's liabilities on the acquisition date (not including tax liabilities that would arise if a section 338 election were made for the target). The target's grossed-up stock basis for this purpose is the amount determined under section 338(b)(1) (applied as if the basis of nonrecently purchased target stock were determined under section 338(b)(3)(B)).

Example (1). (i) On December 31, 1985, T and T1 are wholly-owned subsidiaries of S. On January 1, 1986, P acquires all of the stock of T in a qualified stock purchase. On June 1, 1986, P acquires all of the stock of T1 in a qualified stock purchase. On December 1, 1986, P acquires all of the stock of X from S in a qualified stock purchase. S previously acquired X on April 1, 1986, *i.e.*, after T was sold by S but before T1 was sold by S. P makes neither an express election nor a protective carryover election for T. On May 1, 1986, P purchases an asset from T ("T asset"). The T asset has a fair market value of $30,000 and is subject to a liability of $10,000. On August 1, 1987, P purchases an asset from X ("X asset"). The X asset has a fair market value of $25,000 and is subject to no liabilities. Assume that both asset acquisitions are described in section 338(e)(1) and are not subject to an exception to section 338(e)(1) (other than the carryover basis election exception of paragraph (f)(6) of this section or this *de minimis* exception). Assume in addition that the five percent amount for each of the targets (*i.e.*, T, T1, and X) exceeds $50,000.

(ii) T1 and X are affected targets with respect to T, since a deemed election would occur for those corporations in the event of a section 338 election for T. (Note that X is an affected target with respect to T even though X is not a target affiliate of T.) The *de minimis* amount is $50,000, *i.e.*, the lesser of the sum of the five percent amounts for T, T1, and X or $50,000. The May 1, 1986, asset acquisition, standing alone, does not exceed the *de minimis* amount under these facts, since it does not exceed $50,000. By reason of the August 1, 1987, asset acquisition from X, however, the *de minimis* amount is exceeded, since the gross fair market value of the T and X assets exceeds $50,000, *i.e.*, $55,000 ($30,000 + $25,000). As a result, neither asset acquisition is subject to the *de minimis* exception. Note that T is thereby affected by P's acquisition of the X asset even though that acquisition occurs after T's consistency period (assuming that period is not extended pursuant to paragraph (g)(1) *Answer 1* of this section) and even though P acquires the asset from a corporation that is not a target affiliate of T.

Example (2). (i) Assume the same facts as in *Example (1)*, except that (A) the August 1, 1987, asset acquisition does not occur and (B) the five percent amounts for T, T1, and X are $15,000, $10,000, and $40,000, respectively.

(ii) The May 1, 1986, asset acquisition exceeds the *de minimis* amount as of that day, since the $30,000 gross fair market value of the T asset exceeds the *de minimis* amount (as of that day) of $15,000, *i.e.*, the lesser of the five percent amount for T or $50,000. As of May 1, 1986, the *de minimis* exception therefore does not apply to the asset acquisition. The qualified stock purchase of the stock of T1 does not change this result, since the qualified stock purchase increases the *de minimis* amount only to $25,000 (*i.e.*, the lesser of the five percent amounts for T and T1 or $50,000), which is less than the $30,000 gross fair market value of the T asset. By reason of the qualified stock purchase of the stock of X on December 1, 1986, however, the May 1, 1986, asset acquisition does not exceed the *de minimis* amount, which, as of December 1, 1986, is $50,000, *i.e.*, the lesser of the five percent amounts for T, T1, and X or $50,000. Accordingly, the May 1, 1986, asset acquisition is subject to the *de minimis* exception.

(g) *Special consistency rules*—(1) *Extension of consistency period and 12-month acquisition period in certain cases.*

Question 1: Under what circumstances is T's consistency period extended under section 338(h)(4)(B) beyond the period specified in section 338(h)(4)(A) ("normal consistency period")?

Answer 1: (i) *Extension to period preceding normal consistency period.* T's consistency period extends beyond the normal consistency period to include the day preceding that period on which a member of the P group acquires an asset in a triggering asset acquisition, provided that the Commissioner determines (on the basis of all of the facts and circumstances) that a P group member had a plan in effect at the close of the day of the triggering asset acquisition to make a qualified stock purchase of T and that such plan remained in effect through T's acquisition date.

(ii) *Extension to period following normal consistency period.* T's consistency period extends beyond the normal consistency period to include the later of the day following that period on which a P group member either makes a qualified stock purchase of the stock of a target affiliate of T or makes a triggering asset acquisition, provided that the Commissioner determines (on the basis of all of the facts and circumstances) that a P group member had a plan in effect at the close of the normal consistency period to make such qualified stock purchase or triggering

asset acquisition, and that such plan remained in effect through the subsequent qualified stock purchase or triggering asset acquisition.

(iii) *Triggering asset acquisition.* An asset acquisition is a "triggering asset acquisition" if, had it occurred during the normal consistency period, it would have been described in section 338(e)(1) and would not have been subject to an exception (other than the carryover basis election exception of paragraph (f)(6) of this section) to section 338(e)(1).

Question 2: Under what circumstances is the 12-month acquisition period extended beyond 12 months?

Answer 2: Under the authority of section 338(e)(3) and (i), the 12-month acquisition period is extended beyond 12 months if (i) pursuant to a plan of the P group (as determined by the Commissioner on the basis of all of the facts and circumstances), T stock purchased by P satisfies the percentage ownership requirements of section 338(d)(3) by reference to a period of time that exceeds 12 months ("extended period") and (ii) an extension of the 12-month acquisition period is necessary to carry out the purposes of the consistency rules of section 338(e), (f), or (i). If the requirements of the preceding sentence are satisfied, the extended period is considered the "12-month acquisition period."

(2) *Asset or stock acquisition by non-P group member considered an acquisition by P group member in certain cases.*

Question: Under what circumstances may the Commissioner treat an acquisition by a person other than a P group member ("X") of—

(i) an asset of T (or of a target affiliate of T) as an acquisition of an asset of T (or of a target affiliate of T) by a P group member, or

(ii) stock in T (or in a target affiliate of T) as a purchase of stock in T (or in a target affiliate of T) by a P group member?

Answer: (i) *Acquisition of an asset of T or its target affiliate.* For purposes of applying the consistency rules of section 338 (e), (f), and (i), the Commissioner may treat the acquisition of an asset of T (or of a target affiliate of T) by X as the acquisition of an asset of T (or of a target affiliate of T) by a P group member if—

(A) P makes a qualified stock purchase of T stock,

(B) X acquires the asset of T (or of a target affiliate of T) during T's consistency period,

(C) X transfers the asset to a P group member, or becomes a member of the P group, during T's consistency period, and

(D) If X is not related to a P group member at the time it acquires the asset, the Commissioner determines (on the basis of all of the facts and circumstances) that the requirements described in subdivisions (B) and (C) of this *Answer* (i) were satisfied pursuant to a single plan of the P group.

(ii) *Acquisition of stock in t (or its target affiliate).* For purposes of applying the consistency rules of section 338 (e), (f), and (i), the Commissioner may treat a P group member as having acquired stock in Y (*i.e.*, T or a target affiliate of T) by purchase either on the day a P group member acquires Y stock from X or on the day that X, while holding Y stock, becomes a member of the P group if—

(A) X acquired the Y stock under such circumstances that, if X (whether or not a corporation) were treated as a P group member at the time X acquired that Y stock, a qualified stock purchase of the Y stock ("hypothetical Y stock purchase") would be made by the P group (on or after the day X acquired that Y stock, and wholly or in part by reason of X's acquisition of that Y stock),

(B) Either (*1*) a deemed election would be made for Y by the P group (or could be made for Y by reason of section 338(e)(1) at the discretion of the District Director) if the hypothetical Y stock purchase were an actual qualified stock purchase of Y stock by the P group, or (*2*) a section 338 election actually is made by the P group for any target that would have been an affected target ("hypothetical affected target") if a section 338 election applied with respect to the P group's hypothetical Y stock purchase,

(C) X transfers the Y stock to a P group member or becomes a member of the P group during either (*1*) Y's consistency period (determined as if the hypothetical Y stock purchase were an actual qualified stock purchase of Y by the P group) or (*2*) the consistency period of a hypothetical affected target for which a section 338 election actually is made, and

(D) In the event that X is not related to a P group member at the time it acquires the Y stock, the Commissioner determines (on the basis of all of the facts and circumstances) that the requirements described in subdivisions (A), (B), and (C) of this *Answer* (ii) were satisfied pursuant to a single plan of the P group.

(iii) *Other acquisitions.* The Internal Revenue Service may treat any indirect acquisition of an asset of T (or of a target affiliate of T) or of stock in T (or in a target affiliate of T) as a direct acquisition of such an asset or as a purchase of such stock by a P group member if such treatment is appropriate to carry out the purposes of the consistency rules of section 338 (e), (f), or (i). An indirect acquisition includes, for example, the acquisition of such asset or stock by an intermediary, such as a partnership or trust, in which a P group member has an interest.

(iv) *Operating rules for subdivision (ii) of this Answer*—(A) *Application of section 338(f).* Under the authority of section 338 (f) and (i), the P group is considered to have made a deemed election with respect to its qualified stock purchase of the stock of Y if—

(*1*) That qualified stock purchase occurs in whole or in part by reason of the operation of subdivision (ii) of this *Answer*,

(*2*) Subdivision (ii) of this *Answer* applies to Y by reason of an actual section 338 election for a hypothetical affected target, and

(*3*) The acquisition date of that hypothetical affected target occurs after the acquisition date of Y.

(B) *Aggregation rule.* In the event that acquisitions by two or more persons in the aggregate would satisfy the requirements of subdivision (ii) of this *Answer*, then all such persons shall be treated as a single person for purposes of applying that subdivision.

(v) *Special extension of consistency period and 12-month acquisition period in appropriate cases.* Under the authority of section 338 (e), (f), (h)(4) (B), and (i), the consistency period and 12-month acquisition period of any corporation affected by the provisions of this *Answer* may be extended by the Internal Revenue Service whenever appropriate to carry out the purposes of those provisions:

Example (1). On January 1, 1985, D, an individual unrelated to P, acquires an asset of S for cash ("S asset"). On December 1, 1985, P acquires all of the stock of T from S in a qualified stock purchase. P makes neither an express election nor a protective carryover election for T. On October 1, 1986 (*i.e.*, during T's consistency period), P acquires the S asset from D. Assume that the Commissioner determines, on the basis of all of the facts and circumstances, that D's acquisition of the S asset and D's subsequent transfer of the S asset to P occurred pursuant to a single plan of the P group. For purposes of applying the consistency rules of section 338 (e), (f), and (i), the Commissioner may treat P as having acquired an asset of S.

Example (2). (i) On May 1, 1985, P acquires all of the stock of T from S in a qualified stock purchase and makes an express election for T. On June 1, 1985, B, an individual that is the sole shareholder of P, acquires for cash from S all of the stock of Y.

a target affiliate of T. On December 1, 1985, B transfers the stock of Y to P.

(ii) For purposes of applying the consistency rules of section 338 (e), (f), and (i), the Commissioner may treat P as having acquired the Y stock by purchase, since the three applicable requirements of subdivision (ii) of this *Answer* are satisified. First, if B were treated as a corporation that was a member of the P group at the time of B's acquisition of the Y stock, then a qualified stock purchase of Y stock would be made by the P group on June 1, 1985. Accordingly, the hypothetical Y stock purchase requirement is satisified. Second, had the hypothetical Y stock purchase actually occurred, a deemed election under section 338(f)(1) would be made for Y by reason of the P group's express election for T. Third, B transfers the Y stock to P during Y's consistency period (determined as if the hypothetical Y stock purchase were an actual qualified stock purchase of Y by the P group). If the Commissioner treats P as having acquired the Y stock by purchase under these facts, than a P group member is considered to acquire all of the Y stock in a qualified stock purchase on December 1, 1985, notwithstanding that P acquires the stock from B, a person described in section 338(h)(3)(A)(iii), and therefore would not be considered to have purchased that stock absent this *Answer*. If, pursuant to this *Answer*, P is considered to have made a qualified stock purchase of the stock of Y, then the express election for T causes a deemed election under section 338(f) (1) for Y, since Y is a target affiliate of T and was acquired during the consistency period of T.

Example (3). Assume the same facts as in *Example (2)*, except that B is a corporation and that, on December 1, 1985, B does not transfer the Y stock to a P group member but rather becomes a member of the P group. The result is the same as in *Example (2)*.

Example (4). (i) Assume the same facts as in *Example (2)*, except that (A) on June 1, 1985, B acquires for cash from S only 40 of the 100 shares of Y's only class of outstanding stock, and (B) on April 1, 1986, P purchases for cash the remaining 60 shares of Y's stock.

(ii) If B were considered a corporation that was a member of the P group at the time of B's acquisition of the Y stock, then a qualified stock purchase of Y stock would be made by the P group on April 1, 1986. (Note that the hypothetical Y stock purchase requirement is satisified by reason of an event (P's purchase of 60 shares of Y stock on April 1, 1986) that occurs after B transfers the 40 shares of Y stock to P.) Thus, the result is the same as in *Example (2)*, except that the qualified stock purchase of Y stock by the P group occurs on April 1, 1986 (assuming that the Commissioner determines under subdivision (ii) of this *Answer* that the P group should be treated as having acquired the Y stock from B by purchase) rather than on December 1, 1985.

Example (5). (i) On January 1, 1985, S holds all of the stock of Y and T. At the close of that date, B, an individual that is the sole shareholder of P, acquires for cash from S all of the stock of Y. On February 1, 1985, P acquires all of the stock of T from S in a qualified stock purchase and makes an express election for T. On May 1, 1985, B transfers the stock of Y to P.

(ii) For purposes of applying the consistency rules of section 338(e), (f), and (i), the Commissioner may treat P as having acquired the Y stock by purchase, since the three applicable requirements of subdivision (ii) of this *Answer* are satisfied. First, if B were treated as a corporation that was a member of the P group at the time of B's acquisition of the Y stock, then a qualified stock purchase of Y stock would be made by the P group on January 1, 1985. Accordingly, the hypothetical Y stock purchase requirement is satisfied. Second, an express election actually is made by the P group for a target (T) that is a hypothetical affected target. Third, B transfers the Y stock to P during the consistency period of a hypothetical affected target (T) for which a section 338 election actually is made. If, pursuant to this *Answer*, P is considered to have made a qualified stock purchase of the stock of Y, then the express election for T causes a deemed election under section 338 (f)(1) for Y, since Y is a target affiliate of T and was acquired during the consistency period of T.

Example (6). Assume the same facts as in *Example (5)*, except that P acquires all of the stock of T from S in a qualified stock purchase on September 1, 1985. The result is the same as in *Example (5)*. Assuming that P is treated under subdivision (ii) of this *Answer* as having acquired the stock of Y in a qualified stock purchase, a deemed election is made for Y by reason of subdivision (iv)(A) of this *Answer*. This result follows because (i) the qualified stock purchase of Y occurs under subdivision (ii) of this *Answer* by reason of the actual section 338 election for T, a hypothetical affected target, and (ii) the acquisition date of T occurs after the Acquisition date of Y. Note that the express election for T properly is made even though, as a result of that express election, there may exist a target, Y, that, as between Y and T, is the original target. See paragraph (e) of this section.

Example (7). (i) On May 1, 1985, B, an individual that is the sole shareholder of P, acquires for cash from S all of the stock of T. On September 1, 1985, P acquires an asset of S. On January 1, 1986, B transfers the stock of T to P.

(ii) Under these facts, the hypothetical Y stock purchase requirement is satisfied. If, under the circumstances, a deemed election under section 338(e)(1) with respect to the P group's hypothetical Y stock purchase could be made at the discretion of the District Director by reason of the asset acquisition on September 1, 1985, then the Commissioner may treat B's transfer of the Y stock to P on January 1, 1986, as a purchase by P of that Y stock on that date, since the transfer occurs during the consistency period of Y (determined as if the hypothetic Y stock purchase were an actual qualified stock purchase of Y stock by the P group).

(h) *Determination of section 338(a)(1) deemed sale price*—(1) *Introduction.* The price at which old T is treated as selling its assets in the section 338(a)(1) deemed sale must be determined in order to measure the gain or loss recognized by T in the deemed sale. The questions and answers in this paragraph (h) provide guidance on the determination of the aggregate deemed sale price. For purposes of applying this paragraph (h), T stock is considered purchased or held by P if it is purchased or held by any member of the P group. See section 338(h)(8). This paragraph (h) does not apply if an election under section 338(h)(10) is made. For the effect of old T's tax liabilities, as determined under this paragraph (h), on the basis of new T's assets, see paragraph (j) of this section.

(2) *Definitions*—(i) *ADSP.* The "ADSP" is the aggregate deemed sale price, *i.e.*, the price at which T is deemed to have sold all of its assets in the deemed sale under section 338(a)(1).

(ii) *Elective ADSP formula.* The "elective ADSP formula" is an elective formula prescribed under the authority of section 338(h)(11) for determining the ADSP.

(iii) *Allocable ADSP amount.* The "allocable ADSP amount" is the portion of the ASDP as calculated under the elective ADSP formula that is allocable to a particular T asset. (The ADSP is allocated among the T assets for this purpose in proportion to their relative fair market values. Recapture gain on a T asset under the elective ADSP formula is computed by reference to the allocable ADSP amount for that asset.)

(iv) *Recapture gain.* "Recapture gain" is gain that is recognized in the section 338(a)(1) deemed sale notwithstanding the application of section 337 to the deemed sale. Examples of recapture gain include depreciation and LIFO recapture, section 338(c)(1) amounts, and tax benefit items.

(v) *Section 338(c)(1) percentage.* The "section 338(c)(1) percentage" is 100 percent minus the maximum percentage specified in section 338(c)(1). Items of gain or loss that are realized in the deemed sale but that would not be recognized in an actual sale under section 337 are multiplied by the section 338(c)(1) percentage to arrive at the section 338(c)(1) gain (or loss) recognized in the deemed sale.

(3) *Determination of ADSP*

Question 1: How is the ADSP determined?

Answer 1: (i) *General rule.* The ADSP is the aggregate of the fair market values of all old T's assets at the close of the acquisition date. Section 338(a)(1). A proper appraisal of the assets will be considered evidence of fair market value.

(ii) *Elective ADSP formula for determining ADSP*—(A) *General rule.* Under the authority of section 338(h)(11), the ADSP may be determined under the

elective ADSP formula, which takes into account liabilities and other relevant items.

(B) *Procedure for electing elective ADSP formula and for revoking election.* The election to apply the elective ADSP formula ("formula election") is made by attaching to the final return of old T (including an amended final return) a statement containing the following declaration (or a substantially similar declaration): "THIS RETURN REFLECTS A FORMULA ELECTION FOR T UNDER SECTION 338 AND § 1.338–4T(h)(3)." The formula election is revoked by attaching to an amended final return of old T a statement containing the following declaration (or a substantially similar declaration): "THIS RETURN DOES NOT REFLECT A FORMULA ELECTION FOR T UNDER SECTION 338 AND § 1.338–4T(h)(3)." In addition, a formula election may be made or revoked in connection with the examination of the final return of old T. A formula election made for T also applies to all affected targets, as does the revocation of a formula election for T. A formula election may not be made or revoked if the period within which to make an assessment of tax has expired for any return that would be affected by the election or the revocation. For this purpose, a return would be affected by the election (or revocation) if the election (or revocation) would have the effect, directly or indirectly, of increasing the tax liability reported in that return.

Question 2: How is the ADSP determined under the elective ADSP formula?

Answer 2: (i) *Introduction.* The ADSP under the elective ADSP formula is the sum of (A) the grossed-up basis of P's recently purchased T stock (as defined in section 338(b)(6)(A)), (B) the liabilities of T (including any tax liability resulting from the deemed sale), and (C) other relevant items. If T is acquired in a true bargain purchase (*i.e.*, if the cost of the stock acquisition of P is less than the aggregate fair market value of the assets of T), the ADSP as determined under the elective ADSP formula will reflect that bargain element. This result follows because the elective ADSP formula takes into account the actual price paid by P or T stock. If the elective ADSP formula is not used in such a case, recapture gain items measured by reference to the ADSP will be disproportionately high as compared to the price P actually paid for the T stock and the basis of new T's assets.

(ii) *Grossed-up basis of P's recently purchased T stock.* The grossed-up basis of P's recently purchased T stock is an amount equal to P's basis in recently purchased T stock, divided by the percentage of T stock (by value) attributable to that recently purchased T stock. If T has a single class of outstanding stock, the grossed-up basis of P's recently purchased T stock for purposes of the elective ADSP formula reflects the total price P would have paid for all outstanding T stock had it purchased all such stock for a price per share equal to the average price per share that it paid for the recently purchased T stock.

(iii) *Tax liability resulting from the deemed sale.* The elective ADSP formula takes into account both tax credit recapture liability arising by reason of the deemed sale and the tax liability on recapture gain. The elective ADSP formula reflects that fact that recapture gain both increases the ADSP (by creating a tax liability) and is computed by reference to the ADSP.

(iv) *Calculation of recapture gain with respect to certain property.* Section 1245 depreciation recapture gain an a T asset under the elective ADSP formula is the amount by which (A) the lesser of the recomputed basis of that asset or the allocable ADSP amount for that asset exceeds (B) the adjusted basis of that asset. Proper use of recomputed basis for items of section 1245 property results in the lowest ADSP. When a large number of items subject to section 1245 depreciation recapture must be included in the elective ADSP formula, the determination as to which of those assets should be measured by reference to recomputed basis to arrive at the lowest ADSP requiries a very large number of trial and error computations. Similar rules apply to other classes of property with respect to which recapture gain is properly determined by reference to the lesser of the allocable ADSP amount or some other amount.

(v) *Other applicable rules apply in elective ADSP formula.* The elective ADSP formula may not be applied in such a way as to contravene other applicable rules. Thus, for example, a capital loss under section 338(c)(1) cannot be applied in the elective ADSP formula to reduce ordinary income recapture gain.

(vi) *Sample elective ADSP formula.* The sample elective ADSP formula shown below takes into account the existence of recapture gain arising under sections 1245 and 338(c)(1). Other items of recapture gain may be added to the elective ADSP formula as appropriate. The sample formula is as follows:

$$ADSP = G + L + t_R \times [(\text{Lesser of R or } (ADSP \times F)) - B] + C \times t_R \times [(ADSP \times F) - Cb]$$

For purposes of this sample formula—

(A) "G" is the grossed-up basis of P's recently purchased T stock (as determined under subdivision (ii) of this *Answer 2*).

(B) "L" is the sum of T's liabilities other than T's tax liability for recapture gain amounts determined by reference to the ADSP. (Investment tax credit recapture under section 47 that results from the deemed sale of T's assests is included in L, for example, since that liability is not determined by reference to the ADSP.)

(C) "t_R" is the tax rate applicable to the recapture gain item represented by the bracketed material immediately following this symbol. In the sample formula, the bracketed material following the first use of the "t_R" symbol represents section 1245 depreciation recapture gain on an asset. (If there is more than one asset subject to section 1245 depreciation recapture, the recapture gain for each asset is separately computed in the elective ADSP formula.) The bracketed material following the second use of the "t_R" symbol in the sample formula represents section 338(c) (1) gain on an asset.

(D) "R" is the recomputed basis (as defined in section 1245(a)(2)) of an item of (section 1245 property).

(E) "F" is a fraction the numerator of which is the fair market value of a T asset on T's acquisition date and the denominator of which is the aggregate fair market value of all T assets on T's acquisition date. This fraction is multiplied by the ADSP to arrive at the allocable ADSP amount for a T asset.

(F) [Reserved]

(G) "B" is the adjusted basis of a T asset on the acquistion date.

(H) "C" is the section 338(c)(1) percentage (as defined in paragraph (h)(2)(v) of this section).

(I) "Cb" is the basis of an asset for purposes of determining the section 338(c)(1) gain or loss on that asset. An item of section 1245 property, for example, is taken into account for purposes of determining section 338(c)(1) gain only if the recomputed basis of that item (rather than the allocable ADSP amount for that item) is the measure of section 1245 depreciation recapture gain on that asset, since only in that case is there realized gain on the item that, absent section 338(c)(1), would not be recognized by reason of section 337. In such a case, the recomputed basis is the "Cb" amount.

Example (1). (i) T is a calendar year taxpayer that files separate returns and that has no loss or tax credit carryovers to 1985. As of July 1, 1985, T's only asset, which T has held for more than one year, is an item of section 1245 property with an adjusted basis

to T of $50,400, a recomputed basis of $80,000, and a fair market value of $100,000. On July 1 1985, P purchases all of the stock of T for $75,000 and makes an express election for T. Assume that T has no liabilities other than a tax liability resulting from the deemed sale of assets. Assume in addition that T's marginal tax rate for any ordinary income resulting from the deemed sale of assets is 46 percent.

(ii) Section 1245 depreciation recapture gain on the item of section 1245 property is determined under the elective ADSP formula by reference to the lesser of the recomputed basis of that item ($80,000) or the allocable ADSP amount for that item. (Note that the allocable ADSP amount for the item under these facts is the entire ADSP.) The elective ADSP formula as applied to these facts is as follows:

$$ANSP = G + L + t_R \times [(\text{Lesser of R or ADSP}) - B]$$
$$ADSP = (\$75,000/1) + \$0 + .46 \times [(\text{Lesser of } \$80,000 \text{ or ADSP}) - \$50,400]$$

ADSP—Recomputed basis measurement:

$$ADSP = \$75,000 + .46 \times (\$80,000 - \$50,400)$$
$$ADSP = \$88,616$$

ADSP—ADSP measurement:

$$ADSP = \$75,000 + .46 \times (ADSP - \$50,400)$$
$$ADSP = \$75,000 + (.46 \times ADSP) - 23,184$$
$$ADSP = \$51,816 + .46ADSP$$
$$ADSP - .46ADSP = \$51,816$$
$$.54ADSP/.54 = \$51,816/.54$$
$$ADSP = \$95,955.56$$

Accordingly, the ADSP of T is $88,616, *i.e.*, the recomputed basis measurement ($88,616), which is less than the ADSP measurement ($95,955.56).

Example (2). Assume the same facts as in *Example (1),* except that on July 1, 1985, P purchases only 80 of the 100 outstanding shares of T's only class of stock for $60,000. Assume in addition that those 80 shares represent, at all times during the one-year period beginning on July 1, 1985 (the aquisition date of T), 80 percent of the value of all T stock and that P purchases no additional T stock during that one-year period. Accordingly, the section 338(c)(1) percentage under paragraph (h)(2)(v) of this section is 20 percent, *i.e.*, 100 percent minus 80 percent. Assume that any net capital gain resulting from the deemed sale will be taxed at the 28 percent rate. The elective ADSP formula as applied to these facts is as follows:

$$ADSP = G + L + t_R \times [(\text{Lesser of R or ADSP}) - B] + C \times t_R \times (ADSP - Cb)$$
$$ADSP = (\$60,000/.8) + \$0 + .46 \times [(\text{Lesser of } \$80,000 \text{ or ADSP}) - 50,400] + .20 \times .28 \times [ADSP - (\text{Lesser of } \$80,000 \text{ or ADSP})]^*$$

*Section 338(c)(1) gain exists under the formula only if the recomputed basis of $80,000 rather than the allocable ADSP amount is the measure of section 1245 depreciation recapture gain. The section 338(c)(1) gain in that case is the allocable ADSP amount, reduced by $80,000. Whenever section 1245 depreciation recapture gain for an item is calculated by reference to the allocable ADSP amount for that item, the section 338(c)(1) calculation may be omitted for that item.

ADSP—Recomputed basis measurement:

$$ADSP = (\$60,000/.8) + .46 \times [\$80,000 - \$50,400) + .20 \times .28 \times (ADSP - \$80,000)$$
$$ADSP = \$75,000 + \$13,616 + (.056 \times ADSP) - \$4,480$$
$$ADSP = \$84,136 + .056ADSP$$
$$ADSP - .056ADSP = \$84,136$$
$$.944ADSP/.944 = \$84,136/.944$$
$$ADSP = \$89,127.12$$

ADSP—ADSP measurement:

$$ADSP = (\$60,000/.8) + .46 \times (ADSP - \$50,400)$$
$$ADSP = \$75,000 + (.46 \times ADSP) - \$23,184$$
$$ADSP = \$51,816 + .46ADSP$$
$$ADSP - .46ADSP = \$51,816$$
$$.54ADSP/.54 = \$51,816/.54$$
$$ADSP = \$95,955.56$$

Accordingly, the ADSP of T is $89,127.12, *i.e.*, the recomputed basis measurement ($89,127.12), which is less than the ADSP measurement ($95,955.56).

Example (3). T is a calendar year taxpayer that files separate returns and that has no loss or tax credit carryovers to 1985. On July 1, 1985, P purchases 80 of the 100 outstanding shares of T's only class of stock for $80,000 and makes an express election for T. Assume that those 80 shares represent, at all times during the one-year period beginning on July 1, 1985 (the acquisition date of T), 80 percent of the value of all T stock and that P purchases no additional T stock during that one-year period. Accordingly, the section 338(c)(1) percentage under paragraph (h)(2)(v) of this section is 20 percent, *i.e.*, 100 percent minus 80 percent. Assume in addition that T's marginal tax rate for any ordinary income resulting from the deemed sale of assets will be 46 percent, and that any net capital gain resulting from the deemed sale of assets will be taxed at the 28 percent rate. T does not inventory goods under the LIFO method, so there is no LIFO recapture gain in the deemed sale. T's assets, all of which have been held by T for more than one year, are as follows:

Assets	Basis	FMV [1]	Fraction [2]
1. Goodwill	$5,000	$15,000	.0697674
2. Inventory (FIFO)	10,000	30,000	.1395348
3. Equipment A (recomputed basis $80,000)	5,000	80,000	.372093
4. Equipment B (recomputed basis $20,000)	10,000	90,000	.4186046
Totals	30,000	215,000	1.00

[1] Fair market value.
[2] Fraction of aggregate fair market value. These amounts may reflect certain rounding errors.

T has liabilities (not including the tax liability for recapture gain on its assets) of $50,000. The elective ADSP formula as applied to these facts is as follows (the subscript numerals in the formula correspond to the number assigned each asset in the above table and indicate which asset is being referred to):

$$ADSP = G + L + t_R \times [(\text{Lesser of } R_3 \text{ or } (ADSP \times F_3)) - B_3 + (\text{Lesser of } R_4 \text{ or } (ADSP \times F_4)) - B_4] + C \times t_R \times [(ADSP \times (F_1 + F_2 + F_4)) - (Cb_1^* + Cb_3^{**} + Cb_4^{***})] + C \times t_R \times [(ADSP \times F_2) - Cb_2^{****}]$$

*Equal to B_1
**Equal to the lesser of R_3 or $(ADSP \times F_3)$.
***Equal to the lesser of R_4 or $(ADSP \times F_4)$.
****Equal to B_2.

$$ADSP = \$80,000/.8 + \$50,000 + .46 \times [(\text{Lesser of } \$80,000 \text{ or } (ADSP \times .372093)) - \$5,000 + (\text{Lesser of } \$20,000 \text{ or } (ADSP \times .4186046) - \$10,000] + .2 \times .28 \times [(ADSP \times (.0697674 + .372093 + .4186046) - \$5,000 - (\text{Lesser of } \$80,000 \text{ or } (ADSP \times .372093)) - (\text{Lesser of } \$20,000 \text{ or } (ADSP \times .4186046)] + .2 \times .46 \times [(ADSP \times .1395348) - \$10,000]$$

In this case, the recomputed basis is less than the allocable ADSP amount for Asset #4 but not for Asset #3. The elective ADSP formula computation, as applied on these assumptions, is as follows:

$$ADSP = \$100,000 + \$50,000 + .46 \times [(.372093ADSP - \$5.000) + (\$20,000 - \$10,000)] + .2 \times .28 \times (.860465ADSP - \$5,000 - .372093ADSP - \$20,000) + .2 \times .46 \times (.1395348ADSP - \$10,000)$$
$$ADSP = \$150,000 + .46 \times (.372093ADSP + \$5,000) + .056 \times (.488372ADSP - \$25,000) + .092 \times (.1395348ADSP - \$10,000)$$
$$ADSP = \$150,000 + .1711627ADSP + \$2,300 + .0273488ADSP - \$1,400 + .0128372ADSP - \$920$$
$$ADSP = \$150,000 + .2113487ADSP - \$20$$
$$ADSP = \$149,980 + .2113487ADSP$$
$$ADSP - .2113487ADSP = \$149,980$$
$$.7886513ADSP/.7886513 = \$149,980/.7886513$$
$$ADSP = \$190,172.76$$

The following table breaks the ADSP of $190,173 down to the deemed sale price, section 1245 depreciation recapture gain (and resulting tax) and section 338(c)(1) gain (and resulting tax) allocable to each asset:

Asset	Fraction	ADSP amt (column 2 · $190,173)	Section 1245 gain	Tax on column 4 (· 46)	Section 338(c)(1) gain	Tax on column 6
(1)	(2)	(3)	(4)	(5)	(6)	(7)
#1	.0697674	$13,268	N/A	N/A	[3] $1,654	[6] $463
#2	.1395348	26,536	N/A	N/A	[4] 3,307	[7] 1,521
#3	.3720932	70,762	[1] $65,762	$30,251	N/A	N/A
#4	.4186046	79,607	[2] 10,000	4,600	[5] 11,921	3,338
Totals	1.00	190,173	75,762	34,851	16,882	5,322

[1] Asset #3: $(ADSP \times F_3) - B_3 = \$70,762 - \$5,000 = \$65,762$
[2] Asset #4: $R_4 - B_4 = \$20,000 - \$10,000 = \$10,000$.
[3] Asset #1: $C \times (\text{Col. } 3 - B_1) = .2 \times (\$13,268 - \$5,000) = \$1,654$
[4] Asset #2: $C \times (\text{Col. } 3 - B_2) = .2 \times (\$26,536 - \$10,000) = \$3,307$
[5] Asset #4: $C \times (\text{Col. } 3 - B_4) = .2 \times (\$79,607 - \$20,000) = \$11,921$
[6] $t_R = .28$
[7] $t_R = .46$.

Summary of calculation

Grossed-up basis of P's recently purchased T stock	$100.000
Liabilities (except taxes measured by reference to ADSP)	50.000
Tax on section 1245 depreciation recapture gain	34.851
Tax on section 338(c)(1) gain	5.322
ADSP	190.173

Question 3: Assume that T owns all of the stock of T1 at the close of T's acquisition date and that P makes a qualified stock purchase of and express election for T. For purposes of applying the elective ADSP formula to T1, what is T's basis in the T1 stock that T is deemed to sell and purchase under section 338(a)?

Answer 3: T's basis in recently purchased T1 stock is the allocable ADSP amount for the T1 stock that is deemed purchased by T, treating the T1 stock in the same manner as any other asset of T to which the ADSP of T is allocated under the elective ADSP formula.

Example: (i) Assume the facts of *Example (3)* of *Answer 2* of this paragraph (h), except that Asset #2 is all of the stock of T1 rather than inventory. T1 is a calendar year taxpayer that files separate returns and that has no loss or tax credit carryovers to 1985. As of July 1, 1985, T1's only asset, which T1 has held for more than one year, is an item of section 1245 property with an adjusted basis to T1 of $18,000 and a recomputed basis of $25,000. Under these facts, the express election for T causes a deemed election under section 338(f)(1) for T1. Assume that T1 has no liabilities other than a tax liability resulting from section 1245 depreciation recapture gain in the deemed sale of assets. Assume in addition that T1's marginal tax rate for any ordinary income resulting from its deemed sale of assets is 46 percent.

(ii) The ADSP of T under the elective ADSP formula is computed as follows (the assumptions regarding the application of recomputed basis in the elective ADSP formula are the same as in *Example (3)*):

$$ADSP = G + L + t_R \times x[\{(ADSP \times F_3) - B_3) + \{R_4 - B_4)\} + C \times t_R \times [ADSP^* - Cb_1 + Cb_2 + Cb_3 + Cb_4)]$$

*The total ADSP is taken into account in determining the long term capital gain realized in the deemed sale of T since long-term capital gain potentially is realized with respect to all four assets held by T. Because section 1245 depreciation recapture gain on Asset #3 is calculated by reference to the allocable ADSP amount, however, no long-term capital gain is actually realized with respect to Asset #3, *i.e.*, all gain on Asset #3 is treated as section 1245 depreciation recapture gain.

$$ADSP = \$100,000 + \$50,000 + .46 \times [(.372093ADSP - \$5,000) + (\$20,000 - \$10,000)] + .2 \times .28 \times [ADSP - (\$5,000 + \$10,000 + .372093ADSP + \$20,000)]$$

$$ADSP = \$150,000 + .46 \times [.372093ADSP + \$5,000) + .056 \times (.627907ADSP - \$35,000)$$

$$ADSP = \$150,000 + .1711627ADSP + \$2,300 + .0351627ADSP - \$1,960$$

$$ADSP = \$150,340 + .2063254ADSP$$

$$ADSP - .2063254ADSP = \$150,340$$

$$.7936746ADSP/.7936746 = \$150,340/.7936746$$

$$ADSP = \$189,442.71$$

The ADSP in this *Example* is less than the ADSP in *Example (3)* of *Answer 2* of this paragraph (h)(3) because the gain on Asset #2 (*i.e.*, the T1 stock) that is recognized in the deemed sale (by reason of section 338(c)(1)) is taxed at the 28 percent rate rather than at the 46 percent rate.

(iii) For purposes of applying the elective ADSP formula to T1, T's basis in recently purchased T1 stock is equal to the allocable ADSP amount for the item of T property represented by the T1 stock. The allocable ADSP amount for the T1 stock is $26,431.06, *i.e.*, $189,422.71 × 1395348. No P group members other than T hold recently purchased T1 stock. Thus, the elective ADSP formula as applied to T1 is as follows:

$$ADSP = G + L + t_R \times [(\text{Lesser of R or ADSP}) - B]$$

$$ADSP = \$26,431/1 + \$0 + .46 \times [(\text{Lesser of } \$25,000 \text{ or ADSP}) - \$18,000]$$

ADSP—Recomputed basis measurement:

$$ADSP = \$26,431 + .46 \times (\$25,000 - \$18,000)$$

$$ADSP = \$29,651$$

ADSP—ADSP measurement:

$$ADSP = \$26,431 + .46 \times (ADSP - \$18,000)$$

$$ADSP = \$26,431 + (.46 \times ADSP) - \$8,280$$

$$ADSP = \$18,151 + .46ADSP$$

$$ADSP - .46ADSP = \$18,151$$

$$.54ADSP/.54 = \$18,151/.54$$

$$ADSP = \$33,612.96$$

Because the recomputed basis measurement ($29,651) is less than the ADSP measurement ($33,613), the ADSP of T1 is $29,651.

Question 4: How is the elective ADSP formula affected by an increase in the maximum percentage (by value) of T stock held by P during the one-year period following T's acquisition date?

Answer 4: The section 338(c)(1) percentage used in the elective ADSP formula is determined by reference to the maximum percentage (by value) of T stock held by P during the one-year period following T's acquisition date. See paragraph (h)(2)(v) of this section. Thus, the ADSP as calculated under the ADSP formula cannot be determined with certainty until that one-year period has elapsed. See paragraph (k)(5) of this section.

(i) Reserved.

(j) *Determination of basis of target assets after section 338 election*—(1) *Introduction.* The questions and answers in this paragraph (j) provide guidance under section 338(b) on the determination of the total sum ("adjusted grossed-up basis") to be allocated as basis to the assets of new T. These questions and answers do not specifically deal with the manner in which the adjusted grossed-up basis is allocated among T's assets. For purposes of applying this paragraph (j), T stock is considered purchased or held by P if it is purchased or held by any member of the P group. See section 338(h)(8).

(2) *Determination of adjusted grossed-up basis.*

Question 1: How is the adjusted grossed-up basis determined?

Answer 1: (i) *General rule.* The adjusted grossed-up basis is the sum of (A) P's grossed-up basis in recently purchased T stock, (B) P's basis in nonrecently purchased T stock, (C) the liabilities of T (including tax liabilities computed under paragraph (h) of this section), and (D) other relevant items.

(ii) *P's grossed-up basis in recently purchased T stock.* P's grossed-up basis in recently purchased T stock is the product of P's basis in recently purchased T stock (as defined in section 338(b)(6)(A)), multiplied by the fraction described in section 338(b)(4). If T has a single class of outstanding stock, P's grossed-up basis in recently purchased T stock reflects the total price P would have paid for all outstanding T stock (other than P's nonrecently purchased T stock, as defined in section 338(b)(6)(B)) had P purchased all such stock (other than such nonrecently purchased T stock) for a price per share equal to the average price per share that P paid for the recently purchased T stock. Note that P's grossed-up basis in recently purchased T stock as calculated for purposes of the adjusted grossed-up basis differs from the "grossed-up basis of P's recently purchased T stock" as calculated in the elective ADSP formula. The elective ADSP formula treats P's nonrecently purchased T stock in the same manner as T stock not held by P. See *Answer 2* (ii) of paragraph (h)(3) of this section.

(iii) *P's basis in nonrecently purchased T stock.* In the absence of an election under section 338(b)(3) ("gain recognition election"), P's basis in nonrecently purchased T stock is P's historic basis in that stock.

Question 2: What is the effect of a gain recognition election under section 338(b)(3)?

Answer 2: If P makes a gain recognition election, then, for all purposes of the Code and regulations, (i) P is treated as if it sold on the acquisition date the nonrecently purchased T stock for the basis amount determined under section 338(b)(3)(B), and (ii) P's basis on the acquisition date in nonrecently purchased T stock is the basis amount. If T has a single class of outstanding stock, P's basis in each share of nonrecently purchased T stock after the gain recognition election is

equal to the average price per share of P's recently purchased T stock. In such a case, the sum of P's grossed-up basis in recently purchased T stock and P's basis in nonrecently purchased T stock will be equal to the "grossed-up basis of P's recently purchased T stock" as calculated in the elective ADSP formula. See *Answer 2* (ii) of paragraph (h)(3) of this section. Absent a gain recognition election, the adjusted grossed-up basis will differ from the ADSP as calculated under the elective ADSP formula whenever P holds nonrecently purchased T stock at a basis that differs from P's basis in recently purchased T stock.

Question 3: May losses on nonrecently purchased T stock be recognized in the deemed sale of such stock under section 338(b)(3)?

Answer 3: No. Only gains (unreduced by losses) on the nonrecently purchased T stock are recognized.

Question 4: If P makes a gain recognition election for T, what stock held by P is subject to that election?

Answer 4: All T stock held by P (or other members of the P group) on T's acquisition date that is not recently purchased T stock is subject to the election. In addition, stock in an affected target held by P group members on the affected target's acquisition date also is subject to the gain recognition election for T if such stock is not recently purchased affected target stock.

Example. (i) Assume the same facts as in *Example (2)* of *Answer 2* of paragraph (h)(3) of this section, except that on June 1, 1984 (*i.e.*, more than 12 months before July 1, 1985, the acquisition date of T), P purchases 10 of the 100 outstanding shares of T's only class of stock for $5,000. Those 10 shares constitute nonrecently purchased T stock with respect to P's qualified stock purchase of T stock on July 1, 1985. Assume that the 90 shares of T stock thus held by P on July 1, 1985, represent, at all times during the one-year period beginning on that date (the acquisition date of T) 90 percent of the value of all T stock, and that P purchases no additional T stock during that one year period. Accordingly, the section 338(c)(1) percentage under paragraph (h)(2)(v) of this section is 10 percent, *i.e.*, 100 percent minus 90 percent. The elective ADSP formula as applied to these facts is as follows:

$$ADSP = G + L + t_R \times [(\text{Lesser of } R \text{ or } ADSP) - B] + C \times t_R \times (ADSP - Cb)$$

$$ADSP = (\$60,000/.8) + \$0 + .46 \times [(\text{Lesser of } \$80,000 \text{ or } ADSP) - 50,400] + .10 \times .28 \times [ADSP - (\text{Lesser of } \$80,000 \text{ or } ADSP)]^*$$

*Section 338(c)(1) gain exists under the formula only if the recomputed basis of $80,000 rather than the allocable ADSP amount (as defined in paragraph(h)(2)(iii) of this section) is the measure of section 1245 depreciation recapture gain. The section 338(c)(1) gain in that case is the allocable ADSP amount, reduced by $80,000. Whenever section 1245 depreciation recapture gain for an item is calculated by reference to the allocable ADSP amount for that item, the section 338(c)(1) calculation may be omitted for that item.

ADSP—Recomputed basis measurement:

$$ADSP = (\$60,000/.8) + .46 \times (\$80,000 - \$50,400) + .10 \times .28 \times (ADSP - \$80,000)$$

$$ADSP = \$75,000 + \times \$13,616 + (.028 \times ADSP - \$2,240$$

$$ADSP = \$86,376 + .028ADSP$$

$$ADSP - .028ADSP = \$86,376$$

$$.972ADSP/.972 = \$86,376/.972$$

$$ADSP = \$88,864.20$$

ADSP—ADSP measurement:

$$ADSP = (\$60,000/.8) + .46 \times (ADSP - \$50,400)$$

$$ADSP = \$75,000 + (.46 \times ADSP) - \$23,184$$

$$ADSP = \$51,816 + .46ADSP$$

$$ADSP - .46ADSP = \$51,816$$

$$.54ADSP/.54 = \$51,816/.54$$

$$ADSP = \$95,955.56$$

Accordingly, the ADSP of T is $88,864.20, *i.e.*, the recomputed basis measurement ($88,864.20), which is less than the ADSP measurement ($95,955.56). This ADSP differs from the ADSP in *Example (2)* of *Answer 2* of paragraph (h)(3) of this section because the section 338(c)(1) percentage in this *Example* is 10 percent rather than 20 percent. The existence of nonrecently purchased T stock is irrelevant for purposes of the elective ADSP formula, since that formula treats P's nonrecently purchased T stock in the same manner as T stock not held by P. See *Answer 2* (ii) of paragraph (h)(3) of this section.

(ii) The total tax liability resulting from T's deemed sale of assets, as calculated under the ADSP formula, is $13,864.20, determined as follows:

Tax on section 1245 recapture gain (.46×($80,000−$50,400))	$13,616.00
Tax on section 338(c)(1) gain (.1×.28×($88,864.20−$80,000))	248.20
Total	13,864.20

(iii) The adjusted grossed-up basis of new T's assets is determined on the basis of the following formula:

$$AGUB = GRP + BNP + L$$

For purposes of this formula—

(A) "GRP" is P's grossed-up basis in recently purchased T stock, *i.e.*, the product of P's basis in recently purchased T stock multiplied by a fraction the numerator of which is 100 percent minus the percentage of T stock (by value) attributable to P's nonrecently purchased T stock and the denominator of which is the percentage of T stock (by value) attributable to P's recently purchased T stock. See section 338(b)(4).

(B) "BNP" is P's basis in nonrecently purchased T stock. If P makes a gain recognition election under section 338(b)(3), P's basis in nonrecently purchased T stock is the basis amount determined under section 338(b)(3)(B). (The basis amount is equal to the GRP multiplied by a fraction the numerator of which is the percentage of T stock (by value) attributable to P's nonrecently purchased T stock and the denominator of which is 100 percent minus the numerator amount.) The sum of the GRP and the BNP in the event of a gain recognition election may be stated in a simplified manner: That sum is equal to P's basis in recently purchased T stock, divided by the percentage of T stock (by value) attributable to that recently purchased T stock. Note that this formulation is identical to the formulation used in calculating the "grossed-up basis of P's recently purchased T stock" in the elective ADSP formula.

(C) "L" is the sum of T's liabilities (including tax liabilities computed under paragraph (h) of this section).

(iv) If P does not make a gain recognition election, the adjusted grossed-up basis of new T's assets under the formula described in subdivision (iii) of this *Example* is $86,364.20, determined as follows:

$$AGUB = \$60,000 \times [(1 - .1)/.8] + \$5,000 + \$13,864.20$$

$$AGUB = \$86,364.20$$

(v) If P makes a gain recognition election, the adjusted grossed-up basis of new T's assets under the formula described in subdivision (iii) of this *Example* is $88,864.20, determined as follows:

$$AGUB = \$60,000 \times [(1 - .1)/.8] + \$60,000 \times [(1 - .1)/.8] \times [.1/(1 - .1)] + \$13,864.20$$

$$AGUB = \$88,864.20$$

The calculation of adjusted grossed-up basis if P makes a gain recognition election may be simplified as follows (see subdivision (iii)(B) of this *Answer*):

$$AGUB = \$60,000/.8 + \$13,864.20$$

$$AGUB = \$88,864.20$$

(vi) As a result of the gain recognition election, P's basis in its nonrecently purchased T stock is increased from $5,000 to $7,500, *i.e.*, $60,000×[(1−.1)/.8]×[.1/(1−.1)]. Accordingly, P's basis in each of its 10 shares of nonrecently purchased T stock after the gain recognition election is $750, *i.e.*, $7,500/10. P's basis in each share of nonrecently purchased T stock before the gain recognition election was $500, *i.e.*, $5,000/10. Thus, P recognizes a gain in 1985 with respect to its nonrecently purchased T stock of $2,500, *i.e.*, 10×(750−$500).

Question 5: How is the gain recognition election under section 338(b)(3) made?

Answer 5: (i) *Attachment to statement of section 338 election.* The gain recognition election is made in the form of a gain recognition statement ("GRS") that is attached to a timely filed statement of section 338 election (Form 8023) for T. In order for the gain recognition election to be valid, the statement of section 338 election (with the GRS attached) must be filed within the time specified in § 1.338–1T(c) with the Internal Revenue Service Centers specified in § 1.338–1T (c) and (d) and with each other Service Center with which each affected P group member (as defined in this *Answer 5* (ii)(A)) files its annual income tax return. If a statement of section 338 election is filed on or before August 23, 1985 without the GRS attachment, the P group may make a valid gain recognition election by filing the GRS (with a copy of the previously

filed statement of section 338 election attached) on or before that day with each Service Center specified in the preceding sentence. The gain recognition election is irrevocable. For certain additional filing requirements if a gain recognition election is made, see § 1.338–1T(e)(2).

(ii) *Contents of GRS.* The GRS must be identified as a gain recognition election under section 338(b)(3) and § 1.338–4T(j). In addition, the GRS must—

(A) Contain the name, address, and employer identification number of each corporation (*1*) that is a P group member on the acquisition date of T and that holds nonrecently purchased T stock on that date or (*2*) that is a P group member on the acquisition date of an affected target (provided that such acquisition date occurs on or before the day on which the statement of section 338 election is filed) and that holds nonrecently purchased stock in that affected target on that acquisition date ("affected P group member");

(B) Contain the following declaration (or a substantially similar declaration): "EACH CORPORATION HOLDING STOCK SUBJECT TO THIS GAIN RECOGNITION ELECTION AGREES TO REPORT ANY GAIN PURSUANT TO THE GAIN RECOGNITION ELECTION IN ITS FEDERAL INCOME TAX RETURN (INCLUDING AN AMENDED RETURN, IF NECESSARY) FOR ITS TAXABLE YEAR IN WHICH THE ACQUISITION DATE OF T OR ANY AFFECTED TARGET OCCURS"; and

(C) Be signed (in the manner prescribed in § 1.338–1T(d)(1)(v) by a person authorized to act on behalf of each affected P group member.

Question 6: Assume that T owns all of the stock of T1 at the close of T's acquisition date and that P makes a qualified stock purchase of and express election for T. For purposes of determining the adjusted grossed-up basis of T1, what is T's basis in the T1 stock that T is deemed to sell and purchase under section 338(a)?

Answer 6: T's basis in recently purchased T1 stock for purposes of determining the adjusted grossed-up basis of T1 is new T's basis in the T1 stock.

(k) *Miscellaneous matters affecting the final return of old T*—(1) *Application of section 337 to deemed sale of assets.*

Question 1: If a section 338 election is made for T, will the deemed sale of T's assets under section 338(a)(1) be governed by section 337, notwithstanding section 337 (c)(1)(A) or (c)(2) (relating to collapsible corporations and liquidation subject to section 332, respectively)?

Answer 1: Yes. Section 337 will not apply to T's deemed sale of assets, however, to the extent that another section of the Internal Revenue Code overrides (in whole or in part) the operation of section 337. Thus, for example, if old T is a "consenting corporation" within the meaning of section 341(f) and if old T holds "subsection (f) assets" on the acquisition date, section 337 will not apply to the deemed sale to the extent that gain realized on the deemed sale of the subsection (f) assets is required to be recognized under section 341(f)(2). See also section 897(d)(2), under which a foreign target will be required to recognize gain or loss with respect to its deemed sale of a United States real property interest notwithstanding section 337.

Question 2: Does the LIFO recapture rule of section 337(f) (rather than section 336(b)) apply to T's deemed sale of assets?

Answer 2: Yes.

Question 3: How does section 337 operate in the context of section 338(h)(12), under which, for purposes of section 337, T is treated as having distributed all of its assets at the close of the acquisition date?

Answer 3: (i) *General rule.* Section 338(h)(12) provides that, for purposes of section 337 and provisions that relate to section 337, T is treated as distributing all of its assets as of the close of its acquisition date if (A) T adopts a plan of complete liquidation during the 12-month period ending on the acquisition date, (B) the plan is not rescinded before the close of the acquisition date, and (C) a section 338 election is made for T. Section 337(a) provides that no gain or loss shall be recognized to a corporation from the sale or exchange of property (as defined in section 337(b)) during the 12-month period beginning on the date on which that corporation adopts a plan of complete liquidation, provided that, within such 12-month period, the corporation distributes all of its assets in complete liquidation (less assets retained to meet claims). Accordingly, if the requirements of section 338(h)(12) are satisfied, T does not recognize gain or loss from its sale or exchange of property during so much of such 12-month period as ends on T's acquisition date if the nonrecognition rule of section 337 would have applied to such sale or exchange had T hypothetically distributed all of its assets on the acquisition date ("hypothetical distribution"). For purposes of applying section 337 to the hypothetical distribution, section 337(c)(2) bars the operation of the nonrecognition rule of section 337 if section 332 would have applied to a distribution of all of T's assets in complete liquidation immediately after the plan of complete liquidation was adopted. The restrictions normally applicable to section 337 (*e.g.*, the limitation on collapsible corporations) also apply to the operation of section 337 in the section 338(h)(12) context.

(ii) *Exception for section 338(c)(1) percentage.* Gain or loss on actual asset sales pursuant to the plan of complete liquidation that are subject to the nonrecognition rule of section 337 by reason of section 338(h)(12) nevertheless is recognized to the extent of the section 338(c)(1) percentage (as defined in paragraph (h)(3)(v) of this section). Section 338(c)(1) applied to such gain or loss in the same manner as it applies to gain or loss arising in the deemed sale of assets under section 338(a)(1).

Example. (i) A owns all 100 shares of the only class of outstanding stock of T, a calendar year taxpayer. On January 1, 1985, T adopts a plan of complete liquidation which is not rescinded before the close of June 1, 1985. On April 1, 1985, T sells land held for investment and realizes a long-term capital gain of $2,000. On June 1, 1985, P purchases 90 of T's 100 shares from A and makes an express election for T. Assume that those 90 shares represent, at all times during the one-year period beginning on June 1, 1985 (the acquisition date of T), 90 percent of the value of all T stock and that P purchases no additional T stock during the one-year period beginning on June 1, 1985. Accordingly, the section 338 (c)(1) percentage is 10 percent.

(ii) Because T satisfies all of the requirements of section 338(h)(12), the nonrecognition rule of section 337 applies to T's asset sale on April 1, 1985, assuming that such nonrecognition rule would have applied to that sale had T hypothetically distributed all of its assets on June 1, 1985, *i.e.*, on T's acquisition date. By reason of section 338(c)(1), however, the capital gain of $2,000 is recognized to the extent of the section 338(c)(1) percentage of 10 percent. Accordingly, T recognizes a capital gain of $200 (*i.e.*, $2,000 × .10) that must be reported in old T's final return. (The section 338(c)(1) percentage also may cause the recognition of gain or loss in T's deemed sale of assets on June 1, 1985.)

Question 4: How does section 341 apply to A and T if—

(i) At all relevant times, T is a collapsible corporation (as defined in section 341(b)(1)),

(ii) On January 1, 1985, a causes T to adopt a plan of complete liquidation,

(iii) On June 30, 1985, T sells property (other than property described in section 337(b)(1)) to an unrelated person for cash,

(iv) T immediately distributes that cash to A in exchange for T stock owned by A,

(v) On December 31, 1985, A sells all of its remaining T stock to P,

(vi) Rather than completing the liquidation of T, P makes a section 338 election for T, and

(vii) All of the requirements of section 338(h)(12) are satisfied?

Answer 4: (i) *Application of section 341(e)(4) to T's sale of property.* Section 337(c)(1)(A) bars the application of the nonrecognition rule of section 337 to T's sale of property on June 30, 1985, unless section 341(e)(4) applies with respect to that sale. For purposes of determining whether the requirement of section 341(e)(4)(B) is satisfied, T is treated as selling at the close of T's acquisition date all of the properties held by T on that date.

(ii) *Application of section 341(a)(2) to A's gain on the cash distribution to A.* To the extent that A's gain on the cash distribution from T in exchange for T stock owned by A would be considered (but for section 341(a)(2)) as gain from the sale or exchange of a capital asset held for more than six months, such gain is recharacterized under section 341(a)(2) as ordinary income unless section 341(a) is made inapplicable to A by reason of section 341 (d) or (e)(2). For purposes of determining under section 341(e)(2) whether the requirement of section 341(e)(4)(B) is satisfied, T is treated as selling at the close of T's acquisition date all of the properties held by T on that date.

(iii) *Application of section 341(a)(1) to A's gain on the stock sale.* To the extent that A's gain on the December 31, 1985, sale of T stock would be considered (but for section 341(a)(1)) as gain from the sale or exchange of a capital asset held for more than six months, such gain is recharacterized under section 341(a)(1) as ordinary income unless section 341(a) is made inapplicable to A by reason of section 341 (d), (e)(1), or (f).

Question 5: How do sections 453B(d)(2) and 453(h) apply with respect to the distribution of an installment note ("note") by T to A, the sole shareholder of T at the time of the distribution, if—

(i) On January 1, 1985, A causes T to adopt a plan of complete liquidation,

(ii) On June 30, 1985, T acquires the note in consideration for the sale of non-depreciable property (other than property described in section 337(b)(1)(A)),

(iii) T immediately distributes the note to A in exchange for T stock owned by A,

(iv) On December 31, 1985, A sells all of its remaining T stock to P,

(v) Rather than completing the liquidation of T, P makes a section 338 election for T, and

(vi) The nonrecognition rule of section 337 would have applied by reason of section 338(h)(12) had T sold or exchanged the note on the day it distributed that note to A?

Answer 5: Pursuant to section 453B(d)(2) (and subject to the limitations described therein), no gain or loss is recognized by T on the distribution of the note to A. Pursuant to section 453(h), the receipt by A of payments under the note (and not the receipt of that note in the distribution) is treated as the receipt of payment by A for the T stock transferred to T in exchange for the installment note.

(2) *Application of section 338(h)(10).*

Question 1: Is a section 338 election a prerequisite to a section 338(h)(10) election?

Answer 1: Yes.

Question 2: May an election under section 338(h)(10) be made prior to issuance of a Treasury decision containing regulations under section 338(h)(10)?

Answer 2: No.

Question 3: After a Treasury decision containing regulations under section 338(h)(10) is published, will an election under section 338(h)(10) be permitted retroactively for a qualified stock purchase that occurred prior to publication of that Treasury decision?

Answer 3: Yes. After a Treasury decision containing regulations under section 338(h)(10) is published, a section 338(h)(10) election may be made for stock sales included in a qualified stock purchase with respect to which the acquisition date occurs after January 12, 1983. (January 12, 1983, is the date of enactment of the Technical Corrections Act of 1982, which added section 338(h)(10).)

(3) *Effect of sections 382(a) and 168(d)(2)(B) on old T's final return.*

Question 1: Does section 382(a) (as in effect for taxable years beginning before January 1, 1986) apply solely by reason of the operation of section 338 to bar a net operating loss carryover to old T's final return?

Answer 1: No.

Question 2: Does section 168(d)(2)(B) operate to bar a recovery deduction for the taxable period represented by old T's final return?

Answer 2: (i) *General rule.* Subject to certain exceptions, section 168(d)(2)(B) bars a recovery deduction for the taxable period represented by old T's final return since, by reason of the operation of section 338(a)(1), all of old T's assets are disposed of during that taxable period.

(ii) *Effect of deemed sale return.* The general rule of this *Answer 2* applies only if the final return of old T is not a deemed sale return (within the meaning of § 1.338–1T(f)(3)(i)). If a deemed sale return is filed, the operation of section 338 does not prevent T from taking a recovery deduction for T's taxable period that ends immediately before the deemed sale of assets, since T's assets are not considered disposed of by reason of section 338(a)(1) during that taxable period. (That taxable period is included in the consolidated return of the selling group. See § 1.338–1T(f)(3).) Although the rule of section 168(d)(2)(B) technically applies to the deemed sale return, it is of no consequence since a recovery deduction could not be taken for that taxable period in any case.

Example (1). T is a calendar year taxpayer that files separate returns. On November 1, 1985, P purchases all of the stock of T from S in a qualified stock purchase and makes an express election for T. T is denied a recovery deduction by reason of section 168(d)(2)(B) for the ten-month period that ends at the close of November 1, 1985.

Example (2). Assume the same facts as in *Example (1),* except that T is included in consolidated returns of the S group and therefore is required, by reason of the express election made by P for T, to file a deemed sale return under § 1.338–1T(f)(3). T is not denied a recovery deduction by reason of section 168(d)(2)(B) for the ten-month period that ends immediately before T's deemed sale of assets at the close of November 1, 1985. Such a recovery deduction is reported in the consolidated return of the S group for 1985.

(4) *Application of § 1.1502–76(c) to old T's final return.*

Question: How does § 1.1502–76(c) apply to old T's final return if, immediately before T's deemed sale of assets at the close of the acquisition date, old T was a member of an affiliated group ("selling group") that did not file consolidated returns for taxable years of the common parent of that group that precede the taxable year that includes old T's acquisition date?

Answer: (i) *General rule.* Under § 1.338–1T(f)(6)(i), old T's final return is due on the 15th day of the third calendar month following the month in which the acquisition date occurs ("final return due date"). Under § 1.1502–76(c)(2), a choice is permitted as to the taxable period included in old T's final return if, on or before the final return due date (including extensions), the selling group has not filed a consolidated return that would include old T's taxable period that ends on the acquisition date. On or before the final return due date (including extensions), T may either (i) file a deemed sale return (as defined in § 1.338–1T(f)(3)(i)), on the assumption that the selling group will file the consolidated return, or (ii) file a return

for so much of old T's taxable period as ends at the close of the acquisition date, on the assumption that the consolidated return will not be filed. For purposes of applying § 1.1502–76(c)(2), an extension of time to file old T's final return is considered to be in effect for the period during which the waiver rule of § 1.338–1T(h)(1) applies.

(ii) *Consequence of erroneous filing of deemed sale return.* If, pursuant to subdivision (i) of this *Answer*, T files a deemed sale return but the selling group does not file a consolidated return, then T must file a substituted return for old T not later than the due date (including extensions) for the return of the common parent with which old T would have been included in the consolidated return. The substituted return is for so much of old T's taxable year as ends at the close of the acquisition date. Under § 1.1502–76(c)(2), the deemed sale return is not considered a return for purposes of section 6011 (relating to the general requirement of filing a return) if a substituted return must be filed.

(iii) *Consequence of erroneous filing of return for regular tax year.* If, pursuant to subdivision (i) of this *Answer*, T files a return for so much of old T's regular taxable year as ends at the close of the acquisition date but the selling group also files a consolidated return, T must file an amended return for old T not later than the due date (including extensions) for the selling group's consolidated return. (The amended return will be a deemed sale return.)

(iv) *Last date for payment of tax.* If either a substituted or amended final return of old T is filed pursuant to this *Answer*, the last date prescribed for payment of tax is the final return due date (as defined in subdivision (i) of this *Answer*).

(5) *Effect on old T's final return of plan to abate section 338(c)(1) amounts.*

Question: If, at the time old T's final return is filed, old T is liable for tax by reason of section 338(c)(1) gain but there is a plan in effect to abate such gain by reason of a purchase or redemption of T stock, must such gain nonetheless be reported in old T's final return?

Answer: Yes. T must file old T's final return and pay tax based on the facts as they exist at the time of filing. If the tax payment reflects section 338(c)(1) amounts that are later abated, an amended return should be filed.

(6) *Combined deemed sale return under section 338(h)(15).*

Question 1: What targets are included in a combined deemed sale return ("combined return") under section 338(h)(15)?

Answer 1: The combined return must include all of the targets (i) that are acquired by the P group from a single selling consolidated group (as defined in section 338(h)(10)(B)) and (ii) that would be required to file separate deemed sale returns for the same acquisition date if a combined return were not filed. All such targets must be included in the combined return even though, as between those targets, no one such target is a common parent corporation. Thus, for example, T and T1 may be included in a combined return if (i) T and T1 are directly owned subsidiaries of S, (ii) P, on a single day, acquires from S all of the stock of both T and T1 in qualified stock purchases, and (iii) under the circumstances, T and T1 would be required to file separate deemed sale returns if a combined return were not filed.

Question 2: If a combined return is filed, will the losses of one target included in that return offset the gains of another target, and will a similar rule apply to tax credits?

Answer 2: Yes. Gains and losses recognized on the deemed sale of assets by targets included in a combined return are treated as the gains and losses of a single target. In addition, loss carryovers of a target that were not subject to the separate return limitation year restrictions ("SRLY restrictions") of the consolidated return regulations while that target was a member of the selling consolidated group may be applied without limitation to the gains of other targets included in the combined return. If, however, a target has loss carryovers that were subject to the SRLY restrictions while that target was a member of the selling consolidated group, the use of those losses in the combined return will continue to be subject to those restrictions, applied in the same manner as if the combined return were a consolidated return. A similar rule will apply to tax credits. For SRLY restrictions, see, *e.g.*, §§ 1.1502–1(f), 1.1502–3(c), 1.1502–4(f), 1.1502–21(c), and 1.1502–22(c).

Question 3: How is the combined return made?

Answer 3: The combined return is made by filing a single corporation income tax return in lieu of separate deemed sale returns for all of the targets required to be included in the combined return. The combined return reflects the deemed sales of all of the targets required to be included in the combined return. If the targets included in the combined return constitute a single affiliated group within the meaning of section 1504(a), the income tax return is signed by an officer of the common parent of that group. Otherwise, the return must be signed by an officer of each target included in the combined return. Rules similar to the rules in § 1.1502–75(j) apply for purposes of preparing the combined return. The combined return must include an attachment prominently identified as an "Election to file a combined return under section 338(h)(15)." The attachment must—

(i) Contain the name, address, and employer identification number of each target required to be included in the combined return,

(ii) Contain the following declaration (or a substantially similar declaration): "EACH TARGET IDENTIFIED IN THIS ELECTION TO FILE A COMBINED RETURN CONSENTS TO THE FILING OF A COMBINED RETURN," and

(iii) Be signed (in the manner prescribed in § 1.338–1T(d)(1)(v)) by a person authorized to act on behalf of each of those targets.

(l) *Miscellaneous matters affecting new T*—(1) *Effect of old T liabilities.*

Question: Is new T liable for old T's tax liabilities, including new tax liabilities resulting from the deemed sale?

Answer: Yes. For purposes of subtitle F of the Internal Revenue Code, new T is treated as a continuation of old T. Thus, new T will be liable for old T's tax liabilities. The shareholders of old T also will be liable, however, for those tax liabilities of old T tax that are attributable to taxable years in which those shareholders and old T joined in a consolidated return. See § 1.1502–6(a).

(2) *Availability of investment tax credit; recovery deductions.*

Question 1: Is new T entitled to the investment tax credit for property it is deemed to purchase under section 338(a)(2)?

Answer 1: Yes, provided that the property would qualify for the investment tax credit if new T acquired it in an actual purchase. The property acquired by new T in the deemed purchase generally will be subject to the used property limitations of section 48(c)(2). Notwithstanding § 1.338–1T(f)(3)(v), old T and new T are not considered component members of the same controlled group for purposes of applying section 179(d)(2)(B) to section 48(c)(1) (relating to the related party limitation on the definition of "used section 38 property").

Question 2: Is new T entitled to recovery deductions under section 168(a) for property it is deemed to purchase under section 338(a)(2)?

Answer 2: Yes. New T generally is permitted to take recovery deductions on recovery property acquired in the

deemed purchase of assets, and may make new elections under section 168 without regard to the elections made by old T. For purposes of the "anti-churning" rule of section 168(e)(4) and the rule of section 168(f)(10) (under which the transferee of property is treated as the transferor in certain cases for purposes of applying section 168(a)), old T is not a related person with respect to new T.

(3) *Effect of acquisition of partnership interest in deemed purchase under section 338(a)(2).*

Question: If one of the assets held by old T at the close of the acquisition date is an interest in a partnership with respect to which an election under section 754 applies, then may new T's deemed purchase of that partnership interest cause an adjustment under section 743(b) to the basis of partnership property (with respect to new T only)?

Answer: Yes. The provisions of subchapter K of the Code (relating to partners and partnerships) apply as if the deemed sale and purchase under section 338(a) were an actual sale and purchase.

(4) *Employment taxes; employee plans.*

Question 1: May wages earned by the employees of old T be considered wages earned by such employees from new T for purposes of sections 3101 and 3111 (Federal Insurance Contributions Act) and section 3301 (Federal Unemployment Tax Act)?

Answer 1: Yes.

Question 2: For purposes of applying the rules applicable to employee benefit plans (including, for example, those plans described in sections 79, 104, 105, 120, 124, 125, 127, and 129), qualified pension, profit-sharing, stock bonus and annuity plans (sections 401(a) and 403(a)), simiplified employee pensions (section 408(k)), and tax qualified stock option plans (sections 422A and 423), are old T and new T to be treated as a single employer?

Answer 2: Yes.

Par. 2. Section 1.338—It is amended as follows—

1. Paragraph (c) is amended by—

a. Removing from the first sentence the words "the 60th day after the date of publication of temporary regulations § 1.338–4T" and by adding in their place the words "August 23, 1985", and

b. Removing the third sentence thereof and by adding in its place the following sentence: "See paragraph (e)(1) of this section for an attached schedule containing information relating to target and such other corporations."

2. Paragraph (e)(1) is revised to read as set forth below.

3. Paragraph (e)(2) is revised to read as set forth below.

4. Paragraph (e)(3) is amended by removing the last sentence thereof and by adding in its place the following sentence: "Failure to comply with the requirements of paragraphs (e) (1) and (2) of this section, however, will not invalidate a statement of election (or, if applicable, a gain recognition election under § 1.338–4T(j)(2)) and will have no effect on the applicability of section 338(f)(1)."

5. Paragraph (f)(7)(ii) is amended by removing the words "the 60th day after the date of publication of temporary regulations § 1.338–4T" and by adding in their place the words "August 23, 1985".

6. Paragraph (h) is amended by—

a. Removing, from each place they appear, the words "the 60th day after the date of publication of temporary regulations § 1.338–4T" and by adding in their place the words "August 23, 1985",

b. Removing, from the first sentence of paragraph (h)(1), the words "such 60th day" and by adding in their place the words "August 23, 1985", and

c. Removing, from the first sentence of paragraph (h)(2)(ii), the words "such 60th day" and by adding in their place the words "August 23, 1985".

7. Paragraph (j)(2) is amended by removing from the third sentence the words "the 60th day after the date of publication of temporary regulations § 1.338–4T" and by adding in their place the words "August 23, 1985".

§ 1.338–1T Elections under section 338(g) of the Internal Revenue Code of 1954 (temporary).

* * * * *

(e) *Schedule; attachments to target returns*—(1) *Schedule of information relating to corporations subject to election*—(i) *Required data.* A schedule providing the information specified in this paragraph (e)(1)(i) ("required data") must be attached to the statement of election. The schedule must contain the name, address, and employer identification number of each corporation subject to the statement of election by reason of section 338(f)(1) as of the day the statement of election is filed. In addition, the schedule must—

(A) Disclose the fair market value of the consideration paid by the purchasing corporation for the stock of each such corporation as well as for the stock of the corporation for which the statement of election is expressly made ("target corporations"),

(B) Identify the portion of that consideration represented by the following components: (*1*) cash, (*2*) purchase money debt, and (*3*) other components of consideration (with each such other component separately stated), and

(C) Disclose the liabilities of each of the target corporations (as of the close of the particular target's acquisition date, with the tax liability resulting from the deemed sale of assets under section 338(a)(1) separately stated).

(ii) *Transitional rule.* If a statement of election filed on or before August 23, 1985, does not include the schedule with all of the required data, the requirements of paragraph (e)(1)(i) of this section will be satisfied if, on or before August 23, 1985, the schedule (with a copy of the previously filed statement of election attached) is filed with the Internal Revenue Service Center(s) with which the statement of election is required to be filed under paragraphs (c) and (d) of this section. That schedule must include the required data for each corporation subject to the statement of election as of the day the schedule is filed.

(2) *Attachments to target returns; additional filings with certain Service Centers*—(i) *Attachments.* The following items ("required items") must be attached to old target's final return and to the first return of new target (or, if target is a foreign corporation not subject to United States tax (as defined in paragraph (k)(3)(iii) of this section), to the returns specified in paragraph (k)(6) of this section): (A) a copy of the statement of election, (B) the schedule described in paragraph (e)(1) of this section ("schedule"), and (C) if a gain recognition election under section 338(b)(3) is made in the statement of election, a copy of the gain recognition statement ("GRS") See § 1.338–4T(j)(2) for guidance on the GRS. The requirement of the preceding sentence applies both to the corporation for which the statement of election is expressly made and to a corporation subject to such a statement by reason of section 338(f)(1).

(ii) *Transitional rule.* If all of the required items (with the required contents) are not attached to a return filed on or before August 23, 1985, the requirements of paragraph (e)(2)(i) of this section will be satisfied if, on or before August 23, 1985, all of the required items (with the required contents) are filed with the Internal Revenue Service Center(s) with which the returns to which the required items should have been attached were filed ("corrective statement").

(iii) *Additional filings with certain Service Centers.* On or before the day on which a return or corrective statement described in paragraph (e)(2)(i) or (ii) of this section is filed, the

required items also must be filed (A) with the Internal Revenue Service Centers with which the statement of election is required to be filed under paragraphs (c) and (d) of this section and (B) if the GRS is a required item, with each other Service Center with which each affected P group member (determined as of the day of filing) files its annual income tax return. For the definition of "affected P group member," see § 1.338–T(j)(2) *Answer 5* (ii)(A). The required items need not, however, be filed with a Service Center that already has received the identical required items.

(iv) *Schedule and GRS must be updated.* The schedule attached to a return or filed as part of a corrective statement under paragraph (e)(2) (i) or (ii) of this section (or filed with a Service Center under paragraph (e)(2)(iii) of this section) must contain the required data described in paragraph (e)(1)(i) of this section for each corporation subject to the statement of election as of the day the schedule is filed. Similarly, the GRS filed under the circumstances described in the preceding sentence must include the name, address, and employer identification number of each corporation that is an affected P group member as of the day the GRS is filed.

* * * * *

§ 1.338–2T [Amended]

Par. 3. Section 1.338–2T is amended by removing, from each place they appear in *Example 1* and *Example (2)* of paragraph (j), the words "the 60th day after the date of publication of temporary regulations § 1.338–4T" and by adding in their place the words "August 23, 1985".

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

§ 602.101 [Amended]

Par. 4. Section 602.101(c) is amended by inserting in the appropriate place in the table "1.338–4T . . . 1545–0702".

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue this Treasury decision with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

This Treasury decision is issued under the authority contained in sections 338 and 7805 of the Internal Revenue Code of 1954 (96 Stat. 324, 26 U.S.C. 338; 68A Stat. 917, 26 U.S.C. 7805, respectively).

Roscoe I. Egger, Jr.,

Commissioner of Internal Revenue.

Approved: April 17, 1985.

Ronald A. Pearlman,

Assistant Secretary of the Treasury.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[LR-33-85]

Income Taxes; Questions and Answers Relating to Domestic Matters Under Section 338 of the Internal Revenue Code of 1954; Cross-Reference

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations portion of this issue of the **Federal Register**, the Internal Revenue Service is issuing temporary regulations that add a new § 1.338–4T, relating to miscellaneous matters under section 338, and that amend existing temporary regulations §§ 1.338–1T and 1.338–2T, relating generally to procedural matters under section 338. The text of new § 1.338–4T and of the revisions to §§ 1.338–1T and 1.338–2T also serves as the comment document for this notice of proposed rulemaking.

DATES:

Proposed Effective Date

The regulations are proposed to generally apply to stock acquisitions made after August 31, 1982.

Date for comments and requests for a public hearing. Written comments and requests for a public hearing must be delivered or mailed by June 24, 1985.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR–33–85), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Duane H. Pellervo of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202–566–3458, not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

Temporary regulations published in the Rules and Regulations portion of this issue of the **Federal Register** add new temporary regulations § 1.338–4T to Part 1 of Title 26 of the Code of Federal Regulations ("CFR") and amend temporary regulations §§ 1.338–1T and 1.338–2T, which were published as T.D. 7942 in the **Federal Register** on February 8, 1984 (49 FR 4722), and which were amended and redesignated (as §§ 1.338–1T and 1.338–2T) by temporary regulations published as T.D. 7975 in the **Federal Register** on September 6, 1984 (49 FR 35086). The final regulations that are proposed to be based on the new and amended temporary regulations would be added to Part 1 of Title 26 of the CFR. Those final regulations would provide guidance on a broad range of issues under section 338 of the Code, as added by section 224 of TEFRA (Pub. L. No. 97–248; 96 Stat. 485) and as amended by section 306 (a) (8) of the TCA (Pub. L. No. 97–448; 96 Stat. 2402) and section 712 (k) of the TRA (Pub. L. No. 98–369; 98 Stat. 946). For the text of the new and amended temporary regulations, see T.D., published in the Rules and Regulations portion of this issue of the **Federal Register**. The preamble to the temporary regulations explains the additions to the regulations.

Appropriate Amendments to Regulations Under Affected Sections To Be Made

If the rules in the temporary regulations that relate to sections of the Code other than section 338 are issued in the form of final regulations, the appropriate regulations sections will be amended to reflect those rules (see *e.g.*, the regulations under sections 48, 79, 168, and 304).

Regulatory Flexibility Act and Executive Order 12291

Although this document is a notice of proposed rulemaking that solicits public comment, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6). The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis therefore is not required.

Comments and Request for a Public Hearing

Before these proposed regulations are adopted, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register**. The collection of information requirements contained herein have been submitted to the Office of Mangement and Budget (OMB) for review under section 3504(h) of the Paperwork Reduction Act. Comments on the requirements should be sent to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for Internal Revenue Service, New Executive Office Building, Washington, D.C. 20503. The Internal Revenue Service requests persons submitting comments to OMB to also send copies of the comments to the Service.

Drafting Information

The principal author of these proposed regulations is Duane H. Pellervo of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

List of Subjects in 26 CFR 1.301–1–1.383–3

Income taxes, Corporations, Corporate distributions, Corporate adjustments, Reorganizations.

These regulations are proposed to be issued under the authority contained in sections 338 and 7805 of the Internal Revenue Code of 1954 (96 Stat. 484, 26 U.S.C. 338; 68A Stat. 917, 26 U.S.C. 7805, respectively).

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

Part III

Environmental Protection Agency

40 CFR Part 261

Identification and Listing of Hazardous Waste Management System; Proposed Rule and Request for Comments

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SWH-FRL 2755-1]

Identification and Listing of Hazardous Waste Management System

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comments.

SUMMARY: The Environmental Protection Agency (EPA) today is proposing to amend its regulations under the Resource Conservation and Recovery Act (RCRA) by listing two wastes generated during the production of methyl bromide. If this proposal is issued in final form, its effect would be to subject these wastes to the hazardous waste management standards contained in 40 CFR Parts 262–266, Part 124, and the permitting requirements of Parts 270 and 271.

DATES: EPA will accept public comments on this proposed rule until June 10, 1985. Any person may request a hearing on this amendment by filing a request with Eileen B. Claussen, whose address appears below, by May 10, 1985.

ADDRESSES: Comments should be sent to the RCRA Docket Clerk, Office of Solid Waste (WH–562), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. Comments should identify the regulatory docket "Listing Methyl Bromide." Requests for a hearing should be addressed to Eileen B. Claussen, Director, Characterization and Assessment Division, Office of Solid Waste, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

The public docket for this amendment is located in Room S–212A, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, and is available for viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: The RCRA Hotline at (800) 424–9346 or at (202) 382–3000. For technical information contact Dr. Howard Fribush, Office of Solid Waste (WH–562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, (202) 475–6678.

SUPPLEMENTARY INFORMATION:

I. Background

On May 19, 1980, as part of its final and interim final regulations implementing section 3001 of RCRA, EPA published a list of hazardous wastes generated from specific sources. This list has been amended several times, and is published in 40 CFR 261.32. In addition, the Hazardous and Solid Waste Amendments of 1984 (HSWA) require the Agency to decide whether to list wastes from the production of organobromines. EPA proposes today to add to the list two wastes from the production of methyl bromide.[1] These wastes are: (1) Wastewater from the reactor and acid drier (K131); and (2) spent adsorbent and wastewater separator solids (K132).

One of the hazardous constituents in these wastes is methyl bromide, which causes hyperplasia of the forestomach in rats. It is also a direct mutagen in the Ames *Salmonella* assay and a central nervous system depressant. The wastewater stream, K132, also contains significant concentrations of dimethyl sulfate, for which there is substantial evidence of carcinogenicity. In addition, it is a severe irritant.

The Agency previously has listed as hazardous under 40 CFR 261.33(f), discarded commercial chemical products, off-specification species, container residues, and spill residues containing methyl bromide and dimethyl sulfate, (EPA Hazardous Waste No. U029, Methyl bromide; EPA Hazardous Waste No. U103, Dimethyl sulfate). Methyl bromide and dimethyl sulfate also are listed in Appendix VIII of 40 CFR Part 261.

Methyl bromide typically is present in high concentrations in each waste stream. Methyl bromide also is mobile and persistent, and can reach environmental receptors in harmful concentrations if these wastes are mismanaged. Dimethyl sulfate, which is present in Waste K131, wastewater from the reactor and acid drier, also is present in high concentrations and is mobile and persistent. Waste K131 also is corrosive because it has a pH of less than 2. Evaluated against the criteria for listing hazardous wastes [40 CFR 261.11(a)(3)], EPA has determined that these wastes are hazardous because they are capable of posing a substantial present or potential threat to human health and the environment when improperly treated, stored, transported, disposed of, or otherwise mismanaged.

[1] The Agency already proposed to list wastes from the production of ethylene dibromide (EDB) on November 8, 1984 (see 49 FR 44718–44721). The Agency currently is evaluating other wastes from the production of other organobromines and may propose to list additional wastes in the near future.

II. Summary of the Regulation

A. List of Wastes

This proposed regulation would list as hazardous two wastes generated during the production of methyl bromide. These residual wastes are:

- K131—Wastewater from the reactor and acid drier from the production of methyl bromide.
- K132—Spent adsorbent and wastewater separator solids from the production of methyl bromide.

In 1984, three domestic companies were producing methyl bromide at three locations, with a toal annual production capacity of 33,142 kkg (73 million pounds). The major uses for methyl bromide are as a soil fumigant (80%) and as a space fumigant (15%) (Mannsville, 1984). The total annual volume of the aqueous residual wastes from production of methyl bromide by the processes described here at nameplate capacity is approximately 12,825 kkg (28 million pounds) of reactor and acid drier wastewater (EPA Hazardous Waste No. K131) and 147 kkg (324,000 pounds) of spent adsorbent and wastewater separator solids (EPA Hazardous Waste No. K132).

Methyl bromide typically is produced by reacting methanol with liquid hydrobromic acid. The wastes that are being listed from this operation are formed as residuals at several points in the production of methyl bromide. Waste K131 includes any of a collection of wastewaters and is formed from either of the following two operations: (1) Removal of reactor process water and (2) drying of the product with sulfuric acid. Waste K132 includes any solids formed from (1) the purification of the product by passing it over an adsorbent solid or (2) separating solids from wastewater. Due to the high (greater than 50%) concentration of sulfuric acid in waste K131, this aqueous waste has a pH less than 2. In addition, this waste has considerable quantities of methyl hydrogen sulfate (up to 25 percent), which is also corrosive. This waste, therefore, meets the corrosivity characteristic specified in 40 CFR 261.22(a)(1).

The listing background document (available from the public Docket at EPA Headquarters—see "**ADDRESSES**" section—and from the EPA Regional Libraries) and sources cited there describe this production process in detail. Sections of the background document, however, contain confidential business information (CBI); these CBI sections are not available to the public and will be deleted.

As derived from both industry study questionnaries and sampling analyses, these wastes typically contain significant concentrations of methyl bromide, a halomethane. In addition to methyl bromide, waste K131 contains significant concentrations of dimethyl sulfate, a by-product from the side reaction of methanol with sulfuric acid. The following concentrations are approximate, as they have been derived and aggregated from industry-supplied CBI.

EPA hazardous waste nos	Hazardous constituents	Typical concentrations	
		Percent	ppm
K131	Methyl bromide	Up to 5	Up to 50,000
	Dimethyl sulfate	Up to 0.5	Up to 5,000.
K132	Methyl bromide	Up to 1.5	Up to 15,000

The concentrations of the hazardous constituents in these wastes are significant and present a substantial hazard to human health. Methyl bromide at a concentration of 5 percent in waste K131 is about 36,000 times greater than the ambient water quality criteria (AWQC) (1.39 mg/l for methyl bromide on the basis of chronic toxicity (USEPA), 1980a).[2] Dimethyl sulfate at a concentration of 0.5 percent in waste K131 is about 5,600,000 times greater than the estimated ambient water quality criteria of 0.0089 mg/l. Only a small percentage of these contaminates need migrate from the waste to be present in ground water at levels above the health-based standards and thus present a substantial hazard to human health and the enviroment.

Methyl bromide exhibits acute and chronic toxicity. Methyl bromide was found to cause inflammation and hyperplasia of the forestomach of rats (Danse, *et al.*, 1984). In this 90-day gavage study, 13 of 20 rats of the highest dose group (50 mg/kg) developed squamous cell carcinomas of the forestomach. Methyl bromide also is a central nervous system depressant and may clause psychic, motor, and gastrointestinal disturbances (USEPA, 1980a). Furthermore, methyl bromide exposure has been associated with convulsions and seizures in humans (Alexeeff and Kilgore, 1983), and direct damage to the brain cortex and peripheral axons (Doull, *et al.*, 1980). In addition, there are numerous accounts of human fatalities from accidental methyl bromide exposure due to pulmonary edema (Hayes, 1982; Von Oettingen 1964, Alexeeff and Kilgore, 1983), as well as reports of pathological changes in humans (Von Oettingen, 1964; Alexeeff and Kilgore, 1983) and animal kidneys (Alexeeff, 1982). Dogs chronically ingesting bromide (methyl bromide-fumigated food yielding residual bromide at a dose level of 150 mg/kg/day) for a year became obese, lethargic, and died due to high blood bromide levels (Rosenblum, 1960). In another experiment using fumigated food with residual bromide, pathological changes in the parathyroid and thyroid glands were detected (USEPA, 1980a). Methyl bromide also is a direct-acting mutagen in the Ames *Salmonella* Assay (USEPA, 1980a).

Dimethyl sulfate also is very toxic. Based on numerous studies, the International Agency for Research on Cancer (IARC) and the Agency's Carcinogen Assessment Group (CAG) have determined that there is substantial evidence that dimethyl sulfate is carcinogenic. Dimethyl sulfate is carcinogenic in rats after inhalation or subcutaneous injection, producing mainly local tumors, and after prenatal exposure, producing tumors of the nervous system (IARC, 1974; USEPA, 1980b).

Methyl bromide and dimethyl sulfate, therefore, exhibit toxicological properties of regulatory concern. The listing background document and Health and Environmental Effects Profiles (HEEPs, available from the public docket at EPA Headquarters—see **"ADDRESSES"** section—and from the EPA Regions Libraries) contain additional details on the health effects of these toxicants.

Methyl bromide is a heavier-than-air gas at ambient temperatures with a vapor pressure of 1,420 mm Hg at 20 °C. At this vapor pressure, it is likely that methyl bromide can escape from the waste and present an inhalation hazard. In particular, the Occupational Safety and Health Administration (OSHA) maximum workplace standard for methyl bromide is 20 ppm (15 minute average). Due to the large concentrations of methyl bromide found in the waste—up to five percent—it is quite likely that the health-based standard would be exceeded and may pose an inhalation hazard if the waste was not properly contained. In addition, based on the high solubility of methyl bromide in water (17.5 g/l at 25 °C.), and its miscibility with organic solvents, such as chloroform, the Agency believes that methyl bromide can migrate from the matrix of the waste and is capable of entering the aquatic environment either through runoff or leaching through solid. The Agency also believes that, due to its high migration potential, methyl bromide is likely to leach to ground water in sufficient concentrations to pose a health hazard. Based on the volume of waste that could be generated from methyl bromide production, approximately 640 kkg (1.4 million pounds) of methyl bromide could escape into the environment annually from waste K131, and approximately 1.5 kkg (3,200 pounds) of methyl bromide could escape into the environment annually from waste K132.[3] Based on the toxicity of methyl bromide, the Agency believes these waste volumes are significant.

The Agency has also determined that methyl bromide is sufficiently persistent in both water and air to present a human health hazard. Data show that methyl bromide has a half-life of approximately 40 days in water at 20 °C. and pH 7 (Ehrenberg *et al.*, 1974), a time more than adequate for human exposure. In addition, the estimated lifespan of methy bromide in the troposphere is 1.7 years (Molina *et al.*, 1982). These facts have been demonstrated by actual damage cases (see below).

The Agency further believes that dimethyl sulfate is mobile and can enter the environment via surface water or ground water if improperly managed. This is based on its high solubility in water (2.8 g/100 ml at 18 °C.) and organic solvents, such as ether. Based on the volume of waste that could be generated from production of methyl bromide, approximately 64 kkg (141,000 pounds) of dimethyl sulfate could escape into the enviroment annually from waste K131. Based on the carcinogenicity of dimethyl sulfate, the Agency believes this volume of waste is significant.

Environmental fate data indicate that dimethyl sulfate hydrolyzes to sulfuric acid and methanol with a half-life of 1.2 hours at 25 °C. and pH 7 (USEPA, 1977), and much slower at less than 18 °C. (Clayton and Clayton, 1981). As reported

[2] The agency has developed an AWQC based on carcinoginicity for halomethanes (EPA, 1980a) a class of chemical to which methyl bromide belongs. This AWQC, 0.19 mg/L, has not been used in this evaluation since methyl bromide has not been determined to be a carcinogen. In the event that methyl bromide is shown to a carcinogen, however, the risk that is presented by these levels would be much greater.

[3] The amunt of methy bormide that could escape into the environment is a worst case estimate and is equal to the amount of methyl bromide in the waste. These figures are calculated by multiplying the percent of methy bromide in the waste by the total volume of waste produced. The amount of methyl bromide in waste K131 is 12,825 kkg × 0.05 = 640 kkg. This method is also used to determine the amount of dimethyl sulfate that could escape into the environment.

in the industry study questionnaires and confirmed by sampling analyses, however, there is a significant concentration of dimethyl sulfate in waste K131 (up to 0.5 percent). The Agency believes that this data demonstrates that dimethyl sulfate, as reported in the matrix of the waste, has a greater half-life than that reported in an aqueous solution of dimethyl sulfate, and thus is likely to be sufficiently persistent to enter the environment, if mismanaged.

The Agency has documented an environmental damage incident for wastes which contain methyl bromide. This damage incident provides evidence that methyl bromide is mobile, and may persist after migrating. Methyl bromide was found at 15 ppb downstream of Vandale's Junkyard in Marietta, Ohio (JRB, 1984). This junkyard, a National Priority List site under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), covers about 10 acres. In addition to non-hazadous solid wates, hundreds of drums containing waste dyes and organic chemicals were disposed of in the junkyard. As a result of geological conditions and poor management practices, the stream, sediments, and an adjacent marshy area are contaminated with a variety of chemicals, including methyl bromide.

Additional evidence of the mobility of methyl bromide is found in field studies where methyl bromide was used as a fumigant. Methyl bromide was sampled in the drainage water during the leaching periods of soil after the application of the fumigant. Within 24 hours after the start of leaching, the maximum concentration of methyl bromide in the drainage water was 9.3 mg/l (Wegman *et al.*, 1981). In addition, in data gathered from the Netherlands where methyl bromide is used as soil fumigant, bromide ion was found in precipitation, surface water, and ground water up to 0.98, 41, and 17 mg/l, respectively (Wegman *et al.*, 1983).

Air monitoring was performed at three organobromide production plants in Arkansas in 1976. Trace quantities (less than 31 ppm) of methyl bromide were found in the air near the plants (USEPA, 1978). These data show that methyl bromide is released into the environment and therefore could pose a threat to human health and the environment.

Moreover, the Agency believes that current industry waste management practices may not adequately protect human health and the environment from significant exposures to methyl bromide and dimethyl sulfate. Since information on management of these hazardous wastes is contained in CBI documents, the Agency cannot reveal the actual management practices. Certain of these waste streams, however, typically are disposed using methods that, under reasonable worst case mismanagement scenarios, may pose a significant risk to human health and the environment. These practices do not prevent methyl bromide from leaching from these wastes and contaminating surface water and ground water at significant levels. See the listing background document and the HEEPs for additional details on the fact, transport, and mismanagement of methyl bromide and dimethyl sulfate.

Consequently, due to the high concentrations of methyl bromide and dimethyl sulfate in these wastes, the toxic effects of these constituents, the mobility of methyl bromide and dimethyl sulfate via leaching and runoff, and their persistence in the environment, EPA has determined that these wastes pose a significant present or potential hazard to human health and the environment, when improperly stored, transported, disposed of, or otherwise mismanaged. The Agency, therefore, is proposing to add these wastes to the hazardous waste list in 40 CFR 261.32.

B. Test Methods for New Appendix VII Compounds

The Agency recently proposed making standardized test methods mandatory for use by persons who wish to conduct waste evaluations (49 FR 38786–38809; October 1, 1984). Appendix III of 40 CFR Part 261 is a list of the chemical analysis test methods which the Agency has determined are suitable for use in analyzing wastes for hazardous constituents. The Agency has evaluated the currently available methods and has determined that Method Numbers 8010 and 8240 are suitable for testing for the presence and concentration of methyl bromide, while Method Number 8250 is suitable for testing for dimethyl sulfate. These methods are described in "Test Methods for Evaluating Solid Waste: Physical/Chemical Methods," SW–846, 2nd ed., July 1982, as amended, and are available from: Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, (202) 783–3238, Document number: 055–002–81001–2. This manual explains why the methods selected for methyl bromide and dimethyl sulfate are appropriate. A subscription to this manual sells for $55.00.

III. Regulatory Status of Hazardous Wastewaters

Under the existing hazardous waste regulations, wastewaters that are hazardous and that are treated in a tank as part of a wastewater treatment facility that is subject to regulation under either section 402 or section 307(b) of the Clean Water Act are exempt from the Parts 264 and 265 management standards. Treatment units, such as concrete basins, which may or may not be in-ground, routinely provide for certain steps in a wastewater treatment process such as equalization, neutralization, aeration (in biological treatment facilities), settling, (in both biological and physical/chemical treatment facilities), flocculation or treated wastewater storage before recycling.

Where such units are constructed primarily of non-earthen materials designed to provide structural support, they are defined as tanks for purposes of the hazardous waste regulations. See 40 CFR 260.10 (definition of "tank"). In applying this definition, the Agency has provided guidance that a unit is to be evaluated as if it were free-standing and filled to its design capacity with the material it is intended to hold. If the walls or shell of the unit alone provide sufficient structural support to maintain the structural integrity of the unit under these conditions, the unit is considered to be a tank. Alternatively, if the unit is not capable of retaining its structural integrity without supporting earthen materials, it is considered to be a surface impoundment, and subject to Parts 264 and 265 requirements.

When wastewaters, including those covered by the listing proposed today, are stored or treated in tanks that are part of a unit subject to regulation under section 307(b) or 402 of the Clean Water Act, they are exempt from the Parts 264 and 265 management standards.

IV. CERCLA Impacts

The hazardous wastes designated by today's proposed rule, if listed, become hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). (See CERCLA section 101(14), 42 U.S.C. 9601(14).) A final listing of these methyl bromide production wastes under RCRA would affect reporting responsibilities under CERCLA. (See CERCLA section 103, 42 U.S.C. 9603; 48 FR 23552–23605, May 25, 1983 (proposal); and 50 FR 13456–13521, April 4, 1985 (final).)

Methyl bromide, a hazardous constituent in both waste streams, and dimethyl sulfate, a hazardous constituent in waste K131, will be added to 40 CFR Part 261, Appendix VII if this proposal is made final. Both of these compounds have a statutory reportable

quantity (RQ) of one pound. The final RQ for methyl bromide is 1,000 pounds, and the final RQ for dimethyl sulfate is one pound.

The Agency is currently assessing the available data on all of the hazardous constituents and the waste streams to determine if an adjustment from the statutory one pound RQ is appropriate.

V. State Authority

A. Applicability of Rules in Authorized States

Under section 3006 of RCRA, EPA may autnorize qualified States to administer and enforce the RCRA program within their States. (See 40 CFR Part 271 for the standards and requirements for authorization.) Authorization, either interim or final, may be granted to State programs that regulate the identification, generation, and transportation of hazardous wastes and the operation of facilities that treat, store, or dispose of hazardous waste. Interim authorization is granted to States with programs that are "substantially equivalent" to the Federal program (section 3006(c)). Final authorization is granted to States with programs that are equivalent to the Federal program, consistent with the Federal program and other State programs, and that provide for adequate enforcement (section 3006(b)).

Under RCRA, prior to the Hazardous and Solid Waste Amendments of 1984, once EPA authorizes a State program, EPA suspends administration and enforcement within the State of those parts of the Federal program for which the State is authorized. In authorized States, EPA does retain enforcement authority under sections 3008, 7003, and 3013 of RCRA, although authorized States have primary enforcement responsibility. However, under section 3006(g) of the Hazardous and Solid Waste Amendments of 1984, any requirement pertaining to hazardous wastes promulgated pursuant to the Amendments is effective in authorized States at the same time it is effective in other States. EPA will administer and enforce the requirements in each State until the State is authorized with respect to such requirements.

The listing and related management standards promulgated in today's rule are applicable in all States since the requirements are imposed pursuant to the Amendments. Thus, EPA will implement these standards until authorized States revise their programs to adopt these rules.

B. Effect on State Authorizations

Under RCRA, authorized State programs must be revised to incorporate new requirements imposed by statute or EPA regulations. The procedures and schedule for State adoption of these requirements is described in 40 CFR 271.21. See 49 FR at 21678 (May 22, 1984).

States that have final authorization must revise their programs within a year of promulgation of today's regulations if only regulatory changes are necessary. These deadlines can be extended in exceptional cases. See 40 CFR 271.21(e).

States that submit official applications for final authorization less than 12 months after promulgation of today's regulations may be approved without including standards equivalent to those promulgated. However, once authorized, a State must revised its program to include the listing and related management standards substantially equivalent or equivalent to EPA's within the time period discussed above.

Under the HSWA, states revising their programs to adopt new requirements imposed under the HSWA may do so based on state requirements that are equivalent or substantially equivalent to the HSWA requirements. See section 3006(g)(2). Thus, a state seeking authorization for today's amendments may do so based on controls that are equivalent or substantially equivalent to today's rule.

VI. Status of Methyl Bromide Under FIFRA

Methyl bromide is used as a fumigant and therefore is also subject to regulation under the Federal Insecticide, Fungicide, and Rodenticide (FIFRA). FIFRA uses a statutory risk-benefit balancing test: products are "registered" (authorized) if they generally will not cause any unreasonable risk to man or the environment, taking into account the economic, social, and environmental costs and benefits of use. Accordingly, pesticides that present more than a substantial risk can be approved if the benefits outweigh the risks. (See FIFRA sections 3(c)(5), 3(c)(7), and 2(bb).) If the Agency ever decides that a pesticide no longer meets the standards for registration, then its registration may be canceled. Proponents of the pesticide, however, are afforded opportunities to contest the Agency's determination that registration should be canceled.

Methyl bromide is a major substitute for ethylene dibromide, whose agricultural use as a soil, grain, and grain milling fumigant and as a post-harvest treatment for other commodities was recently banned by the Agency (see 48 FR 46228–56248, October 11, 1983). Since methyl bromide is registered for these uses, the Agency believes that methyl bromide production may increase significantly.

The Agency's Office of Pesticides Program has requested oncogenicity and reproduction studies on methyl bromide, as well as additional food residue and environmental fate data on this chemical. As of this writing, the Office of Pesticides and Toxic Substances plans to complete a Registration Standard and to reach an initial Special Review decision on methyl bromide by the end of 1985. The Agency believes that the decision to list methyl bromide waste streams as RCRA hazardous wastes, for which a different statutory standard applies, is consistent with the treatment of methyl bromide under FIFRA.

VII. Regulatory Impact Analysis

Under Executive Order 12291, EPA must determined whether a regulation is "major" and therefore requires a Regulatory Impact Analysis. The total additional cost for disposal of the wastes as hazardous wastes is estimated to be less than $23,000 (JRB, 1985), well under the $100 million constituting a major regulation. This cost is insignificant and results from some companies already managing these wastes as if they were hazardous wastes and from minimal additional compliance requirements, such as manifesting these additional wastes.

In addition, we do not expect that there will be an adverse impact on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. Since this proposal is not a major regulation, no Regulatory Impact Analysis is being conducted.

VIII. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on small entities.

The hazardous wastes proposed to be listed here are not generated by small entities (as defined by the Regulatory Flexibility Act). Accordingly, I hereby certify that this proposed regulation

would not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis. (See 5 U.S.C. 603.)

List of Subjects in 40 CFR Part 261

Hazardous materials, Waste treatment and disposal, Recycling.

Dated: April 17, 1985.

For the reasons set out in the preamble, it is proposed to amend Title 40 of the Code of Federal Regulations as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for Part 261 continues to read as follows:

Authority: Secs. 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6921, and 6922).

2. In § 261.32, add the following waste streams to the subgroup "Organic Chemicals":

§ 261.32 Hazardous wastes from specific sources.

Industry and EPA hazardous waste No.	Hazardous waste	Hazard code
•	•	•
K131	Wastewater from the reactor and acid dryer from the production of methyl bromide.	(C, T)
K132	Spent adsorbent and wastewater separator solids from the production of methyl bromide.	(T)
•	•	•

3. Add the following entries in numerical order to Appendix VII of Part 261:

Appendix VII—Basis for Listing Hazardous Waste

EPA hazardous waste No.	Hazardous constituents for which listed
•	•
K131	Methyl bromide, dimethyl sulfate.
K132	Methyl bromide.
•	•

Part IV

Department of Housing and Urban Development

Office of the Assistant Secretary for Public and Indian Housing

Indian Prototype Cost Determinations Issued Under the United States Housing Act of 1937; Notice

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

[Docket No. N-85-1518; FR-2096]

Indian Prototype Cost Determinations Issued Under the United States Housing Act of 1937

[Note.—This document originally appeared in the issue of Tuesday, April 16, 1985, at 50 FR 14994. It is reprinted at the request of the department because the Appendix appearing on pages 14995–14998 contained typographical errors.]

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice of prototype cost determinations.

SUMMARY: This Notice establishes prototype limits for development of Indian housing new construction projects under the United States Housing Act of 1937. The prototype cost determinations stated in this Notice supersede the prototype cost schedules previously published, and all amendments and additions to such schedules published before the date of this Notice.

FOR FURTHER INFORMATION CONTACT: Andrew Suski, Office of Indian Housing, Room 4234, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410, telephone (202) 755–6522. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Section 6(b) of the United States Housing Act of 1937 (42 U.S.C. 1437d) requires HUD to determine costs in different areas for construction and equipment (prototype costs) of new dwelling units suitable for occupancy by lower income families. This determination must be published in the **Federal Register.** The prototype costs constitute a limit on development cost for the construction and equipment of new housing projects.

The schedules in this Notice represent updates of the per unit prototype cost limits for development of Indian housing under 24 CFR Part 905 (§§ 905.213 and 905.214(b)), last published and effective December 7, 1982 (47 FR 55136). This Notice does not affect the schedules for public housing prototype costs published December 6, 1984 (49 FR 47772). Additionally, this notice does not govern prototype costs for Indian housing projects located in areas not identified in the appendix to this notice (e.g., Oklahoma). These projects will be governed by the prototype costs set forth in the December 6, 1984 public housing notice.

The prototype cost determinations for the update are based on actual public and Indian housing project data from HUD field offices and on construction cost information published by the private sector of the housing industry. The update includes approximately a 3.4 percent national average increase to reflect inflation. This increase should be sufficient based on our experience that the prototype limits last published have been more than sufficient to permit Indian housing development to proceed during the past two years.

Since Section 6(b) of the U.S. Housing Act of 1937 provides that the prototype costs shall become effective upon publication in the **Federal Register**, this Notice is effective today, the day of publication.

The following factors were considered in developing prototype cost:

(1) Prototype cost comprises the cost of dwelling structure, (Account No. 1460), and dwelling equipment, (Account No. 1465), as described in HUD Low-Rent Housing Accounting Handbook 7510.1, Chapter 3, Section 15, and includes a pro rata share of the builders' fee and overhead, insurance, social security, sales tax, and bonds.

(2) Prototype cost does *not* include the costs of site acquisition, site improvement, nondwelling structures or spaces (and equipment), planning (architectural-engineering fees, permit fees, inspection, and similar costs), relocation, interest or IHA administrative costs, all of which are described in HUD Low-Rent Housing Accounting Handbook 7510.1, Chapter 3, Section 15.

(3) Section 6(b) of the Act identifies eight factors the Secretary is to consider in determining prototype costs, which include such things as the effectiveness of existing cost limits in the area, advice of local housing producers, maximization of energy conservation for heating, lighting and other purposes, and the extra durability required for safety, security and economical maintenance of the housing. (See 42 U.S.C. 1437d).

(4) Prototype costs are ceiling amounts that may be approved for a particular project. Development of Indian housing under Part 905 also must take into account compliance with applicable design requirements in the Indian housing regulations. The HUD Minimum Property Standards are taken into account but are not controlling. (See § 905.212(a)).

Written comments will be considered, and additional amendments will be published, if the Department determines that acceptance of the comments is appropriate. Comments with respect to the cost limits for a given location should be sent to the local HUD office having jurisdication for that location. A list of these offices follows:

	Area(s) served
Region 5, Office of Indian Programs, 300 S. Wacher Drive, Chicago, Illinois 60606.	Regions 1–5 and Iowa
Region 6, Indian Programs Division, 200 N.W. Fifth Street, Oklahoma City, Oklahoma 73102.	Oklahoma, Kansas, Missoun, Texas, Arkansas and Louisiana.
Region 8, Office of Indian Programs, 1404 Curtis Street, Denver, Colorado 80202.	Region 8 and Nebraska
Region 9, Office of Indian Programs, 101 North First Ave., Phoenix, Arizona 85003.	Region 9 and New Mexico.
Region 10, (Seattle) Office of Indian Programs, 1321 Second Ave., Seattle, Washington 98101.	Region 10, except Alaska.
Region 10, (Anchorage) Office of Indian Programs, 701 C Street, Box 64, Anchorage, Alaska 99513.	Alaska.

A Finding of No Significant Impact with respect to the environment required by the National Environmental Policy Act (42 U.S.C. 4321–4347) is unnecessary since statutorily required prototype costs are categorically excluded under 24 CFR 50.20(1).

The Catalog of Federal Domestic Assistance program is: 14.147, Low-Income Housing-Homeownership for Low-Income Families (Turnkey III, Mutual Help for Indians).

The prototype per-unit cost schedule for all prototype cost areas issued under 24 CFR § 905.213 are hereby established as shown on the tables set forth below entitled "Prototype Per-Unit Cost Schedule."

(Sec. 7(d), Department of HUD Act, 42 U.S.C. 3535(d); Sec. 6(b), U.S. Housing Act of 1937, 42 U.S.C. 1437d(b))

Dated: April 10, 1985.

Warren T. Lindquist,

Assistant Secretary for Public and Indian Housing.

BILLING CODE 4210-33-M

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Presidential Documents

Title 3—

The President

Proclamation 5326 of April 23, 1985

National Defense Transportation Day and National Transportation Week, 1985

By the President of the United States of America

A Proclamation

Our Nation's history can be traced through the development and growth of transportation in America. Our country has grown as transportation has given us access to new geographic, economic, and technical frontiers.

During colonial days, Americans were dependent on the river systems and ocean ports still used in commerce today. President Thomas Jefferson commissioned Lewis and Clark to explore the West through our rivers, providing new opportunities for trade and commerce. In 1825, the Erie Canal, connecting Buffalo to New York, opened the Great Lakes for settlement and industry.

Pioneers broke new ground to the West by way of the Cumberland Road in 1811. Other highways were soon developed to move people and goods across the wilderness. Completion of the first transcontinental railroad in 1869 joined East to West, ushering in a new era of transportation, strengthening American commerce.

Aviation history was made at Kitty Hawk in 1903, launching an aviation system now serving over 300 million passengers a year. Today, we are witnessing the beginning of a new era in space transportation with the development of commercial space vehicles.

As our cities grew, transit systems evolved to provide affordable, convenient urban transportation. The 20th Century brought the automobile, truck, intercity bus, rapid rail systems, and an expanded road system that now includes thousands of miles of interstate highways.

As has been true throughout our history, transportation today is critical to our economy and necessary to our defense. America's transportation systems have made our society the most mobile on earth. A diverse transportation network has assured the rapid, safe, and dependable movement of people and goods throughout the country and around the world.

In recognition of transportation's importance, and to honor the millions of Americans who serve and supply our transportation needs, the Congress, by joint resolution approved May 16, 1957, has requested that the third Friday in May of each year be designated as National Defense Transportation Day; and by joint resolution approved May 14, 1962, that the week in which that Friday falls be proclaimed National Transportation Week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby designate Friday, May 17, 1985, as National Defense Transportation Day and the week beginning May 12, 1985, through May 18, 1985, as National Transportation Week. I urge the people of the United States to observe these occasions with appropriate ceremonies that will give full recognition to the importance of our transportation system to this country.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of April, in the year of our Lord nineteen hundred and eighty-five, and of the Independence of the United States of America the two hundred and ninth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 50, No. 81
Friday, April 26, 1985

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 513; Lemon Reg. 512, Amdt. 1]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action establishes the quantity of fresh California-Arizona lemons that may be shipped to the fresh market at 300,000 cartons during the period April 28-May 4, 1985, and increases the quantity of lemons that may be shipped to 310,000 cartons during the period April 21-April 27, 1985. Such action is needed to provide for orderly marketing of fresh lemons for such periods due to the marketing situation confronting the lemon industry.

DATES: The regulation (§ 910.813) becomes effective April 28, 1985, and the amendment (§ 910.812) is effective for the period April 21-April 27, 1985.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

This final rule is issued under Marketing Order No. 910, as amended (7 CFR Part 910) regulating the handling of lemons grown in California and Arizona The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy currently in effect. The committee met publicly on April 23, 1985, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified weeks. The committee reports that lemon demand has improved and should continue to improve all sizes of fruit.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation and amendment are based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and the amendment relieves restrictions on the handling of lemons. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing Agreements and Orders, California, Arizona, Lemons.

PART 910—[AMENDED]

1. Section 910.813 is added to read as follows:

§ 910.813 Lemon Regulation 513.

The quantity of lemons grown in California and Arizona which may be handled during the period April 28, 1985, through May 4, 1985, is established at 300,000 cartons.

2. Section 910.812 Lemon Regulation 512 is revised to read as follows:

§ 910.812 Lemon Regulation 512.

The quantity of lemons grown in California and Arizona which may be handled during the period April 21, 1985, through April 27, 1985, is established at 310,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: April 24, 1985.

Thomas R. Clark,
Deputy Director, Fruit and Vegetable Division Agricultural Marketing Service.

[FR Doc. 85–10305 Filed 4–25–85; 8:45 am]
BILLING CODE 3410–02–M

7 CFR Part 981

Handling of Almonds Grown in California; Administrative Rules and Regulations Governing Crediting for Marketing Promotion

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends one paragraph of the creditable marketing promotion provisions of the administrative rules and regulations established under the Federal marketing order for California almonds. This change is designed to provide handlers with more flexibility in promoting the sale of California almonds.

EFFECTIVE DATE: April 26, 1985.

FOR FURTHER INFORMATION CONTACT: Frank M. Grasberger, Acting Chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250 (202) 447–5053.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been classified a "non-major" rule under criteria contained therein.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

It is found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553) in that: (1) It gives handlers enough time to plan advertising and promotion

operations by the June 30 deadline; (2) handlers are aware of the action which is a relaxation of previous restrictions; and (3) no useful purpose would be served by delaying the effective date of this action.

Notice of this action was published in the March 22, 1985, issue of the **Federal Register** (50 FR 11510), and interested persons were afforded an opportunity to submit written comments. No comments were received. However, two additional changes in § 981.441(c)(3)(ii) and (iii) were proposed that are not included in this final rule because the Board recommended the comment period be extended to allow the Board time to further review and consider them. Extension of that time will be dealt with in another action.

This final rule revises § 981.441(b) of Subpart—Administrative Rules and Regulations (7 CFR 981.401—981.474; 49 FR 19798; and 40788). Section 981.441 is issued under § 981.41 of the marketing agreement and Order No. 981 (7 CFR Part 981), both as amended, regulating the handling of almonds grown in California and hereinafter referred to collectively as the "order". The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The proposal is based on a unanimous recommendation of the Almond Board of California, hereinafter referred to as the "Board", which works with USDA in administering the order.

Section 981.41 of the order provides that the Board, with the approval of the Secretary, may allow handlers to receive credit for their direct marketing promotion expenditures, including paid advertising, against their pro rata expense assessment obligations for such activities. Section 981.441 prescribes the rules and regulations which handlers must follow to obtain such credit.

Section 981.441(b) currently provides that in order for a handler to receive credit, his/her paid advertisements must be published, broadcast, or displayed, and his/her other marketing promotion activities must be conducted, during the year for which credit is requested, except that a handler may expend a maximum of 20 percent of his/her total creditable advertising and promotion obligation (as of the June 30 redetermination report) for advertisement published, broadcast, or displayed, and other marketing promotion activities conducted, during the subsequent July 1—December 31 period. A handler utilizing this extension of time must certify to the Board, at the time of the June 30 redetermination, his/her planned expenditures during the extension period and must file any required documentation with the Board no later than the following January 31.

The Board believes that the 20 percent limit on credit for paid advertising and other marketing promotion activities during the July 1—December 31 extension period is too restrictive and proposed that this limit be increased to 40 percent. A handler's pro rata expense assessment obligation for a particular crop year may not match his/her advertising and promotion needs for that year. Thus, it is desirable to allow a greater portion of a handler's creditable advertising to be carried over from one crop year to the next so that handlers can more effectively utilize their promotion funds.

List of Subjects in 7 CFR Part 981

Marketing agreements and orders, Almonds, and California.

PART 981—[AMENDED]

Therefore, § 981.441 of Subpart—Administrative Rules and Regulations (7 CFR 981.401–981.474; 49 FR 19798; and 40788) is changed as follows:

§ 981.441 [Amended]

1. Section 981.441(b) is amended by changing "20 percent" to "40 percent."

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: April 23, 1985.

Thomas R. Clark,

Deputy Director, Fruit and Vegetable Division.

7 CFR Part 1004

[Docket No. AO–160–A62–R03]

Milk in the Middle Atlantic Marketing Area; Order Amending Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action amends the "plant" and "pool plant" definitions of the Middle Atlantic order. These changes will allow a federation of cooperatives to qualify its reserve processing plant as a separate pool plant under certain circumstances and to efficiently exhange by-products by pipeline with an adjacent nonpool plant. Such changes are based on evidence presented at a public hearing held in Alexandria, Virginia, on September 13, 1984. The amendments are needed to recognize the changes in marketing conditions. The hearing on this issue was requested by a federation of cooperatives, which represents a number of dairy farmers who supply milk to the market. Cooperative associations representing more than the required two-thirds of the producers supplying milk for the market during the representative period of December 1984 have approved issuance of the amended order.

EFFECTIVE DATE: June 1, 1985.

FOR FURTHER INFORMATION CONTACT: Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–7183.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing: Issued August 30, 1984; published September 6, 1984 (49 FR 35100).

Emergency Partial Final Decision: Issued October 17, 1984; published October 24, 1984 (49 FR 42737).

Order Amending Order: Issued November 6, 1984; published November 14, 1984 (49 FR 44986).

Recommended Decision: Issued January 29, 1985; published February 1, 1985 (50 FR 4694).

Final Decision: Issued March 22, 1985; published April 1, 1985 (50 FR 12813).

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when the Middle Atlantic order was first issued and when it was amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Middle Atlantic marketing area.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the

price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area; and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Determinations.* it is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in Sec. 8c (9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order amending the order is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as hereby amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

List of Subjects in 7 CFR Part 1004

Milk marketing order, Milk, Dairy products.

Order Relative to Handling

It is therefore ordered, That on and after the effective date hereof, the handling of milk in the Middle Atlantic marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

PART 1004—MILK IN THE MIDDLE ATLANTIC MARKETING AREA

1. Section 1004.4 is revised to read as follows:

§ 1004.4 Plant.

Except as specifically provided in § 1004.7(d)(2), "plant" means the land and buildings together with their surroundings, facilities and equipment, whether owned or operated by one or more persons, constituting a single operating unit or establishment for the receiving, processing or packaging of milk or milk products (including filled milk). However, a separate facility used only for the purpose of transferring bulk milk from one tank truck to another tank truck or only as a distribution depot for fluid milk products in transit for route distribution shall not be included under this definition.

2. In § 1004.7, paragraphs (d)(2), and (e) are revised to read as follows:

§ 1004.7 Pool Plant.

* * * * *

(d) * * *

(2) A reserve processing plant operated by a federation of cooperative associations if, during the month, 30 percent or more of the producer milk of member producers of such cooperatives is caused to be delivered to and physically received at pool plants qualified pursuant to paragraph (a) of this section either from the farms of such producers or by transfer in the form of fluid milk products (except filled milk) from the plant(s) of such cooperatives. If a pipeline is maintained between a reserve processing plant and a nonpool plant operated by another person and located on the same premises, the reserve processing plant shall be a pool plant for the month if the operator of such plant proves to the satisfaction of the market administrator that such plant should be eligible for pool status on the basis of the plant's monthly receipts and disposition of milk and that the pipeline was used only to move by-products (not milk) between such plants during the month.

* * * * *

(e) A plant that qualified as a pool plant pursuant to paragraph (b) or (d) of this section during each of the immediately preceding months of September through February shall be qualified for automatic pool plant status for each of the following months of March through August, unless the plant operator files a written request with the market administrator prior to the beginning of any such month asking that such plant not be a pool plant. Such nonpool status shall be effective on the first day of the month following the receipt of such request and shall continue until the plant again qualifies as a pool plant pursuant to paragraph (b) or (d) of this section, subject to the following conditions:

(1) The automatic pool plant status for any plant identified in paragraph (e) of this section shall be cancelled if another plant is qualified as a pool plant on the basis of deliveries to the same plants through which such automatic pooling status was acquired by the plant. Cancellation of the plant's automatic pool plant status shall be effective on the first day of the month in which the other plant is qualified as a pool plant and shall continue until the plant again qualifies as a pool plant pursuant to paragraph (b) or (d) of this section; and

(2) The automatic pool plant status of a reserve processing plant operated by a federation of cooperative associations qualified pursuant to paragraph (d)(2) of this section shall be forfeited for any month during the March through August period in which the market administrator determines on the basis of the investigation conducted pursuant to paragraph (d)(2) of this section that such plant shall not be a pool plant for the month.

* * * * *

(Secs. 1–19 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: June 1, 1985.

Signed at Washington, D.C. on: April 19, 1985.

Karen Darling,

Acting Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410–02–M

Commodity Credit Corporation

7 CFR Part 1427

[Amdt. 3]

Standards for Approval of Warehouses for Cotton or Cotton Linters

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to amend the regulations found at 7 CFR 1427.1081 *et seq.* relating to the Commodity Credit Corporation (CCC) Standards for Approval of Warehouses for Cotton or Cotton Linters. The final rule will: (1) Permit a parent company to submit a financial statement for a wholly-owned subsidiary; (2) permit warehousemen to submit financial statements on forms other than on Form WA–51; (3) revise the references to CCC regulations governing suspension and debarment; (4) permit CCC to accept an irrevocable letter of credit on forms other than Form CCC–33A; (5) delete the use of a Certificate of Competency issued by the Small Business Administration for a warehouseman who is deficient in net worth; (6) delete certain references to the withdrawal of approval of warehouses by CCC; and (7) make certain other miscellaneous changes.

EFFECTIVE DATE: April 26, 1985.

FOR FURTHER INFORMATION CONTACT: Lynn W. Howe, 202–447–5785, Warehouse Division, U.S. Department of Agriculture, Agricultural Stabilization and Conservation Service, P.O. Box 2415, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA procedures required by Executive Order 12291 and Departmental Regulation 1512–1 and has been classified "not major" since it does not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environment Assessment nor an Environmental Impact Statement is needed.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 28115 (June 24, 1983).

It has been determined that the Regulatory Flexibility Act is not applicable to this final rule since the Commodity Credit Corporation (CCC) is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of rulemaking with respect to the subject matter of this rule.

The Commodity Credit Corporation Charter Act (15 U.S.C. 714) authorizes CCC to conduct various activities to stabilize, support, and protect farm income and prices. CCC is authorized to carry out such activities as making price support available with respect to various agricultural commodities, removing and disposing of surplus agricultural commodities, exporting or aiding in the exportation of agricultural commodities, and procuring agricultural commodities for sale both in the domestic market and abroad.

Section 4(h) of the CCC Charter Act provides that the Corporation shall not acquire real property in order to provide storage facilities for agricultural commodities, unless CCC determines that private facilities for the storage of such commodities are inadequate. Further, section 5 of the CCC Charter Act provides that, in carrying out the Corporation's purchasing and selling operations, and in the warehousing, transporting, processing, or handling of agricultural commodities, CCC is directed to use, to the maximum extent practicable, the usual and customary channels, facilities, and arrangements of trade and commerce.

Accordingly, CCC has set forth Standards for Approval of Warehouses for Cotton and Cotton Linters which must be met by warehousemen before CCC will enter into storage agreements with such warehousemen for the storage of cotton which is owned by CCC or which is serving as collateral for CCC price support loans.

During the past few years changes in the cotton warehousing industry, financial institution requirements, and Federal contracting requirements necessitate updating the Standards for Approval of Warehouses for Cotton and Cotton Linters.

Accordingly, a notice of proposed rulemaking was published by the Department in the **Federal Register** on August 31, 1984, 49 FR 34511, requesting comments with respect to a number of proposals regarding changes in the Standards for Approval of Warehouses for Cotton and Cotton Linters. The comment period was for sixty days and ended on October 30, 1984.

Amendments to the regulations were proposed which would: (1) Permit a parent company to submit a financial statement for a wholly-owned subsidiary; (2) permit warehouses to submit financial statements on forms other than on Form TW–51; (3) incorporate for CCC purposes USDA regulations governing suspension and debarment; (4) permit CCC to accept an irrevocable letter of credit on forms other than Form CCC–33A; (5) delete the use of a Certificate of Competency issued by the Small Business Administration for a warehouseman who is deficient in net worth; (6) delete certain references to the withdrawal of approval of warehouses by CCC; and (7) make certain other miscellaneous changes.

No comments were received concerning the proposed rule. Accordingly, it has been determined that the provisions of the proposed rule should be adopted as a final rule except for minor technical changes. These changes are in §§ 1427.1082(c)(2) and 1427.1086(c)(2) to delete references to Department of Agriculture suspension and debarment regulations and insert in lieu thereof references to suspension and debarment regulations. Subsequent to the promulgation of the proposed rule, the CCC suspension and debarment regulations were amended to incorporate, with limited exceptions, the Department of Agriculture suspension and debarment regulations. In addition, § 1427.1081 has been revised to change the form number for the financial statement from "TW–51" to "WA–51". It is believed that these minor changes in references from the proposed rule are not of such a nature as to warrant any further public rulemaking.

List of Subjects in 7 CFR Part 1427

Cotton, Loan programs—Agriculture, Packaging, and Containers, Price support programs, Surety bonds, and Warehouse.

Final Rule

PART 1427—[AMENDED]

The provisions of 7 CFR Part 1427 are amended as follows:

1. The authority citation for 7 CFR Part 1427, Subpart—Standards for Approval of Warehouses for Cotton or Cotton Linters is revised to read as follows:

Authority: Secs. 4 and 5, 62 Stat. 1070, as amended, 1072, as amended (15 U.S.C. 714 b and c).

2. In Section 1427.1081, paragraphs (b) and (d)(2) are revised to read as follows:

§ 1427.1081 General statement and administration.

* * * * *

(b) Copies of the CCC storage agreement and forms required for obtaining approval under this subpart may be obtained from the Kansas City Commodity Office, U.S. Department of Agriculture, P.O. Box 205, Kansas City, Missouri 64141 (hereinafter referred to as the "KCCO").

* * * * *

(d) * * *

(2) A current financial statement on Form WA–51, "Financial Statement", supported by such supplemental schedules as CCC may request.

Financial statements may be submitted on forms other than Form WA–51 with approval of the Director, KCCO, or the Director's designee. Financial statements shall show the financial condition of the warehouseman as of a date no earlier than ninety (90) days prior to the date of the warehouseman's application, or such other date as CCC may prescribe. Additional financial statements shall be furnished annually and at such other times as CCC may require. CCC also may require that financial statements prepared by the warehouseman or by a

public accountant be examined by an independent certified public accountant in accordance with generally accepted auditing standards. Only one financial statement is required for a chain of warehouses owned or operated by a single business entity. If approved by the Director, KCCO, or the Director's designee, the financial statement of a parent company, which includes the financial position of a wholly-owned subsidiary, may be used to meet the CCC standards for approval for the wholly-owned subsidiary.

* * * * *

4. In § 1427.1082, paragraph (c)(2) is revised to read as follows:

§ 1427.1082 Basic Standards.

* * * * *

(c) * * *

(2) Be neither suspended nor debarred under applicable CCC suspension and debarment regulations.

* * * * *

5. In § 1427.1083, paragraph (e) is revised to read as follows:

§ 1427.1083 Bonding Requirements for Net Worth.

* * * * *

(e) An irrevocable letter of credit may be accepted by CCC in lieu of the required amount of bond coverage provided that the issuing bank is a commercial bank insured by the Federal Deposit Insurance Corporation. Such standby letter of credit shall be on Form CCC–33A, "Irrevocable Letter of Credit", or on such other form as may be specifically approved by the Director, KCCO, or the Director's designee.

§ 1427.1085 [Amended]

6. Section 1427.1085 is amended by removing paragraph (b) and by redesignating paragraphs (c) and (d) as paragraphs (b) and (c), respectively.

7. Section 1427.1086 is revised to read as follows:

§ 1427.1086 Approved of warehouse, requests for reconsideration.

(a) CCC will approve a warehouse if it determines that the warehouse meets the standards set forth in this subpart. CCC will send a notice of approval to the warehouseman. Approval under this subpart, however, does not relieve the warehouseman of the responsibility for performing the warehouseman's obligations under any agreement with CCC or any other agency of the United States.

(b) Except as otherwise provided in this subpart:

(1) CCC will not approve the warehouse if CCC determines that the warehouse does not meet the standards set forth in this subpart, and

(2) CCC will send any notice of rejection of approval to the warehouseman. This notice will state the cause(s) for such action. Unless the warehouseman or any officials or supervisory employees of the warehouseman are suspended or debarred, CCC will approve the warehouse if the warehouseman establishes that the causes for CCC's rejection of approval have been remedied.

(c) If rejection of approval by CCC is due to the warehouseman's failure to meet the standards set forth:

(1) In § 1427.1082, other than the standard set forth in paragraph (c)(2) thereof, the warehouseman may, at any time after receiving notice of such action, request reconsideration of the action and present to the Director, KCCO, in writing, information in support of such request. The Director shall consider such information in making a determination of notify the warehouseman in writing of such determination. The warehouseman may, if dissatisfied with the Director's determination, obtain a review of the determination and an informal hearing thereon by filing an appeal with the Deputy Administrator, Commodity Operations, Agricultural Stabilization and Conservation Service (hereinafter referred to as "ASCS"). The time of filing appeals, forms for requesting an appeal, nature of the informal hearing, determination and reopening of the hearing shall be as prescribed in the ASCS regulations governing appeals, 7 CFR Part 780. When appealing under such regulations, the warehouseman shall be considered as a "participant"; and

(2) In § 1427.1082(c)(2), the warehouseman's administrative appeal rights with respect to suspension and debarment shall be in accordance with applicable CCC regulations. After expiration of a period of suspension or debarment, a warehouseman may, at any time, apply for approval under this subpart.

8. Section 1427.1088 is added to read as follows:

§ 1427.1088 OMB Control Numbers Assigned Pursuant to Paperwork Reduction Act.

The information collection requirements contained in this regulation (7 CFR Part 1427) have been approved by the Office of Management and Budget under provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Numbers 0560–0040, 0560–0074, 0560–0027, and 0560–0059.

Signed at Washington, D.C., on April 23, 1985.

Everett Rank,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410–05–M

Farmers Home Administration

7 CFR Part 1980

Business and Industrial Loan Program

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its Business and Industrial (B&I) Loan Program regulations to permit negotiated reductions in interest rates charged on guaranteed loans. This action is necessary because otherwise loan liquidations will result from borrowers' inability to repay loan installments due to interest rates not being compatible with existing market conditions. The effect of this action is to permit the borrower, lender, and holder (if any) to collectively negotiate a reduced interest rate, thereby benefiting the borrower.

EFFECTIVE DATE: April 26, 1985.

FOR FURTHER INFORMATION CONTACT: Dwight A. Carmon, Loan specialist, Business and Industry Division, FmHA, USDA, 14th and Independence Avenue, S.W., Washington, D.C. 20250. Telephone: (202) 475–3811.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Departmental Regulation 1512–1, which implements Executive Order 12291 and has been determined to be "non-major" since the annual effect on the economy is less than $100 million and there will be no significant increase in costs or prices for consumers, individual industries, organizations, governmental agencies or geographic regions. There will be no significant effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalogue of Federal Domestic Assistance Number for Business and Industrial Loans is 10.422.

The activities covered by this final rule are subject to the requirements for intergovernmental consultation as stated in 7 CFR Part 3015 Subpart V, "Intergovernmental Review of

Department of Agriculture Programs and Activities," and FmHA Instruction 1940–J, "Intergovernmental Review of Farmers Home Administration Programs and Activities."

This final action has been reviewed in accordance with FmHA Instruction 1940–G, "Environmental Program." FmHA has determined that this final action does not constitute a major Federal action significantly affecting the quality of the human environment and, in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–90, an Environmental Impact Statement is not required.

This action responds to numerous inquiries addressing the need to adjust interest rates for the mutual accommodations of borrower(s) and lender(s). This final rule defines FmHA's position on the reduction of interest rates so that the borrower, lender and the Government can accommodate to changing market conditions and conditions in the borrower's ability to make loan payments on schedule.

This final rule allows interest to be reduced by collective action by the borrower, lender and holder. It prohibits fixed rates from being changed to variable rates to reduce the interest rate to the borrower unless the variable rate has a ceiling which is less than the original fixed rate. No increase in interest rates will be permitted except under the normal fluctuations for approved variable interest rate loans.

Discussion of Comments Received and Final Rule

A proposed rule was published in the **Federal Register** (49 FR 21547) on May 22, 1984. That proposal provided for a 30-day comment period. Written comments were received from eighteen respondents generally supportive of the proposed rule.

The proposed rule is adopted without change.

Section 1980.423 Interest Rates.

Paragraph (a)(1).

FmHA added a cross-reference to paragraph (a)(6)(i) of this section to include an exception to the requirement that there will be no floor or ceiling on variable interest rates. There were no unfavorable comments.

Paragraph (a)(6).

This paragraph allows the borrower, lender and holder (if any) to collectively negotiate a permanent reduction in the interest rate on their B&I guaranteed loan at anytime during life of the loan upon written agreement by all parties. One respondent commented that the proposed rule is unclear as to whether a reduced interest rate below the cost of money to the Government when the Government has repurchased would be acceptable or not. The Agency does not feel that the provision is unclear. The provision was included to ensure that the decision official includes the cost of money to the Government as one factor but not the only factor in reaching a decision. Another respondent suggested that interest rate reductions be limited to one per calendar year. The Agency sees no reason to so limit the rule. Greater flexibility is preferred. In certain instances, moe than one interest rate reduction in a year may be necessary. Although this result would not be encouraged, the greater flexibility provided by the proposed rule allows for it. Another respondent suggested that interest rate reductions be allowed for a limited time rather than be a permanent reduction. In the Agency's opinion, it is often difficult, if not impossible, to estimate how long a temporary reduction in interest rate would be necessary to alleviate the borrower's problem of being unable to meet the payment. At this time, FmHA prefers to require a permanent reduction since it provides for stability in payment which could only aid the borrower in its operations. This decision can always be reconsidered later.

Paragraph (a)(6)(i).

This paragraph allows a fixed rate to be changed to a variable rate only when the variable rate has a ceiling which is less than the original fixed rate. One respondent suggested this paragraph be revised to remove the requirement of a ceiling on the variable rate. This suggestion is rejected because the Agency wishes to assure that any change in a variable rate will not ultimately result in a higher interest rate than when the interest rate was originally fixed. Another respondent suggested that the paragraph be revised to provide that a fixed rate cannot be changed to a variable rate under any circumstance. The Agency sees no reason to adopt this suggestion since a ceiling is placed on a change to a variable rate requiring it be lower than the original fixed rate.

Paragraph (a)(6)(ii).

This paragraph provides that the amount of interest claimed cannot exceed that which would have been eligible for claim under the variable interest rate. One respondent recommended this paragraph be removed because the calculation would be confusing. The Agency chooses to adopt the proposed rule without change because it believes the calculation can be made.

Paragraph (a)(6)(iii).

This paragraph provides that the lender is reponsible for legal documentation of interest changes by means of a legal attachment to the promissory note. There were no unfavorable comments.

Paragraph (a)(7).

This paragraph prohibits any increase in interest rates on B&I guaranteed loans except where variable interest rate notes are in effect. There were no unfavorable comments.

Administrative: Paragraphs (a)(6) and (a)(7).

This new paragraph provides for internal tracking of an interest rate change on a B&I guaranteed loan. There were no unfavorable comments.

List of Subjects in 7 CFR Part 1980

Loan programs—business and industry, Rural development assistance, Rural areas.

PART 1980—[AMENDED]

Accordingly, FmHA amends § 1980.423 of Subpart E of Part 1980, Chapter XVIII, Title 7, Code of Federal Regulations, by revising paragraph (a)(1), by adding paragraphs (a)(6) and (a)(7), and by adding a paragraph entitled "*ADMINISTRATIVE,*" at the end of the Section to read as follows:

§ 1980.423 Interest rates.

(a) * * *

(1) A variable interest rate must be a rate that is tied to a base rate published periodically in a financial publication specifically agreed to by the lender and borrower. It must rise and fall with the selected base rate, and changes can be made no more often than quarterly. There will be no floor or ceiling on variable interest rates except as specified in paragraph (a)(6)(i) of this section. The lender must incorporate within the variable rate promissory note at loan closing, the provision for adjustment of payment installments coincident with an interest rate adjustment. This will assure that the outstanding principal balance is properly amortized within the prescribed loan maturity to eliminate the possibility of a balloon payment at the end of the loan.

* * * * *

(6) The borrower, lender and holder (if any) may collectively effect a permanent reduction in the interest rate of their B&I guaranteed loan at any time during the

life of the loan upon written agreement by these parties. FmHA must be notified by the lender, in writing, within 10 calendar days of the change. If the guaranteed portion has been repurchased by FmHA, then FmHA is a holder and must affirm or reject interest rate change proposals. When FmHA is a holder, it will concur in such interest rate change only when it is demonstrated to FmHA that the change is a more viable alternative than initiating or proceeding with liquidation of the loan or continuing with the loan in its present state, and that the Government's financial interests are not adversely affected. Factors which will be considered in making such a determination will include whether the proposed interest rate will be below the Government's cost of borrowing money, whether continuing with the loan would realistically promote or enhance rural development and employment in rural areas, whether the monetary recovery would be increased by proceeding immediately to liquidation, if applicable, or allowing the borrower to continue at a reduced interest rate, and whether an in-depth financial analysis by the lender reasonably indicates that the business would be successful at a lower interest rate and reasonably indicates that the borrower could make the reduced payment and pay off amounts in arrears, if any. The FmHA file will reflect the documentation of the interest rate change decision.

(i) Fixed rates cannot be changed to variable rates to reduce the interest rate to the borrower unless the variable rate has a ceiling which is less than the original fixed rate.

(ii) Variable rates can be changed to reduced fixed rates. In a final loss settlement, when qualifying rate changes were made with the required written agreements and notification, the interest will be calculated for the periods the given rates were in effect, except that interest claimed on a loan which originated at a variable rate can never exceed the amount which would have been eligible for claim had the variable interest remained in force. The lesser cost to the Government will always prevail. The lender must maintain records which adequately document the accrued interest claimed.

(iii) The lender is responsible for the legal documentation of interest changes by an allonge attached to the promissory note(s) or any other legally effective amendment of the rate(s); however, no new note(s) may be issued.

(7) No increases in interest rates will be permitted under the B&I loan guarantee except the normal fluctuations in approved variable interest rate loans.

. . . . . .

Administrative Par (a)(6) and (a)(7)

The State Director will notify the Finance Office of any interest rate reduction by using Form FmHA 1980-47, "Guaranteed Loan Borrower Adjustments." The State Director will make corrections to the Rural Community Facility Tracking System (RCFTS) reflecting the interest rate change. The FmHA loan file, as well as the attachments to the copy of the promissory note in the file, will be documented by the State Director to reflect any change in the interest rate.

Authority: 7 U.S.C. 1989; Order of Secretary of Agriculture, 7 CFR 2.23; Order of Under Secretary for Small Community and Rural Development, 7 CFR 2.70)

Dated: December 26, 1984.

Charles W. Shuman,

Administrator, Farmers Home Administration.

8 CFR Part 238

Contracts With Transportation Lines; Addition of AirCal, Inc.

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule amends the listing of transportation lines which have entered into agreements with the Service for the preinspection of their passengers and crew at locations outside the United States by adding the name of AirCal, Inc.

EFFECTIVE DATE: April 12, 1985.

FOR FURTHER INFORMATION CONTACT: Loretta J. Shogren, Director, Policy Directives and Instructions, Immigration and Naturalization Service, 425 I Street, N.W., Washington, DC 20536. Telephone: (202) 633-3048.

SUPPLEMENTARY INFORMATION: The Commissioner of Immigration and Naturalization entered into agreement with AirCal, Inc. to provide for the preinspection of their passengers and crew as provided by section 238(b) of the Immigration and Nationality Act, as amended (8 U.S.C. 1228(b)). Preinspection outside the United States facilitates processing passengers and crew upon arrival at a U.S. port of entry and is a convenience to the traveling public.

Compliance with 5 U.S.C. 553 as to notice of proposed rulemaking and delayed effective date is unnecessary because the amendment merely adds transportation lines' names to the present listing and is editorial in nature.

This order constitutes a notice to the public under 5 U.S.C. 552 and is not a rule within the definition of section 1(a) of E.O. 12291.

List of Subjects in 8 CFR Part 238

Aliens, Common carriers, Government contracts, Inspections, Transportation lines.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 238—CONTRACTS WITH TRANSPORTATION LINES

§ 238.4 [Amended]

Section 238.4 is amended by adding the name AirCal, Inc. under "At Vancouver."

(Secs. 103 and 238 of the Immigration and Nationality Act, as amended; (8 U.S.C. 1103 and 1228))

Dated: April 22, 1985.

[Docket No. 85-004]

Semen of Ruminants or Swine From Countries Where Rinderpest or Foot-and-Mouth Disease Exists

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: This document affirms, with certain changes, the interim rule which amended the regulations concerning the importation into the United States of semen of ruminants or swine from countries where rinderpest or foot-and-mouth disease exists. The regulations were amended by changing the criteria for testing for foot-and-mouth disease and other infectious diseases in donor animals, by changing the criteria for determining which animals are eligible to be donor animals, and by changing provisions concerning the holding of the semen prior to the completion of the testing. These amendments are necessary to increase the reliability of testing for foot-and-mouth disease and other infectious diseases in the donor animals, and for relieving unnecessary restrictions on the importation of their semen.

EFFECTIVE DATE: April 26, 1985.

FOR FURTHER INFORMATION CONTACT: Dr. H. A. Kryder, Import-Export Animals and Products Staff, VS, APHIS, USDA, Room 839, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-8530.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR 92.4(d) (referred to below as the regulations) contain specific provisions concerning the importation into the United States of semen of ruminants or swine from countries where rinderpest or foot-and-mouth disease exists.

An interim rule published in the **Federal Register** on November 2, 1984 (49 FR 44088-44090), amended the regulations by changing the criteria for testing for foot-and-mouth disease and other infectious diseases in donor animals, by changing the criteria for determining which animals are eligible to be donor animals, and by changing provisions concerning the holding of the semen prior to the completion of the testing.

The document of November 2, 1984, invited the submission of written comments on or before January 2, 1985. Six comments were received. The comments were from representatives of a foreign government, a university, a zoo, and Federal government agencies. All of these comments have been carefully considered and are discussed below. Except as otherwise explained below, the provisions of the interim rule have been adopted as a final rule.

Semen Sample

Under the provisions of the interim rule, a 0.5 ml sample of semen is required to be taken for testing from each semen collection taken from the donor ruminant or swine. Two of the commenters indicated that the semen sample should be smaller, but they did not indicate what size the sample should be. No changes in the regulations are made based on these comments. As stated in the interim rule at 49 FR 44089, a semen sample of no less the "0.5 ml . . . (must be taken) from each collection since 0.5 ml from each semen collection is the amount that is needed for testing."

One commenter apparently asserted that the semen sample for testing should be unprocessed semen without any added substances. It was intended to require that the semen sample be unprocessed semen without any added substances. Changes are made in the regulations to more clearly reflect such intent.

Antibiotics

One commenter indicated that the regulations should be amended to require that semen collected from donor animals be treated with antibiotics as a condition of importation. No changes are made based on this comment. The interim rule only concerns the importation of semen of ruminants or swine originating in any country where rinderpest or foot-and-mouth disease exits. Other provisions in 9 CFR Part 92 regulate the importation of semen of ruminants or swine originating in other countries. It is industry practice to treat with antibiotics all semen (other than test samples) of ruminants or swine offered for importation into the United States, regardless of whether rinderpest or foot-and-mouth disease exists in the country of origin. However, the regulations do not currently require that any semen be treated with antibiotics as a condition of importation. Antibiotics affect bacteria but have no effect on viruses, such as viruses which cause foot-and-mouth disease and rinderpest. Further, the issue of whether semen of ruminants or swine should be treated with antibiotics as a condition of importation is a general issue for all semen of ruminants or swine offered for importation into the United States from any foreign country. The Department is considering whether to have a separate rulemaking proceeding concerning whether semen of ruminants or swine should be required to be treated with antibiotics as a condition of importation.

Testing for Diseases

The regulations specifically provide for testing of the donor animal for rinderpest and foot-and-mouth disease. One commenter stated that the donor animal should also "be free of tuberculosis, brucellosis, trichomoniasis leptospirosis, and vibriosis." No changes are made based on this comment. The regulations already provide for testing as necessary to ensure that the donor animal is free of communicable diseases, including any testing necessary to ensure that the donor animal is free of the diseases specified in the comment.

FMD-Vaccinated Donor Bulls

One commenter expressed concern about the "use of FMD-vaccinated donor bulls." This issue was dealt with at some length in the document of November 2, 1984. It was stated on page 44089 of that document that:

> This document deletes the virus neutralization and the fluorescent antibody tests for FMD for ruminants, and changes the regulations to provide instead that the blood samples from ruminants shall be tested for FMD antibodies using the virus infection associated (VIA) test, and to provide that the [oesophageal-pharyngeal] samples from ruminants shall be tested for FMD virus using the virus isolation test. . . .
>
> . . . . . .
>
> Prior to the effective date of this document, the semen from donor ruminants was required to have come from ruminants that had not been vaccinated against [foot-and-mouth disease]. The new testing protocol for ruminants is sufficiently sensitive to distinguish between the serological response produced by the presence of FMD and the serological response produced by FMD vaccine. Therefore, the requirement that the semen must come from a donor ruminant that has not been vaccinated against FMD is no longer necessary, and is deleted. . . .

The Department reaffirms this rationale, and no changes are made in the regulations concerning this issue.

Exotic Ruminants in the Wild

One commenter questioned whether the regulations apply to the importation of semen from exotic ruminants in the wild. The regulations apply to the importation of "semen of ruminants or swine, originating in any country designated in paragraph (a) of § 94.1 of this subchapter as a country where rinderpest or foot-and-mouth disease is determined to exist." This includes any ruminants regardless of whether they are exotic ruminants in the wild.

Laboratory

The regulations previously provided for semen testing and other testing to be performed at the Plum Island Animal Disease Laboratory. The actual name of the laboratory is the "Foreign Animal Disease Diagnostic Laboratory." One commenter asserted that the regulations should use the official name of the laboratory. The Department agrees with the commenter, and the name of the laboratory is changed to "Foreign Animal Disease Diagnostic Laboratory" wherever it appears in § 92.4. In addition, "Greenport, New York" is added after the name to indicate the location of the laboratory.

Miscellaneous

Also, in § 92.4(d)(1)(iv) footnote 1 is redesignated as footnote 2.

Executive Order 12291 and Regulatory Flexibility Act

This action has been reviewed in conformance with Executive Order 12291 and has been determined to be not a "major rule." The Department has determined that this action will not have an effect on the economy of $100 million or more; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; will not have any significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

It is anticipated that the amount of semen from ruminants and swine that will be annually imported under the provisions of § 92.4(d) will constitute less than 1 percent of the semen of ruminants and swine annually utilized in the United States. Further, the importation of such semen is not the primary activity of any business in the United States.

Therefore, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

Accordingly, it has been determined that the interim rule concerning semen of ruminants or swine from countries where rinderpest or foot-and-mouth desease exists (49 FR 44088–44090) is adopted, with the changes shown below, as a final rule.

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

§92.4 [Amended]

1. In § 92.4(d)(1(ii), "Plum Island Animal Disease Laboratory of the United States Department of Agriculture" is changed to "Foreign Animal Disease Diagnostic Laboratory, Greenport, New York,".

2. In § 92.4(d)(1)(iii), "Plum Island Animal Disease Laboratory of the United States Department of Agriculture" is changed to "Foreign Animal Disease Diagnostic Laboratory, Greenport, New York,".

3. Footnote 1 in § 92.4(d)(1)(iv) is redesignated footnote 2 and "Plum Island Animal Disease Center," is removed from redesignated footnote 2.

4. In § 92.4(d)(4), "Plum Island Animal Disease Laboratory of the United States Department of Agriculture" is changed to "Foreign Animal Disease Diagnostic Laboratory, Greenport, New York".

5. In § 92.4(d)(5), the first two sentences are changed to read: "The semen sample from each collection shall have consisted of unprocessed semen without any added substances, and shall have been tested at the Foreign Animal Disease Diagnostic Laboratory, Greenport, New York. Such tests shall have been performed by injecting the semen samples into test animals which are susceptible to rinderpest or foot-and-mouth disease."

Authority: Sec. 203, 60 Stat. 1087, as amended; secs. 6, 7, 8, 10, 26 Stat. 416, as amended, 417; sec. 2, 32 Stat. 792, as amended; sec. 306, 46 Stat. 689, as amended; secs. 2, 3, 4, 5, 11; 76 Stat. 129, 130, 132; sec. 1, 84 Stat. 202; 7 U.S.C. 1622, 19 U.S.C. 1306, 21 U.S.C. 102–105, 111, 134a, 134b, 134c, 134d, 134f, and 135; 7 CFR 2.51, and 371.2(d).

Done at Washington, D.C., this 22nd day of April 1985.

Billy G. Johnson,

Acting Deputy Administrator, Veterinary Services.

BILLING CODE 3410–34–M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 563

[No. 85–293]

Over-the-Counter Financial Options Trading; Accounting for Financial Options

Dated: April 18, 1985.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule and request for comments.

SUMMARY: The Federal Home Loan Bank Board ("Board"), as the operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC" or "Corporation"), is amending its regulations pertaining to financial options transactions by institutions whose accounts are insured by the FSLIC ("insured institutions"). The amendment will permit an insured institution to enter into over-the-counter financial options transactions ("OTC options") with primary dealers in government securities and with those affiliated companies substantially engaged in similar activities, provided that the primary dealer guarantees the transactions entered into by its affiliate. The regulation previously had been interpreted as precluding OTC options, thereby limiting financial options transactions to those traded on designated exchanges. The amendment is intended to reflect the Board's belief that OTC options transactions may be effectively used by insured institutions to hedge their interest-rate risk, and that limiting the counterparty to primary dealers will reduce the credit and liquidity risks associated with these transactions.

The Board also has revised the manner in which an insured institution accounts for "short call" positions (both for exchange-traded and OTC options). The regulation formerly permitted an institution that entered into a short call option matched against a specific asset, liability, or an intended cash-market transaction, to defer any realized losses over the estimated life of the matched

item while recognizing the option commitment fee as income over the term of the option. The amendment is intended to discourage institutions from entering into short call positions to take advantage of the favorable accounting treatment, rather than for sound economic reasons, and to remove an incentive which may make some institutions reluctant to close out their short call positions even when losses are increasing in order to continue to record the commitment fee as income. As amended, the regulation will require that fees received in conjunction with short call options and any related losses be deferred and amortized over the estimated life of the hedged item.

DATES: Effective date: April 24, 1985. Comments must be received by: June 24, 1985.

ADDRESS: Send comments to Director, Information Services Section, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552. Comments will be available for public inspection at the above address.

FOR FURTHER INFORMATION CONTACT: Robert J. Pomeranz, Policy Analyst, Office of Policy and Economic Research, (202) 377–6209; Diana Garmus, Financial Analyst, Office of Examination and Supervision, (202) 377–6820, or Robert Monheit, Attorney, Office of General Counsel, (202) 377–6448; Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION: *Over-the-Counter ("OTC") Options Transactions.* The Board has provided by regulation (12 CFR 563.17–5) that an insured institution (to the extent that it has the legal power to do so) may engage in the purchase or sale of financial-options contracts. However, only financial-options contracts based upon a financial instrument that the institution has authority to invest in or issue, designated by the Commodity Futures Trading Commission ("CFTC") or the Securities and Exchange Commission ("SEC"), and under terms and conditions established by an exchange designated or regulated by the CFTC or the SEC, can be used (§ 563.17–5(a)(4) and (c)). As a result, insured institutions were not permitted by this regulation to engage in over-the-counter transactions in financial-options contracts. See: Office of Examination and Supervision, Federal Home Loan Bank Board, T-Memorandum No. T–74.

The Board has further considered the use of OTC options by insured institutions and recognizes that there are certain advantages, as well as risks, inherent in the use of such transactions. OTC options may be effectively used by insured institutions to hedge or limit their exposure to interest-rate risk. Through these transactions, institutions may reduce the "basis" risk (price and yield correlations between the item hedged and the hedging vehicle) normally associated with hedging balance-sheet items or intended cash-market transactions. Also, while many institutions have invested in government-guaranteed mortgage-backed securities, there are no exchange-traded option contracts based upon these securities. Thus, OTC options may provide needed flexibility for institutions involved in these securities or involved in mortgage-banking operations. OTC options also provide greater flexibility because their terms (such as expiration dates) may be negotiated by the parties.

However, this very lack of standardization and lack of exchange-governed rules may subject participants to substantial credit and liquidity risk. The Board believes that if OTC options transactions between insured institutions and *any* counterparty were permitted, it would be difficult to determine the creditworthiness of the numerous potential counterparties and the market value of the transaction. As a result, additional reporting, recordkeeping, monitoring and other requirements might be necessary beyond those currently required of insured institutions in connection with exchange-traded options. In addition, the Board might find it necessary to attempt to monitor and exercise some regulatory control over all OTC option counterparties, a task too burdensome for this agency.

Instead, the Board believes that, in light of the potential credit and liquidity risks and after considering possible alternative methods for dealing with such problems, it is both necessary and preferable to limit the counterparties to "primary dealers" in government securities (i.e. members of the Association of Primary Dealers in United States Government Securities). Primary dealers are actively engaged in the distribution of government securities among investors, are substantially capitalized, make continuous markets, have a long-term commitment to the market and the capacity to maintain continuous markets in OTC options. Primary dealers are monitored by the Federal Reserve Bank of New York and must submit daily reports on their market positions as well as monthly financial statements, both used to test their capital adequacy on a daily basis. These reports are supplemented by regular contacts and on-site visits by representatives of the Federal Reserve Bank of New York. Thus, limiting OTC options counterparties to primary dealers should reduce the credit risk associated with such transactions without the necessity of the Board monitoring the capital adequacy of all potential counterparties. Insured institutions are required to follow the same reporting and recordkeeping requirements for OTC options as for exchange-traded options, and primary dealers must report their OTC option contracts with insured institutions to the Board in order to be eligible to participate in these transactions with the Board's regulatees. The Board appreciates the confidential nature of the information that will be submitted in the reports and has been advised by staff that such information falls within the purview of 5 U.S.C. 552(b) (4) and (8) and thus would be exempt from disclosure under the Freedom of Information Act.

The Board is aware that some primary dealers conduct OTC options trading only through affiliated entities and does not wish to require these primary dealers to restructure their operations in order to become counterparties in OTC options transactions with insured institutions. The Board believes that, because of the primary dealer's capital adequacy, ability to make continuous markets, and continuous monitoring by the Federal Reserve Bank of New York, a guarantee by a primary dealer of the OTC options transactions of its affiliates is sufficient to limit the credit and liquidity risks facing insured institutions. However, the Board is concerned that the affiliates have demonstrated experience in trading government securities, and is limiting the eligible affiliates to those that have substantially engaged in the trading of government securities. Therefore, the Board has included, in the definition of a "primary dealer", any parent, subsidiary, or affiliate that is substantially engaged in dealing in government securities, provided that the primary dealer guarantees the OTC options transactions between its affiliate and any insured institution.

Accounting Amendments

The accounting regulation required that the option premium be divided into two components—the immediate exercise value (intrinsic value) and the option commitment fee (time value). If the transaction involves a long put or call, the option commitment fee (paid by the institution) is recognized as an expense over the term of the option. If the transaction involves a short call or

short put, the option commitment fee (received by the institution) is recognized as income over the term of the option. When an option is matched against a specific asset, liability, or an intended cash-market transaction, any realized gains or losses are deferred over the estimated life of the matched item. When an option is unmatched, it must be carried on the books at its immediate exercise value. Unmatched options normally involve short put and long call positions.

These accounting techniques may be abused with respect to short call options. The option commitment fee is determined at the time the position is established and this fee is recognized as income over the term of the option, while any realized losses are deferred over the estimated term of the matched asset. This accounting treatment may cause an institution to enter into short call positions for the accounting treatment rather than for sound economic reasons. Moreover, even when losses are increasing, some institutions may be reluctant to close out their short call positions since they can still record the commitment fee as income. The following are examples demonstrating how these accounting techniques fail to reflect the economics of the transactions.

An institution sells a call option on Treasury bonds with an exercise price of 70 and three months to expiration. The institution receives a $2,000 option premium. The option is based on a $100,000 par value, 8% coupon rate, 20-year Treasury bond and the market value of the underlying instrument is 70. If this is a matched option, the entire option commitment fee may be recognized in income over the term of the option regardless of any interest-rate changes. The institution could record monthly income of $667 for each call option sold (based on a straight-line amortization method).

If interest rates decline and the market value of the underlying instrument increases to 74 at the time the option expires, the option contract would have a value of $4,000. The commitment fee of $2,000, received at the inception of the contract, would have been recognized in income while the amount required to offset the option would be deferred over the estimated term of the matched asset. In reality, the institution realized a $2,000 *loss*, but recorded *income* of $2,000 over the option contract term. It would defer the loss of $4,000 which will be amortized over the estimated life of the matched asset. If the institution owned the underlying security, the security's market value would have appreciated by $4,000 during the three-month period.

If interest rates had increased, so that the market value of the security underlying the option contract had declined to 66, the institution would not have been required to recognize the decline in the current period as long as the cash-market security was held for investment purposes. The loss would be recognized over the life of the security through a lower return on the investment. This result is inconsistent with the recognition of the commitment fee of $2,000 over the term of the option contract. This accounting does not reflect the economics of the transaction and is exacerbated by the lack of a position limit on short calls.

If the described accounting treatment for short call options were not changed, some institutions would enter into large positions based on the accounting treatment rather than the economics of the transaction. The availability of this technique could also encourage mismanagement of the position. Further, a problem institution could temporarily and artificially bolster its net worth if it enters into short call positions and records the option commitment fee to income, thus hindering the Board's ability to take appropriate supervisory action in a timely fashion.

For these reasons, the Board has determined to amend § 563.17–5(g) to require that option commitment fees received for the sale of matched short call options be recorded as a discount on the matched asset. This fee, together with any related losses from these transactions, will be deferred and amortized over the estimated life of the matched item. This accounting treatment, applicable to such transactions entered into after the effective date of this rule, more closely parallels the concept of hedge accounting, which attempts to match gains and losses from option transactions with those of the matched item. It is also intended to deter insured institutions from entering into short call positions solely for the benefit derived from a more favorable accounting treatment.

Solicitation of Comments

The Board finds that observance of the public notice and comment procedures of 5 U.S.C. 553(b) and 12 CFR 508.11 and the 30-day delay of effective date of 5 U.S.C. 553(d) and 12 CFR 508.14 is unnecessary, impracticable and contrary to the public interest. The amendments adopted pertaining to OTC options transactions increase the ability of insured institutions to enter into option transactions. This portion of the amendments relieves a restriction and the Board finds that it is in the public interest for insured institutions, to the extent permitted by applicable law, to take immediate advantage of the authority to enter into OTC options transactions. The Board also finds that it would be impracticable and contrary to the public interest to delay the amendments pertaining to accounting for matched short call options because insured institutions might be encouraged to enter into the soon-to-be-curtailed transactions during such period in order to take maximum advantage of the old accounting rule, thus threatening safety and soundness. However, the Board solicits comments on both the OTC options authorization and the accounting amendments, and any other changes necessary to ensure that insured institutions engage in options transactions in accordance with safe and sound practices.

List of Subjects in 12 CFR Part 563

Savings and loan associations, Savings banks, Securities.

Accordingly, the Federal Home Loan Bank Board hereby amends Part 563, Subchapter D, Chapter V of Title 12, *Code of Federal Regulations*, as set forth below.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 563—OPERATIONS

Amend § 563.17–5 by revising paragraphs (a)(4), (c), (e), and (g) (2) and (3); and by adding a new paragraph (a)(12); as follows:

§ 563.17–5 Financial options transactions.

(a) *Definitions.* * * *

(4) *Financial options contract.* An agreement to make or take delivery of a standardized financial instrument upon demand by the holder of the contract at any time prior to the expiration date specified in the agreement, under terms and conditions established either by (i) an exchange designated or regulated by the Commodity Futures Exchange Commission or the Securities Exchange Commission, or (ii) the insured institution and a primary dealer in government securities that are counterparties in an over-the-counter transaction.

* * * * *

(12) *Primary dealer in government securities.* Any member of the Association of Primary Dealers in United States Government Securities and any parent, subsidiary, or affiliated entity of such primary dealer: *Provided,*

that the member guarantees (to the satisfaction of the Corporation) the over-the-counter financial options transactions between its parent, subsidiary, or affiliated entity with an insured institution, and *Provided further*, that the parent, subsidiary , or affiliated entity is substantially engaged in similar activities.

* * * * *

(c) *Authorized contracts.* An insured institution may engage in financial options transactions using any financial-options contracts either (1) designated by the Commodity Futures Trading Commission or approved by the Securities and Exchange Commission; or (2) entered into with a primary dealer in government securities, and based upon a financial instrument that the institution has authority to invest in or to issue, or based upon a financial futures contract.

* * * * *

(e) *Notification and reporting.* (1) An insured institution shall notify the District Director—Examinations of the Federal Home Loan Bank district in which it is located immediately following authorization of its board of directors to engage in financial options transactions. The institution shall report its outstanding positions together with the total unrealized gain or loss from such positions to the Board.

(2) An insured institution shall not engage in an over-the-counter financial options transaction with any primary dealer unless such primary dealer notifies the District Director—Examinations of the Federal Home Loan Bank district in which the insured institution is located immediately following the entering into such transaction, and reports monthly on the outstanding positions of such insured institution.

* * * * *

(g) *Accounting.* * * *

(2) *Option commitment fee.* (i) The option commitment fee paid for a long position or received from the sale of a short put option shall be amortized to income or expense over the term of the option, except as provided in paragraph (g)(3)(ii) of this section.

(ii) The option commitment fee received from the sale of a matched short call option shall be deferred and treated as a discount on the matched asset. The option commitment fee received from the sale of an unmatched short call option shall be amortized to income over the term of the option.

(3) *Options contracts.* (i) Gains or losses on options contracts that are matched with assets or liabilities carried at the lower of cost or market value or carried at market value shall be considered in determining the market value of the asset or liability.

(ii) Options positions that are matched with assets or liabilities carried at cost or to be carried at cost shall be accounted for as follows:

(*a*) If a commitment fee will be or has been received with respect to the matched asset, the option commitment fee shall be treated as an adjustment of such fee. The adjusted commitment fee shall then be treated as a fee paid or received in connection with the matched asset;

(*b*) If a commitment fee has not been received with respect to a matched asset, the option commitment fee (except if received for the sale of a short call option) shall be amortized to income or expense over the commitment period by the straightline method;

(*c*) Any resulting gain or loss from an option position shall be treated as a discount or premium on the matched asset or liability;

(*d*) In the event that the cash-market or forward-commitment position with which an option is matched is sold or will not occur, the option shall be marked to market.

(iii) The immediate exercise value of short puts and other unmatched option positions shall be carried at their current market value.

(Sec. 409, 94 Stat. 160, secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended (12 U.S.C. 1725, 1726, 1730); sec. 5A, 47 Stat. 727, as amended by sec. 1, 64 Stat. 256, as amended; sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1464), Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

Jeff Sconyers,

Secretary.

BILLING CODE 6720-01-M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR PART 721

Federal Credit Union Insurance and Group Purchasing Activities

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final rule.

SUMMARY: NCUA amends its regulations in order to allow Federal credit unions to receive income in connection with the sale to their members of credit-related insurance and share account-related insurance. Previous rules limited Federal credit unions to receiving reimbursement from the insurances company for the credit union's administrative costs. The rule is issued with a delayed effective date (August 1, 1985) so that Federal credit unions will have sufficient time to study the effects of and prepare to comply with relevant state insurance laws.

EFFECTIVE DATE: August 1, 1985.

ADDRESS: National Credit Union Administration, 1776 G Street, NW., Washington, D.C. 20456.

FOR FURTHER INFORMATION CONTACT: Robert M. Fenner, Director, or Hattie M. Ulan, Attorney, Department of Legal Services at the above address or telephone: (202) 357–1030.

SUPPLEMENTARY INFORMATION:

Background

Part 721 of NCUA's Rules and Regulations authorizes Federal credit union (FCU) participation in insurance and other group purchasing activities, through which insurance and other goods and services are made available from third party vendors to credit union members. Part 721 has two sections. Section 721.1 authorizes FCU's to perform administrative functions for the vendor. Section 721.2 generally limits FCU's to receiving reimbursement for the cost of their involvement in the insurance or group purchasing activity.

In July of 1984, the NCUA Board requested public comment on a proposed change to § 721.2 that would allow FCU's to receive income in excess of cost in connection with the sale of credit-related insurance to members. (See 49 FR 30739, 8/1/84.) The proposal was based in part on NCUA's determination that an FCU may, as a matter of law, be permitted to generate income in connection with an insurance or group purchasing activity that is "incidental" to the exercise of an expressly authorized power (e.g., the power to make loans to members). The Board also requested comment on whether any other insurance or group purchasing activity (in addition to credit-related insurance) may be considered incidental to the exercise of an express power, and if, so, whether § 721.2 should be amended to allow FCU's to generate income from those activities as well.

NCUA received a total of seventy comment letters in response to the proposal. Two credit union trade associations, one insurance underwriter, two insurance trade associations, four state credit union leagues, one state credit union service system, one attorney, eight insurance agencies and forty-five credit unions responded to the proposal. Forty-eight commenters favored removing the reimbursement

restrictions on credit-related insurance and twenty-one commenters were opposed. The majority of the credit unions favored removing the restrictions, while the insurance representatives were generally opposed.

After review of the comments and further consideration of the issues, the Board has determined to remove the reimbursement limits for insurance directly related to extensions of credit and for insurance directly related to the opening and maintenance of share, share certificate and share draft accounts. The following analysis addresses the major issues raised in the proposal and in the comment letters.

Analysis

Authority

Federal credit unions, like all financial institutions, are institutions of statutorily limited powers. The powers of FCU's are enumerated in section 107 of the Federal Credit Union Act (12 U.S.C. 1757). Included are several specific powers, such as the power to make loans to members, to make certain investments, and to accept share, share draft and share certificate accounts. The various specific powers are followed by the authority "to exercise such incidental powers as shall be necessary or requisite to enable [the FCU] to carry on effectively the business for which it is incorporated." (12 U.S.C. 1757(15).) Prevailing case law construes this "incidental powers" clause to authorize activities that are "convenient or useful in connection with performance of one of [the credit union's] established activities pursuant to its express powers." *American Bankers Association* v. *Connell*, 447 F. Supp. 296, 298 (D.D.C., 1978).

The NCUA Board has consistently construed the powers of Federal credit unions broadly, in order to afford maximum flexibility to FCU's in providing services to their members. It is clear, however, that a Federal credit union may engage in an insurance or group purchasing activity for the purpose of generating income only if that activity is expressly authorized or is properly incidental to the exercise of an express power. Involvement in "nonincidental" insurance and group purchasing is permitted on a cost reimbursement basis on the theory that the FCU is not engaging in the particular activity or business, but rather is simply providing informational or good-will services to members and receiving reimbursement for the cost of the FCU's involvement.

Scope of Rule Change

Consistent with the above analysis, and after review of the comments, the Board has determined to eliminate the reimbursement restrictions for any sale of insurance which is "directly related to an extension of credit by the credit union or directly related to the opening or maintenance of a share, share draft or share certificate account at the credit union." (See § 721.2(b)(2) of the final rule.)

Included among the types of insurance that may be incidental to an extension of credit by an FCU are: credit life insurance, credit disability insurance, loss of income insurance, property and casualty insurance on motor vehicles, boats and residential dwellings, title insurance, mortgage guarantee insurance, and mechanical breakdown insurance on motor vehicles. Life savings insurance is the primary existing example of share-related insurance of which the Board is aware. Most FCU's that offer life savings insurance do so pursuant to a group plan under which the FCU itself pays the premium for all members. Some FCU's have chosen, however, to offer life insurance on a member-pay basis in connection with share, share certificate and share draft accounts. In addition, other credit unions are offering life and disability insurance in connection with IRA accounts.

Federal credit union involvement in other insurance and in group purchasing of other goods and services will continue to be limited to a cost reimbursement basis.

Reverse Competition

In its proposal, the Board asked whether reimbursement restrictions should be retained in order to prevent "reverse competition" in the sale of credit insurance. That is, it has previously been suggested that in the absence of reimbursement restrictions, credit unions would seek out insurance paying the highest commission, without due regard for the cost of the insurance to the members. Commenters argued fervently on both sides of the issue. Those who argued that reverse competition exists insisted that lifting the reimbursement cap for credit insurance would increase costs to credit union members while decreasing their benefits. Those in favor of lifting the reimbursement caps argued that reverse competition will not occur in credit unions. Rather, the credit union will have an opportunity to receive income that is presently paid to other parties, and the benefits of increased compensation on credit insurance will accure to the credit union members as increased dividends on savings, lower interest rates on loans and/or increased services to members.

The majority of the commenters who argued that reverse competition will develop were not FCU's. In fact, only two FCU commenters expressed the view that reverse competition will become a problem if the reimbursement restrictions on credit insurance are lifted.

While the NCUA Board appreciates the concerns expressed with respect to the potential for reverse competition in the credit insurance market, the Board believes that the ability to prevent such developments can and should properly be placed in the hands of Federal credit unions and Federal credit union management. Credit unions are cooperative member-owned institutions. The entire board of directors is elected by the membership, and thus is continuously accountable to the interests of the member. Moreover, the directors serve as volunteers. Directors and employees are and will continue to be prohibited from personally receiving commissions or other forms of compensation in connection with credit insurance sales (see § 721.2(c) of the regulation). Thus, there is little incentive for a credit union to simply seek out the insurance product paying the highest commissions. To the extent that Federal credit unions do choose to receive commissions or other income, that income should redound to the benefit of the entire membership as discussed above.

Also concerning the issue of whether FCU's should be allowed to receive income, the Board notes that many credit unions now receive commission income indirectly by establishing credit union service organizations that receive the commission income and pay it through to the credit union as a return on the credit union's investment in the service organization. Allowing FCU's the choice of receiving the income directly will recognize what is currently taking place in the marketplace and eliminate the need for the artificial device of establishing a service organization. Finally, with respect to reverse competition, the Board notes that if the evidence at a future date demonstrates that Federal credit union members are paying dramatically higher insurance premiums as a result of the removal of compensation limits, NCUA can and will reconsider this issue.

State Insurance Law

As noted in the Board's proposal, Federal credit unions' obligation to

comply with state insurance laws is not affected by a change to NCUA's regulation. It is not NCUA's intent to interfere with the authority and ability of state insurance commissioners to regulate insurance activities. Although FCU's will not be subject to NCUA limits on credit-related and share-related insurance under the new regulation, they are subject to any state regulations on all insurance activities.

For example, most states impose licensing requirements upon entities receiving insurance compensation in excess of cost. A few of the commenters opposed to lifting the reimbursement restrictions stated that the potential licensing requirements will impose too much of a regulatory burden upon FCU's. The Board does not believe this to be the case for two reasons. First, a credit union may choose not to increase the compensation it receives for credit-related and share-related insurance. Federal credit unions that choose to limit their reimbursements to actual costs, or to a cost approximation that is acceptable to the state insurance commission, may not be subject to licensing requirements under state laws. Second, if an FCU receives compensation in excess of costs, the delayed effective date of the new regulation (August 1, 1985) will allow FCU's adequate time to educate themselves as to any licensing or other requirements that apply.

One commenter raised the issue of assignment of insurance commissions. Apparently, in some states a financial institution may not be licensed as an insurance agent. A natural person must be licensed as the agent in order to receive insurance commissions above costs. NCUA will have no objection to an employee or official of the FCU becoming licensed as an insurance agent on the condition that *all* insurance income received as agent is assigned to the FCU. This can be accomplished through a contractual arrangement between the employee/agent and the FCU.

The FCU must be in compliance with state insurance laws. This includes state laws on licensing, receipt of compensation and insurance-related unfair or deceptive practices. Various methods of receiving insurance compensation may be proper under different state laws. The following is a nonexclusive list of methods which may be available to FCU's:

—an FCU may serve as an insurance agent and receive compensation as such.
—an FCU employee or official may be licensed as an insurance agent and receive compensation so long as the employee or official assigns all compensation to the FCU.
—an FCU may acquire a group credit insurance policy and provide coverage to its members for loans made to them under such a policy. The FCU may receive experience refunds, dividends or retrospective rate credits from the insurance company as provided in the group policy.
—an FCU may choose not to receive increased compensation available under the new regulation and continue to receive reimbursements for costs.
—an FCU may provide credit- and/or savings-related insurance at no additional charge to its members.

The Board believes that each FCU board of directors should determine which method is appropriate for its FCU and the FCU's members.

Compensation to Employees, Officials and Family Members

Very few comments addressed the issue of compensation to officials, employees and their family members. As noted in the proposal, the prohibition on such commissions is a carryover from the present regulation. Several commenters did note that the term "immediate family" should be defined for purposes of this regulation. NCUA has previously defined this term to mean "a spouse, or a child, parent, grandchild, grandparent, brother or sister, or the spouse of any such individual" in both its lending and investment regulations. [See 12 CFR 701.21(c)(8) & 703.2(i) and 703.4(e).] The Board believes that this same definition should apply to Part 721 and has added the definition in the final rule. Although insurance compensation to employees and officials is restricted, an employee or official who is the licensed insurance agent for the FCU may, as previously indicated, receive compensation on the condition that it is assigned in its entirety to the FCU.

Effective Date

This final rule will become effective August 1, 1985. The effective date is delayed to provide FCU's adequate time to educate themselves on state laws they may have to comply with under the new regulation.

Regulatory Flexibility Act

The NCUA Board hereby certifies that the final rule will not have a significant economic impact on a substantial number of small credit unions because the rule will increase their management flexibility and reduce their paperwork burdens. A Regulatory Flexibility Analysis is, therefore, not required.

Financial Regulation Simplification Act

Since this final rule reduces burdens and delay would cause unnecessary harm, the NCUA Board finds that full and separate consideration of all the requirements of the Financial Regulation Simplification Act is impracticable. The NCUA Board has, however, considered most of these policies, as set forth in the preamble above.

List of Subjects in 12 CFR Part 721

Credit unions, insurance, Group purchasing.

Dated: April 17, 1985.

Rosemary Brady,

Secretary of the Board.

Authority: 12 U.S.C. 1757(15); 12 U.S.C. 1766(a).

PART 721—[AMENDED]

Accordingly, the NCUA rules and regulations (12 CFR Part 721) are amended as follows:

Section 721.2 is revised to read as follows:

§ 721.2 Reimbursement.

(a) For purposes of paragraph (b) of this section, the following definitions shall apply:

(1) "Dollar amount" shall mean $4 per single payment policy, $6 per combination policy, or $4 per annum for any other type of policy; and

(2) "Cost amount" shall mean the total of the direct and indirect costs to the Federal credit union of any administrative functions performed on behalf of the vendor. The Federal credit union must be able to justify this amount using standard accounting procedures.

(b) A Federal credit union may be reimbursed or compensated by a vendor for activities performed under § 721.1 as follows:

(1) Except as otherwise provided by applicable state insurance law, reimbursement or compensation is not limited with respect to insurance sales by the credit union or its employees which are directly related to an extension of credit by the credit union or directly related to the opening or maintenance of a share, share draft or share certificate account at the credit union;

(2) For insurance sales other than those described in paragraph (b)(1), a Federal credit union may receive an amount not exceeding the greater of the dollar amount or the cost amount;

(3) For group purchasing plans other than insurance, a Federal credit union may receive an amount not exceeding the cost amount.

(c) No official or employee of a Federal credit union or any immediate family member of an official or employee may receive any compensation or benefit, directly or indirectly, in conjunction with any activity under this regulation. For purposes of this section, "immediate family member" means a spouse, or a child, parent, grandchild, grandparent, brother or sister, or spouse of any such individual.

Airworthiness Directives; Teledyne Continental Motors IO-470 and O-470 Series Engines

Correction

In FR Doc. 85-9241, beginning on page 15098 in the issue of Wednesday, April 17, 1985, make the following correction:

On page 15099, first column, in § 39.13, nineteenth line from the bottom of the page, "2138199" should have read "238199".

BILLING CODE 1505-01-M

14 CFR Part 39

[Docket No. 85-NM-31-AD; Amdt. 39-5044]

Airworthiness Directives; Boeing Model 707 and 720 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) which requires inspection of the wing front spar upper chord of Boeing Model 707 and 720 airplanes. This action is promoted by a recent report of a 46-inch crack. The chords are subject to cracks, which if undetected will propagate to the point where fail-safe load cannot be supported.

DATES: Effective May 8, 1985.

Compliance schedule as prescribed in the body of the AD, unless already accomplished.

ADDRESSES: The service bulletin specified in this AD may be obtained upon request from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. The service bulletin may also be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Carlton Holmes, Airframe Branch, ANM-120S; (206) 431-2926. Mailing address: FAA, Northwest Mountain Region, Seattle Aircraft Certification Office, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Recently one operator reported a 46-inch crack, which was located along the dry bay area between the inboard and outboard nacelles. When the crack extended into the fuel tank areas, fuel leakage resulted which led to discovery of the crack. Cracks of such length may lower the fail-safe load capability below required minimums and left undetected could result in a buckling of the upper front spar and failure to the wing.

Boeing Service Bulletin No. 3240, revised November 13, 1981, addresses cracking problems in the wing spar chords. Cracks in the front upper chord are attributed to a combination of corrosion and fatigue which results from slat actuator loads. The service bulletin recommended inspections at 1000 flight intervals, and provided repair information.

Since this situation is likely to exist or develop on other airplanes of the same type design, this AD requires inspection and repair, if necessary, in accordance with the Boeing service bulletin.

Further, since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

The FAA has determined that this regulation is an emergency regulation that is not major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evalution or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Boeing: Applies to Model 707 and 720 series airplanes certificated in all categories with 15,000 or more landings.

To insure continued structural integrity of the wing front spar upper chord, accomplish the following within 100 landings or 60 days, whichever occurs first, unless previously accomplished within the last 900 landings or 10 months:

A. Perform a close visual inspection of the wing front spar upper chord for cracks in accordance with Boeing Service Bulletin 3240, Revision 1, or later FAA approved revision. Repeat the inspection at intervals not to exceed 1,000 landings or one year, whichever occurs first.

B. If cracks or corrosion areas are found, repair prior to further flight in accordance with the above service bulletin or in a manner approved by the Manager, Seattle Aircraft Certification Office.

C. The temporary crack repairs described in the above service bulletin, Part III, Figure 2, may be performed; however, the crack must be reinspected at intervals not exceeding 300 landings and a permanent repair must be accomplished within 1,000 landings or one year, whichever occurs first after the temporary repair.

D. After each of the above inspections and repairs have been performed, apply BMS-3-23 or equivalent corrosion inhibitor to the affected areas.

E. Areas of wing front spar upper chord replaced or repaired in accordance with the repair kits specified in Boeing Service Bulletin 3240, are exempt from the inspections of paragraph A., above.

F. An alternate means of compliance which provides an acceptable level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

G. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may also be examined at FAA, Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective May 8, 1985.

(Secs. 313(a), 314(a), 601 through 610, and 1102 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 through 1430, and 1502); 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89)

Issued in Seattle, Washington, on April 18, 1985.

Charles R. Foster,

Director, Northwest Mountain Region.

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 85–ANE–13; Amdt. 39–5902]

Airworthiness Directives; Teledyne Continental Motors IO–470 and O–470 Series Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule, extension of compliance date.

SUMMARY: This amendment extends the date for compliance with the AD from April 15, 1985, the effective date of the AD, to April 30, 1985. The extension is needed to prevent unintended grounding of aircraft.

EFFECTIVE DATE: This action is effective April 26, 1985.

FOR FURTHER INFORMATION CONTACT: Robert R. Goodall, Aerospace Engineer, Propulsion Branch, ACE–140A, Atlanta Aircraft Certification Office, Federal Aviation Administration, 1075 Inner Loop Road, College Park, Georgia 30337, telephone (404) 763–7435.

SUPPLEMENTARY INFORMATION: On March 26, 1985, the FAA issued an AD applicable to certain Teledyne Continental Motors IO–470 engines and certain cylinder assemblies in inventory or installed on designated IO–470 series engines. The AD became effective on April 15, 1985. The AD was issued to prevent excessive valve stem wear, oil contamination, valve seizure, and total loss of engine power. The AD required compliance within 10 hours after the effective date of the AD. It was anticipated, at the time the AD was issued, that adequate notice would be provided to operators of the affected engines to avoid an immediate grounding of their aircraft. Due to unforeseen circumstances, however, it now appears that the compliance date of April 15, 1985 did not provide adequate notice to avoid immediate groundings. Therefore, this action amends the AD by changing the compliance date from "the effective date of the AD" (April 15, 1985) to April 30, 1985.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Conclusion

This amendment merely extends the compliance date of an existing AD by fifteen days, to avoid unintended immediate grounding of aircraft. This is consistent with the intent of the original AD. No other change is being made to the original AD. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291, and (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT."**

[Airspace Docket No. 84–ANM–34]

Extension of Jet Route—Denver, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment extends Jet Route J–157 from Denver, CO, to Keann Intersection to aid flight planning and improve the flow of air traffic at Denver, CO.

EFFECTIVE DATE: 0901 G.M.T., June 6, 1985.

FOR FURTHER INFORMATION CONTACT: Burton Chandler, Airspace and Air Traffic Rules Branch (ATO–230), Airspace—Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8783.

SUPPLEMENTARY INFORMATION:

History

On February 14, 1985, the FAA proposed to amend Part 75 of the Federal Aviation Regulations (14 CFR Part 785) to extend Jet Route J–157 from Denver, CO, to Keann Intersection to aid flight planning and improve the flow of air traffic at Denver, CO (50 FR 6198). Interested parties were invited to

participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 75.100 of Part 75 of the Federal Aviation Regulations was republished in Handbook 7400.6A dated January 2, 1985.

The Rule

This amendment to Part 75 of the Federal Aviation Regulations amends a segment of Jet Route J–157 from Denver, CO, to Keann Intersection. This action will enhance IFR flight planning and the flow of air traffic in the affected area.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

[Docket No. 24598; Amdt. No. 1293]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA) DOT

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

EFFECTIVE DATE: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures Standards Branch (AFO–230), Air Transportation Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–8277.

SUPPLEMENTARY INFORMATION: This amendment of Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument.

Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, and 8260–5. Materials incorported by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the Federal Register expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the

close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

List of Subjects in 14 CFR Part 97

Approaches, Standard instrument, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, Effective at 0901 G.m.t. on the dates specified, as follows:

1. By Amending § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN SIAPs identified as follows:

. . . Effective June 6, 1985

Kenai, AK—Kenai Muni, VOR RWY 19, Amdt. 13
Selawik, AK—Selawik, VOR RWY 27, Orig.
Selawik, AK—Selawik, VOR/DME RWY 9, Orig.
Selawik, AK—Selawik, VOR RWY 9, Orig.
Dumas, AR—Billy Free Municipal, VOR/DME RWY 36, Orig.
Fayetteville, AR—Drake Field, VOR-A, Amdt. 23
Rogers, AR—Rogers Muni Airport-Carter Field, VOR RWY 1, Amdt. 9
Rogers, AR—Rogers Muni Airport-Carter Field, VOR/DME RWY 19, Amdt. 7
Hayden, CO—Yampa Valley, VOR-A, Amdt. 1
Pensacola, FL—Pensacola Regional, VOR RWY 7, Amdt. 2
Boise, ID—Boise Air Terminal (Gowen Field), VOR RWY 10R, Amdt. 19
Boise, ID—Boise Air Terminal (Gowen Field), VOR/DME RWY 10R, Amdt. 5
Cambridge, MD—Cambridge-Dorchester, VOR-A, Amdt. 4
Leonardtown, MD—St. Mary's County, VOR RWY 11, Amdt. 1
Leonardtown, MD—St. Mary's County, VOR RWY 29, Amdt. 2
Baytown, TX—RWJ Airpark, VOR/DME RWY 33, Orig.
Baytown, TX—RWJ Airpark, VOR-A, Amdt. 1
Ennis, TX—Ennis Muni, VOR/DME-A, Orig.
Appleton, WI—Outagamie County, VOR/DME RWY 3, Amdt. 2

2. By amending § 97-25 LOC, LOC/DME, LDA, LDA/DME, SDF, and SDF/DME SIAPs identified as follows:

. . . Effective June 6, 1985

Fayetteville, AR—Drake Field, LOC RWY 16, Amdt. 13
Harrison, AR—Boone County, LOC RWY 36, Amdt. 4
Pensacola, FL—Pensacola Regional, LOC BC RWY 34, Amdt. 10
Hoquiam, WA—Bowerman, LOC RWY 24, Amdt. 2
Appleton, WI—Outagamie County, LOC BC RWY 21, Amdt. 3

. . . Effective May 9, 1985

Huntsville, AL—Huntsville-Madison Co Apt—Carl T. Jones Fld, LOC RWY 18L, Orig.

3. By amending § 97.27 NDB and NDB/DME SIAPs identified as follows:

. . . Effective June 6, 1985

Gambell, AK—Gambell, NDB-A Amdt. 1
Gambell, AK—Gambell, NDB-B Amdt. 1
Gambell, AK—Gambell, NDB/DME RWY 16, Orig.
Gambell, AK—Gambell, NDB/DME RWY 34, Orig.
Rogers, AR—Rogers Muni Airport-Carter Field, NDB RWY 19, Amdt. 2
Santa Ynez, CA—Santa Ynez, NDB RWY 8, Orig.
Pensacola, FL—Pensacola Regional, NDB RWY 34, Amdt. 15
Winston-Salem, NC—Smith Reynolds, NDB RWY 33, Amdt. 21
Burnet, TX—Burnet Muni/Kate Craddock Field, NDB RWY 1, Amdt. 1
Appleton, WI—Outagamie County, NDB RWY 3, Amdt. 9
Appleton, WI—Outagamie County, NDB RWY 11, Amdt. 2
Appleton, WI—Outagamie County, NDB RWY 29, Amdt. 2

. . . Effective April 16, 1985

Hickory, NC—Hickory Muni, NDB, RWY 24, Amdt. 3

. . . Effective April 12, 1985

Gastonia, NC—Gastonia Muni, NDB RWY 3, Amdt. 4

4. By amending § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME and MLS/RNAV SIAPs identified as follows:

. . . Effective June 6, 1985

Barrow, AK—Wiley Post-Will Rogers Memorial, ILS/DME RWY 6, Amdt. 2
Kenai, AK—Kenai Muni, ILS RWY 19, Amdt. 4
Prescott, AZ—Ernest A. Love Field, ILS/DME RWY 21, Orig.
Hot Springs, AR—Memorial Field, ILS RWY 5, Amdt. 10
Pensacola, FL—Pensacola Regional, ILS RWY 16, Amdt. 12
Winston-Salem, NC—Smith Reynolds, ILS RWY 33, Amdt. 22
Westhampton Beach, NY—Suffolk County, ILS RWY 24, Amdt. 8
North Myrtle Beach, SC—Grand Strand, ILS RWY 23, Amdt. 6
Appleton, WI—Outagamie County, ILS RWY 3, Amdt. 11

. . . Effective April 16, 1985

Hickory, NC—Hickory Muni, ILS RWY 24, Amdt. 5

5. By amending § 97.31 RADAR SIAPS identified as follows:

. . . Effective June 6, 1985

Columbia, SC—Owens Field, RADAR-1, Orig.

6. By amending § 97.33 RNAV SIAPs identified as follows:

. . . Effective June 6, 1985

Burnet, TX—Burnet Muni/Kate Craddock Field, RNAV RWY 19, Amdt. 1
Houston, TX—Hull Field, RNAV RWY 17, Amdt. 4
Houston, TX—Hull Field, RNAV RWY 35, Amdt. 5
Appleton, WI—Outagamie County, RNAV RWY 29, Amdt. 2

. . . Effective April 12, 1985

Gastonia, NC—Gastonia Muni, RNAV RWY 3, Amdt. 2

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348, 1354(a), 1421, and 1510); 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.49(b)(3)).

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Note.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

Issued in Washington, D.C. on April 19, 1985.

John S. Kern,

Acting Director of Flight Operations.

[FR Doc. 85-10136 Filed 4-25-85; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Parts 379 and 399

[Docket No. 50465-5065]

Amendments To Export Controls on Software and Electronic Computers

AGENCY: Office of Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: This rule delegates ECCN 1566A of the Commodity Control List covering software (15 CFR 399.1) and adds software formerly described in ECCN 1566A to 15 CFR 379.4, thus removing the validated licensing requirements for the export of certain software to destinations in Country Groups T and V (except the People's

Republic of China and Afghanistan). This rule revises General License GTDR to authorize exports of certain software, except to Country Groups S and Z. This rule also amends ECCN 1565A of the Commodity Control List to clarify the scope of controls on " embedded" computers and certain computer peripherals, and to make clear that in calculating Processing Data Rate (PDR) to determine eligibility of systems under the first 1565 entry in Supplement No. 1 to Part 373, exporters of computers under Distribution License should use the "floating point" PDR.

EFFECTIVE DATE: April 30, 1985.

FOR FURTHER INFORMATION CONTACT: For software questions, call Raj Dheer on (202) 377–2290, and for questions on ECCN 1565A contact Randy Williams on (202) 377–3109, Scientific & Electronic Equipment Division, Office of Export Administration, Department of Commerce, Washington, D.C. 20230.

SUPPLEMENTARY INFORMATION

Regulatory Changes

On December 31, 1984, the Office of Export Administration issued a rule (49 FR 50608–50632) revising export controls on certain computer equipment, software, and communication switching equipment. The effective date of any new controls imposed by that rule was deferred until April 29, 1985.

Supplement No. 1 to § 399.1 (the Commodity Control List) includes all commodities subject to Department of Commerce export control. This rule deletes ECCN 1566A of the Commodity Control List covering software and adds software formerly described in ECCN 1566A to § 379.4. A major result of this change is to remove validated license requirements for the export of certain software to destinations in Country Groups T and V (except the People's Republic of China and Afghanistan).

General license GTDR is revised to authorize exports of certain software, except to Country Groups S and Z.

This rule also amends ECCN 1565A of the Commodity Control List to clarify the scope of controls on "embedded" computers and certain computer peripherals. In addition, exporters of computers under the Distribution License are advised that in calculating Processing Data Rate (PDR) to determine eligibility of systems under the first 1565 entry in Supplement No. 1 to Part 373, they should use the "floating point" PDR.

Finally, this rule further extends the "Saving Clause" contained in 50 FR 4503 (January 31, 1985) from April 29, 1985 to May 29, 1985 for those items not covered by this rule. This will permit certain items removed from general license authorization by the December 31, 1984 revisions (49 FR 50608) and not covered by this rule to continue to be shipped under general license up to May 29, 1985.

The effective date of the amendments made herein is April 30, 1985.

Rulemaking Requirements

In connection with various rulemaking requirements, the Office of Export Administration has determined that:

1. The provisions of the Administrative Procedure Act requiring notice of proposed rulemaking, an opportunity for public participation, and a delay in effective date (5 U.S.C. 553) are inapplicable because this regulation involves a foreign affairs function of the United States.

2. This rule reduces the regulatory burden on exporters because it removes validated license requirements (approved under OMB Control No. 0625–0001) for the export of certain software to most destinations. The written assurance requirement is covered under OMB Control No. 0625–0140.

3. Because a notice of proposed rulemaking is not required, this rule is not a rule within the meaning of section 601(2) of the Regulatory Flexibility Act, 5 U.S.C. 601(2) and is not subject to the requirements of that Act. Accordingly, no initial or final Regulatory Flexibility Analysis has been or will be prepared.

4. This rule is not a rule or regulation within the meaning of Section 1(a) of Executive Order 12291 and, accordingly, is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has been or will be prepared.

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis.

List of Subjects in 15 CFR Part 379 and 399

Exports, Science and Technology.

Accordingly, the Export Administration Regulations (15 CFR Parts 368–399) are amended as follows:

PART 379—[AMENDED]

§ 379.1 [Amended]

1. Section 379.1 is amended by adding a final sentence to paragraph (a), reading "All software is technical data."

§ 2. Section 379.4 is amended by adding a paragraph (b)(3) following the Note in (b)(2), reading as follows:

§ 379.4 General license GTDR; Technical data under restriction.

* * * * *

(b) * * *

(3) Software, *unless* it is explicitly listed in Supplement No. 3 to Part 379 or in any entry on the Commodity Control List (e.g. ECCN's 1091A, 1354A, 1355A, 1527A, 1532A, 1567A) or applications software identified in section 379.4(c) and (d).

* * * * *

3. Section 379.4(f)(1) is amended by adding paragraph (i)(*a*), which is currently reserved, as follows:

§ 379.4 General license GTDR; Technical data under restriction.

* * * * *

(f) * * *

(1) * * *

(i) * * *

(*a*) Electronic computers, if the technical data is software listed in Supplement No. 3 to Part 379. Software not listed in Supplement No. 3 to Part 379 or any ECCN entry, or in § 379.4 (c) or (d) may be exported to Country Groups T & V, without written assurance.

* * * * *

4. Section 379.4(g) is amended by revising paragraph (g)(2), as follows:

§ 379.4 General license GTDR; technical data under restriction.

* * * * *

(g) * * *

(2) No software or technical data may be exported or reexported under General License GTDR when such software or technical data are listed on the Commodity Control List (Supplement No. 1 to § 399.1). See ECCNs 1091A, 1354A, 1355A, 1527A, 1532A, and 1567A. In addition, exports of application software included in § 379.4 (c) and (d) require a validated license. See § 379.4(f)(1)(i)(*a*) for written assurance requirements applicable to software.

* * * * *

5. Section 379.4(i) is revised to read as follows:

* * * * *

(i) *Additional restrictions applicable to the People's Republic of China.* In addition to the prohibitions of § 379.4 (c) and (d), no technical data related to commodities identified on the Commodity Control List (Supplement No. 1 to § 399.1) as controlled for reasons of national security, nuclear non-proliferation, or crime control may be exported to the People's Republic of China under General License GTDR. In addition, software covered by Supplement 3 to Part 379 requires a

validated license for export to the PRC. These prohibitions do not apply, however, to technical data described in § 379.4(b).

6. A new Supplement No. 3 to Part 379 is added to read as follows:

Supplement No. 3.—Computer Software

Software described in this Supplement is subject to the written assurance requirements of § 379.4(f)(1)(ii)(*a*) and requires an individual validated license for export to Country Groups QSWYZ, the People's Republic of China, and Afghanistan.

Technical Notes

1. "Software" is defined as follows:

"Software"—A collection of one or more "programs" or "microprograms" fixed in any tangible medium of expression.

"Program"—A sequence of instructions to carry out a process in, or convertible into, a form executable by an electronic computer.

"Microprogram"—A sequence of elementary instructions, maintained in a special storage, the execution of which is initiated by the introduction of its reference instruction into an instruction register.

2. "Software" is categorized as follows (there is a close relationship and possible overlap among these categories):

"Development system"—"Software" to develop or produce "software". This includes "software" to manage those activities. Examples of a "development system" are programming support environments, software development environments, and programmer productivity aids.

"Software" to convert a convenient expression of one or more processes ("source code" or "source language") into equipment executable form ("object code" or "object language").

"Diagnostic system"—

"Software" to isolate or direct "software" or equipment malfunctions.

"Maintenance system"—

"Software" to:

(a) Modify "software" or its associated documentation in order to correct faults, or for other updating purposes; or

(b) "Maintain" equipment;

"Operating system"—

"Software" to control:

(a) The operation of a "digital computer" or of "related equipment"; or

(b) The loading or execution of "programs".

"Application software"—

"Software" not falling within any of the definitions of the other categories of "software".

3. "Specially designed software" is defined as:

The minimum "operating systems", "diagnostic systems", "maintenance systems" and "application software" necessary to be executed on a particular equipment to perform the function for which it was designed. To make other incompatible equipment perform the same function requires:

(a) Modification of this "software"; or

(b) Addition of "programs".

(For a complete list of definitions of terms used in this Supplement, see Advisory Note 12 below; see also ECCN 1585 for additional definitions relating to electronic computers.)

List of Software Subject To This Supplement to Part 379:

(a) "Software" of whatever category, as follows:

(1) "Software" designed or modified for any computer that is part of a computer series designed and produced within Country Groups Q, W, Y, or Z, the Peoples's Republic of China, or Afghanistan;

except "application software" designed for and limited to:

(i) Accounting, general ledger, inventory control, payroll, accounts receivable, personnel records, wages calculation on invoice control;

(ii) Data and text manipulation such as sort/merge, text editing, data entry or work processing;

(iii) Data retrieval from established data files for purposes of report generation or inquiry for the functions described in (i) or (ii) above; or

(iv) The non "real time processing" of pollution sensor data at fixed sites or in civil vehicles for civil environmental monitoring purposes;

(2) "Software" designed or modified for the design, development or production of items controlled by ECCNs on the Commodity Control List identified by the code letter "A", by the International Traffic in Arms Regulations, by 10 CFR Part 110 or by 10 CFR Part 810;

(3) "Software" designed or modified for:

(i) Controlled "hybrid computers";

(ii) One or more of the functions described in ECCN 1565(h)(1)(i) (A) to (M) or for "digital computers" or "related equipment" designed or modified for such functions, except the minimum "specially designed software" in machine executable form for "digital computers" and "related equipment" thereby freed from control only by ECCN 1565(h)(2)(i) or (iii), and only when supplied with the equipment or systems;

(4) "Software" for computer-aided design, manufacture, inspection or test of items controlled by ECCNs on the Commodity Control List identified by the code letter "A", by the International Traffic in Arms Regulations, by 10 CFR Part 110 or by 10 CFR Part 810;

(5) "Software" designed or modified to provide certifiable multi-level security or certifiable user isolation applicable to government classified material or to applications requiring an equivalent level of security, or "software" to certify such "software" [1];

(b) Categorized "software", as follows:

(1) "Development systems":

(i) "High-level language" "development systems" designed for or containing "programs" or "databases" special to the development or production of:

(A) "Specially designed software" controlled by ECCNs on the Commodity Control List identified by the code letter "A", by the International Traffic in Arms Regulations, by 10 CFR Part 110 or by 10 CFR Part 810;

(B) "Software" controlled by sub-paragraphs (a)(2), (a)(3), (b)(5)(v), or (b)(5)(vi) of this Supplement, including any subset designed or modified for use as part of such a "development system";

(ii) "High-level language" "development systems" designed for, or containing the "software" tools and "databases" for, the development or production of "software", or any subset designed or modified for use as part of a "development system" such as or equivalent to:

(A) Ada Programming Support Environment (APSE);

(B) Any subset of APSE, as follows:

(1) Kernel APSE;

(2) Minimal APSE;

(3) Ada compilers specially designed as an integrated subset of APSE; or

(4) Any other subset of APSE;

(C) Any superset of APSE; or

(D) Any derivative of APSE;

(2) "Programming systems":

(i) "Cross-hosted" compilers and "cross-hosted" assemblers;

(ii) Compilers or interpreters designed or modified for use as part of a "development system" controlled by sub-paragraph (b)(1) above;

(iii) Disassemblers, decompilers or other "software" that convert "programs" in object or assembly language into a higher level language, except simple debugging "application software", such as mapping, tracing, checkpoint/restart, breakpoint, dumping and the display of the storage contents or their assembly language equivalent;

(3) "Diagnostic systems" or "maintenance systems" designed or modified for use as part of a "development system" controlled by sub-paragraph (b)(i) above;

(4) "Operating systems":

(i) "Operating systems" designed or modified for "digital computers" or "related equipment" exceeding any of the following limits:

(A) Central processing unit—"main storage" combinations:

(1) "Total processing data rate"—48 million bit per second;

(2) "Total connected capacity" of "main storage"—25.2 million bit;

(3) "Virtual storage" capability—512 M Byte;

(B) Input-output control unit-drum, disk or cartridge-type streamer tape drive combinations:

(1) "Total transfer rate"—15 million bit per second;

(2) "Total access rate"—320 access per second;

(3) Total connected "net capacity"—7,000 million bit;

(4) "Maximum bit transfer rate" of any drum or disk drive—10.3 million bit per second;

(C) Input/output control unit-bubble memory combinations: Total connected "net capacity"—2.1 million bit;

(D) Input-output control unit—magnetic tape drive combinations:

[1] Department of Defense certifiable under section (b)(3) of "Department of Defense Trusted Computer System Evaluation Criteria", published in DOD Computer Security Center, Fort Meade, MD 20755.

(1) "Total transfer rate"—5.2 million bit per second;

(2) Number of magnetic tape drives—twelve;

(3) "Maximum bit transfer rate" of any magnetic tape drive—2.6 million bit per second;

(4) "Maximum bit packing density"—63 bit per mm. (1,600 bit per inch) per track;

(5) Maximum tape read/write speed—508 cm. (200 inch) per second;

Note.—This sub-paragraph does not control "operating systems" designed or modified for "digital computers" or "related equipment":

(a) Not exceeding the above limits even when the "operating systems" can also be used on "digital computers" or "related equipment" exceeding the above limits; or

(b) Belonging to a series containing models exceeding the above limits, if the "operating systems" are used on "digital computers" or "related equipment" of the series that do not exceed the above limits.

(ii) "Operating systems" providing online transaction data processing that permit integrated teleprocessing and "on-line updating" of "databases";

(5) "Application software";

(i) "Software" for cryptologic or cryptanalytic applicaions;

(ii) Artificial intelligence "software", including "software" normally classified as expert systems, that enables a "digital computer" to perform functions normally associated with human perception and reasoning or learning;

(iii) "Database management systems" designed to handle "distributed databases" for

(A) Fault tolerance by using techniques such as maintenance of duplicated "databases"; or

(B) Integrating data at a single site from independent remote "databases";

(iv) "Software" designed to adapt "software" resident on one "digital computer" for use on another "digital computer", except "software" to adapt between two legally exported machines.

Advisory Notes

Advisory Note 1: *Reserved.*

Advisory Note 2: *Reserved.*

Advisory Note 3: Licenses are likely to be approved for export to satisfactory end-users in Country Groups QWY, the People's Republic of China (PRC) and Afghanistan of "software" initially exported to those destinations before January 1, 1984, provided that:

(a) The "software" is identical to and in the same language form (source or object) as initially exported, allowing minor updates for the correction of errors that do not modify the initially exported functions;

(b) The accompanying documentation does not exceed the level of the initial export;

(c) The "software" is exported to the same controlled destination as the initial export.

Advisory Note 4: Licenses are likely to be approved for export to satisfactory end-users in Country Groups QWY, the People's Republic of China (PRC) and Afghanistan of "application software" controlled by sub-paragraph (a)(1) above, but not otherwise listed in this Supplement or ECCNs on the Commodity Control List identified by the code letter "A", provided that:

(a) The "application software" is designed for and limited to the following:

(1) The approved end-use of legally exported equipment or systems in conjunction with any computer that is part of a computer series produced within a controlled area and based on a design originating in a COCOM country; or

(2) The monitoring and control of industrial processes limited to the production of items not described by ECCNs on the Commodity Control List identified by the code letter "A", by the International Traffic in Arms Regulations, by 10 CFR Part 110 or by 10 CFR Part 810; and

(b) No restricted technical data is provided.

Advisory Note 5: Licenses are likely to be approved for export to satisfactory end-users in Country Groups QWY, the People's Republic of China (PRC) and Afghanistan of "software" not exceeding 5,000 statements in "source language", excluding data, provided that:

(a) The "software" is neither designed nor modified for use as a module of a larger "software" module or system that in total exceeds this limit;

(b) The "software" is not controlled by sub-paragraph (b)(5) above; and

(c) The Office of Export Administration is reasonably satisfied that:

(1) The "software" will be used primarily for the specific non-strategic application for which the export would be approved;

(2) The type and characteristics of such "software" are reasonable for this application; and

(3) The "software" will not be used for the design, development or production of items controlled by ECCNs on the Commodity Control List identified by the code letter "A", by the International Traffic in Arms Regulations, by 10 CFR Part 110 or by 10 CFR Part 810.

Advisory Note 6: *Reserved.*

Advisory Note 7: *Reserved.*

Advisory Note 8: Licenses are likely to be approved for export to satisfactory end-users in Country Groups QWY, the People's Republic of China (PRC) and Afghanistan of normal commercial "software" for civil Air Traffic Control (ATC) systems approved for export, provided that:

(a) The "software" is commonly used by civil Air Traffic Control authorities outside controlled areas, but not precluding the personalization of certain parameters for civil Air Traffic Control authorities wherever located;

(b) The "software" is not designed or modified for any "digital computer" that is part of a "digital computer" series designed and produced within a controlled area;

(c) The "software" is the minimum necessary to accomplish the normal civil Air Traffic Control functions outside controlled areas;

(d) The "software" will not contain or be capable of accomplishing any of the following functions:

(1) Electronic Counter Counter Measures (ECCM);

(2) Weapon display, allocation or operation;

(3) Intercept guiding capability; or

(4) Interfacing with altitude determining radars, except secondary search radars;

(e) The "software" is further limited by the amount of "source code", which is to be the minimum necessary for the use (*i.e.*, installation, operation and maintenance) of the "software";

(f) In addition to the above limitations, the only other system "software" allowed is the minimum "programming system" for the maintenance of the "software".

(g) A signed statement of the end-user or importing agency containing a full description of the "software" and its characteristics vis-a-vis the sub-paragraphs above, its intended application and workload and a complete identification of all end-users and their activities is provided;

(h) The "software" will not be used to provide or process data associated with military control centers or military radars or otherwise be associated with such radars or centers; and

(i) The type and characteristics of the "software" are reasonable for the specific civil Air Traffic Control applications.

Advisory Note 9: Licenses are likely to be approved for export to satisfactory end-users in Country Groups QWY, the People's Republic of China (PRC) and Afghanistan of "operating systems" controlled only by sub-paragraph (b)(4)(ii) above when supplied with "digital computers" and "related equipment" exported under the provision of ECCN 1565, Advisory Notes 9 and 12, provided that these "operating systems" are:

(a) For use with a "digital computer" exported under the provisions of ECCN 1565;

(b) In machine executable version;

(c) Limited to the minimum "standard commercially available" "software"; and

(d) Not designed or modified for "database management systems" controlled by sub-paragraph (b)(5)(iii) above.

Advisory Note 10: Licenses are likely to be approved for export to satsifactory end-users in Country Groups QWY, the People's Republic of China (PRC) and Afghanistan of "software" controlled by sub-paragraph (a)(3)(ii) above for "digital computers" and "related equipment" exported under the provisions of ECCN 1529, Advisory Note 5, or ECCN 1565, Advisory Notes 5 and 9, provided that:

(a) The "software" is limited to:

(1) The minimum necessary for the approved application;

(2) Machine executable form; and

(3) "Specially designed software" for

(i) Equipment likely to be approved for export solely under ECCN 1529, Advisory Note 5;

(ii) Equipment likely to be approved for export under ECCN 1565, Advisory Note 5, for one or more of the functions described in ECCN 1565(h)(1)(i)(A), (B) or (D);

(iii) Equipment likely to be approved for export under ECCN 1565, Advisory Note 9, for one or more of the functions described in ECCN 1565(h)(1)(i)(A), (B), or (C);

(b) The "specially designed software" for "signal processing" and "image enhancement" does not provide for more than one of the following:

(1) Time compression; or
(2) Transformations between domains (e.g. Fast Fourier Transform or Walsh Transform).

Advisory Note 11: Licenses are likely to be approved for export to satisfactory end-users in Country Groups QWY, the People's Republic of China (PRC) and Afghanistan of "software" controlled by sub-paragraph (a)(3)(ii) above for "digital computers" and "related equipment" exported under the provisions of ECCN 1565, Advisory Note 12, provided that the "software" is limited to
(a) "Software" for one or more of the functions described in ECCN 1565(h)(1)(i)(A), (B), or (C);
(b) The minimum necessary for the approved applications; and
(c) Machine executable form.

Advisory Note 12: Definitions of Terms Used in this Supplement:

"Analog computer"—
Equipment that can, in the form of one or more continuous variables:
(a) Accept data;
(b) Process data; and
(c) Provide output of data.

"Application software"—
"Software" not falling within any of the definitions of the other categories of "software".

"Cross-hosted"—
For "programming systems", those that produce "programs" for a model of electronic computer different from that used to run the "programming system", *i.e.*, they have code generators for equipment different from the host computer.

"Database"—
A collection of data, defined for one or more particular applications, physically located and maintained in one or more electronic computers or "related equipment".

"Database management system"—
"Applications software" to manage and maintain a "database" in one or more prescribed logical structures for use by other "application software" independent of the specific methods used to store or retrieve the "database".

"Development system"—
"Software" to develop or produce "software". This includes "software" to manage those activities. Examples of a "development system" are programming support environments, software development environments, and programmer productivity aids.

"Diagnostic system"—
"Software" to isolate or detect "software" or equipment malfunctions.

"Digital computer"—
Equipment that can, in the form of one or more discrete variables:
(a) Accept data;
(b) Store data or instructions in fixed or alterable (writable) storage devices;
(c) Process data by means of a stored sequence of instructions that is modifiable; and
(d) Provide output of data.

Note.—Modifications of a stored sequence of instructions include replacement of fixed storage devices, but not a physical change in wiring or interconnections.

"Distributed database"—A "database" physically located and maintained in part or as a whole in two or more interconnected electronic computers or "related equipment", such that inquiries from one location can involve "database" access in other interconnected electronic computers or "related equipment".

"Firmware"—see "microprogram".

"High-level language"— A programming language that does not reflect the structure of any one given electronic computer or that of any one given class of electronic computers.

"Hybrid computer"—Equipment that can:
(a) Access data;
(b) Process data, in both analog and digital representations; and
(c) Provide output of data.

"Maintenance system"—"Software" to:
(a) Modify "software" or its associated documentation in order to correct faults, or for other updating purposes; or
(b) Maintain equipment.

"Microprogram"—A sequence of elementary instructions, maintained in a special storage, the execution of which is initiated by the introduction of its reference instruction into an instruction register.

"Object code" or "object language"—See "programming system".

"On-line updating"—Processing in which the contents of a "database" can be amended within a period of time useful to interact with an external request.

"Operating system"—"Software" to control:
(a) The operation of a "digital computer" or of "related equipment"; or
(b) The loading or execution of "programs".

"Program"—A sequence of instructions to carry out a process in, or convertible into, a form executable by an electronic computer.

"Programming system"—"Software" to convert a convenient expression of one or more processes ("source code" or "source language") into equipment executable form ("object code" or "object language").

"Related equipment"—Equipment 'embedded' in, 'incorporated' in, or 'associated' with electronic computers, as follows:
(a) Equipment for interconnecting "analog computers" with "digital computers";
(b) Equipment for interconnecting "digital computers";
(c) Equipment interfacing electronic computers to "local area networks" or to "wide area networks";
(d) Communication control units;
(e) Other input/output (I/O) control units;
(f) Recording or reproducing equipment referred to ECCN 1565 by ECCN 1572;
(g) Displays; or
(h) Other peripheral equipment.

Note.—"Related equipment" containing an "embedded" or "incorporated" electronic computer, but lacking "user accessible programmability", does not thereby fall within the definition of an electronic computer.

"Self-hosted"—For "programming systems", those producing "programs" for the same model of electronic computer as that used to run the "programming system", *i.e.*, they only have code generators for the host computer.

"Software"—A collection of one or more "programs" or "microprograms" fixed in any tangible medium of expression.

"Source code" or "source language"—See "programming system".

"Specially designed software"—The minimum "operating systems", "diagnostic systems", "maintenance systems" and "application software" necessary to be executed on a particular equipment to perform the function for which it was designed. To make other incompatible equipment perform the same function requires:
(a) Modification of this "software" or
(b) Addition of "programs".

"Standard commercially available"—For "Software" that is
(a) Commonly supplied to general purchasers or users of equipment outside controlled areas, but not precluding the personalization of certain parameters for individual customers wherever located;
(b) Designed and produced for civil applications;
(c) Not designed or modified for any "digital computer" that is part of a "digital computer" series designed and produced within a controlled area; and
(d) Supplied in a commonly distributed form.

Technical Note.—In the case of "software" for mainframe "digital computers" that may have a "virtual storage capability" exceeding the limit of sub-paragraph (b)(4)(i)(A)(3) and that may be considered for export under the conditions of ECCN 1565, Advisory Notes 9 & 12, the limitation of the "virtual storage capability" of 512 MByte does not apply.

Advisory Note 13: Licenses are likely to be approved for export to satisfactory end-users in the People's Republic of China (PRC) of software that has been approved previously for export and standard commercial packages for business applications, for example:
(1) Operating systems for transaction processing and real time updating, and
(2) Relational database management systems.

PART 399—[AMENDED]

7. In Supplement No. 1 to § 399.1 (the Commodity Control List), Commodity Group 5 (Electronics and Precision Instruments), ECCN 1565A is amended by adding a Note following paragraph (h)(2)(i) of the List of Electronic Computers and Related Equipment Controlled by ECCN 1565A, and adding a Note following (h)(2)(vi) as follows:

1565A Electronic computers, "related equipment", * * *

* * * * *

(h) * * *
(2) *Except:* * * *
(i) * * *

Note.—Equipment or systems are released from control under subparagraph (i) only if the "digital computer" portion of the equipment or system meets the following requirements:

(a) The circuit board(s) that contain the "digital computer" are company

specific products whose design intermixes on the same board the digital computer with other circuit components that are essential to the operation of the equipment or system;

(b) The circuit board(s) that contain the "digital computer" are not available as independent, general purpose, OEM products except as service spare parts; and

(c) The "digital computer" is not the principal component of the equipment.

Equipment or systems containing general purpose "digital computer" circuit boards such as the LSI-11 and the SBC/80 are *not* released from control by subparagraph (i).

* * * * *

(vi) * * *

Note.—Subparagraphs (v) and (vi) above release from control identified peripherals only if the following conditions are met:

(a) Microprocessor microcircuits contained in the peripheral are essential and dedicated solely to the operation of the peripheral equipment; and

—Are not the principal element of the peripheral equipment; and

—Do not exceed a total processing date rate of 28 Megabit per second.

(b) The peripheral equipment is designed to permit only loading or inserting "programs" that do not change that basic characteristics of the peripheral equipment and do not raise performance parameters above the levels specified for release; and

(c) The user is not provided with technical data or software to change the sequence of instructions comprising the loaded or inserted program.

8. In Supplement No. 1 to § 399.1 (the Commodity Control List), Commodity Group 5 (Electronics and Precision Instruments), ECCN 1566A is removed.

The Saving Clause in the preamble to the document appearing at 49 FR 50608, on page 50609, December 31, 1984, as amended at 50 FR 4593, is revised to read as follows:

Saving Clause

Items which were removed from general license authorizations as a result of this rule (49 FR 50608, Dec. 31, 1984) may be exported under the previous general license provisions up to and including May 29, 1985 except for those items covered by the rule of (date of publication) for which the effective date is April 30, 1985. Any items subject to this Saving Clause not actually exported before midnight May 29, 1935 require a validated export license.

Authority: Secs. 203, 206, Pub. L. 95-223, Title II, 91 Stat. 1626, 1628 (50 U.S.C. 1702, 1704), Executive Order No. 12470 of March 30, 1984 (49 FR 13099, April 3, 1984), Presidential Notice of March 28, 1985 (50 FR 12513, March 29, 1985).

Dated: April 24, 1985.

John K. Boidock,

Director, Office of Export Administration, International Trade Administration.

BILLING CODE 3510-DT-M

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Part 629

Job Training Partnership Act (JTPA); Single Unit Charge Agreements Involving Training of Youths

AGENCY: Employment and Training Administration, Labor.

ACTION: Final rule.

SUMMARY: The Department of Labor is conforming the Job Training Partnership Act regulations to the requirements of the Carl D. Perkins Vocational Education Act relating to single unit charge agreements involving training of youths, to broaden the number of categories of training results which exempt such costs from allocation or proration among several cost categories.

EFFECTIVE DATE: April 26, 1985.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Colombo, Director, Office of Employment and Training Programs, Employment and Training Administration, U.S. Department of Labor, Room 6402, 601 D Street, NW., Washington, D.C. 20213. Telephone: 202-376-6093.

SUPPLEMENTARY INFORMATION: Pursuant to JTPA, the Department of Labor (DOL) enters into agreements with State Governors to operate programs to prepare youth and unskilled adults for entry into the labor force and to afford job training to those economically disadvantaged individuals and other individuals facing serious barriers to employment, who are in special need of such training to obtain productive employment. JTPA section 2, 29 U.S.C. 1501. As part of the general program requirements of JTPA, "[c]ommercially available training packages, including advanced learning technology, may be purchased for off-the-shelf prices and without requiring a breakdown of the cost components of the package if such packages are purchased competitively and include performance criteria." JTPA section 141(d)(3), 29 U.S.C. 1551(d)(3).

Section 108 of JTPA, however, limits certain costs under the Act. 29 U.S.C. 1518. As a result, § 629.38(e) of the JTPA regulations provides that in assigning costs to the training category, the Governor shall ensure that:

(2) Costs which are billed as a single unit charge do not have to be allocated or prorated among the several cost categories but may be charged entirely to training when the agreement:

(i) Is for training;

(ii) Is fixed unit price; and

(iii) Stipulates that full payment for the full unit price will be made only upon completion of training by a participant and placement of the participant into unsubsidized employment in the occupation trained for and at not less than the wage specified in the agreement.

On October 19, 1984, subsequent to the promulgation of the above regulation, section 7 of Pub. L. 98-524, the Carl D. Perkins Vocational Education Act (98 Stat. 2435, 2491), was enacted, providing that:

Sec. 7. Notwithstanding section 629.38(e)(2)(iii) of title 20 of the Code of Federal Regulations, relating to allowable training costs under the Job Training Partnership Act, payment for training packages purchased competitively pursuant to section 141(d)(3) of such Act in the case of youth shall include payment for the full unit price if the training results in either placement in unsubsidized employment or the attainment of the outcome specified in section 106(b)(2) of such Act.

The JTPA section 106(b)(2) outcomes mentioned above are "(A) attainment of recognized employment competencies recognized by the private industry council, (B) elementary, secondary, and postsecondary school completion, or the equivalent thereof, and (C) enrollment in other training programs or apprenticeships, or enlistment in the Armed Forces." 29 U.S.C. 1516(B)(2).

The enactment of section 7 of Pub. L. 98-524 supersedes the provisions of 20 CFR 629.38(e)(2)(iii). Therefore, for information and completeness, DOL has determined to amend the JTPA regulation to conform to the statute.

The rule as amended merely restates a statutory mandate in Pub. L. 98-224 superseding the current regulation, and no discretion is given to DOL in the implementation of the requirement. Pub. L. 98-224 is effective with respect to fiscal years beginning on or after October 1, 1984. Sec. 2, Pub. L. 98-224, 98 Stat. at 2486. Therefore, DOL for good cause finds that notice and public comment on the rule are impracticable, unnecessary, and contrary to the public interest. 5 U.S.C. 533(b)(B). Since the rule relieves somewhat the restriction on classification of training costs, and since Pub. L. 98-224 was effective on October 1, 1984, and permits no discretion on the part of DOL, DOL finds

that there is good cause to make the rule effective upon its publication in the **Federal Register**. 5 U.S.C. 553(d) (1) and (3).

Regulatory Impact:

This rule affects only the assignment of costs relating to youth training under JTPA grants to Governors. As such, it does not have the financial or other impact to make it a major rule, and, therefore, the preparation of a regulatory impact analysis is not necessary. See Executive Order No. 12291, 3 CFR, 1981 Comp., p. 127.

This document was not preceded by a general notice of proposed rulemaking, and, therefore, is not a rule as defined in the Regulatory Flexibility Act. 5 U.S.C. 601(2) and 604(a).

Catalogue of Federal Domestic Assistance Number

This program is listed in the *Catalogue of Federal Domestic Assistance* at No. 17.250, "Job Training Partnership Act (JTPA)".

Grant programs, Labor, Manpower training programs.

Promulgation of Final Rule:

Accordingly, Part 629 of Chapter V of Title 20, Code of Federal Regulations is amended as follows:

PART 629—[AMENDED]

In § 629.38, paragraph (e)(2)(iii) is revised to read as follows:

§ 629.38 Classification of costs.

* * * * *

(e) * * *

(2) * * *

(iii)(A) Stipulates that full payment for the full unit price will be made only upon completion of training by a participant and placement of the participant into unsubsidized employment in the occupation trained for and at not less than the wage specified in the agreement; or

(B) In the case of youth, payment for training packages purchased competitively pursuant to section 141(d)(3) of the Act shall include payment for the full unit price if the training results in either placement in unsubsidized employment of the attainment of an outcome specified in section 106(b)(2) of the Act.

* * * * *

(Sec. 7, Pub. L. 98-524, 98 Stat. 2435, 2491)

Signed at Washington, D.C., this 19th day of April, 1985.

Ford B. Ford,

Under Secretary of Labor.

BILLING CODE 4510-30-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 660

[Docket No. 81N-0417]

Additional Standards for Anti-Human Globulin; OMB Approval of Requirements

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is announcing that the Office of Management and Budget (OMB) has approved the collection of information requirements in the biologics regulations concerning additional standards for Anti-Human Globulin. The agency is amending those regulations to reflect OMB's approval.

EFFECTIVE DATE: April 26, 1985.

FOR FURTHER INFORMATION CONTACT: Joseph Wilczek, Center for Drug and Biologics (HFN-368), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1306.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of February 11, 1985 (50 FR 5574), FDA established additional standards for Anti-Human Globulin (21 CFR Part 660, Subpart F). In that document (50 FR 5578), FDA announced that it had submitted the final rule to OMB for approval of the collection of information requirements contained in §§ 660.51, 660.52, 660.53, 660.54, and 660.55.

OMB has approved the collection of information requirements under OMB control number 0910-0208. This document announces OMB's approval and amends the regulations to reflect that approval.

Because this amendment merely reflects OMB's approval of collection of information requirements, notice and public procedure and delayed effected date are unnecessary (5 U.S.C. 553 (b)(B) and (d)).

List of Subjects in 21 CFR Part 660

Biologics, Labeling.

PART 660—ADDITIONAL STANDARDS FOR DIAGNOSTIC SUBSTANCES FOR LABORATORY TESTS

§§ 660.51, 660.52, 660.53, 660.54, and 660.55 [Amended]

Therefore, under the Public Health Service Act (sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), Part 660 is amended in § 660.51 *Processing*, § 660.52 *Reference preparations*, § 660.53 *Controls for serological procedures*, § 660.54 *Potency tests, specificity tests, tests for heterospecific antibodies, and additional tests for nonspecific properties*, and § 660.55 *Labeling* by inserting the number "0910-0208" at the end of the parenthetical statement at the end of each section.

Effective date. April 26, 1985.

(Sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262))

Dated: April 19, 1985.

Mervin H. Shumate,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 85-10092 Filed 4-25-85; 8:45 am]

BILLING CODE 4160-01-M

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

29 CFR Part 2200

Amendment of Review Commission Rules of Procedure to Clarify Commission Procedures Regarding the Issuance of Subpoenas and the Failure of Parties to File Briefs

AGENCY: Occupational Safety and Health Review Commission.

ACTION: Final rule.

SUMMARY: This document amends the rules of procedure of the Occupational Safety and Health Review Commission to delegate to its judges the function of signing subpenas and to describe the action that may be taken if parties fail to respond to a briefing notice. The amendments are intended to clarify regulations at 29 CFR Part 2200 .

EFFECTIVE DATE: April 26, 1985.

FOR FURTHER INFORMATION CONTACT: Earl R. Ohman, Jr., General Counsel, Occupational Safety and Health Review Commission, 1825 K Street, NW., Suite 402, Washington, D.C. 20006, (202) 634-4015.

SUPPLEMENTARY INFORMATION: Pursuant to section 12(g) of the Occupational Safety and Health Act of 1970, 29 U.S.C. 661(f), by which the Review Commission is authorized to make such rules as are

necessary for the orderly transaction of its proceedings, the review Commission has promulgated Rules of Procedure at 29 CFR Part 2200.

Under section 12(i) of the Occupational Safety and Health Act, 29 U.S.C. 661(h), the Commission and its members are authorized to issue subpenas. Rule 55(a) of the Review Commission's Rules of Procedure governs the issuance of subpenas. In practice, under Rule 55(a), the Commission's judges issue subpenas imprinted with the Chairman's signature. Consistent with the other duties of the Commission's judges that are described in section 12(j) of the Act, 29 U.S.C. 661(i), the Commission now delegates to its judges the purely ministerial function of signing the subpenas.

Rule 93(d) of the Review Commission's Rules of Procedure governs the failure of parties involved in the Commission's proceedings to timely file briefs. The failure to timely respond to the Commission's briefing notice by a party whose petition for review has been granted has created uncertainty for other parties attempting to comply with the Commission's briefing schedule. It also has delayed adjudication of the case. The Commission has generally given parties a further opportunity to file a brief and indicated that if no response is received the direction for review may be vacated. The Commission may also vacate the direction if the petitioning party fails to respond. To clarify its practice, the Commission amends its Rules of Procedure to spell out what action it may choose to take if the parties fail to respond to a briefing notice. Because the rule changes are procedural, 5 U.S.C. 553(b)(3)(A) permits them to be effectuated without prior notice or public comment.

List of Subjects in 29 CFR Part 2200

Administration practice and procedure, Occupational safety and health.

PART 2200—[AMENDED]

1. For the reasons stated in the summary, 29 CFR Part 2200 is amended by revising § 2200.55(a) to read as follows:

§ 2200.55 Issuance of subpenas; petitions to revoke or modify subpenas; right to inspect or copy data.

(a) On behalf of the Commission or any member thereof, the judge shall, on the application of any party, issue to the applying party subpenas requiring the attendance and testimony of witnesses and the production of any evidence, including relevant books, records, correspondence or documents, in his possession or under his control. The party to whom the subpena is issued shall be responsible for its service. Applications for subpenas, if filed prior to the assignment of the case to a judge, shall be filed with the Executive Secretary at 1825 K Street, NW., Washington, D.C. 20006. After the case has been assigned to a judge, applications shall be filed with the judge. Applications for subpenas shall be made ex parte. The subpena shall show on its face the name and address of the party at whose request the subpena was issued.

. . . . . .

2. For the reasons stated in the summary, 29 CFR Part 2200 is amended by revising § 2200.93(d) to read as follows:

§ 2200.93 Briefs before the Commission.

. . . . . .

(d) *Consequences of late filing of brief.* The Commission may decline to accept a brief that is not timely filed. If a petitioning party fails to respond to a briefing notice or expresses no interest in review, the Commission may vacate the direction for review, or it may decide the case without that party's brief. If the non-petitioning party fails to respond to a briefing notice or expresses no interest in review, the Commission may decide the case without that party's brief. If a case was directed for review upon a Commissioner's own motion, and either party fails to respond to the briefing notice, the Commission may either vacate the direction for review or decide the case without briefs.

. . . . . .

(Sec. 12(g), Occupational Safety and Health Act of 1970, 29 U.S.C. 661(f))

Signed this 19th day of April, 1985.

E. Ross Buckley,

Chairman.

Timothy F. Cleary,

Commissioner.

[FR Doc. 85-9963 Filed 4-25-85; 8:45 am]

BILLING CODE 7600-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-8-FRL 2821-6]

Approval and Promulgation of Implementation Plans; Montana; Colstrip Area Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Agency is approving the Colstrip nonattainment area plan for control of Total Suspended Particulate (TSP) emissions to meet the primary NAAQS for TSP as required under section 110, of the Clean Air Act. A proposal to approve this plan was published in the **Federal Register** on July 5, 1983, and again July 23, 1984, as a part of a package of Montana issues.

EFFECTIVE DATE: April 26, 1985.

ADDRESSES: Copies of the submittal are available at the following addresses:

Environmental Protection Agency, Montana Office, Federal Building, Drawer 10096, 301 South Park, Helena, Montana 59626

Environmental Protection Agency, Region VIII, Air Program Branch, 1 Denver Place, Denver, Colorado 80295

Public Information Reference Unit, EPA Library, 401 M Street, SW., Washington, D.C.

Office of the Federal Register, Room 8401, 1100 L Street, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Jay M. Sinnott, Environmental Protection Agency, Montana Office, Federal Building, Drawer 10096, 301 South Park, Helena, Montana 59626, (406) 449-5486

SUPPLEMENTARY INFORMATION: In a March 4, 1980 notice of final rulemaking (45 FR 14036), EPA approved the Colstrip plan on the condition that the State issue a permit to Western Energy Company requiring that the Company carry to completion all of the activities set forth in the State's October 4, 1979 submission.

On September 21, 1981, the Governor submitted a copy of the permit issued to Western Energy Company in response to EPA's comments. The permit contains all of the needed requirements; and EPA proposed approval of the plan, along with a number of other Montana actions, on July 5, 1983 (48 FR 30696) and again on July 23, 1984 (49 FR 29622). No comment was received on the Colstrip plan following either of these notices.

Final Action

EPA is approving the Colstrip area plan, submitted by Montana, for attainment of the primary National Ambient Air Quality Standards for TSP.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Authority: Secs. 110(a) and 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410(a) and 7601(a)).

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements (see 307(b)(2)).

List of Subjects in 40 CFR Part 52

Air pollution control, Particulate matter, Incorporation by reference.

Note.—Incorporation by reference of the State Implementation Plan for the State of Montana was approved by the Director of the Federal Register on July 1, 1982.

Dated: April 12, 1985

Lee M. Thomas,

Administrator.

PART 52—[AMENDED]

Title 40, Part 52 of the Code of Federal Regulations is amended as follows:

Subpart BB—Montana

1. In § 52.1370 paragraph (c)(17) is added as follows:

§ 52.1370 Identification of plan.

* * * * *

(c) * * *

(17) On September 21, 1981 the Governor submitted a permit which had been issued to the Western Energy Company as required in the conditional approval of the Colstrip TSP plan.

2. Section 52.1380 is amended by revising the introductory paragraph and paragraph (a) and by removing and reserving paragraph (b) (which would remove the condition of approval of the above regulations):

§ 52.1380 Control strategy: Total suspended particulates.

Part D—Conditional Approval—The Butte plan is approved provided that the following condition is met:

(a) For Butte, by February 15, 1981, the State will submit a revised airborne particulate regulation as specified in their October 4, 1979, submittal to EPA.

(b) [Reserved]

(Sec. 110 of the Clean Air Act, as amended)

[FR Doc. 85-9425 Filed 4-25-85; 8:45 am]

BILLING CODE 6560-50-M

40 CFR Part 81

[A-8-FRL-2821-7]

Designation of Areas for Air Quality Planning Purposes; Montana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Agency is approving the redesignation of the Colstrip Area from nonattainment to attainment of Federal Primary Total Suspended Particulate (TSP) standards. The State of Montana requested this redesignation on October 17, 1984 as authorized under section 107 of the Clean Air Act.

EFFECTIVE DATE: This action will take effect June 25, 1985 unless notice is received within 30 days that adverse or critical comments will be submitted.

ADDRESSES: Copies of documents supporting Montana's request are available for public inspection at the following addresses:

Environmental Protection Agency, Montana Office, Federal Building, Room 292, 301 South Park, Helena, Montana 59626

Environmental Protection Agency, Region VIII, Air Programs Branch, 1 Denver Place, Denver, Colorado 80295.

FOR FURTHER INFORMATION CONTACT: Jay M. Sinnott, Environmental Protection Agency, Montana Office, Federal Building, Drawer 10096, 301 South Park, Helena, Montana 59626, (406) 449-5486.

SUPPLEMENTARY INFORMATION: On October 17, 1984, Montana submitted a request to redesignate the Colstrip area from nonattainment to attainment of the primary TSP standards. This submission includes monitoring and modeling information to support the request.

Background

The Colstrip nonattainment area, so designated in a state submission of January 6, 1978, is an area of approximately 120 square miles surrounding the community of Colstrip (population 1,476). The main sources of particulate emissions in the area are coal strip mines operated by the Western Energy Company and the Peabody Coal Company; construction activity at Montana Power Company's Colstrip unit 3 and 4 coal-fired power plants; road dust and highway construction activities.

The agency proposed approval of Montana's attainment plan on July 23, 1984. A previous conditional approval on March 4, 1980 called for submission of a permit issued to Western Energy Company which includes the emission controls required to achieve attainment. This permit was submitted September 21, 1981. EPA is taking final action approving Montana's attainment plan in a separate notice published in today's **Federal Register**.

Highway construction in Colstrip has been completed and power plant construction activity at the near-complete power plants has decreased dramatically.

The most recent eight quarters of data, ending March 31, 1984, reveal a maximum annual geometric mean of 43 $\mu g/m^3$ and a second highest 24-hour level of 191 $\mu g/m^3$, well below the respective primary standards of 75 and 260 $\mu g/m^3$. This data was collected at six (6) sampling sites which clearly meet siting criteria and are representative of the area.

A modeling study predicts that no violations will occur in the Colstrip area throughout the projected period of peak mining activity.

Final Action

The Agency is approving Montana's request to redesignate the Colstrip area from nonattainment to attainment of primary TSP National Ambient Air Quality Standards.

The request is being approved without a prior proposal because the action is expected to be noncontroversial and no adverse comments are anticipated. If significant adverse or critical comment is received a notice will be published withdrawing this action and another notice will appear proposing to approve an action and establishing a comment period.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities (see 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Authority: Secs. 107(d)(5), 110(a) and 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410(a) and 7601(a)).

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements (See 307(b)(2)).

List of Subjects in 40 CFR Part 81

Air pollution control, National Parks, Wilderness areas.

Dated: April 12, 1985.

Lee M. Thomas,

Administrator.

PART 81—[AMENDED]

Part 81 of Chapter 1, Title 40 of the Code of Federal Regulations is amended by revising the TSP portion of the table in § 81.327 as follows:

§ 81.327 Montana.

Designated area	Does not meet primary standards	Does not meet secondary standards	Cannot be classified	Better than national standards
Montana-TSP				
City of Missoula	X			
Colstrip area		X		
City of Columbia Falls	X			
Missoula area		X		
Butte area	X			
Billings area		X		
Great Falls area		X		
East Helena area		X		
Remainder of State				X

[1] EPA designation replaces State designation.

[OPTS-50032B; 2742-1]

Premanufacture Notification Exemption; Exemption for Chemical Substances Manufactured in Quantities of 1,000 Kg or Less Per Year

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Section 5(a)(1)(A) of the Toxic Substances Control Act (TSCA) requires that persons notify EPA before they manufacture or import a new chemical substance for commercial purposes. Section 5(h)(4) of TSCA authorizes EPA, upon application and by rule, to exempt the manufacturer or importer of any new chemical substance from the provisions of section 5 if the Agency determines that the manufacture, processing, distribution in commerce, use, or disposal of the substance will not present an unreasonable risk of injury to health or the environment. EPA is granting a limited exemption under section 5(h)(4) from the requirements of section 5(a)(1)(A) for persons who manufacture certain new chemical substances in quantities of 1,000 kilograms or less per year. To ensure that these chemical substances will not present an unreasonable risk, EPA has included procedural safeguards, including a 21-day review, and other conditions in the exemption.

DATE: This rule shall be promulgated for purposes of judicial review at 1 p.m. eastern time on May 10, 1985. This rule is effective June 10, 1985.

FOR FURTHER INFORMATION CONTACT:

Outside the USA: (Operator 202-554-1404).

SUPPLEMENTARY INFORMATION: OMB control number 2070-0012.

I. Background

A. Introduction

Under section 5(a)(1)(A) of TSCA, any person who intends to manufacture or import a new chemical substance for commercial purposes must notify EPA 90 days before manufacture or import begins. A new chemical substance is any chemical substance that is not on the Chemical Substance Inventory compiled by EPA under section 8(b) of TSCA.

The requirement to submit premanufacture notices (PMNs) for new chemical substances became effective on July 1, 1979, 30 days after publication of the Initial Inventory. EPA issued final Premanufacture Notice Requirements and Review Procedure, published in the **Federal Register** of May 13, 1983 (48 FR 21722). In the **Federal Register** of September 13, 1983 (48 FR 41132), the Agency clarified certain provisions of the rule, made a non-substantive amendment to the timing of the submission of the notice of commencement of manufacture, and stayed other provisions of the rule. The rule became effective October 26, 1983. Since the beginning of the program in 1979, EPA has reviewed more than 4,000 PMNs.

Section 5(h)(4) of TSCA allows the Administrator, upon application and by rule, to exempt a new chemical substance or category of new chemical substances from any requirement of section 5 if he or she determines that the manufacture, processing, distribution in commerce, use, and disposal of the substance will not present an unreasonable risk of injury to health or the environment. The Agency issued an exemption for certain chemical substances used in or for instant photographic film articles published in the **Federal Register** of June 4, 1982 (47 FR 24308), and an exemption for new polymeric substances which was published in the **Federal Register** of November 21, 1984 (49 FR 46066). With this notice, the Agency is issuing an exemption for certain low volume chemical substances.

This exemption was developed in response to petitions from the Chemical Manufacturers Association (CMA) and other industry trade groups. Notice of receipt of the CMA and other petitions was published in the **Federal Register** of November 3, 1981 (46 FR 54688); proposed rules were published in the **Federal Register** of August 4, 1982 (47 FR 33896, 47 FR 33924). These rules, which would have exempted certain site-limited intermediates and low volume substances, were proposed as § 723.10 of Subpart A. The final rule is promulgated as § 723.50 of Subpart B, but includes only substances manufactured or imported at 1,000 kilograms or less per year.

The 60-day comment period on the proposals ended on October 4, 1982. EPA received 52 comments on the site-limited intermediate and low volume proposal from trade associations, chemical manufacturers, an environmental organization, and other interested persons. At the request of the Natural Resources Defense Council and other groups, a public hearing was held on November 1, 1982, in Washington, D.C. Seven organizations or individuals made oral comments on the proposal at the hearing. EPA reopened the public comments period at the hearing, extending it for 30 days, to give participants at the hearing an opportunity to answer questions from EPA on their comments. Seven organizations provided comments during the extended period.

EPA has summarized its response to the major public comments received during the rulemaking. This summary, together with copies of the public comments and a transcript of the hearing, is included in the public record.

B. Exemption Requests

The CMA petition, received on May 21, 1981, requested exemptions for:

1. Site-limited intermediates.

2. Chemical substances produced in quantities of 25,000 pounds or less per year.

3. Polymers whose precursor monomers are on the TSCA Inventory.

In addition, CMA requested an exemption that would authorize EPA to allow manufacture of new chemical substances of low concern before the end of the 90-day PMN review period. CMA also requested that EPA issue regulations establishing a procedure for handling individual section 5(h)(4) exemption applications.

In support of its petition, CMA argued that the requirements of section 5 of TSCA inhibit innovation in the chemical industry. According to CMA, the requested exemptions would significantly reduce the impact of section 5 on innovation and, by requiring review by an industry "qualified expert," encourage industry to conduct adequate risk assessments before introducing new chemical substances into commerce. CMA also stated that its proposal embodied a "pay as you go" approach. Under such an approach, PMNs on exempted chemical substances would be deferred until the cost of PMN submission would be less burdensome and until more comprehensive information developed by manufacturers might be available for EPA review.

EPA subsequently received petitions from the Synthetic Organic Chemical Manufacturers Association (June 28, 1981) and the Dyes Environmental and Toxicological Organization (July 10, 1981) requesting an exemption for the same categories of chemical substances proposed by CMA. In addition, seven trade organizations submitted endorsements of the CMA petition.

C. Alternatives Proposed

In response to the petitions from CMA and other groups, EPA began separate rulemakings for polymers and site-limited intermediates/low volume chemicals. This rule addresses only chemical substances produced at 1,000 kilograms or less per year. The polymer exemption rule was published in the **Federal Register** of November 21, 1984 (49 FR 46066).

After reviewing comments from both industry and the public, EPA has decided not to pursue at this time a rule to exempt site-limited intermediates and chemical substances produced in quantities of between 1,000 and 10,000 kilograms per year. Industry commenters stated that the exemption criteria for these categories (particularly the qualified expert provisions) were overly burdensome, and that the exemption did not provide significant relief. The Agency, however, determined that it could not reduce the procedural safeguards in the rule and still make the finding of no unreasonable risk. At the same time, public interest groups questioned the legal basis of the exemptions. Therefore, EPA has decided to issue a more limited exemption applying only to substances produced at 1,000 kilograms or less per year.

EPA also has decided not to pursue at this time a rule to shorten the PMN review period, because (1) it believes that the exemptions for low volume chemical substances and polymers will substantially reduce or eliminate the need for this exemption, and (2) there is a serious question as to whether TSCA permits EPA to allow early manufacture by either a rule or a policy statement. In addition, because of limited resources, EPA has decided not to develop general section 5(h)(4) procedural rules at this time.

II. Final Exemption

A. Summary of the Rule

The final rule exempts certain low volume chemical substances from premanufacture notification requirements of section 5 of TSCA. The basic outline of the rule is described below.

Manufacturers or importers of a new chemical substance produced at 1,000 kilograms or less per year may submit a brief exemption notice to EPA, in lieu of a full PMN, 21 days before manufacture. The notice must include chemical identity, a description of use, site of manufacture, and test data in the submitter's possession or control. EPA will review the notice and declare a chemical substance ineligible for the exemption if the Agency determines that the substance (or metabolites, environmental transformation products, impurities, or byproducts) may cause serious acute or chronic effects in humans or significant environmental effects under anticipated conditions of manufacture, processing, distribution in commerce, use, or disposal, or that serious unresolved issues concerning potential risks require further review. If EPA does not find the substance ineligible, manufacture may begin at the end of the review period. Manufacturers must submit another exemption notice before use or site or manufacture changes; only one manufacturer may make a given chemical substance under this exemption.

The rule also establishes procedures by which EPA can revoke an exemption for a specific chemical substance after manufacture has begun. EPA will revoke an exemption if new information indicates that the chemical substance does not meet the criteria for an exemption.

B. Discussion of the Final Rule

The final rule adopts most of the provisions concerning substances manufactured at 1,000 kilograms per year or less in the proposed rule published on August 4, 1982. This unit of the preamble clarifies several areas of confusion identified by public commenters and discusses the differences between the final rule and the proposal.

1. Scope of Rule

As explained in Unit I.C of this preamble, this final rule does not include exemptions for site-limited intermediates or substances produced at between 1,000 and 10,000 kilograms per year. It exempts from the full PMN requirements only certain substances produced in quantities of 1,000 kilograms or less per year.

2. Length of Review Period

The proposed rule would have required that companies notify EPA 14 calendar days before manufacturing a new chemical substance under the exemption. In the final rule, companies are required to notify EPA 21 calendar days before manufacture begins.

EPA recognizes that one of the major benefits of this exemption is that it allows companies to respond more rapidly to market demand and to introduce new chemical substances more quickly into commerce. Extending the review period from 14 to 21 calendar days will to a certain extent reduce this benefit. However, after carefully reviewing public comments and its experience in the premanufacture notice review process, the Agency has concluded that 14 calendar days will not be long enough to review exempt chemical substances adequately. Instead, 21 days is the minimum reasonable period in which EPA can review an exemption candidate and, if necessary, inform the manufacturer that it is not eligible for the exemption. For this reason, the review period was extended.

3. Exclusions

EPA will exclude specific substances from the exemption if, during its 21-day review, it concludes that the substances themselves, or reasonably anticipated metabolites, environmental transformation products, byproducts, or impurities, may cause serious acute or chronic effects in humans or significant environmental effects under reasonably

anticipated conditions of manufacture, processing, distribution in commerce, use, or disposal.

Several commenters asked for clarification of these standards.

a. *Serious acute or chronic human effects.* Several commenters asked for further explanation of the standard for excluding chemical substances capable of causing "serious acute effects" and "serious chronic effects." To clarify this standard, EPA has revised these definitions to include "disfigurement" and "severe or prolonged loss of the ability to use a normal bodily or intellectual function with a consequent impairment of normal activities," as well as death and severe or prolonged incapacitation. This revised definition would include any generally recognized adverse health effect (e.g., neurotoxic effects, liver and other organ toxicity, reproductive toxicity, mutagenicity, carcinogenicity, teratogenicity, fetotoxicity, skin sensitization, and severe skin and eye irritation). The modification makes it clear that a chemical substance could be excluded because of potential for non-life-threatening as well as life-threatening effects.

Several commenters also requested that EPA clarify the list of examples of serious acute or chronic effects contained in the preamble to the proposal. EPA intended that the list illustrate the kinds of possible effects that might cause the Agency concern and that could disqualify a substance from the exemption. EPA does not expect that exempt substances will not have any of these effects under any circumstances. However, if EPA concludes that a substance may cause any of these effects, the substance would not be eligible for the exemption unless the conditions of manufacture, processing, use, and disposal were such that serious adverse effects would not occur.

b. *Significant environmental effects.* The proposal defined "significant environmental effects" as "injury to the environment which reduces or adversely affects the productivity, utility, value, or function of biological, commercial, or agricultural resources, or causes the loss of a member of a rare or endangered species." The Agency received numerous comments on this definition, many of them expressing the concern that potential for any injury would lead to the exclusion of a substance from the exemption. Also, several commenters stated that the manufacturer might have no way to know whether the substance might threaten a single member of an endangered species.

In response to these comments, § 723.50(b)(11) of the final rule defines "significant environmental effects" as:

(i) Any irreversible damage to biological, commercial, or agricultural resources of importance to society,

(ii) Any reversible damage to biological, commercial, or agricultural resources of importance to society if the damage persists beyond a single generation of the damaged resource or beyond a single year, or

(iii) Any known or reasonably anticipated loss of members of an endangered or threatened species. "Endangered" or "threatened" species are those species identified by the Secretary of the Interior in accordance with the Endangered Species Act, as amended (16 U.S.C. 1531).

This change is intended to clarify the point that potential for insignificant or trivial injury to individual environmental organisms or to environmental resources would not disqualify a substance. As EPA explained in the preamble to the proposed rule, it does not intend to exclude all chemical substances that might cause any harm to any organism. Rather, the exclusion is directed toward "significant" environmental effects, both acute and chronic. The significance of environmental effects must be viewed in terms of the extent of the environmental damage, the potential recovery or repairability of the damage, and the degree to which the damage will impair the utility or function of the environmental unit affected.

Examples of significant environmental effects include direct effects on resources of demonstrable value, such as a fish kill reducing the value of a commercial fish population for a single generation, or a long-term reduction in a fish population over several generations. They also include indirect effects, such as long-term reduction in soil fertility; ecologically significant changes in species' interrelationships, e.g., excessive stimulation of primary producers (algae, macrophytes) in aquatic ecosystems; and ecologically significant interference with critical biochemical cycles, such as the nitrogen cycle. This list is illustrative and is not intended to be all-inclusive. However, any substance capable of exhibiting these or comparable effects under reasonably anticipated conditions of manufacture, processing, distribution in commerce, use, or disposal would not be eligible for an exemption.

Several commenters suggested that EPA modify the definition of significant environmental effects so that it was the same as the definition of substantial risk in EPA's policy statement implementing section 8(e) of TSCA published in the **Federal Register** of March 16, 1978 (43 FR 11110). Section 8(e) of TSCA requires manufacturers, processors, and distributors to notify EPA of any information that reasonably supports the conclusion that a chemical substance or mixture presents a substantial risk of injury to health or the environment. However, EPA decided not to adopt the section 8(e) standard in this exemption; this standard was developed to ensure that EPA learned of known hazards associated with existing chemicals likely to be distributed widely in the environment. The Agency does not believe that this standard would be adequate to support a "no unreasonable risk" finding under TSCA section 5(h)(4). However, it should be clear that any environmental risk that would trigger a section 8(e) substantial risk notification would exclude a substance from this exemption if EPA concluded that such risks may occur under reasonably anticipated conditions of manufacturing, processing, distribution in commerce, use, or disposal.

c. *Byproducts and impurities.* The proposal excluded chemical substances from the exemption if there was a reasonable basis to conclude that byproducts of manufacture, processing, distribution in commerce, use, or disposal may have serious acute or chronic effects in humans or significant environmental effects under reasonably anticipated conditions of exposure. The final rule also excludes chemical substances if EPA concludes that impurities in the substance may cause such effects under reasonably anticipated conditions of exposure. This requirement was added because on several occassions the Agency has taken action on new chemical substances because of impurities. Therefore, EPA believes that it is necessary to consider impurities in its review and to exclude new substances because of potential risks posed by impurities.

4. Information Requirements

The final rule retains the basic requirements concerning the information the manufacturer must provide in the exemption notice. However, it modifies the requirements for chemical identity and use descriptions. These changes are discussed below.

a. *Test data.* Companies intending to manufacture a substance under the exemption must include test data in the submitter's possession or control that are related to the effects of the chemical substance on health and the

environment. This includes physical-chemical properties and environmental fate data relevant to risk assessment (e.g., vapor pressure, partition coefficient, biodegradation data) as well as toxicological data. Where a company performs tests to support an exemption, EPA recommends that it follow the testing guidelines developed by the Organization for Economic Cooperation and Development or EPA's Office of Toxic Substances (see EPA, "Health Effects Test Guidelines," EPA 560/6-82-001).

The term "possession or control" was defined in § 720.3(y) of the final PMN rule (48 FR 21722). However, that provision was stayed in the **Federal Register** of September 13, 1983 (48 FR 41132) and a new definition has been proposed in the **Federal Register** of December 27, 1984 (49 FR 50201). Until the new definition becomes final, exemption notice submitters should follow the September 13, 1983 clarification (48 FR 41132) and the preamble to the proposed definition (49 FR 50201).

b. *Data on impurities.* In the proposed rule, manufacturers were not required to provide EPA with any information on impurities. This information, however, is required in notices submitted under section 5(a)(1) of TSCA as part of the description of chemical identity. On several occasions it has proved critical in the Agency's assessment of risks posed by a new chemical substance. Therefore, EPA believes that it is necessary to require information on impurities in the final exemption rule. Section 723.50(e)(1)(iii)(D) of the final rule requires the manufacturer to identify impurities anticipated to be present in the exempt substance and their weight percent in the total substance. If there are unidentified impurities, the notice must include an estimate of their total weight percent. Information on impurities must be provided to the extent that it is known to or reasonably ascertainable by the submitter.

c. *Polymer identity.* The final rule has also been revised so that information required on polymer identity is the same as that required in § 720.45 of the PMN rule. To the extent the information is known or reasonably ascertainable, companies must indicate the typical composition of each monomer and other reactants used in the polymer (by weight percent of total monomer); the maximum residual of each monomer present in the polymer; and a partial or incomplete structural diagram. The notice must also provide estimates of the minimum number-average molecular weight of the polymer and the amount of low molecular weight species below 500 and below 1,000 molecular weight, and it must describe how the estimates were made. In the section 5 notice review program, EPA has frequently found this information important in assessing new polymers and in characterizing their potential risks. For this reason, EPA believes that such information is necessary in exemption notices as well as in section 5(a)(1) notices.

For guidance on providing information on polymer identities, companies should refer to EPA's clarification of the PMN notification requirements (48 FR 41132).

d. *Generic name.* In the proposal, there were no provisions for developing generic chemical names to protect confidential chemical identities. However, EPA intends to publish the identity of chemical substances manufactured under the exemption (see unit III.D of this preamble); therefore, the final rule requires manufacturers of exempt chemical substances to develop and submit to EPA generic chemical names masking the identity of the substance if they claim the substance's specific identity as confidential. The name must be only as generic as necessary to protect the confidential chemical identity and should reveal the specific chemical identity to the maximum extent possible.

It is important for manufacturers who claim chemical identity confidential to provide generic names; if a generic name is not provided, EPA may develop its own name and publish it on the list of exempted chemicals. This name may be less acceptable to the manufacturer than one it could have developed. For further discussion of generic names and confidentiality, see Unit II.B.10 of this preamble.

e. *Description of use.* In the proposal, manufacturers of low volume chemical substances would have been required to provide a brief use description by function and application in their exemption notices. Examples of function/application use descriptions are: Surfactant in automobile spray wax, colorant for paper and other cellulosics, and antioxidant in fuel oils and lubricants.

Section 723.50(e)(1)(iv) generally retains this requirement and further specifies that the submitter must indicate whether the use or uses are industrial, commercial, or consumer. However, the final rule drops the requirement that the use description "must be specific enough to indicate the typical circumstances of exposure, including routes of exposure, associated with new chemical substances." This sentence raised concern among commenters, some of whom believed it implied the need for extensive and detailed descriptions. EPA eliminated it from the final rule because it believes that a description of use by function and application will generally provide enough information to determine circumstances of exposure. However, when EPA does not have sufficient information on use to characterize exposure, the exemption may be denied if warranted by toxicity concerns.

The use description requirements in the final rule are consistent with those of the TSCA section 5(a)(1) notice form for new chemical substances. For guidance on developing use descriptions, or on providing other information in the exemption notice, such as chemical indentity, see the EPA "Instructions Manual for Premanufacture Notification of New Chemical Substances," available from the Office of Toxic Substances, TSCA Assistance Office, and EPA's **Federal Register** notice clarifying the PMN rule (48 FR 41132).

Several commenters suggested that use descriptions should be required only if the uses are known to the manufacturer. This suggestion was not adopted in the final rule. EPA believes that it is reasonable to require manufacturers, as a condition of the exemption, to ascertain the uses to which their products will be put and to provide that information to EPA. Because the use must be described only in relatively general function/application terms EPA believes that this requirement will not be burdensome.

f. *Exposure and other data.* Companies intending to manufacture a substance under this exemption are not required to provide information on exposure or exposure controls. However, they should recognize that EPA, without specific information on exposure, release, and controls will make reasonable assumptions, based on use, in reviewing the substance. Where there may be some concern for toxicity, manufacturers may wish to provide EPA with more information on exposure, release, or controls. In many cases, this information may eliminate potential EPA concerns. However, § 723.50(e)(1)(viii) requires that, where a manufacturer provides information on exposure controls or other controls to support its exemption notice, the manufacturer must maintain those controls throughout the exemption.

g. *Sanitized copy of notice.* The final rule requires the submitter to provide a sanitized copy of the notice. This provision, while not in the original

proposal, is included in the final rule to safeguard the confidentiality of the submission. This sanitized copy submission requirement is similar to requirements contained in the PMN rule (40 CFR 720.80(b)(2)), the polymer exemption rule (40 CFR 723.250), and the exemption rule for substances used in or for the manufacture or processing of instant photographic and peel-apart film articles (40 CFR 723.175).

5. Customer Notification

The proposal and the final rule require companies holding an exemption to submit a new exemption notice before manufacturing the exempt chemical substance for a use not described in the original notice. (This would include changes from one class of use to another—e.g., from industrial to consumer uses—as well as changes in function/application within these classes.)

Several commenters stated that this requirement raised difficulties because companies might not know of new uses developed by their customers. One commenter—an industry trade association—suggested that EPA could address these difficulties by requiring the manufacturer to notify customers of use restrictions. Section 723.50(j) of the final rule adopts this suggestion. The rule does not specify how companies must notify customers of use restrictions, but rather leaves the form of notification up to the exemption holder. However, as part of the rule's recordkeeping requirements (see Unit II.B.7 of this preamble), manufacturers are expected to keep records documenting notification.

EPA believes that this requirement is necessary because EPA's 21-day review will be based on the use description in the exemption notice. A change in use may lead to substantially different conditions of exposure. Therefore, EPA believes that it is appropriate to require the manufacturer to take reasonable steps to ensure that the exempt substance is used as intended (and as reviewed by EPA).

6. Notification of Changes in Site of Manufacture or Use

The proposal would have required manufacturers to renotify EPA if they manufactured a new chemical substance at a site of manufacture or for a use not reported in the exemption notice. Several commenters suggested that this requirement was unnecessary. Site of manufacture and use, however, will be important elements in EPA's 21-day review; changes in site or use might lead to considerably different exposure. Therefore, EPA believes that it is necessary to retain the requirement that companies submit a new exemption notice before either of these elements changes.

Several commenters suggested that it would be unnecessarily burdensome to comply with these renotification requirements. EPA, however, believes that the burden should be minimal. EPA assumes that submitters will be able to identify likely sites of manufacture and uses with reasonable accuracy in their original notices. Therefore, companies will have to renotify EPA infrequently.

7. Recordkeeping

The proposed rule required manufacturers to maintain records pertaining to production volume for 5 years after the final date of manufacture of the exempt substance. Many commenters pointed out that this requirement could mean that records might have to be retained almost indefinitely; commenters also suggested that this requirement was particularly difficult for production volume records, which are typically kept for only 5 years.

In response, EPA has modified the recordkeeping requirements. Section 723.50(o)(1) of the final rule requires manufacturers of exempt chemical substances to maintain production volume records for 5 years after the date of their preparation. In other words, exemption files must include production volume records for the previous 5 years. Manufacturers must also maintain (1) documentation of information in the exemption notice, and (2) documentation of compliance with the terms of the exemption. Documentation of compliance includes available records documenting site of manufacture and uses, customer notifications, etc. Like the production volume records, documentation of information in the notice and of compliance must be retained for 5 years after its preparation.

8. Standards for Denial of Exemption

The proposal stated that EPA would deny an exemption for a chemical substance during its abbreviated review if "the new chemical substance does not meet the terms of this section, or [if] unresolved issues concerning toxicity or exposure require further review." Several commenters suggested that it was inappropriate for EPA to deny an exemption simply because of "unresolved issues"; EPA should deny an exemption only when there was clear evidence that a substance was not eligible.

EPA disagrees with this comment and is retaining the proposed language in §723.50(g)(1) of the final rule, with minor editorial modifications. EPA has based its "no unreasonable risk" finding in part on its experience in the PMN process, which indicates that within 2 to 3 weeks of notice submission it can identify problematic chemical substances requiring more detailed review. In some cases, such substances are selected for more detailed review because of "serious unresolved issues," rather than because of affirmative evidence that a substance may be a problem. EPA believes that its ability to deny an exemption for the same reasons is an essential element of the rule and the no unreasonable risk finding.

EPA would not deny an exemption under this standard simply for speculative reasons. Instead, exemptions would be denied where serious concerns were raised, and more time or information was necessary to address them. For example, a chemical substance might be an analogue of a suspected carcinogen, or it might raise other toxicity concerns, but the potential for exposure might be unclear. This would be a particular concern where limited information was provided by the notice submitter or exposure fell outside the control of the manufacturer. In such cases, further review might be necessary to ensure that the manufacture and use of the exemption candidate would be safe.

In some cases, the submitter may be able to provide EPA with information during the 21-day review period that would resolve an issue, and manufacture would not be delayed. However, where a serious issue concerning the safety of the chemical substance cannot be resolved during the review period, it is important that EPA have the authority to reject the exemption.

9. Revocation

The proposal established procedures by which EPA could revoke an exemption for a given chemical substance after the review period ended. EPA would take such an action if new information indicated that the substance did not meet the terms of the exemption.

In general, EPA has retained the basic approach of the proposal, although it has modified the specific terms in several respects. Under the final rule, if EPA makes a preliminary determination that the substance does not meet the terms of the exemption after the review period has ended, it will notify the manufacturer by certified letter. EPA might reach this conclusion if new information indicated that the substance was not eligible (e.g., new data might be received on the exempt substance

showing significant risk potential). The manufacturer will have 15 days from written notification to submit objections to the determination or an explanation of its diligence and good faith in attempting to meet the terms of the exemption. If the manufacturer was manufacturing, processing, distributing in commerce, or using the substance at the time of the notification and submits objections or an explanation or both within 15 days, it may continue to manufacture, process, distribute in commerce, and use the substance while EPA considers the objections or explanation.

If a manufacturer is not manufacturing, processing, distributing in commerce, or using the chemical substance at the time it receives notification from EPA, it cannot resume manufacture until EPA determines that the substance meets the terms of the exemption or until a PMN has been submitted and the notice review period has ended without action by EPA.

This provision modifies the proposal which would have allowed the manufacturer to continue commercial activities after notification only if it were manufacturing the substance at the time of notification. Several commenters on the proposal suggested that these standards were unfair to batch processors who might not be in production at the time they received a notice of ineligibility. EPA believes it has addressed this problem by expanding the provision to allow manufacture to continue if the manufacturer was manufacturing, processing, distributing in commerce, or using the substance at the time of the notification. Thus, a batch manufacturer would not be adversely affected if it is between batches but still processing, distributing, or using the chemical substance previously produced. Although some companies will still be at a disadvantage under this approach, EPA believes that ineligible chemical substances should not be manufactured under an exemption. For this reason, the Agency believes that it is inappropriate to allow companies to begin manufacturing a substance under an exemption after information has been received indicating the substance is not eligible. The costs associated with this requirement should be minimal, because revocation procedures will probably have to be invoked only infrequently.

Several commenters stated that a 15-day period is not adequate to allow objections to be filed. In the final rule, EPA has modified this provision somewhat, requiring a response within 15 days of written instead of telephone notification. In its written notification, the Agency intends to provide specific questions about the substance's eligibility, so that the manufacturer will be able to respond to EPA's particular concerns. EPA believes that 15 days is adequate time for the manufacturer to submit objections and/or an explanation of its due diligence and good faith efforts to meet the terms of the exemption.

Under the final rule, like the proposal, EPA will respond to the manufacturer's objections and explanations within 15 days. If EPA determines that the substance meets the terms of the exemption, the manufacturer could continue or resume manufacture under the exemption. If EPA determines that, while the substance does not meet the terms of the exemption, the manufacturer acted with due diligence and in good faith to meet the terms of the exemption and the manufacturer was manufacturing, processing, distributing in commerce, or using the substance at the time of the notification, the manufacturer may continue to manufacture, process, distribute in commerce, or use the substance if it submits a PMN under section 5(a)(1) of TSCA and the PMN rule within 15 days of the final notification by EPA. If such a manufacturer were to continue to manufacture, process, distribute in commerce, or use the substance without submitting a PMN, EPA would bring an enforcement action.

If EPA determines that, despite the company's objections or explanation, the manufacturer did not act diligently and in good faith, the company must cease manufacture, processing, distribution in commerce, and use within 24 hours of telephone notification. This provision slightly modifies the proposal requirements for companies determined by EPA to be acting without due diligence or in bad faith. Under the proposal, such companies would have been required to cease manufacture within 24 hours of EPA's initial notification. Under the final rule, these companies may continue commercial activities if they file objections.

In determining whether a manufacturer exercised due diligence and good faith in attempting to comply with the rule, the Agency would consider many factors, and decisions would be made on a case-by-case basis as an exercise of the Agency's discretion. For example, a manufacturer would not be considered to have exercised due diligence and to have acted in good faith if it (1) deliberately falsified information in the exemption notice, (2) failed to provide relevant toxicity data on the new chemical substance in its possession or control to EPA, or (3) knowingly changed the uses described in the notice after beginning manufacture.

Action under this provision of the rule would not prevent EPA from using its authority to bring an injunctive action under section 17 of TSCA to prevent further manufacture, or, if the substance presents an imminent hazard, action under section 7 of TSCA. In addition, any manufacturer who failed to meet the terms of the exemption intentionally or who submitted false or misleading information would be subject to an enforcement action.

10. Confidentiality

Section 723.50(k) of the final rule specifies confidentiality procedures. These procedures are essentially the same as those in the proposal and in § 720.80 of the PMN rule. They take into account various requirements under the Act, including the need to provide nonconfidential information to the public, give EPA information it needs to respond to Freedom of Information Act requests, and allow persons to assert claims of confidentiality with minimum burden.

Under this exemption, a person may assert a claim of confidentiality for any information submitted to EPA. To do so, submitters must clearly indicate on the exemption notice or attached document (e.g., by circling, underlining , or bracketing) the information that they wish to claim as confidential. Only the information claimed as confidential should be identified as confidential. A submitter should not simply stamp "confidential" on the page which contains both confidential and nonconfidential information.

As discussed in Unit II.B.4.d of this preamble, § 720.50(k)(3) of the final rule requires that submitters provide a sanitized copy of the exemption notice in which all confidential information has been deleted. The final rule also requires submitters to develop and submit generic chemical names if they claim chemical identity confidential. (See Unit II.B.4.d.) In some cases, companies may develop a generic name that EPA believes is more generic than necessary to protect confidential chemical identity. In this case, EPA, using the procedures in § 720.85 of the PMN rule, will propose to the submitter a more specific name. If that name is unacceptable, the submitter must explain why EPA's name is not sufficiently generic to protect confidential chemical identity and propose an alternative. EPA

will publish the submitter's alternative name if it is acceptable. Otherwise, EPA will use for publication in the **Federal Register** the generic name it devised 30 days after giving notice to the submitter.

Sanitized copies of the exemption notices will be placed in the public file. The generic names will be maintained on a list of exempted substances, which EPA will update once a month. These updates will be published monthly in the **Federal Register** and periodically in the *TSCA Chemicals-in-Process Bulletin.*

III. Major Issues

A. Volume Limits for Low Volume Chemical Substances

The final rule retains the proposed 1,000 kilogram per year limit for low volume chemical substances, but as explained in Unit I.C of this notice, the final rule does not retain the greater than 1,000 kilogram per year production volume limit category.

EPA selected 1,000 kilograms per year because it is high enough to provide relief to a significant number of new chemical substances (approximately 20 percent of new chemical substances), while low enough to set a reasonable bound on possible risks. EPA is convinced that the safeguards built into the low volume exemption are adequate to protect against unreasonable risks at 1,000 kilograms per year, particularly with the extention of the review period to 21 days. Furthermore, the 1,000 kilograms or less per year limit was chosen because it is consistent with the volume trigger for full new chemical notification under the European Economic Community's Sixth Amendment.

B. Exclusion of High-Risk Chemical Categories

In the proposal, EPA suggested as an alternative that a list of high-risk chemical categories, based on structure, be developed. Individual new chemical substances falling into these categories would not be eligible for the exemption. The Dyes Environmental and Toxicology Organization, Inc. (DETO), in effect suggested this approach in its exemption petition for dyes when it stated that EPA might consider excluding benzidine,o-tolidine, and o-dianisidine-based dyes, and dyes containing N-N-dimethyl-4-aminobenzene analogues. The basis for this exclusion would be structure-activity information and test data which suggest that individual members of these categories might cause serious chronic health effects. Several commenters suggested that such an approach would be advisable and would significantly strengthen the exemption.

EPA did not adopt this approach because it would be unnecessarily resource-consuming to develop a list of excluded categories of chemical substances. EPA believes that any general list of categories would provide no more protection than that already provided in the proposed rule by EPA's 21-day review. New chemical substances belonging to highly suspect classes, such as the classes identified by DETO, would be eliminated unless exposure information provided by the submitter demonstrated their safety under conditions of manufacture and use.

C. Subsequent Manufacturers

Under the final rule, only one manufacturer is allowed to manufacture a given substance under the exemption. Subsequent manufacturers of the same chemical substance would not be eligible for the exemption; they would be required instead to submit a premanufacture notice. This requirement is necessary because the risk assessment for the exemption assumes that total production of chemical substances in the category will not exceed the production volume limit of 1,000 kilograms per year.

Several commenters on the proposal criticized this approach on the grounds that it could result in unwarranted administrative complexities and that it might delay manufacture. As an alternative, commenters suggested that EPA allow subsequent manufacture under the exemption. EPA would have the opportunity to review the exemption notice and revoke the exemption for all exemption holders if it identified any concerns.

EPA rejected this approach because it could allow the aggregate production volume to grow well beyond the low volume limit without full premanufacture review. The exemption is based on the premise that the exempted substances will in fact be low volume—that is, below 1,000 kilograms per year. Even though it appears relatively unlikely that second or third manufacturers would produce the same substance under a given low volume exemption, this possibility could theoretically lead to the production of an exempt substance at volumes many times greater than the exemption volume limit. Also, it would be possible for companies to circumvent the volume limit by buying an exempt substance from several different manufacturers or importers, yet the substance could still be processed or used at a single site. EPA does not believe that the 21-day review will be adequate to identify such situations consistently. For these reasons, EPA believes that it is inadvisable—and inconsistent with its risk assessment—to allow multiple manufacturers under the low volume exemptions.

EPA also believes that commenters have exaggerated the administrative complexities and potential for delay associated with the requirement that subsequent manufacturers of low volume substances submit a premanufacture notice. The rule establishes a system to allow companies with *bona fide* intent to manufacture a substance under a low volume exemption to determine whether their substance is already being manufactured under that exemption. EPA now operates a comparable *bona fide* system under the premanufacture notice program and finds it effective and workable. If manufacturers do not wish to face the delay associated with the *bona fide* process, they can submit an exemption notice; of another company is already manufacturing the substance under the exemption, the notice would be rejected. However, because this would happen only very rarely, it is likely that few if any manufacturers would be rejected on these grounds.

To simplify the administration of this rule, EPA will maintain a list of exempted substances and will have monthly additions to the exemption list published in the **Federal Register** and periodic updates in the *TSCA Chemicals-in-Process Bulletin.* As a result, prospective manufacturers of low volume substances may be able to determine whether a given substance is eligible for the low volume exemption. However, because substances will be listed under generic names when their identities are confidential, it may still be necessary for companies to make *bona fide* inquiries, or to submit exemption notices without absolute certainty that another company is not already making the substance under the exemption.

D. Public Notice

In the preamble to the proposal, EPA stated that exempt substances will not be added to the TSCA Chemical Substance Inventory because they have not undergone section 5 premanufacture review. As a result, the public would have no way of knowing which chemical substances were being manufactured under the exemption. This would reduce public knowledge concerning EPA's conduct of the exemption review process, and would make it difficult for chemical companies to determine if a particular chemical substance was being

manufactured under an exemption. Without a list of exempt substances, manufacturers would find it more difficult to ascertain whether a specific new chemical substance was already being manufactured under an exemption and therefore whether it was eligible for the low volume exemption.

For these reasons, EPA will maintain a list of substances that have cleared exemption review, and will publish updates to the names of the substances added to the low volume exemption list. These updates will appear monthly as notices in the **Federal Register** and appear periodically in the *TSCA Chemicals-in-Process Bulletin*. If the identity of a given chemical substance is claimed confidential, EPA will publish a generic chemical name supplied by the manufacturer, or one that it has developed as described in Unit II.B.10 of this preamble. In addition, EPA will maintain a low volume exemption public file comparable to the PMN public file. Sanitized versions of exemption notices submitted under this rule will be placed in the file. Companies are required to submit sanitized notices, with all confidential material deleted, together with any notices containing confidential business information.

Together, the published low volume exemption list and the public file will give the public a reasonable understanding of the scope of the program and the nature of the substances being manufactured under the exemption. They will also simplify procedures for companies intending to manufacture substances under the exemption.

IV. Regulatory Analysis

To support the August 4, 1982 proposal, EPA prepared a risk assessment and an economic analysis. After reviewing public comments, EPA revised these documents, modifying them where necessary to reflect changes in the final rule. The final documents are available in the public record of this rulemaking. The documents are summarized briefly below. This unit also explains the basis for the Agency's finding of no unreasonable risk.

A. Summary of Risk Assessment

1. General Approach

In its analysis of the risks posed by low volume chemical substances, EPA evaluated the risks that could be associated with toxic volume substances without the various restrictions or conditions that could be included in an exemption. This analysis provided an estimate of possible risks from such substances and a basis for determining whether or not specific safeguards would be needed. EPA then considered the impact of the exemption conditions to determine the extent to which they would reduce the risks. Although such reductions in risk were not readily quantifiable, EPA believes that the provisions of the exemption will reduce the risks estimated in the assessment so that unreasonable risks will not occur.

EPA's general approach in evaluating potential risks from low volume substances involved:

(1) Selecting hazards (i.e., adverse health and environmental effects) that are of concern in protecting human health and the environment.

(2) Determining a representative range of potencies for assessing each of the effects of concern.

(3) Defining exposure scenarios.

2. Low Volume Chemical Substances

a. *Analysis of potential health and environmental effects.* In analyzing low volume chemical substances, EPA selected a range of potencies for certain health effects for hazard evaluation. This procedure is justified by the fact that nothing inherent in low volume substances limits their toxicity. However, very few new low volume substances are likely to exhibit the upper ranges of toxicity represented in the risk assessment.

b. *Exposure assessment.* The exposure assessment illustrates that while low production volume in itself sets bounds on potential for exposure and environmental release, the manufacture, processing, and use of such substances can in some circumstances result in significant exposure.

i. *Occupational exposure.*—Low production volume typically limits the total number of workers who may be exposed to chemical substance, as well as the duration and frequency of exposure. However, the actual exposure levels for individual workers may be substantial. Based on PMN data, about four workers are exposed, on the average, during manufacture of chemical substances produced in quantities of 1,000 kilograms or less per year. Duration of exposure associated with manufacture averaged about 5 hours per day, and the average number of days of production per year was 62.

Only a limited number of PMNs included estimates of workplace concentration. The average concentrations associated with manufacture were most often in the ranges of 0–1 and 1–10 mg/m^3 for airborne solids and in the 1–10 ppm range for vapors. EPA's evaluation of Occupational Safety and Health Administration (OSHA) data (USEPA–OTS, "Site-Limited Intermediate Exemption: Occupational Exposure and Environmental Release Assessment," March 19, 1982) indicated an average TWA concentration of 0.14 mg/m^3, with a maximum value of 0.6 mg/m^3 for airborne solids, and an average TWA of 6 ppm, with a maximum value of 72 ppm for vapors. EPA believes that data obtained from OSHA monitoring activities provide more reliable estimates of workplace concentrations.

EPA's analysis indicated that processing and use operations may result in a higher level of exposure than manufacturing operations. Also, the average number of workers exposed during processing and use operations exceeded the average number typically exposed during manufacture. The number averaged 12 workers for a substance processed in quantities of 1,000 kilograms or less per year.

ii. *Consumer exposure.*—Consumer exposure was assessed for five use scenarios—photographic chemicals used in home darkrooms, spray adhesives, paints, dyes, and fragrances used in soaps, detergents, or shampoos. The use scenarios, which reflect actual uses reported in PMNs, were selected to represent a range of potential exposure situations.

According to EPA's analysis, the individual lifetime average daily exposures in these scenarios ranged from negligible levels for dyes in dyed fabrics to 0.0016 mg/kg/day for a fragrance in soap. Many of the scenarios could result in the exposure of relatively large numbers of consumers. At the 1,000-kg/yr production level the estimated number of consumers exposed ranges from 440,000 for a fragrance in shampoo to 26,000 for an additive in spray adhesives. Because the concentration of the substance in final products would remain constant, reduction in production volume is likely to reduce only the number of consumers exposed, not the exposure to each individual.

iii. *Environmental release.*—The exposure analysis indicated that the average quantity released to water is 0.08 percent of production volume, with an upper bound of 0.4 percent. However, some processing and industrial uses result in more substantial release rates with a range from 0.3 to 25 percent of the production volume released to water. Releases to air average 0.03 percent of production volume, with a 0.2 percent upper bound. Discharges of a new low volume substance from a single site processing 1,000 kilograms of the substance were estimated to produce

environmental concentrations ranging from <0.0005 to 0.53 ppm in a receiving stream whose stream dilution factor was equal to the national median for streams receiving effluents from industrial facilities.

In some cases, environmental releases from consumer uses equaled the total production volume. However, the actual magnitude of environmental exposure was determined to be insignificant because of the low production volume, the wide distribution of release, and the small amount of the new substance typically contained in consumer products.

c. *Estimated risks.* Given the above exposure and environmental release estimates, EPA evaluated the risks to workers, consumers, aquatic organisms, and persons living near a plant manufacturing or processing low volume chemical substances.

Although EPA expects that most low volume substances will present low risks, the assessment illustrated that workers could be subjected to significant health risks from potent or moderately potent carcinogens, teratogens, neurotoxins, or reproductive hazards. Airborne concentrations of low volume substances appear to present negligible risk to general populations, except when the released substance is a highly potent carcinogen or teratogen. Aqueous releases that may contaminate drinking water also appear to present low risks, except where the released substance is a highly potent toxic agent or where direct discharge occurs at the maximum release estimated by EPA.

Consumer exposure under most of the scenarios considered appears to present significant risks if the new substance is at least a moderately potent carcinogen. In addition, potent and moderately potent teratogens, neurotoxins, and reproductive hazards might also present substantial risks.

Environmental risks from most low volume substances would not present substantial risks to aquatic organisms at estimated discharge rates. However, EPA's analysis also demonstrates that it is reasonable to expect that a small number of substances may present substantial risks to aquatic organisms at anticipated high stream concentration levels.

d. *Chemical substances manufactured at 1,000 kilograms or less per year.* For chemical substances manufactured at 1,000 kilograms or less per year, fewer workers and consumers (than those associated with higher production volumes) are likely to be exposed. Actual exposure at this level of production will in most cases be substantially less than that indicated in the exposure analysis, which is based in part on available data from relatively large scale operations.

For small scale operations to reach the workplace exposure indicated in the exposure assessment, production of the total 1,000 kilograms generally would have to take place in a relatively short time— perhaps as short as a day or two. In this case, the duration of exposure would be low, and therefore the potential for adverse chronic effects would be significantly reduced. Where manufacture took place over a relatively long period, workplace exposure would be unlikely to reach the levels identified in the exposure assessment (USEPA–OTS, "Site-Limited Intermediate Exemption: Occupational Exposure and Environmental Release Assessment," March 19, 1982).

Small volume operations are typically conducted over an extended period only if there is a need for careful control (for example, to ensure product purity); this control would be likely to reduce exposure. Because of the small daily production volume, the small size of equipment, and the localized nature of operations, effective control is possible, and environmental release and exposure to the worker from activities such as material transfer, sampling, and cleanup is minimized.

In addition, substances produced at 1,000 kilograms or less per year will not typically receive wide distribution. In many cases, they are produced for limited purposes or do not achieve commercial success and thus do not remain on the market long. Therefore, widespread or long term exposure to commercial users or consumers is unlikely.

3. Risk Under Exemption Conditions

There are several elements of the exemption that will substantially reduce the risks to human health and the environment identified in the risk assessment. The most important of these elements are the low risk associated with low volume and the 21-day EPA premanufacture review.

The basis for low risk associated with low volume is the inherent expectation of low exposure potential because of the small quantities being manufactured. Risk will be reduced by the exclusion from the exemption of chemical substances where EPA determines that they may cause serious human or environmental effects under conditions of manufacture, processing, distribution in commerce, use, and disposal.

EPA's 21-day premanufacture review for all chemical substances manufactured under this exemption will exclude from exemption those chemical substances that fail to meet these standards, and will provide a level of protection equivalent to that now provided in the PMN program.

B. Summary of Economic Analysis

1. Introduction

To perform the economic analysis of the low volume exemption, the Agency created a data base from a sample of about 500 PMNs which represented the total submitted during a specific period in 1980 and 1981. This data base provides an overview of the Agency's experience with the PMN program. The Agency reviewed this data base to determine types of chemical substances being submitted for review, their projected production volumes, their intended uses, and in some cases their potential toxicity. This information was used to estimate the number of new substances that would be likely to be eligible for an exemption.

The Agency also reviewed the current cost of PMN requirements for manufacturers of new low volume substances; it estimated the direct relief to industry, reflected in decreased reporting costs and decreased time in bringing a new substance to the market, that would result from different exemption alternatives. It estimated direct savings to EPA resulting from decreased PMN review costs. These figures were used to derive quantitative estimates of benefits.

In assessing benefits, EPA also considered nonquantifiable benefits, such as increase in chemical innovation. Although the Agency could not attach specific figures to these benefits, they are likely to be substantial. EPA's analysis of the impact on industry of the PMN rule suggests that the nonquantifiable costs of the program may be greater than the quantifiable costs. By extension it appears reasonable to assume that the nonquantifiable benefits of an exemption may be greater than those that can be quantified.

The complete economic analysis consists of an economic support document and a supplemental memorandum and can be found in the public file.

2. Current Impact of PMN Program

As a baseline for its economic analysis, EPA estimated the annual direct costs of submitting PMNs on low volume substances. A review of the sample of 500 PMNs indicates that about 21 percent of all PMNs (210 out of the annual submission rate of 1,000 PMNs) are substances produced in quantities of

1,000 kilograms or less per year. Using the current PMN reporting costs, the annual reporting costs to industry for low volume substances can be estimated to be between $273,000 and $1,575,000.

Besides these direct filing costs, industry is also faced with additional costs from the TSCA-imposed 90-day PMN review period (delay costs), from having to assert and possibly substantiate confidential business information claims, and from uncertainty.

3. Benefits of the Exemption

The Agency estimated the number of new chemical substances that would be eligible for the exemption by counting the number of chemical substances for which there are PMNs that fall under the exemption. From this number, EPA then calculated the annual net benefits of the exemption. These benefits include the actual cost savings to industry for not having to submit PMNs and the savings from the reduction of the 90-day delay. The costs of having to submit the exemption notices are subtracted from the gross savings to obtain the net savings to industry.

Assuming a rate of 1,000 PMNs a year, the low volume exemption would exempt about 210 new substances per year; net benefits to industry would be between $460,000 and $1,450,000 or between $2,190 and $6,905 per exempted chemical. The "low" end of the net benefits range was based on the lowest estimates of the cost to submit a PMN; the "high" end of the benefits was based on the highest estimates of these figures. This cost figure also includes the discounted costs of submitting a PMN in the third year for chemical substances whose production volume would exceed the volume limit by the third year of production.

The economic analysis also indicates that the exemption may lead to direct savings in EPA resources that would otherwise be spent reviewing PMNs. For low volume chemical substances, the saving would be $19,000, or $91 per exempted chemical. These figures reflect the difference between costs of reviewing a PMN and estimated costs of reviewing an exemption notice. Of course, EPA resources would not be freed if the availability of the exemption led to an increase in innovation and a significant increase in the overall number of submissions to EPA.

In addition to the benefits which EPA has quantified, there are certain benefits which the Agency has examined qualitatively. Chief among these are the benefits of reduced uncertainty and of increased innovation. The reduction in the length of the review period from 90 to 21 days would reduce the period of uncertainty about the outcome of EPA's review of the notice (whether the substance would be manufactured, when, and under what restrictions, if any, etc.). Also, by reducing direct PMN filing costs and delay costs, the exemption will encourage chemical innovation. These reductions will mean that substances which formerly were not profitable to introduce would not be acceptable investments. The net value of this additional innovation would constitute additional benefits, both to the chemical industry and to society.

C. Finding of No Unreasonable Risk

1. Statutory Background

Under section 5(h)(4) of TSCA, EPA is authorized to exempt the manufacturer of any new chemical substance from all or part of the requirements of section 5 if EPA determines that the manufacture, processing, distribution in commerce, use, and disposal of the substance will not present an unreasonable risk of injury to health or the environment. Section 26(c) of TSCA provides that any action authorized under TSCA for an individual chemical substance may be taken for a category of such substances.

The term "unreasonable risk" is not defined in TSCA. The legislative history indicates that determination of whether a risk is unreasonable requires a balancing of the probability and severity of harm from the substance or category of substances against the cost of the regulatory action to society. Because EPA's determination of the reasonableness of risk involves a consideration of factors such as environmental effects, use patterns, and market potential, which are frequently difficult to define and quantify precisely, EPA must rely not only on the available data but also its professional judgment. Congress recognized that the implementation of the unreasonable risk standard "will vary depending on the specific regulatory authority which the Administrator seeks to exercise." [Legis. Hist. at 422]

2. EPA's Approach To Making the No Unreasonable Risk Finding

To determine whether the category of substances manufactured under the exemption presents an unreasonable risk, the Agency should consider not only the inherent risks presented by the overall exemption category, but also the extent to which specific exclusions or adjustments of the overall category definition have mitigated such potential risks. EPA must then analyze the effect on risk of any further conditions imposed on the exemption. For example, manufacturers who intend to use the exemption must submit only a limited notice, which may affect the Agency's ability to identify risk. Because the effect of the exemption is to modify general PMN requirements, EPA should also compare the absolute risk posed by the same substances if the substance had been subject to the full notice submission requirements and minimum 90-day EPA review period.

Congress did not intend the section 5 review process to eliminate entirely all risk resulting from manufacture, processing, distribution in commerce, use, and disposal of new chemical substances, nor is it possible to do so. While section 5 gives EPA the opportunity to review all new chemical substances, the Agency is authorized to ban such substances or otherwise control against risks only (1) when it can show that the substances will present an unreasonable risk of injury to health or the environment (section 5(f) of TSCA), or (2) when there is insufficient information to evaluate the risks and EPA finds either that the manufacture, processing, distribution in commerce, use, or disposal may present an unreasonable risk, or that the substance will be produced in substantial quantities and will be released in substantial amounts or will result in significant or substantial human exposure (section 5(e) of TSCA). To the extent that certain risks presented by members of a category of substances would not have been regulated by EPA during a full PMN review, assuming EPA's maximum exercise of its section 5 authorities, such risks could not be considered to be risks posed by an exemption rule.

There are two methods of calculating the benefits of the exemption which should be weighed in determining whether exempt substances will present an "unreasonable" risk. First, EPA can consider the benefits in a manner analogous to the way it would consider them if the Agency were evaluating a particular member of the category during an ordinary PMN review. Under this approach the evaluation would focus on the benefits of the substances to society, and the extent to which any regulation of the substances necessary to address risk concerns would reduce or eliminate such benefits. The basis for considering this type of benefits information is that Congress arguably did not intend to exempt from premanufacture notice requirements any substances which were likely to have been subject to control under section 5(e) or 5(f). EPA thus would not consider

the reduced burden of the PMN or other benefits of reducing PMN requirements, because these costs would not be considered in making a regulatory decision on a PMN substance. One problem with focusing on the benefits of the substances in the category is that, while section 5(h)(4) contemplates granting exemptions by category, it is difficult or impossible to predict accurately the nature of those benefits.

Under the second approach, EPA could consider benefits beyond those considered in an actual PMN review. As discussed in the proposed rule, a broader consideration of benefits would analyze, in addition to the benefits of the substances themselves, the reduction in the costs to society imposed by the full PMN requirements. There are strong arguments for taking such an approach in making a no unreasonable risk finding in the context of a section 5(h)(4) exemption. The legislative history indicates that EPA's unreasonable risk consideration should include effects on society beyond the benefits of a substance. In addition, unlike the review of an individual PMN, the costs of PMNs for substances which would be addressed by this exemption have not already been paid. Such direct costs would include the cost of preparing and submitting the PMN, and the cost of the delay in the introduction of the benefits of a new chemical. In addition, economic analyses have indicated that reporting and delay costs may discourage the introduction of new chemical substances. While elimination of these costs would not be a benefit that EPA would take into account in making an individual control decision on a new substance, they are real effects on society which result from EPA's exercise of its exemption authority and are thus appropriately considered in a section 5(h)(4) unreasonable risk finding for a category of substances.

3. Exemption Conditions

There are several exemption provisions that directly or indirectly reduce the likelihood that exemption substances would adversely affect health or the environment. EPA believes that these provisions together will significantly limit risk and will adequately support a finding of no unreasonable risk, given the bounds on exposure associated with the exemption category and the benefits of the exemption.

The major provisions that limit risk are discussed below:

a. *Production volume limitation.* A critical element of the finding is that low volume chemical substances manufactured in volumes of 1,000 kilograms or less per year have limits on exposure potential. The number of workers exposed and the duration and frequency of exposure is generally limited. Uses would be for the most part limited to specialty applications, and consumer exposure would not typically occur. Under some circumstances, significant numbers of consumers could be exposed, but the levels of exposure would usually be low.

b. *EPA review.* EPA's abbreviated review plays an important role in the exemption and in the finding of no unreasonable risk. In the final rule, EPA has strengthened this review by lengthening it from 14 to 21 days. During this period, the Agency will have sufficient time to identify any problems that were likely to have been identified in a full PMN review. If EPA determines that a new chemical substance is not eligible for an exemption, manufacture cannot begin. The manufacturer is then required to comply with TSCA section 5(a)(1) before the substance can be manufactured for commercial purposes.

c. *New information and EPA revocation.* In addition to these safeguards, the rule contains several other provisions that will further limit the possibility that exemption substances will present significant risks. Most important, the rule establishes procedures for revocation of the exemption if EPA later determines that the substance does not meet the conditions of the exemption. In addition, EPA has the authority to require documents relevant to an exemption from the manufacturer (in addition to the information provided in the exemption notice), and the manufacturer is required to submit promptly to EPA any new data indicating that a substance is ineligible. These provisions will ensure that eligibility for the exemption will be determined on the basis of the best available information, regardless of when the information becomes available.

4. Benefits

It is impossible to quantify the total benefits which may accrue to society from the individual substances subject to this exemption. Uncertainty about benefits is inherent in any action under TSCA which deals with a category of substances whose structure and uses are unknown. However, it is clear that the field of chemistry has been the source of many recent technological advances, particularly in the area of low volume specialty chemicals. In addition, it is obvious that a new chemical substance must present benefits to society by performing a new function, or performing an old function more efficiently or less expensively, or with less risk, or it would not have been developed or used. Therefore, EPA has concluded that the new chemical substances eligible for exemption, as a category and as individual substances, will present some significant benefits to society.

EPA was able to quantify some of the benefits to society which will result from this exemption that do not depend on specific knowledge about the benefits of the individual substances. First, as is indicated above, manufacturers submitting notices under this exemption will incur reduced reporting costs. Second, there will be a potential for significant reduction in the delay in introducing new substances. Manufacturers, and the general public, will be able to take advantage of the benefits of individual new low volume substances more quickly, including any increases in efficiency and decreases in cost.

Assuming that approximately 210 new chemical substances a year would be manufactured under the exemption, net benefits would be between $46,000 and $1,450,000 annually. Of this amount, a significant portion consists of the savings in costs due to reduced delay. Total industry costs associated with the PMN program are presently estimated at $3.715 to $9.915 million annually. The final exemption rule will therefore reduce this cost to industry by about 12 to 15 percent.

5. Conclusion

Given the limitations on risk posed by substances manufactured under this exemption and the benefits that would be derived from them, EPA has determined that substances manufactured under the terms of this exemption rule will not present an unreasonable risk.

V. Judicial Review

To provide all interested persons an equal opportunity to file a timely petition for judicial review and to avoid so called "races to the courthouse," EPA has decided to promulgate this rule for purposes of judicial review 2 weeks after publication in the **Federal Register**, as reflected in **"DATES"** in this notice. The effective date has, in turn, been calculated from the promulgation date.

VI. Record

EPA has established a record for this rulemaking (Docket Number: OPTS–50032) which is available for inspection in Rm. E–107, 401 M St. SW., Washington, D.C. 20460. Persons who do not have access to the record in the

public reading room should contact Edward A. Klein, Director, TSCA Assistance Office (TS–799), at the above address for assistance.

The record includes all information considered by the Agency in developing this exemption proposal. The preamble to the proposal lists items entered into the record through June 1982. The list below identifies items entered into the record after that date. These lists together identify the complete rulemaking record:

57. Adhesives Manufacturers Association "Letter Endorsing the Chemical Manufacturers Association Petition for PMN Exemptions," August 13, 1981.

58. *USEPA–OTS.* "Letter from Edward A. Klein, Director, Chemical Control Division, to Bill Ahrens, Adhesives Manufacturers Association," September 14, 1981.

59. *USEPA–OTS.* "Premanufacture Notification: Proposed Exemption for Site-Limited Intermediate Chemical Substances Manufactured in Quantities of 10,000 Kg or Less Per Year," 47 FR 33896, August 4, 1982.

60. Comments received in response to proposed rule exempting certain new site-limited intermediates and low volume chemicals from premanufacture notice requirements, 47 FR 33896 (52 comments).

61. *USEPA–OTS.* "OTS–DETO Meeting Summary," Summary of meeting with Dyes Environmental and Toxicology Organization (DETO), Septemer 14, 1982.

62. *USEPA–OTS.* "Summary of Meeting with Brulin and Co., Inc.," October 4, 1982.

63. Transcript of public meeting on proposed rule exempting certain site-limited intermediates and low volume chemicals from premanufacture notice requirements, 47 FR 33986 (6 exhibits).

64. *USEPA–OTS.* "Questions for Participants in the Public Hearing," November 1, 1982.

65. Comments received in response to public hearing on proposed exemption for site-limited intermediates and low volume chemical substances (7 comments).

67. *CMA.* "Letter to Don R. Clay, Acting Assistant Administrator for Pesticides and Toxic Substances," June 2, 1983.

68. *USEPA–OTS.* "Response to Comments on Proposed PMN Exemption for Low Volume Chemicals," December 31, 1984.

69. Office of Management and Budget (OMB). "PMN Exemption Rules: Staff Option," November 7, 1983.

70. *SOCMA.* "Letter to William Ruckelshaus, Administrator of the Environmental Protection Agency," January 23, 1984.

71. *USEPA–OTS.* "Economic Impact Analysis of TSCA Section 5(h)(4) Exemptions: Low Volume and Site-Limited Intermediate Chemicals," September 1983.

72. *USEPA–OTS.* "Memorandum: Economic Analysis of the Final Exemption Rule for Low Volume Chemicals," Revising "Economic Impact Analysis of TSCA Section 5(h)(4) Exemptions, Low Volume and Site-Limited Intermediates Chemicals," October 26, 1984.

73. *USEPA–OTS.* "Risk Analysis in Support of the Proposed Exemption of Site-Limited Intermediates and Low Volume Chemicals," December 5, 1983.

74. *USEPA–OTS.* "Health and Environmental Risk Assessment of TSCA Section 5(h)(4) Exemption for New Low Volume Chemicals," revising "Risk Analysis in Support of the Proposed Exemption of Site-Limited Intermediate and Low Volume Chemicals," November 1, 1984.

75. USEPA–OTS. "Low Volume Exemption—Occupational Exposure and Environmental Release Assessment," March 1982.

76. USEPA–OTS. Memorandum "Engineering Assessment of the Final Exemption Rule for Low Volume Chemicals," October 30, 1984.

VII. Application of Executive Order 12291, Paperwork Reduction Act, and Regulatory Flexibility Act

This regulation does not satisfy any of the criteria for major regulation described in Executive Order 12291; therefore, EPA has determined that a Regulatory Impact Analysis is not necessary. The annual impact of the rule on the economy will not exceed $100 million; instead it will provide substantial relief to the regulated industry. The rule will not burden any particular geographic region and will not affect government agencies, except that it may reduce the burden of PMN review for EPA. The exemption will not adversely affect the ability of domestic manufacturers to compete with foreign manufacturers or vice versa and it will encourage chemical innovation. EPA expects that the net effect of this exemption rule on the economy will be positive.

This regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

As required by the Regulatory Flexibility Act (5 U.S.C. 605(b)), EPA hereby certifies that this rule will not have a significant adverse economic impact on a substantial number of small businesses. Instead, it will provide relief from the burdens of the present PMN requirements, and is likely to be particularly beneficial to small businesses. The Chemical Specialties Manufacturers Association, which represents many small businesses, has stated that "declines in the rates of projected innovation as a result of TSCA costs were on the whole substantial, and were particularly heavy for firms in smaller size classes." Since the exemption will reduce PMN filing costs and shorten production delays, small manufacturers will especially benefit from the rule.

In addition, small firms will benefit because they submit a disproportionately large percentage of PMNs on low volume chemical substances. According to the PMN data base, 31 percent of the PMN submissions by small firms have been on substances with projected production volumes of 1,000 kilograms or less per year, while only 21 percent of all PMNs have been on such substances. Therefore, the low volume exemption is likely to provide proportionately greater relief to these small firms. For this reason, the Agency has not prepared a Regulatory Flexibility Analysis for this rule.

The information collection requirements contained in this rule have been approved by OMB under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* and have been assigned OMB control number 2070–0012.

List of Subjects in 40 CFR Part 723

Chemicals, Environmental protection, Premanufacture notification exemption, Hazardous substances, Recordkeeping and reporting.

Dated: April 19, 1985.

Lee M. Thomas,

Administrator.

PART 723—[AMENDED]

Therefore, Chapter I of Title 40 of the Code of Federal Regulations is amended by adding a new § 723.50, to read as follows:

§ 723.50 Chemical substances manufactured in quantities of 1,000 kilograms or less per year.

(a) *Purpose and scope.* (1) This section grants an exemption from the premanufacture notice requirements of section 5(a)(1)(A) of the Toxic Substances Control Act (15 U.S.C. 2604(a)(1)(A)) for the manufacture of certain chemical substances manufactured in quantities of 1,000 kilograms or less per year.

(2) To manufacture a new chemical substance under the terms of this exemption, (i) a manufacturer must submit a notice of intent to manufacture 21 days before manufacture begins, as required under paragraph (e) of this section; and (ii) the manufacturer must comply with all other provisions of this section.

(b) *Definitions.* (1) "Act" means the Toxic Substances Control Act (15 U.S.C. 2601 *et seq*).

(2) The terms "article," "byproduct," "EPA," "health and safety study," "importer," "impurity," "known to or reasonably ascertainable," "manufacture," "new chemical substance" "person," "possession or control," "test data" have the same meanings as in § 720.3 of this chapter.

(3) The term "Assistant Administrator" means the EPA Assistant Administrator for Pesticides and Toxic Substances or any employee designated by the Assistant Administrator to carry out the Assistant Administrator's functions under this section.

(4) The term "category of chemical substances" has the same meaning as in section 26(c)(2) of the Act (15 U.S.C. 2625(c)(2)).

(5) "Director of the Office of Toxic Substances" means the Director of the EPA Office of Toxic Substances or any EPA employee designated by the Director to carry out the Director's functions under this section.

(6) The term "environment" has the same meaning as in section 3 of the Act (15 U.S.C. 2602).

(7) "Environmental transformation product" means any chemical substance resulting from the action of environmental processes on a parent compound that changes the molecular identity of the parent compound.

(8) "Metabolite" means a chemical entity produced by one or more enzymatic or nonenzymatic reactions as a result of exposure of an organism to a chemical substance.

(9) "Serious acute effects" means human disease processes or other adverse effects that have a short latency period for development, result from short-term exposure, or are a combination of these factors and that are likely to result in death, severe or prolonged incapacitation, disfigurement, or severe or prolonged loss of the ability to use a normal bodily or intellectual function with a consequent impairment of normal activities.

(10) "Serious chronic effects" means human disease processes or other adverse effects that have a long latency period for development, result from long-term exposure, are long-term illnesses, or are a combination of these factors and that are likely to result in death, severe or prolonged incapacitation, disfigurement, or severe or prolonged loss of the ability to use a normal bodily or intellectual function with a consequent impairment of normal activities.

(11) "Significant environmental effects" means either:

(i) Any irreversible damage to biological, commercial, or agricultural resources of importance to society,

(ii) Any reversible damage to biological, commercial, or agricultural resources of importance to society if the damage persists beyond a single generation of the damaged resource or beyond a single year, or

(iii) Any known or reasonably anticipated loss of members of an endangered or threatened species. "Endangered" or "threatened" species are those species identified as such by the Secretary of the Interior in accordance with the Endangered Species Act, as amended (16 U.S.C. 1531).

(12) "Site" means a contiguous property unit. Property divided only by a public right-of-way shall be considered one site. There may be more than one manufacturing plant on a single site.

(c) *Exemption categories.* Any person who intends to manufacture (including import) a new chemical substance in quantities of 1,000 kilograms or less per year may seek an exemption under this section for that chemical substance, subject to the conditions specified in paragraph (d) of this section. No more than one person may hold an exemption for a particular new chemical substance under this paragraph.

(d) *Exclusions*—(1) *Chronic effects.* A new chemical substance cannot be manufactured under this section if EPA determines, in accordance with paragraph (g) of this section, that the substance or a reasonably anticipated metabolite or environmental transformation product of it may cause serious chronic effects, including carcinogenic and teratogenic effects, under anticipated conditions of manufacture, processing, distribution in commerce, use, or disposal of the new chemical substance.

(2) *Acute effects.* A new chemical substance cannot be manufactured under this section if EPA determines, in accordance with paragraph (g) of this section, that the substance or a reasonably anticipated metabolite or environmental transformation product of it may cause serious acute effects (lethal or sublethal) under anticipated conditions of manufacture, processing, distribution in commerce, use, or disposal of the new chemical substance.

(3) *Environmental effects.* A new chemical substance cannot be manufactured under this section if EPA determines, in accordance with paragraph (g) of this section, that the new chemical substance or a reasonably anticipated environmental transformation product of it may cause significant environmental effects under anticipated conditions of manufacture, processing, distribution in commerce, use, or disposal of the new chemical substance.

(4) *Impurities.* A new chemical substance cannot be manufactured under this section if EPA determines, in accordance with paragraph (g) of this section, that reasonably anticipated impurities in the substance may cause serious acute or chronic effects in humans or significant environmental effects under anticipated conditions of manufacture, processing, distribution in commerce, use, or disposal of the new chemical substance.

(4) *Impurities.* A new chemical substance cannot be manufactured under this section if EPA determines, in accordance with paragraph (g) of this section, that reasonably anticipated impurities in the substances may cause serious acute or chronic effects in humans or significant environmental effects under anticipated conditions of manufacture, processing, distribution in commerce, use, or disposal of the new chemical substance.

(5) *Byproducts.* A new chemical substance cannot be manufactured under this section if EPA determines, in accordance with paragraph (g) of this section, that the reasoanbly anticipated byproducts of manufacture, processing, distribution in commerce, use, or disposal of the substance, including waste or emissions, may cause serious acute or chronic effects in humans or significant environmental effects under anticipated conditions of manufacture, processing, distribution in commerce, use, or disposal of the new chemical substance.

(e) *Exemption notice.* (1) The manufacturer must submit a notice to the Document Control Officer as provided in paragraph (n) of this section at least 21 days before manufacture begins. The date of submission will be the date on which the notice is received by the Document Control Officer. EPA will acknowledge the receipt of the notice by letter. The letter will identify the date on which the review period begins. The notice must include:

(i) *Manufacturer's name.* The name and address of the manufacturer of the new chemical substance and the name and telephone number of a technical contact must be provided.

(ii) *Type of exemption.* The exemption notice must indicate that the manufacturer is seeking a low volume exemption.

(iii) *Chemical identification* —(A) *Class 1 substances* (chemical substances whose composition can be represented by a definite structural

diagram). The chemical name (preferably Chemical Abstract Services (CAS) or International Union of Pure and Applied Chemistry (IUPAC) nomenclature), the molecular formula, CAS Registry Number (if available), and a structural diagram.

(B) *Class 2 substances* (chemical substances that cannot be fully represented by a structural diagram). The chemical name, the molecular formula, the CAS Registry Number (if available). The notice must identify the immediate precursors and reactants by name CAS Registry Number (if possible). The notice must include a partial or incomplete structural diagram (if available). Chemical names for such substances should be developed according to the guidelines in the TSCA Chemical Substance Inventory, Initial Inventory, Volume 1.

(C) *Polymers.* Monomers and other reactants used in the manufacture of the polymer by chemical name and CAS Registry Number (if available); typical percent of each monomer and other reactants used in the polymer (by weight percent of total polymer); the maximum residual of each monomer present in the polymer; and a partial or incomplete structural diagram (if possible). The notice must provide estimates of the minimum number-average molecular weight of the polymer and the amount of low molecular weight species below 500 and below 1,000 molecular weight and describe how the estimates were obtained. This information must be provided to the extent it is known or reasonably ascertainable by the submitter.

(D) *Impurities.* Impurities anticipated to be present in the new chemical substance by name, CAS Registry Number (if known), and weight percent of the total substance. If there are unidentified impurities, the notice must include an estimate of their total weight percent. Information on impurities must be provided to the extent that it is known to or reasonably ascertainable by the submitter.

(E) *Generic name.* If the manufacturer claims the chemical identity of the new chemical substance confidential, he or she must submit a generic name in accordance with paragraph (k)(2) of this section. The name should be only as generic as necessary to protect the confidential chemical identity of the particular chemical substance. In should reveal the specific chemical indentity to the maximum extent possible.

(iv) *Description of use.* Each use for which the chemical substance would be manufactured by function and application (e.g., spray adhesive in the manufacture of laminates). The description of use must indicate whether the use is industrial, commercial, or consumer.

(v) *Site of manufacture* (except for chemical substances that are imported). The notice must state the name and address of the site or sites of manufacture of the new chemcial substance.

(vi) *Certification.* The manufacturer must certify that:

(A) The manufacturer intends to manufacture or import the new chemical substance for commercial purposes, other than in small quanitities solely for research and development, under the terms of this section.

(B) The manufacturer is familiar with the terms of this section and will comply with those terms.

(C) The new chemical substance for which the notice is submitted meets all applicable exemption conditions.

(vii) *Test data.* The manufacturer must submit all test data in its possession or control which are related to the effects of the new chemical substance on health or the environment.

(viii) *Exposure controls.* The manufacturer may also provide information on exposure controls or other controls for the new chemical substance. Where a manufacturer provides such information to support the exemption notice, the manufacturer must maintain those controls throughout the period of the exemption.

(ix) *Sanitized copy of notice.* (A) The manufacturer must make all claims of confidentiality in accordance with paragraph (k) of this section. If any information is claimed confidential, the manufacturer must submit a second copy of the notice, with all information claimed as confidential deleted, in accordance with paragraph (k)(3) of this section.

(B) If the submitter does not provide the second copy, the submission is incomplete.

(2) *Incomplete notices.* If EPA receives a submission which does not include all of the information required under paragraph (e) of this section, the submission will be determined to be incomplete by the Director of the Office of Toxic Substances. The exemption review period will not begin until EPA receives all required information.

(f) *Review period.* EPA will review the notice submitted under paragraph (e) of this section to determine whether the new chemical substance is eligible for the exemption. The review period will end 21 days after receipt of the notice by EPA. Upon expiration of the 21-day review period, if EPA has taken no action, the manufacturer may begin to manufacture the new chemical substance under the other terms of this exemption.

(g) *Notice of ineligibility*—(1) *During the review period.* If the Assistant Administrator for Pesticides and Toxic Substances determines during the review period that the new chemical substance does not meet the terms of this section, or that there are issues concerning toxicity or exposure that require further review, the Assistant Administrator will notify the manufacturer by telephone that the substance is not eligible. This telephone notification will subsequently be confirmed by certified letter that identifies the issues and explains why they are unresolved. The manufacturer may not begin manufacture of the new chemical substance without complying with section 5(a)(1) of the Act.

(2) *After the review period.* (i)(A) If at any time after the end of the review period specified in paragraph (f) of this section, the Assistant Administrator for Pesticides and Toxic Substances makes a preliminary determination that the new chemical substance does not meet the terms of this section, the Assistant Administrator will notify the manufacturer by certified letter that EPA believes that the new chemical substance does not meet the terms of this section.

(B) The manufacturer may continue to manufacture, process, distribute in commerce, and use the new chemical substance after receiving notice under paragraph (g)(2) (i)(A) of this section if the manufacturer was manufacturing, processing, distributing in commerce, or using the substance at the time of the notification and if the manufacturer submits objections or an explanation under paragraph (g)(2)(ii) of this section. Manufacturers not manufacturing, processing, distributing in commerce, or using the substance at the time of notification may not begin manufacture until EPA makes its final determination under paragraph (g)(2)(iii) of this section.

(ii) A manufacturer who has received notice under paragraph (g)(2)(i) of this section may submit detailed objections to the determination or an explanation of its diligence and good faith efforts in attempting to comply with the terms of this section within 15 days of receipt of written notification.

(iii) The Assistant Administrator will consider any objections or explanation submitted under paragraph (g)(2)(ii) of this section and will make a final determination. The Assistant Administrator will notify the manufacturer of the final determination by telephone within 15 days of receipt of

the objections or explanation, and subsequently by certified letter.

(iv) If the Assistant Administrator determines that the new chemical substance meets the terms of this section, the manufacturer may continue or resume manufacture, processing, distribution in commerce, and use in accordance with the terms of this section.

(v) If the Assistant Administrator determines that the new chemical substance does not meet the terms of this section and that the manufacturer did not act with due diligence and in good faith to meet the terms of this section, the manufacturer must cease any continuing manufacture, processing, distribution in commerce, and use of the new chemical substance within 24 hours of the telephone notification under paragraph (g)(2)(iii) of this section. The manufacturer may not resume manufacture, processing, distribution in commerce, or use until it submits a notice under section 5(a)(1) of the Act and Part 720 of this chapter and the notice review period has ended.

(vi) If the Assistant Administrator determines that the new chemical substance does not meet the terms of this section and that the manufacturer acted with due diligence and in good faith to meet the terms of this section, the manufacturer may continue manufacture, processing, distribution in commerce, and use of the new chemical substance if:

(A) It was actually manufacturing, processing, distributing in commerce, or using the chemical substance at the time it received the notification specified in paragraph (g)(2)(i) of this section, and

(B) It submits a notice on the new chemical substance under section 5(a)(1) of the Act and Part 720 of this chapter within 15 days of receipt of the telephone notification under paragraph (g)(2)(iii) of this section. Such manufacture, processing, distribution in commerce, and use may continue unless EPA takes action under section 5(e) or 5(f) of the Act.

(3) Action under this paragraph does not preclude action under sections 7, 15, 16, and 17 of the Act.

(h) *Additional information.* If the manufacturer of a new chemical substance under the terms of this exemption obtains test data or other information indicating that the new chemical substance may not qualify for the exemption, the manufacturer must submit these data or information to EPA within 15 working days of receipt of the information.

(i) *Changes in site or use.* (1) Chemical substances manufactured under this section must be manufactured at the site or sites described and for the uses described in the exemption notice submitted in accordance with paragraph (e) of this section.

(2)(i) Any person who manufactures a new chemical substance described in paragraph (c) of this section must comply with the provisions of this section before manufacturing the new chemical substance at a site that was not reported in a previous exemption notice, including submission of a new notice under paragraph (e) of this section.

(ii) Any person who manufactures a new chemical substance described in paragraph (c) of this section must comply with the provisions of this section before manufacturing the new chemical substance for a use that was not reported in a previous exemption notice, including submission of a new notice under paragraph (e) of this section.

(3) In an exemption notice informing EPA of a change in site or use, the manufacturer is not required to provide information submitted to EPA in a previous exemption notice on that chemical substance. The new exemption notice, however, must indicate the identity of the new chemical substance; the manufacturer's name; the name and telephone number of a technical contact; and the new site or use. The notice must also include a certification by the manufacturer, as described in paragraph (e)(1)(vi) of this section.

(j) *Customer notification.* (1) Manufacturers of a new chemical substance described in paragraph (c) of this section must notify processors and industrial users that the substance can be used only for the uses specified in the exemption notice. The manufacturer must also inform processors and industrial users of any controls specified in the exemption notice. The manufacturer may notify processors and industrial users by means of a container labeling system, written notification, or any other method that adequately informs them of use restrictions or controls.

(2) If the manufacturer learns that a customer is processing or using the exempt substance in violation of use restrictions or without imposing prescribed controls, the manufacturer must cease distribution of the substance to the customer immediately. The manufacturer must also report this action to EPA within 15 days under paragraph (h) of this section.

(k) *Confidentiality.* (1) If the manufacturer submits to EPA under this section information which it claims to be confidential business information, the manufacturer must clearly identify the information at the time of submission to EPA by bracketing, circling, or underlining it and stamping it with "CONFIDENTIAL" or some other appropriate designation. Any information so identified will be treated in accordance with the procedures in Part 2 of this Title. Any information not claimed confidential at the time of submission may be made available to the public without further notice.

(2)(i) Any person who asserts a claim of confidentiality for chemical identity under this paragraph must provide a generic chemical name that is only as generic as necessary to protect the confidential chemical identity of the particular chemical substance. The name should reveal the specific chemical identity to the maximum extent possible.

(ii) The generic name provided by the submitter will be subject to EPA review and approval in accordance with the procedures specified in § 720.85(b)(6) of this chapter. The generic name provided by the submitter or an alternative selected by EPA under these procedures will be placed on a public list of substances exempt under this section.

(3) If any information is claimed confidential, the manufacturer must submit a second copy of the notice except that all information claimed as confidential in the first copy must be deleted. EPA will place the second copy in the public file.

(l) *Determination of first manufacturer of a new chemical substance.* (1) A person who intends to manufacture a new chemical substance under this section may determine whether that particular substance is already being manufactured under that section and, therefore, whether the person is eligible for the exemption, by submitting a notice on the substance under paragraph (e) of this section. EPA will inform the manufacturer within the 21-day review period if the manufacturer is not eligible for the exemption because another person is already manufacturing the substance under the exemption.

(2) Alternatively, the manufacturer may ask EPA whether another manufacturer is already producing the new chemical substance under this section. EPA will respond to this inquiry only if EPA determines that the manufacturer making the inquiry has shown a *bona fide* intent to manufacture the substance under the terms of this section.

(i) To establish a *bona fide* intent to manufacture a substance under this section, the manufacturer must submit to EPA:

(A) The specific chemical identity of the substance that the person intends to manufacture.

(B) A signed statement that the person intends to manufacture that chemical substance under the terms of this section.

(C) A description of the research and development activities conducted to date, and the purpose for which the person will manufacture the chemical substance.

(D) An elemental analysis.

(E) Either an X-ray diffraction pattern (for inorganic substances), a mass spectrum (for most other substances), or an infrared spectrum of the particular chemical substance, or if such data do not resolve uncertainties with respect to the identity of the chemical substance, additional or alternative spectra or other data to identify the substance.

(ii) If an importer cannot provide all the information required by paragraph (1)(2)(i) of this section because it is claimed confidential business information by its foreign manufacturer or supplier, the foreign manufacturer or supplier may supply the information directly to EPA.

(iii) The Director of the Office of Toxic Substances will promptly examine the manufacturer's submission.

(A) If the Director determines that the manufacturer has not shown a *bona fide* intent to manufacture the new substance under the terms of this section, the Director will promptly notify the manufacturer. The manufacturer may then submit a notice under paragraph (e) of this section or a notice under section 5(a)(1) of the Act.

(B) If the Director determines that the manufacturer has shown a *bona fide* intent to manufacture the new chemical substance under the terms of this section, the Director will promptly inform the manufacturer whether the substance is being manufactured under this section. If the substance is not being manufactured under this section, the manufacturer may submit a notice under paragraph (e) of this section. If the new chemical substance is being manufactured under this section, the manufacturer must submit a notice under section 5(a)(1) of the Act.

(m) *Volume limitation.* A person manufacturing a new chemical substance under this section may not manufacture more than 1,000 kg of the substance during each 12-month period following the date the review period described in paragraph (f) of this section expires.

(n) *Submission of information.* Information submitted to EPA under this section must be sent in writing to: Document Control Officer (TS–793), Office of Toxic Substances, Environmental Protection Agency, Rm. E–201, 401 M St., SW., Washington, D.C. 20460.

(o) *Recordkeeping.* (1) Each manufacturer of a new chemical substance described in paragraph (c) of this section must maintain records of (i) the annual production volume of the new chemical substance under the exemption, and (ii) documentation of information in the exemption notice and compliance with the terms of this section. Records maintained under this paragraph must be retained for 5 years after date of their preparation.

(2) Any person who manufactures a new chemical substance under the terms of this section must, upon request of a duly designated representative of EPA permit such person at all reasonable times to have access to and to copy records kept under paragraph (o)(1) of this section.

(3) The manufacturer must submit the records listed in paragraph (o)(1) of this section to EPA upon written request by the Director of the Office of Toxic Substances. Manufacturers must provide these records within 15 working days of receipt of this request.

(p) *Compliance.* (1) Failure to comply with any provision of this section is a violation of section 15 of the Act (15 U.S.C. 2614).

(2) Submitting materially misleading or false information in connection with the requirements of any provision of this section is a violation of this section and therefore a violation of section 15 of the Act (15 U.S.C. 2614).

(3) Violators may be subject to the civil and criminal penalties in section 16 of the Act (15 U.S.C 2615) for each violation.

(4) EPA may seek to enjoin the manufacture or processing of a chemical substance in violation of this section, or act to seize any chemical substance manufactured or processed in violation of this section, or take other actions under the authority of section 7 of the Act (15 U.S.C. 2606) or section 17 of the Act (15 U.S.C. 2616)).

(Approved by the Office of Management and Budget under control number 2070–0012)

BILLING CODE 6560–50–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6655]

Suspension of Community Eligibility Under the National Flood Insurance Program; New York et al.

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the flood plain management requirements of the program. If FEMA receives documentation that the community has adopted the required flood plain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the **Federal Register**.

EFFECTIVE DATES: The third date ("Susp.") listed in the fourth column.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646–2717, 500 C Street, Southwest, FEMA—Room 509, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 et. seq.). Accordingly, the communities are suspended on the effective date in the fourth column, so that as of that date flood insurance is no longer available in the community. However, those communities which, prior to the suspension date, adopt and

submit documentation of legally enforceable flood plain management measures required by the program, will continue their eligibility for the sale of insurance. Where adequate documentation is received by FEMA, a notice withdrawing the suspension will be published in the **Federal Register**.

In addition, the Director of Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. No direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood prone areas. (Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Director finds that notice and public procedure under 5 U.S.C. 533(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified. Each community receives a 6-month, 90-day, and 30-day notification addressed to the Chief Executive Officer that the community will be suspended unless the required flood plain management measures are met prior to the effective suspension date. For the same reasons, this final rule may take effect within less than 30 days.

Pursuant to the provision of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in Section 2 of the Flood Disaster Protection Act of 1973, the establishment of local flood plain management together with the availability of flood insurance decreases the economic impact of future flood losses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate flood plain management, thus placing itself in noncompliance of the Federal standards required for community participation. In each entry, a complete chronology of effective dates appears for each listed community.

44 CFR Parts 80, 82, and 83

Crime Insurance Program

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Final rule.

SUMMARY: These revisions to the Federal Crime Insurance Program achieve the following: They raise the premiums for commerical crime insurance policies, revise the number of premium classes by which applications for crime insurance are rated and amend the protective device requirements for some commercial business to permit a premium modification for specific degrees of protection. The regulations also provide more detailed and helpful instructions for calculating premiums and identifying the classification of businesses.

On January 29, 1985, the Federal Insurance Administration, Federal Emergency Management Agency, published for comment in the **Federal Register** a proposed rule containing these revisions which were based on a study performed by the Federal Insurance Administration and the Actuarial Firm of Tillinghast, Nelson and Warren, Inc. comparing the premiums of the Federal Crime Insurance Program to the Insurance Service Office advisory premiums used by the private sector.

DATE: This rule will be effective for commercial crime insurance business written after May 1, 1985, and renewal policies not already billed to existing policyholders.

FOR FURTHER INFORMATION CONTACT: Robert J. DeHenzel, Federal Emergency Management Agency, Federal Insurance Administration, Donohoe Building, 500 C Street, SW., Room 433, Washington, DC 20472, telephone number (202) 646–3440.

SUPPLEMENTARY INFORMATION: All written comments received during the comment period were duly considered prior to publication of the final rule. These revisions are the result of the experience gained in the thirteen (13) years the Federal Crime Insurance Program has been in operation and are the direct result of the affordability study conducted by the Federal Insurance Administration and the Actuarial Firm of Tillinghast, Nelson and Warren, Inc. during the past two years. While the base premium level for commercial policies is subject to an overall increase of 35%, the ultimate revenue collected under the plan is, in addition, affected by the protective device requirements and package credit plan. Installation of additional protective devices will serve to lower the burglary premium for insureds who thereby reduce their exposure to crime losses. The package plan will provide a 10% discount to any insured purchasing both burglary and robbery. Thus, despite the fact that the Federal Insurance Administration is increasing the base premiums for commercial policies by 35%, the premiums continue to be affordable and the revenue change under the plan is only +13.2%.

FEMA has determined that an environmental impact statement is not needed for this rule. A copy of the finding of no significant impact and an environmental assessment is available at the above address.

List of Subjects

44 CFR Parts 80 and 83

Crime insurance.

44 CFR Part 82

Crime insurance, Security measures.

Accordingly, 44 CFR Parts 80, 82, 83 are amended as follows:

PART 80—DESCRIPTION OF PROGRAM AND OFFER TO AGENTS

§ 80.1 [Amended]

1. Section 80.1 is amended by redesignating paragraphs (a)(6)–(a)(14) as (a)(7)–(a)(15) respectively.

2. Section 80.1 entitled Definitions paragraph (a) is amended by adding new paragraph 6 entitled discounts to read as follows:

§ 80.1 Definition.

* * * * *

(6) "Discounts": The premium credit issued to businesses protected by a burglar alarm system, considered adequate for the type of risk involved.

* * * * *

PART 82—PROTECTIVE DEVICE REQUIREMENTS

Subpart A—General

1. Section 82.1 is amended by redesignating paragraphs (c)–(j) as paragraphs (d)–(k).

2. Section 82.1 entitled "Definitions" is further amended by adding new paragraph (c) "Central Station, Supervised Alarm System (without guard dispatch)" to read:

§ 82.1 Definitions.

* * * * *

(c) "Central Station, Supervised Alarm System (without guard dispatch)" means a silent alarm system that is constantly in operation, which signals upon any breach of a door, windows (including store front windows and unbarred skylights), or other accessible openings to the protected premises, at an office of the law enforcement authorities or at an office of an independent agency, located at a distance from the protected property, which has trained operators continually on duty twenty four (24) hours a day to receive signals and to notify law enforcement authorities as soon as any breach of the premises is confirmed.

* * * * *

3. Section 82.5 entitled "Inspection of commercial premises" is amended by revising the existing paragraphs (b) and (d) be revising the last sentence of paragraph (e) to read as follows:

§ 82.5 Inspection of commercial premises.

* * * * *

(b) Coverage under a commercial crime insurance policy indemnifying against burglary losses shall not commence unless it is determined that the premises sought to be insured comply with all applicable protective device requirements. Provided, That all commercial premises whose exterior doors and accessible openings are found upon inspection to be protected by central station supervised service alarm systems or silent alarm systems (as those systems are defined in paragraphs (b), (c), and (l) of § 82.1) shall not be required to comply with the provisions of paragraphs (b) and (e) of § 82.31 pertaining to the protection of those exterior doors and accessible openings by such devices as bars, grillwork, and other physical barriers. The benefit of this provision, therefore, applies also to comercial premises which, because of their particularly high risk inventories of merchandise continue to be required by paragraphs (f) (1) and (2) of § 82.31 to have exterior doors and accessible openings protected by specified types of alarm systems, namely, supervised service alarm systems for the highest risk inventories and silent alarm systems for less high risk inventories.

* * * * *

(d) Because the statement of annual gross receipts is a significant factor in the determination of the correct premium, the annual gross receipts figures (ventas netas for Puerto Rico) or the Total Income of the tax returned as derived from interest, rents, capital gains, etc., reported on the application or at the time of renewal shall be verified at the time of the adjustment of any loss. The applicant or insured shall at the time make available any necessary documentation to substantiate the annual gross receipts figure reported.

(e) * * * The Administrator may also in his or her discretion determine that the frequency and/or severity of occurrences of loss experienced under any policy issued under the provision of paragraphs (b) and (c) of this section, requires that as a condition of continuation of coverage on renewal of such policy the premises insured thereunder be protected by one or more of the protective devices described in paragraphs (a), (b), (c), (d), (e), (f) (1), (2), (3), and (4) of § 82.31 for applicable points of entry for incurred losses.

4. Section 82.31 entitled "Minimum standards of industrial and commercial properties" paragraph (f) is revised as follows:

§ 82.31 Minimum standards for industrial and commercial properties.

* * * * *

(f) The following types of establishments whose inventories pose a particularly serious risk shall, as a minimum, in addition to the requirements of paragraphs (a), (b), and (d) of this section be protected by the type of alarm system indicated. If the system specified in paragraphs (f)(1) and (f)(2) of this section is not available in the community in which the premises are located, the type of system specified in paragraph (f)(3) of this section shall be permitted. In addition to, but not in place of, any central station supervised alarm system or silent alarm system required under paragraphs (f) (1), (2) and (3) of this section, an insured may also utilize a local alarm system.

(1) Central Station (with Guard dispatch) supervised service alarm system shall be required for the following businesses:

(i) Beer/Wine—Wholesale.

(ii) Boutiques.

(iii) Cameras/Photo Supplies/Film Processing—Wholesale/Retail/Mfg.

(iv) Clothing/Men's (age 12 and over)—Wholesale/Retail.

(v) Clothing/Women's (age 12 and over)—Wholesale/Retail.

(vi) Drug Stores and Druggists Sundries.

(vii) Electrical Appliances/ Apparatus/Parts—Wholesale/Retail/ Mfg.

(viii) Food Stuffs/Wholesale.

(ix) Gasoline Service Station/Fuel Dealers.

(x) Jewelry—Retail/Wholesale/Mfg./ Storage.

(xi) Liquor Sales—Retail.

(xii) Pawnbrokers.

(xiii) Precious Metals/Electroplating—Mfg./Wholesale/Retail.

(xiv) Radio/TV/Stereo/Electronic Equipment/Computer—Wholesale/ Retail/Mfg.

(xv) Record Shop.

(xvi) Tobacco—Wholesale.

(xvii) Used Clothing/Shoe Repair/ Thrift Shops.

(xviii) Variety Stores/Department Stores.

(2) Central Station (without Guard dispatch) supervised service alarm system shall be required for the following businesses:

(i) Art Supplies—Retail/Wholesale/ Mfg.

(ii) Auto Parts—(No Service)—Wholesale/Retail/Mfg.

(iii) Beer/Wine with Food Retail.

(iv) Drugs—Wholesale.

(v) Dry Goods/Textiles/Sewing Material—Wholesale/Retail/Mfg.

(vi) Furniture/Home Furnishing/ Floor Covering/Upholstery—Wholesale/ Retail/Mfg.

(vii) Furriers—Wholesale/Retail/ Mfg./Storage.

(viii) Grocery Stores/Delicatessens/ Health Food Stores.

(ix) Guns/Ammunition—Wholesale/ Retail/Mfg.

(x) Hardware/Houseware—Wholesale/Retail/Mfg.

(xi) Hobby Shops/Toys/Novelty—Wholesale/Retail/Mfg.

(xii) Leather Products—Wholesale/ Retail/Mfg.

(xiii) Liquor—Wholesale.

(xiv) Meat/Poultry/Fish Dealers.

(xv) Music Stores/Instruments/ Supplies—Wholesale/Retail/Mfg.

(xvi) Precious Metals/Electroplating—Wholesale/Retail/Mfg.

(xvii) Shoe Stores—Wholesale/Retail/Mfg.
(xviii) Sport Goods—(General)—Wholesale/Retail/Mfg.
(xix) Tobacco Dealers—Retail.
(xx) Wig Shops.
(3) Silent alarm system shall be required for the following businesses:
(i) All Risks Not Otherwise Classified.
(ii) Amusement Enterprises.
(iii) Antique Store.
(iv) Art Gallery.
(v) Beach Concession Stands/Supplies.
(vi) Beauty & Health Supplies/Cosmetic—Wholesale/Retail/Mfg.
(vii) Billiard/Pool Parlors.
(viii) Building Contractors—Material—Retail/Wholesale.
(ix) Candy/Nut Stores—Retail/Wholesale.
(x) Clothing Apparel (Children 12 and under)—Retail/Wholesale.
(xi) Clothing Manufacturers/Tailoring.
(xii) Clubs (Serving Alcoholic Beverages).
(xiii) Coin/Stamp Shop.
(xiv) Distributors—Variety/Non-Alcoholic Beverages.
(xv) Dry Cleaners.
(xvi) Fine Arts (Porcelain, Ivory, Oriental Rugs, Paintings, etc.).
(xvii) Florist—Wholesale/Retail.
(xviii) Garages/Auto Repair/Body Shop.
(xix) Gift Stores—(Costume Jewelry $25.00 Wholesale Limit)—Retail/Wholesale/Mfg.
(xx) Hotel/Motel/Rooming House/Apartments.
(xxi) Industrial Materials/Iron & Metal Work—Wholesale/Retail/Mfg.
(xxii) Laundries.
(xxiii) Marine/Aircraft Materials—Sales/Service—Retail/Wholesale/Mfg.
(xxiv) Medical (Doctors/Dentist, etc.) Supplies—Wholesale/Retail/Mfg.
(xxv) Motorbikes/Bicycles/Moped.
(xxvi) Office Supplies/Business Machines/Equipment—Retail/Wholesale/Mfg.
(xxvii) Pet Stores/Kennels—Supplies.
(xxviii) Restaurants.
(xxix) Savings/Loans/Bank and Other Financial Institutions excluding Check Cashing.
(xxx) Schools (Profit) Day Care Centers/Studios.
(xxxi) Specialized Clothing (Sportswear/Lingerie/Accessories/etc.)—Wholesale/Retail/Mfg.
(xxxii) Stationery/Books/Printing/Engraving/Paper—Plastic Products—Retail/Wholesale/Mfg.
(xxxiii) Tavern/Bar/Lounge.
(4) Local alarm systems shall be required for the following businesses:
(i) Auto Parts—Sales/Service—Wholesale/Retail/Mfg.
(ii) Beauty/Barber Shops.
(iii) Check Cashing Agency/Money Exchange—Collectors.
(iv) Discos/Dance Halls/Pavilions.
(v) Donut/Pastry/Coffee/Ice Cream—(Seated Service).
(vi) Fast Food/Bakery/Ice Cream—(carry out).
(vii) Flea Markets/Auction Houses.
(viii) Fruit/Vegetable/Newspaper Stands.
(ix) Funeral Homes.
(x) Golf and Other Sports Professionals.
(xi) Health Clubs/Spas/Massage Parlors.
(xii) Nursing Homes/Convalescent.
(xiii) Parking Lots/Rental Cars/Carwash/Taxi Office.
(xiv) Photographers Studios.
(xv) Professional/Specialized Services (Lawyers/Accountants/ etc./Couriers/Housekeeping/etc.).
(xvi) Radio/TV/Stereo/Electronic Equipment/Computers—(Service Only).
(xvii) Realty/Insurance/Travel/Employment (Agencies).
(xviii) Security/Locksmiths/Alarms—Retail/Wholesale/Mfg.
(xix) Vending Machines—Sales/Rentals/Mfg.

PART 83—COVERAGE, RATES AND PRESCRIBED POLICY FORMS

Subpart B—Commercial Crime Insurance Coverage

5. Section 83.24 entitled "Classification of commercial risk" is amended by revising the last sentence in paragraph (a) and by revising paragraph (d) as follows:

§ 83.24 Classification of commercial risks.

(a) * * * For example, a business with the following types of merchandise inventoried, 60% handbags and wigs, and 40% fine jewelry, shall be classified as Class 5 Fine Jewelry.

* * * * *

(d) The following business classifications shall be applicable to the Commercial Crime Insurance Policy:

CLASSIFICATION/ALARM LISTING

Premium Code	Premium Class	Description	Alarm type
A1	3	All risks not otherwise classified	3
02	3	Amusement enterprise	3
B1	2	Antique store	3
C1	4	Art gallery	3
33	5	Art supplies (retail, wholesale, mfg.)	2
D1	2	Auto parts/no service (retail wholesale, mfg.)	2
03	2	Auto parts/sales/service (retail, wholesale, mfg.)	4
47	2	Beach concession stands/supplies	3
32	2	Beauty/barber shops	4
41	2	Beauty & health supplies/cosmetic (retail, wholesale, mfg.)	3
C6	4	Beer/wine with food (retail)	2
F1	6	Beer/wine (wholesale)	1
04	4	Billiard/pool parlors	3
70	6	Boutiques	1
05	2	Bowling lanes/centers/skating rinks	0
34	2	Building contractors/materials (retail, wholesale, mfg.)	3
06	4	Cameras/photo supplies/film processing (retail, wholesale mfg.).	1
43	2	Candy/nuts stores (retail, wholesale)	3
G1	4	Check cashing agency/money exchange/collectors	4
J1	1	Churches/charities/nonprofit org/public properties	0
36	4	Clothing apparel/children 12 & under (retail, wholesale).	3
I1	5	Clothing manufacturer/tailoring	3
22	5	Clothing/men's (age 12 & over) (retail wholesale).	1
30	5	Clothing/women's (age 12 & over) (retail, wholesale)	1
07	4	Clubs (serving alcoholic beverages).	3
K1	3	Coin/stamp shop	3
08	2	Discos/dance halls/pavilions	4
50	2	Distributors-variety/non-alcoholic beverages.	3
C5	3	Donut/pastry/coffee/ice cream shop (seated service).	4
09	4	Drug stores/druggist's sundries	1
L1	3	Drugs (wholesale)	2
10	4	Dry cleaners	3
38	3	Dry goods/textile/sewing material (retail, wholesale, mfg.).	2
11	3	Electric appliances/apparatus/parts (retail, wholesale, mfg.).	1
E1	2	Fast food/bakery/donut, ice cream (carryout only).	4

6. Section 83.24a entitled "Gross receipts" is amended by revising paragraphs (f) and (i) as follows:

§ 83.24a Gross receipts.

* * * * *

(f)(1) A warehouse operated as a distribution center for store(s) under common ownership and management shall report the total gross receipts of the store(s) it supplies. If a warehouse supplies more than one store, it shall report the sum of the gross receipts figures for all the stores it supplies. If more than one warehouse supplies one store, the gross receipts figure applicable to the store shall be apportioned among the warehouses according to the percentage the value of merchandise supplied by each warehouse bears to the total value of merchandise supplied.

(2) A warehouse operated as a distribution center for store(s) *not* under common ownership and management shall report the total gross receipts of the warehouse only, if the business is taxed on gross receipts.

(3) A warehouse operated as a distribution center for store(s) *not* under common ownership and management shall report the "Total Income" line of the tax return as derived from interest, rents, capital gains, other, etc., if the business is not taxed on gross receipts.

* * * * *

(i) Any questions regarding gross receipts or unique or unusual risk requiring special rating treatment shall be submitted to the servicing company listed in § 80.6 of this chapter for rate quotation.

7. Section 83.25 entitled "Commercial Crime Insurance Rates" is revised in its entirety and shall now read as follows:

§ 83.25 Commercial Crime Insurance Rates.

(a) Premium rates for Commercial Crime Insurance Policies for risks shall be determined by reference to the rate charts contained in paragraph (e) of this section. The annual gross receipts shall be determined in accordance with § 83.24(a).

(b) *Option 1:* An applicant may apply for insurance coverage under Insuring Agreements I, II, III, IV, and VII of the Commercial Policy dealing with Safe Burglary, Theft from Night Depository, and Burglary or Robbery of a Watchman, and Damage resulting from losses under Insuring Agreements I and VII only. Such coverage shall be referred to as Option 1.

(c) *Option 2:* An applicant may apply for insurance coverage under Insuring Agreements V, VI, VII, and VIII of the Commercial Policy dealing with Robbery and Observed Theft inside and outside the premises and Damage resulting from losses under Insuring Agreements V and VI only. Such coverage shall be referred to as Option 2.

(d) *Option 3:* An applicant may apply for insurance coverage under all of the Insuring Agreements I, II, III, IV, V, VI, and VII of the Commercial Crime Insurance Policy. This Option provides for uniform as well as varying limits of coverage under Option 1 and 2 but only in the same policy. Both Options 1 and 2 must be applied for at the same time. If one of the options has been selected the other option may be added upon a renewal or upon an endorsement of the original policy. A discount will be provided for Combined Coverage, Option 3.

(e) The following tables shall be used to determine rates for commercial risks.

(1) *Option 1*: Burglary Only
Option 2: Robbery Only
Option 3: A combination of Options 1 and 2 in uniform or varying amounts
(2) See Discount Page for applicable multipliers and discounts.

(f) If the premises are protected by an acceptable burglar alarm system or Class E safe, premium discounts shall be permitted as follows:

ALARM/SAFE CREDITS

Alarm system	Safe type	
	Class E	Other
None	.85	1.00
Local	.75	.90
Silent	.70	.80
Central Station	.65	.75
Central Station With Guard	.60	.70

Note.—Multiply the Burglary rate by the appropriate factor.

Package Discount

Apply a factor of .90 to the total premium if both burglary and robbery are purchased.

§ 83.26 [Amended]

8. Section 83.26, paragraph (b) entitled "Commercial Crime Insurance Policy Form" is amended in the following respects.

A. The paragraph entitled "Insuring Agreements" is amended to read as follows:

Option 1 (Burglary Only Including Safe Burglary)

Option 1 includes insurance coverage only under the individually numbered insuring Agreements I, II, III, and IV listed below.

I. Burglary; Robbery of a Watchman

To pay for loss by burglary or by robbery of a watchman, while the named premises are not open for business, of merchandise, furniture, fixtures and equipment within the named premises provided that this Insuring Agreement does not extend to the loss of money or securities or to cash value in excess of $50 for any item of jewelry unless such property is forcibly extracted from a locked safe as provided under Insuring Agreement II entitled "Safe Burglary" which follows:

II. Safe Burglary

To pay for loss by safe burglary of money, securities and merchandise within the named premises while the premises are not open for business, but no payment shall be made for loss not forcibly extracted from a locked safe, nor by a loss in excess of $5,000 except with respect to loss by safe burglary of a safe rated for burglary resistance as Class E or better weighing at least seven hundred and fifty pounds or securely anchored to the floor.

III. Damage

To pay for damage to the named premises and to money, securities, merchandise, furniture, fixtures and equipment within the named premises by burglary, robbery of a watchman, safe burglary or attempt thereat provided the insured is the owner thereof or is liable for such damage.

IV. Policy Period, Territory

To pay for losses under Insuring Agreements I, II, and III only when occurring during the policy period within a state, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands and such other territories or possessions of the United States, including the Trust Territory of the Pacific Islands, as defined in 12 U.S.C. 1749bbb–10a et seq. and set forth in 44 CFR Part 80 et seq.

Option 2 (Robbery Only)

Option 2 includes insurance coverage only under the individually numbered insuring Agreement V, VI, VII and VIII listed below.

V. Robbery, Including Observed Theft Inside the Premises

To pay for loss by robbery or observed theft of money, securities, merchandise, furniture, fixtures, and equipment within the named premises.

VI. Robbery, Including Observed Theft, Outside of the Premises

To pay for loss by robbery or observed theft of money, securities, and merchandise, including the wallet or bag containing such property while such property is in conveyance by the insured or his messenger outside the named premises, but no payment shall be made for any loss in excess of $5,000 except when the insured or his messenger is accompanied by a guard armed with a firearm. The person carrying the insured property and the armed guard cannot be same person.

This Insuring Agreement includes theft from a night desository but only if a deposit of money has been made at a night depository of a banking institution by a bonded armored car messenger service.

VII. Damage

To pay for damage to the named premises and to money, securities, merchandise, furniture, fixtures and equipment within the named premises, by robbery, or attempt thereat, provided the insured is the owner thereof or is liable for such damage.

VIII. Policy Period, Territory

To pay for losses under Insuring Agreements V, VI, VII only when occurring during the policy period within a state, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands and such other territories or possessions of the United States including the Trust Territory of the Pacific Islands, as defined in 12 U.S.C. 1749bbb–10a et seq. and set forth in 44 CFR Part 80 et seq.

Option 3 (Robbery and Burglary in Uniform and Varying Amounts)

Option 3 shall provide for uniform and varying limits of coverage under Option 1 and 2 but only in the same policy. Both Option 1 and 2 must be applied for at the same time.

If one of the options has been selected, the other option may be added upon a renewal or upon an endorsement of the original policy. A discount will be provided for Combined Coverage, Option 3.

B. The paragraph entitled "Exclusions" is amended so that subparagraph (d) is read as follows:

This policy does not apply:

* * * * *

(d) under Insuring Agreement I and II to loss occurring during a fire in the premises.

9. Paragraph 1 of the Commercial Insurance Policy under the heading "Conditions" is amened as follows:

A. Subparagraph 8, "No benefit to bailee," is removed.

B. This Section headed "Conditions" is further amended by redesignating paragraphs (9)–(15) as paragraphs (8)–(14), respectively.

These amendments issued under 12 U.S.C. 1749bbb–17.

Issue Date: April 10, 1985.

Jeffrey S. Bragg,

Administrator, Federal Insurance Administration.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 81 and 83

[PR Docket No. 84-1236; FCC 85-187]

Eligibility for Portable Ship Station Licenses and Frequency Assignments on the Great Lakes

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document amends four rule sections in the maritime services. The purpose of these amendments is to eliminate interference to the ship movement service on the Great Lakes and to prevent inadvertent unlicensed operations by boaters. This action is a result of the Commission's ongoing effort to review and update the rules.

EFFECTIVE DATE: May 28, 1985.

FOR FURTHER INFORMATION CONTACT: James A. Shaffer, Private Radio Bureau, (202) 632-7197.

SUPPLEMENTARY INFORMATION:

List of Subjects

47 CFR Part 81

Coast stations, Marine safety, Radio.

47 CFR Part 83

Canada, Communications equipment, Ship stations, Radio.

Report and Order (Proceeding Terminated)

In the matter of amendments of parts 81 and 83 concerning eligibility for portable ship station licenses and frequency assignments on the Great Lakes; PR Docket No. 84-1236, FCC 85-187.

Adopted: April 15, 1985.
Released: April 19, 1985.

By the Commission.

1. This Report and Order amends Parts 81 and 83 of the Commission's rules to: (1) Eliminate granting portable ship station licenses to entities which solely install or service marine radio equipment, and (2) designate marine VHF Channels 11, 12, 13 and 14 primarily available for ship movement service communications in the Great Lakes.

Portable Ship Station License

2. Currently § 83.50(b) of our rules permits a ship station license to be granted solely for testing marine radio equipment incident to installation or servicing. Boat owners frequently assume that after a service company installs and tests a radio it is appropriately licensed and available for use. This mistake results in inadvertent unlicensed operations. Since the ship station application procedure has been simplified to permit "instant" operating authority at the time the application is mailed [1] there is no need for a service company to test a newly installed radio under its own portable ship station license. This can be done under the authority granted by concurrently completing the combined application form, FCC Form 506 and 506-A (Application for Ship Radio Station License). Therefore, in the Notice of Proposed Rule Making [2] in this proceeding, we proposed to discontinue granting portable ship station licenses to entities solely installing or servicing marine radio equipment. We received no comments addressing this proposal. For the reasons indicated above, we are amending § 83.50(b) as proposed.

3. Existing portable ship station licensees which solely install or service marine radio equipment will be permitted to continue to operate under their license for the remainder of their license term. We will emphasize in a Public Notice the boat owner/operator responsibilities to complete FCC Forms 506 and 506-A prior to installing, testing and operating a new marine radio. Additionally, we are correcting § 83.28(a)(1) to state that FCC Form 506-A provides temporary authority to operate for 90 days rather than 60 days.

Great Lakes Ship Movement Service

4. In response to reports of interference on ship movement channels in some areas of the Great Lakes we proposed in the Notice to make marine VHF Channels 11, 12, 13 and 14 primarily available for ship movement service communications. The ship movement service is part of the safety system established on the Great Lakes by the Canadian and U.S. Coast Guards. VHF Channels 11, 12, 13 and 14, are designated by the Great Lakes Agreement [3] as ship movement channels. Channels 11, 12 and 14 are also used for commercial and port operations communications. The Lake Carriers' Association, the United States Coast Guard, and Canada's Department of Communications filed comments on this proposal. No reply comments were received.

5. The commenters supported the proposed amendments but noted an ongoing issue concerning the future use of Channel 13 in the Great Lakes. The Vessel Bridge-to-Bridge Radiotelephone Act [4] requires that certain classes of vessels use Channel 13 for communications from one vessel's bridge to another vessel's bridge concerning navigational matters. However, in the Great Lakes under a waiver Channel 16 is used for bridge-to-bridge communications. Channel 16 has become congested in some areas. For this reason, the U.S. Coast Guard is currently discussing with the Canadian authorities the use of Channel 13 for bridge-to-bridge communications in the Great Lakes. Therefore, U.S. Coast Guard suggested minor changes in the proposed amendments which would accommodate any future changes in the use of Channel 13 in the Great Lakes.

6. As pointed out in the Notice, there are ten other frequencies available for commercial communications on a primary basis in the Great Lakes while five additional frequencies are available for port operations communications. On a secondary basis, Channel 11 would continue to be available for commercial communications and Channels 12 and 14 for port operations communications. No licensee will be without a suitable alternative frequency if secondary status is unsatisfactory in a particular area. Therefore, we are amending the rules substantially as proposed. However, as suggested by the U.S. Coast Guard we have made minor changes to §§ 81.356 and 83.351 concerning the use of Channel 13 in the Great Lakes. If Channel 13 ultimately becomes the Great Lakes bridge-to-bridge channel we will initiate appropriate rule making.

7. Pursuant to section 605(b) of the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), we certify that these rules will not, if promulgated, have a significant economic impact on a substantial number of small entities. The majority of the installation or servicing of ship radio stations is performed under the ship station license. The purpose of these rule amendments is to prevent unlicensed station operations by uninformed boat operators and to prevent interference to ship movement communications on the Great Lakes. No economic impact will result.

8. The amendments contained herein have been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or record keeping, labeling, disclosure, or record retention requirements; and will not increase or decrease burden hours imposed on the public.

Secretary.

Appendix

Parts 81 and 83 of Chapter 1 of Title 47 of the Code of Federal Regulations are amended as follows:

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA FIXED SERVICE

A. In § 81.356(a), the tables for Port Operations, Commercial and Navigational frequencies are amended by revising the channel designators 12, 73, 14, 11 and 13 and paragraphs (b)(4) and (b)(13) are added as follows:

§ 81.356 Assignable frequencies in the band 156–162 MHz.

(a) * * *

Channel designator	Frequencies (MHz)		Points of communications	Conditions of use
	Coast	Ship		
12	156.600	156.600	do	1, 4
73	156.675	156.675	do	
14	156.700	156.700	do	1, 4
11	156.550	156.550	Coast to ship	1, 4
13	156.650	156.650	Coast to ship	10, 13

(b) * * *

* * * * *

(4) In the Great Lakes available primarily for use for the Ship Movement Service (SMS) appropriate to the area of operation. On a secondary basis, available for use as permitted elsewhere in these rules.

* * * * *

(13) In the Great Lakes, available for use in the Ship Movement Service in sectors designated by St. Lawrence Seaway Development Corporation.

* * * * *

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

§ 83.28 [Amended]

B. 1. In § 83.28 paragraph (a)(1) is amended by changing the number 60 to 90 in the last sentence.

§ 83.50 [Amended]

2. In § 83.50 paragraph (b) is amended by removing the words "installation or servicing" from the first sentence.

3. In § 83.351(a) the table is amended by revising the entries for 156.550 through 156.700, and paragraphs (b)(53) and (b)(54) are added and reserved, and paragraphs (b)(55) and (b)(56) are added to read as follows:

§ 83.351 Frequencies available.

(a) * * *

Carrier frequency	Section	Conditions of Use limitations
. . . . .		
156.550	83.359, 83.361, 83.539	19, 20, 27, 35 55
156.575	83.359	19, 20, 28, 32
156.600	83.359, 83.361, 83.539	19, 20, 23, 35 55
156.625	83.359	19, 20, 30, 46
156.650	83.359	19, 20, 24, 31 36, 55, 56
156.675	83.359	19, 20, 23
156.700	83.359, 83.361, 83.539	19, 20, 23, 35 55
. . . . .		

(b) * * *

* * * * *

(53) [Reserved]

(54) [Reserved]

(55) In the Great Lakes available primarily for the Ship Movement Service (SMS) appropriate to the area of operation. On a secondary basis available for use as permitted elsewhere in these rules.

(56) In the Great Lakes, available for use in the Ship Movement Service (SMS) in sectors designated by St. Lawrence Seaway Development Corporation.

Proposed Rules

Federal Register
Vol. 50, No. 81
Friday, April 26, 1985

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 400

[Doc. No. 2104S]

General Administrative Regulations; Reinsurance Agreement

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Proposes rule.

SUMMARY: The Federal Crop Insurance Corporation (Corporation) proposes to issue a new Subpart J in Chapter IV of Title 7 of the Code of Federal Regulations (CFR), to be known as 7 CFR Part 400—General Administrative Regulations—Subpart J, Reinsurance Agreement. The intended effect of this rule is to prescribe procedures applicable to operations under a Reinsurance Agreement with the Corporation. The authority for the promulgation of this rule is contained in the Federal Crop Insurance Act, as amended.

DATE: Written comments, data, and opinions on this proposed rule must be submitted not later than May 28, 1985, to be sure of consideration.

ADDRESS: Written comments on this proposed rule should be sent to the Office of the Manager, Federal Crop Insurance Corporation, Room 4096, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 447–3325.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established by Departmental Regulation No. 1512–1. This action constitutes a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations is March 1, 1990.

Merritt W Sprague, Manager, FCIC, has determined that this action (1) is not a major rule as defined by Executive Order No. 12291 (February 17, 1981), because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) will not increase the Federal paperwork burden for individuals, small businesses, and other persons.

The title and number of the Federal Assistance Program to which this proposed rule applies are: Title—Crop Insurance; Number 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Background

The Federal Crop Insurance Corporation, an agency of the United States Department of Agriculture, is authorized by the Federal Crop Insurance Act, as amended (Act) (7 U.S.C. 1501 *et seq.*), to offer programs of crop insurance to American farmers, the regulations for which are found in Title 7 of the Code of Federal Regulations (7 CFR Part 400 *et seq.*).

Section 508(a) of the Federal Crop Insurance Act, as amended by Pub. L. 80–320, August 1, 1947, provided, commencing with crops planted for harvest in 1948, for reinsurance of insurers of producers of agricultural commodities and that such reinsurance be limited to contracts covering farms in not more than 20 counties. (7 U.S.C. 1508(a)).

On July 23, 1957, Pub. L. 85–111 added a new subsection 508(f) to the Act providing for reinsurance of crop insurance in Puerto Rico written by an agency of the Puerto Rican Government on any crop or plantation should private reinsurance become unavailable. (7 U.S.C. 1508(f)).

Amendments to the Act in 1980, contained in Pub.L. 96–365, dated September 26, 1980, provided in Subsection 508(e) that, to the maximum extent possible, consistent with Subsections (a) and (b) of Section 508 and with sound reinsurance principles, reinsurance be offered to insurers including private insurance companies or pools of such companies, and reinsurers of such companies that insure producers of any agricultural commodity under any plan acceptable to the Corporation. (7 U.S.C. 1508(e)).

Section 508(f) was also amended by Pub.L. 96–365 to provide reinsurance for production of agricultural commodities in the Commonwealth of Puerto Rico, Virgin Islands of the United States, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands, in the same manner as provided for agricultural products in the United States. (7 U.S.C. 1508(f)).

There has been a steady increase in the volume of crop insurance sold through commercial channels since the passage of the 1980 amendments to the act. Since 1981, premium income on reinsured paper has gone from $12.8 million to an estimated $378 million for crop year 1985, an increase of 2,900 percent. During the same period, the share of business written by reinsured companies compared with government operations, including agents and private insurance companies under Agency Sales and Service Agreements, rose from 3 percent to 70–80 percent by available estimates.

The proposed Standard Reinsurance Agreement sets forth the terms and conditions under which the Corporation will reinsure all eligible crop insurance policies sold or reinsured by insurance companies. All such policies must be written on terms, including premium rates, approved by the Corporation, and may only be issued on crops and in areas approved by the Corporation. All

participating insurance companies must submit a plan of operation for the Corporation's approval.

The policies must be made available to all eligible producers by the participating insurance companies. In the administration of the Agreement, the Corporation must be provided all relevant information, including a list of all applicants refused coverage and all producers cancelled from insurance, along with the reason for such action. All loss adjustment methods will be prescribed by the Corporation and only licensed agents or brokers may sell policies covered by the Agreement. The Corporation may, at any time, suspend its obligation to accept additional liability by providing written notice to that effect.

Interested parties may obtain a copy of the proposed Reinsurance Agreement for the 1985–87 reinsurance years by contacting the Office of the Manager, Federal Crop Insurance Corporation, Room 4096, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

Written comments, data, and opinions on this proposed rule should be sent to the Office of the Manager, Federal Crop Insurance Corporation, Room 4096, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

Written comments received pursuant to this notice will be available for public inspection in the Office of the Manager during regular business hours, Monday through Friday.

List of Subjects in 7 CFR Part 400

Crop insurance, reinsurance agreement.

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.* the Federal Crop Insurance Corporation hereby proposes to add a new Subpart J to Part 400 of Title 7 of the Code of Federal Regulations, to be known as 7 CFR Part 400, Subpart J—General Administrative Regulations; Reinsurance Agreement, containing procedures applicable to insurance companies under a reinsurance agreement with the Corporation, to read as set forth below:

PART 400—GENERAL ADMINISTRATIVE REGULATIONS

. . . . . .

Subpart J—Reinsurance Agreement

Sec.
400.75 Availability of Reinsurance Agreements.
400.76 Eligibility for Reinsurance Agreements.
400.77 Obligations of the Corporation.
400.78 Limitations on Corporation's obligations.
400.79 Obligations of participating Insurance Company.
400.80 Disputes.
400.81 OMB control numbers.

Authority: Secs. 506, 516, Pub. L. 75–430, 52 Stat. 73, 77 as amended (7 U.S.C. 1506, 1516).

Subpart J—Reinsurance Agreement

§ 400.75 Availability of reinsurance agreements.

The Federal Crop Insurance Corporation ("Corporation") will offer Reinsurance Agreements to eligible companies under which the Corporation will reinsure policies which the companies issue to producers of agricultural commodities. The Reinsurance Agreement will be consistent with the requirements of the Federal Crop Insurance Act, as amended, and provisions of the regulations of the Corporation found at Chapter IV of Title 7 of the Code of Federal Regulations.

§ 400.76 Eligibility for reinsurance agreements.

A company will be eligible to participate in an Agreement if the Corporation determines the company meets the financial standards and financial reporting requirements at Subpart G of Part 400 of Title 7 of the Code of Federal regulations (7 CFR 400.50 *et seq.*)

§ 400.77 Obligations of the Corporation.

The Reinsurance Agreement will include the following among the obligations of the Corporation.

(a) The Corporation will reinsure policies written on terms, including premium rates, approved by the Corporation, on crops and in areas approved by the Corporation, and in accordance with the provisions of the Federal Crop Insurance Act, as amended, and the provisions of these regulations.

(b) The Corporation will pay a portion of each producer's premium on the policies reinsured under the Reinsurance Agreement, as authorized by the Federal crop Insurance Act, as amended.

§ 400.78 Limitations on Corporation's obligations.

The Reinsurance Agreement will include the following among the limitations on the obligations of the Corporation.

(a) The Corporation may, at any time, suspend its obligation to accept additional liability from the company by providing written notice to that effect.

(b) The obligations of the Corporation under the Agreement are contingent upon the availability of appropriations.

(c) The Corporation will not reinsure any policy sold by the company to a producer after the date the company receives notice that the Corporation has determined that the producer is ineligible to receive Federal crop insurance.

§ 400.79 Obligations of participating insurance company.

The Reinsurance Agreement will include the following among the obligations of the Company.

(a) The company shall follow all Corporation procedures in its administration of the crop insurance policies reinsured.

(b) The company shall make available to all eligible producers crop insurance for the crops and in the areas which are stated in its plan of operation which is approved by the Corporation.

(c) The company shall provide the Corporation, on forms approved by the Corporation, all information that the Corporation may deem relevant in the administration of the Agreement, including a list of all applicants refused coverage and all insured producers cancelled from insurance, along with the reason for such action, the crop program and the amount of coverage for each.

(d) The company shall utilize only loss adjustment procedures and methods that are approved by the Corporation.

(e) The company shall sell the policies covered under the Agreement through licensed agents or brokers who have successfully completed a training course approved by the Corporation.

(f) The company shall not discriminate against any employee, applicant for employment, insured or applicant for insurance because of race, color, religion, sex, age, handicap, or national origin.

§ 400.80 Disputes.

All disputes arising under this Subpart and the Agreement entered into by the company and the Corporation must be submitted for decision to the Manager of the Corporation. The decision for the Manager shall be final unless the company requests reconsideration in writing within 30 days of the receipt of the decision. Any hearing provided by the Corporation will be of an informal nature and the rules of evidence will not apply. Pending final decision of the dispute, the company will proceed diligently with the performance of the Agreement, as required by the Corporation.

§ 400.81 OMB control numbers.

The information collection requirements contained in the Agreement, to which these operating procedures apply, have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Nos. 0563–0003 and 0563–0007.

Done in Washington, D.C., on March 25, 1985.

Peter F. Cole,

Secretary, Federal Crop Insurance Corporation

Dated: April 22, 1985.

Approved:

Edward Hews,

Acting Manager.

BILLING CODE 3410–08–M

Commodity Credit Corporation

7 CFR Part 1421

[Amdt .4]

Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: This rule proposes to amend the regulations found at 7 CFR 1421.5551 *et seq.* relating to the Commodity Credit Corporation (CCC) Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed. The proposed rule would: (1) Permit a parent company to submit a financial statement for a wholly-owned subsidiary; (2) permit warehousemen to submit financial statements on forms other than on Form TW–51; (3) revise the references to CCC regulations governing suspension and debarment; (4) permit CCC to accept an irrevocable letter of credit on forms other than Form CCC–33A; (5) delete the use of a Certificate of Competency issued by the Small Business Administration for a warehouseman who is deficient in net worth; (6) delete certain references to the withdrawal of approval of warehouses by CCC; and (7) make certain other miscellaneous changes.

DATE: Comments must be received on or before May 28, 1985 in order to be assured of consideration.

ADDRESS: Interested persons are invited to send written comments to Paul W. King, Director, Warehouse Division, United States Department of Agriculture, Agricultural Stabilization and Conservation Service, P.O. Box 2415, Washington, D.C. 20013; (202) 447–4018 or 447–7433.

FOR FURTHER INFORMATION CONTACT: Lynda Flament, 202–447–7912, Warehouse Division, U.S. Department of Agriculture, Agricultural Stabilization and Conservation Service, P.O. Box 2415, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under USDA procedures established in accordance with Departmental Regulation 1512–1 and Executive Order 12291 and has been classified "not major." It has been determined that the provisions of this proposed rule will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local governments, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

It has been determined by an environmental evaluation that his action will have no significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed

It has been determined that the Regulatory Flexibility Act is not applicable to this proposed rule since the Commodity Credit Corporation is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of rulemaking with respect to the subject matter of this rule.

This program/activity is not subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

The Commodity Credit Corporation (CCC) Charter Act (15 U.S.C. 714) provides authority for CCC to conduct a number of operations to stablize, support, and protect farm income and prices. CCC is authorized to carry out such activities as making price support available with respect to various agricultural commodities, removing and disposing of surplus agricultural commodities, exporting or aiding in the exportation of agricultural commodities, and procuring agricultural commodities for sale both in the domestic market and abroad.

Section 4(h) of the CCC Charter Act provides that the Corporation shall not acquire real property in order to provide storage facilities for agricultural commodities, unless CCC determines that private facilities for the storage of such commodities are inadequate. Further, section 5 of the CCC Charter Act provides that, in carrying out the Corporation's purchasing and selling operations, and in the warehousing, transporting, processing, or handling of agricultural commodities, CCC is directed to use, to the maximum extent practicable, the usual and customary channels, facilities, and arrangements of trade and commerce.

Accordingly, CCC has set forth standards of approval which must be met by warehousemen before CCC will enter into storage agreements with such warehousemen for the storage of agricultural commodities which are owned by CCC or which are serving as collateral for price support loans made available by CCC.

CCC proposes to amend the following regulations which govern the Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed (7 CFR 1421.5551 *et seq.*) in the manner described below.

Section 1421.5551(d)(2) of the regulations currently requires warehousemen to submit financial statements of Form TW–51 and permits a chain of warehouses owned and operated by a single business entity to submit only one financial statement. That form has been revised and is now form WA–51–2. Several warehousemen have complained that their independently prepared financial statements should satisfy CCC needs and they should not be required to incur the added expense and paperwork burden of submitting financial information on CCC's form. Also, several warehousemen whose warehouse facilities are wholly-owned and operated by a parent company have requested that the financial statement which is prepared for the parent company and which includes the combined financial position of the parent company and all subsidiaries be accepted by CCC. These warehousemen believe that to prepare a separate financial statement for each subsidiary warehouse is very costly and unnecessary. This proposed rule would permit warehousemen to submit financial statements to CCC on forms other than the WA–51–2 with the approval of the Director, Kansas City Commodity Office (KCCO), or the Director's designee. In addition, this proposed rule provides that a financial

statement from the parent company may be accepted by CCC in lieu of individual statements from each wholly-owned subsidiary if approved by the Director, KCCO, or the Director's designee.

Section 1421.5552 (c) of the regulations currently provides that, in meeting the standards for approval, the warehouseman, officials and each of the supervisory employees of the warehouseman in charge of the warehouse must not be either suspended or debarred under CCC's suspension and debarment regulations, 7 CFR Part 1407. The Board of Directors of the Corporation has adopted, with limited reservations, the regulations implemented by the Department of Agriculture with respect to the suspension and debarment of individuals and firms contracting with CCC. The provisions of § 1421.5552(c) have been revised to merely reference the CCC suspension and debarment regulations. A conforming amendment has also been made in § 1421.5556(c)(2).

Section 1421.5553(e) of the regulations currently provides that CCC may accept an irrevocable letter of credit in lieu of the required amount of bond coverage if the issuing bank is a commercial bank insured by the Federal Deposit Insurance Corporation and the letter of credit is submitted to CCC on Form CCC–33A, "Irrevocable Letter of Credit". Several banks have objected to the use of Form CCC–33A and would prefer to use their own letter of credit form. This proposed rule would permit commercial banks to issue letters of credit on forms other than Form CCC–33A, provided that such forms are approved by the Director, KCCO, or the Director's designee.

Section 1421.5555(b) of the regulations currently provides that a Certificate of Competency issued by the Small Business Administration (SBA) for a warehouseman will be accepted by CCC for the purpose of establishing conformance by the warehouseman with certain of the Standards for Approval and the warehouseman will not be required to furnish bond coverage for any deficiency in net worth. The SBA has been reluctant to issue a Certificate of Competency to warehousemen since there is no guarantee that CCC–owned commodities will be stored with a warehouseman who has been issued a certificate. In fact, there have been no grain, rice, bean, or seed warehousemen approved with Certificate of Competency in the recent past. Accordingly, it has been concluded that the provisions of § 1421.5555(b), which references the use of a Certificate of Competency, are not needed and this proposed rule would delete that section accordingly.

Section 1421.5556 of the present regulations sets forth the procedures under which CCC approves or disapproves a warehouse for the purpose of storing comodities owned by CCC or pledged to CCC as price support loan collateral. These regulations also provide for the administrative appeal procedures which may be utilized by a warehouseman whose warehouse was not approved by CCC. In addition, § 1421.5556 sets forth the procedures and requirements involving the withdrawal of approval of a warehouse by CCC as a result of the failure of the warehouse to continue meeting the standards for approval or for the failure of the warehouseman to perform the contractual obligations specified in the CCC storage agreement. This proposed rule would delete any references in § 1421.5556 to the withdrawal of approval of warehouses by CCC since it is felt that these regulations should only relate to the approval, rather than the disapproval, of warehouses by CCC. The terms and conditions with respect to the continuing obligations of the warehouseman to meet the standards of approval and storage commitments will be set forth in the Storage Agreement entered into between the warehouseman and CCC.

Section 1421.5556(c)(1) has also been revised to provide that any request by a warehouseman for reconsideration of a determination by CCC that the warehouseman has failed to meet the Standards for Approval must be in writing. Previously, such a request for reconsideration could be made orally to the Director, KCCO, as well as in writing.

In addition to the foregoing, the following changes have been made: (1) Section 1421.5551(b) of the regulations has been amended to correct the mailing address for the Kansas City Commodity Office, and the table of contents has been revised; (2) section 1421.5558 has been revised to simplify the language and delete the current contract fee schedule since it is subject to change; and (3) a new § 1421.5559 has been added to include control numbers assigned by the Office of Management and Budget (OMB) under provisions of 44 U.S.C. Chapter 35 to information collection requirements.

List of Subjects in 7 CFR Part 1421

Grains, Loan programs, Agriculture, Oilseeds, Peanuts, Price support programs, Soybeans, Surety bonds, Tobacco, and Warehouses.

Proposed Rule

Accordingly, it is proposed that the regulations at 7 CFR Part 1421 be amended as follows:

1. The Authority citation to 7 CFR Part 1421, Subpart—Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed is added to read as follows:

Authority: Secs. 4 and 5, 62 Stat. 1070, as amended, 1072, as amended (15 U.S.C. 714 b and c).

2. In Section 1421.5551, paragraphs (b) and (d)(2) (iv) and (v) are revised to read as follows:

§ 1421.5551 General Statement and Administration.

* * * * *

(b) Copies of the CCC storage agreement and forms required for obtaining approval under this subpart may be obtained from the Kansas City Commodity Office, U.S. Department of Agriculture, P.O. Box 205, Kansas City, Missouri 64141 (hereinafter referred to as the "KCCO").

* * * * *

(d) * * *

(2) * * *

(iv) A current financial statement on Form WA–51–2, "Financial Statement", supported by such supplemental schedules as CCC may request. Financial statements may be submitted on forms other than Form WA–51–2 with approval of the Director, KCCO, or the Director's designee.

(v) Only one financial statement is required for a chain of warehouses owned or operated by a single business entity. If approved by the Director, KCCO, or the Director's designee, the financial statement of a parent company, which includes the financial position of a wholly-owned subsidiary, may be used to meet the CCC standards for approval for the wholly-owned subsidiary.

* * * * *

4. In Section 1421.5552, paragraph (c)(2) is revised to read as follows:

§ 1421.5552 Basic standards.

* * * * *

(c) * * *

(2) Be neither suspended nor debarred under applicable CCC suspension and debarment regulations.

* * * * *

5. In Section 1421.5553, paragraph (e) is revised to read as follows:

§ 1421.5553 Bonding requirements for net worth.

* * * * *

(e) An irrevocable letter of credit may be accepted by CCC in lieu of the required amount of bond coverage provided that the issuing bank is a commercial bank insured by the Federal Deposit Insurance Corporation. Such standby letter of credit shall be on Form CCC–33A, "Irrevocable Letter of Credit", or on such other form as may be specifically approved by the Director, KCCO, or the Director's designee.

6. Section 1421.5555 is amended by deleting paragraph (b) and by redesignating paragraph (c) as paragraph (b).

7. Section 1421.5556 is revised to read as follows:

§ 1421.5556 Approval of warehouses, requests for reconsideration.

(a) CCC will approve a warehouse if it determines that the warehouse meets the standards set forth in this subpart. CCC will send a notice of approval to the warehouseman. Approval under this subpart, however, does not relieve the warehouseman of the responsibility for performing the warehouseman's obligations under any agreement with CCC or any other agency of the United States.

(b) Except as otherwise provided in this subpart:

(1) CCC will not approve the warehouse if CCC determines that the warehouse does not meet the standards set forth in this subpart, and

(2) CCC will send any notice of rejection of approval to the warehouseman. The notice will state the cause(s) for such action. Unless the warehouseman or any officials or supervisory employees of the warehouseman are suspended or debarred, CCC will approve the warehouse if the warehouseman establishes that the causes for CCC's rejection of approval have been remedied.

(c) If rejection of approval by CCC is due to the warehouseman's failure to meet the standards set forth:

(1) In § 1421.5552, other than the standard set forth in paragraph (c)(2) thereof, the warehouseman may, at any time after receiving notice of such action, request reconsideration of the action and present to the Director, KCCO, in writing, information in support of such request. The Director shall consider such information in making a determination and notify the warehouseman may, if dissatisfied with the Director's determination, obtain a review of the determination and an informal hearing thereon by filing an appeal with the Deputy Administrator, Commodity Operations, Agricultural Stabilization and Conservation Service (hereinafter referred to as "ASCS"). The time for filing appeals, forms for requesting an appeal, nature of the informal hearing, determination and reopening of the hearing shall be as prescribed in the ASCS regulations governing appeals, 7 CFR Part 780. When appealing under such regulations, the warehouseman shall be considered as a "participant"; and

(2) In § 1421.5552(c)(2), the warehouseman's administrative appeal rights with respect to suspension and debarment shall be in accordance with applicable CCC regulations. After expiration of a period of suspension or debarment, a warehouseman may, at any time, apply for approval under this subpart.

7. Section 1421.5558 is revised to read as follows:

§ 1421.5558 Contract fees.

(a) Each warehouseman who has a non-Federally licensed grain or rice warehouse in States that do not have a Cooperative Agreement with CCC for warehouse Examinations must pay an annual contract fee to CCC for each such warehouse which is approved by CCC or for which CCC approval is sought as follows:

(1) A warehouseman who has an existing agreement with CCC for the storage or handling of CCC-owned commodities or commodities pledged to CCC as loan collateral must pay an annual contract fee for each warehouse approved under that agreement in advance of the revewal date of such agreement.

(2) A warehouseman who does not have an existing agreement with CCC for the storage and handling of CCC-owned commodities or commodities pledged to CCC as loan collateral but who desires such an agreement must pay a contract fee for each warehouse for which CCC approval is sought prior to the time that the agreement is approved by CCC.

(b) The amount of the contract fee shall be determined and announced annually in the **Federal Register**.

9. Section 1421.5559 is added to read as follows:

§ 1421.5559 OMB control numbers assigned pursuant to Paperwork Reduction Act.

The information collection requirements contained in this regulation (7 CFR Part 1421) have been approved by the Office of Management and Budget under provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Numbers 0560–0009, 0560–0036.

Signed at Washington, D.C., on April 23, 1985.

Everett Rank,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410–05–M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Specific Exemptions

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule..

SUMMARY: The Nuclear Regulatory Commission is proposing to amend its regulations to clarify the standards that will be applied when it considers whether to grant exemptions from the regulatory requirements codified in 10 CFR Part 50.

DATE: Comment period expires May 28, 1985. Comments received after that date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before May 28, 1985.

ADDRESSES: Send Comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Branch. Hand deliver comments to: Room 1121, 1717 H Street, NW., Washington, D.C. between 8:15 a.m. and 5: p.m.

FOR FURTHER INFORMATION CONTACT: F. X. Cameron, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone: 301–492–8689

SUPPLEMENTARY INFORMATION:

I. Background

Section 50.12 of Chapter 1, Title 10 of the Code of Federal Regulations provides that the Commission may grant exemptions from the regulations in Part 50 that it determines are authorized by law and will not endanger life or property or the common defense and security and are otherwise in the public interest. Traditionally, this authority has been delegated by the Commission to its staff which determines whether exemptions are needed and justified. The Commission believes that it is not possible for its regulations to predict and accommodate every conceivable circumstance. Consequently, it has historically provided mechanisms to grant exemptions or waivers where application of the regulation would not serve the public interest and no undue

risk to the public health and safety would occur as a result of not requiring literal adherence to a particular requirement.

In several recent adjudicatory proceedings reviewed by the Commission, it has become evident that it would be desirable to attempt to state clearly the circumstances where the Commission believes that exemptions are warranted for the guidance of applicants, licensees, the staff and the public.

The Commission wishes to emphasize that it expects the intent of its regulations to be met and normally this requires conforming to the regulations as stated. The Commission recognizes, however, that there are circumstances where on balance it would not be equitable or in the public interest to require literal adherence to regulations particularly where to so require would not result in an improvement in overall safety or a reduction in risk to the public. The objective of the proposed rule is to identify the criteria to apply in such circumstances and to provide a means for considering the equities so that consistent regulatory decisions can be made concerning exemptions to Commission regulations.

The authority of an administrative agency to provide for exemptions from its regulations is well-established.[1] In *U.S.* v. *Allegheny-Ludlum Steel Corp.*, Justice Rehnquist stated that:

> It is well established that an agency's authority to proceed in a complex area . . . by means of rules of general application entails a concomitant authority to provide exemptions procedures in order to allow for special circumstances. 406 U.S. 742, 755 (1972).

However, judicial decisions also reject the approach of granting exemptions indiscriminately. As described by Judge Leventhal in *WAIT Radio* v. *FCC:*

> The agency may not act out of unbridled discreation or whim in granting waivers any more than in any other aspect of its regulatory function. 418 F.2d 1153, 1157 (D.C. Cir. 1969). *See also, Basic Media Ltd.*, v. *FCC*, 559 F.2d 830, 833. (D.C. Cir. 1977); *Mary Carter Paint Co.* v. *FTC*, 333 F.2d 654, 660 (5th Cir. 1964) (concurring opinon).

The courts have cited several permissible rationales for the granting of exemptions. In *U.S.* v. *Allegheny-Ludlum Steel Corp., supra*, the Supreme Court cited "special circumstances" as a rationale for granting exemptions. In *WAIT Radio*, the D.C. Circuit believed that an exemption or waiver provision might account for considerations of "hardship, equity, or more effective implementation of overall policy." *Supra*, at 1159. In *Basic Media, supra*, the D.C. Circuit stated that any rule of general applicability will involve particular cases of hardship for which an agency would grant an exemption. Similarly, in *Gulf Oil Corp.* v. *Hickel*, 435 F.2d 440 (D.C. Circuit 1970), the court found that a provision for adjustment in cases of extreme hardship is a meaningful component of a regulatory scheme. Another rationale was provided in *Industrial Broadcasting Co.*, v. *FCC*, 437 F.2d 680 (D.C. Cir. 1970) where the court held that the desired flexibility in the regulatory process is maintained by requiring the agency to take a hard look at novel proposals, i.e., where the person seeking a waiver can demonstrate that his or her circumstances are substantially different from those which have been carefully considered in the rulemaking proceeding from which an exemption is desired.

In conformance with the principle that a means of granting relief from regulations should be provided, 10 CFR 50.12(a) of the Commission regulaitons provides that:

> (a) The Commission may, upon application by any interested person or upon its own initiative grant such exemptions from the requirements of the regulations in this part as it determines are authorized by law and will not endanger life or property or the common defense and security and are otherwise in the public interest. To obtain an exemption to Appendices G and H to this part, the requirements of paragraph 50.60(b) of this part must be met in addition to the requirements of this paragraph.

At this point, it should be noted that 10 CFR 5012(b) establishes a separate exemption procedure to permit the carrying out of construction activities, normally prohibited by 10 CFR 50.10, prior to the issuance of a construction permit.[2] The § 50.12(b) procedures are not of concern here and are left undisturbed by this proposed rulemaking.

In reviewing § 50.12(a) requests for exemptions, the focus of the NRC staff ("staff") has been on whether any undue risk would result from the granting of a particular exemption. This determination was, in general, the result of a qualitative engineering analysis of the purpose of the regulatory requirement and of the specific methods specified in the regulation for achieving the regulatory purpose. The staff would then compare the proposed method of operation to ensure that the regulatory purpose was satisfied and that the method to be used in a particular case was, under the particular circumstances before the staff, appropriate and technically sound as a method for accomplishing the regulatory purpose. In recent years when probabilistic quantitative assessment techniques have been available, these techniques, along with engineering judgment, have been used to ensure that the exemption involved was acceptable from a safety standpoint. In summary, the staff would evaluate an exemption request to determine if there was a justifiable reason for the proposed exemption and, in addition, whether adequate protection of the public health and safety would be maintained if the exemption were granted.

In addition, the staff viewed the Commission's regulatory framework as containing a reasonable amount of flexibility, with various requirements applicable only for certain modes of operation, and operation at certain times and power levels. For a typical power reactor under operating license review, the staff normally would recognize that, while the plant was ready for low power operation, power ascension or even initial full power operation, the plant might not fully comply with each and every NRC regulation. In these circumstances, "non-compliances" typically were dealt with by license conditions requiring completion of installation, testing, or further analyses before proceeding to a particular power level ("Prior to exeeding 5% power * * *") or by a particular time ("By the first refueling outage * * *"). The effect on safety of such temporary "non-compliances" was evaluated by the Staff and discussed and justified in the staff safety evaluation report or supplement thereto. In situations where the noncompliances would be corrected in a relatively short time and did not prevent a finding of adequate safety, the staff would condition the operating license so as to mandate that the

Cir. 1970); *Industrial Broadcasting Co.* v. *FCC*, 437 F.2d 680, 683 (D.C. Cir. 1970), *Basic Media Ltd.* v. *FCC*, 559 F.2d 830 (D.C. Cir. 1977).

[2] For a thorough discussion of the application of 10 CFR 50.12(b), *see, In the Matter of United States Department of Energy, Project Management Corporation, Tennessee Valley Authority* (Clinch River Breeder Reactor Plant) CLI–83–1, 17 NRC 1 (1983). Note that 10 CFR 2.758(b) of the Commission's regulations allows a party to an adjudicatory proceeding involving an initial licensing decision to petition for a waiver or exemption from the application of a Commission regulation. The sole ground for such a waiver is that special circumstances in the particular proceeding are such that application of the regulation would not serve the purposes for which the regulation was adopted. Section 2.758(b) is also unaffected by this proposed rulemaking.

requirements be met at a later time or before a particular power level rather than expressly consider or grant an exemption from the regulations for the period of operation prior to reaching the time or power level at which the deficiency was to be corrected. In issuing operating licenses, the staff only considered and explicitly granted exemptions in instances of long-term or permanent non-compliance with the regulations and where, of course, the staff could find that the standards for granting an exemption in 10 CFR 50.12(a) were satisfied. Note that the proposed rule, when it becomes effective, would eliminate the existing practice of granting temporary "non-compliances" without expressly granting an exemption under 50.12(a).

The Commission's recent decision on an exemption request for the Shoreham nuclear power plant,[3] represented a departure from past staff practice in the exemption area. In Shoreham, the Commission requested the applicant, in addressing the determinations to be made under the 10 CFR 50.12(a) exemption criteria, to includle a discussion of:

1. The "exigent circumstances" that favor the granting of an exemption under 10 CFR 50.12(a) should it be able to demonstrate that, in spite of its noncompliance with GDC 17, the health and safety of the public would be protected.

2. Its basis for concluding that, at the power levels for which it seeks authorization to operate, operation would be as safe under the conditions proposed by it, as operation would have been with a fully qualified onsite A/C power source.

In the context of exemptions related to plant operations, these determinations regarding "exigent circumstances" and "as safe as" are not explicitly stated in 10 CFR 50.12(a). Although the Commission later specified that *Shoreham* was only to apply to the particular circumstances of that case, the decision did underscore the need to review existing Commission practice in the exemption area. The proposed rule is an attempt to fashion a comprehensive, consistent, practicable, and appropriate framework for reviewing exemption requests, based on past staff practice and on the Commission's concerns, as evidenced in the *Shoreham* decision and related discussions.

II. The Proposed Rule

The proposed rule retains the existing criteria of § 50.12(a) in a slightly modified form, as general standards for the granting of exemptions. Under proposed § 50.12(a)(1), the Commission may grant exemptions which:

are authorized by law, will not present an undue risk to the public health and safety, are consistent with the common defense and security, and are in the public interest.

As in the existing rule, an exemption must be "authorized by law." Apart from the very fact of granting the exemption relief itself, the granting of the exemption cannot be in violation of other applicable laws, such as the Atomic Energy Act, or the National Environmental Policy Act.

In a departure from the text of the existing rule, the proposed rule would require a finding that the exemption will not "present an undue risk to the public health and safety" and would be "consistent with the common defense and security." These criteria provide an explicit recognition of traditional staff practice in evaluating the safety implications of a particular exemption. It is anticipated that this evaluation will consider such factors as compensatory measures, length of time that the exemption will be in effect, and stage of plant operation (i.e., fuel loading, low power, full power, etc.). The Commission believes that the "not endanger" language in the current rule was never intended to embody any special standards for exemptions that differed from the statutory standards that licensing must provide adequate protection to the health and safety of the public and be in accord with the common defense and security. The "no undue risk" standard of the proposed rule is a refinement of the statutory standard that reflects current staff practice in the exemptions area.

As is currently required by § 50.12(a), the proposed rule would also require that the exemption be in the "public interest." However, in recognition of the Commission's decision in *Shoreham, supra*, the Commission wishes to explicitly state that the public interest determination will consist of a consideration of the special circumstances that justify the exemption. Apart from those related conditions set forth in proposed § 50.12(a)(2), discussed *infra*, that are specific applications of "special circumstances," this determination would be confined to the consideration of the equities of the situation, similar to those cited in the *Shoreham* decision, including the stage of the facility's life, any financial or economic hardships, any unusual difficulties in complying with the regulation, any internal inconsistencies in the regulation, the applicant's good faith effort to comply with the regulation from which the exemption is sought, the public interest in adherence to the Commission's regulations, and the safety issues involved.

The Commission notes that because the criteria in proposed § 50.12(a)(1) will now include consideration of hardships or unusual difficulties, as well as the level of safety, it is deleting the provision from existing § 50.12(a) on additional requirements for exemptions from the fracture toughness requirements of 10 CFR Part 50, Appendices G and H. A corresponding deletion has been made to 10 CFR 50.60.(b).

In addition to the general standards of proposed § 50.12(a)(1) the Commission is proposing to add a new § 50.12(a)(2), which would require that one of several conditions exist before an exemption could be granted. The Commission believes that these conditions represent situtations in which it would be reasonable to grant an exemption, provided that the general standards of § 50.12(a)(1) are also met. These conditions were selected on the basis of exemption criteria that have been noted by the courts with approval (special circumstances, hardship, equity, more effective implementation of overall policy, circumstances substantially different from those considered in the rulemaking proceeding) and on the basis of examples from past Commission exemption practice where the circumstances underlying the exemption appeared to be relevant and appropriate for exemption relief.[4] The Commission would emphasize that the conditions in proposed § 50.12(a)(2) constitute a specific application of either the safety criterion or the public interest (special circumstances) criterion stated in the general standards of proposed § 50.12(a)(1). Although an exemption request may satisfy one of the conditions in proposed § 50.12(a)(2), the general criteria in proposed § 50.12(a)(1) must *also* be satisfied. For example, proposed § 50.12(a)(2)(iii) establishes a condition that "alternative or compensatory means exist to achieve the underlying purpose of the rule." Although the exemption request may satisfy this specific condition, it must also satisfy the general public interest

[3] *In the Matter of Long Island Lighting Company* (Shoreham Nuclear Power Station, Unit 1), CLI–84–8, slip op., (May 16, 1984) (hereinafter "Shoreham").

[4] As noted by the D.C. Circuit in *WAIT Radio* v. *FCC*, 418 F.2d 1153, 1159, (D.C. Cir. 1969): Sound administrative procedures contemplates waivers, or exemptions granted only pursuant to a relevent standard . . . best expressed in a rule that obviates discriminatory approaches. . . . The process viewed as a whole leads to a general rule, and limited waivers or exemptions granted pursuant to an appropriate general standard.

(special circumstances) criterion of proposed § 50.12(a)(1) to justify the granting of the exemption. The Commission's objective in establishing the conditions of § 50.12(a)(2) is to impose limits on the type of exemption requests that can be granted. The addition of § 50.12(a)(2) is intended to reaffirm and strengthen the existing NRC policy and practice of evaluating and granting exemptions in a judicious and discriminating manner.

Proposed § 50.12(a)(2) would require that one of the following be satisfied before an exemption could be granted:

- Application of the regulation in the particular circumstances would be in conflict with other rules of the Commission; or
- Application of the regulation in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule; or
- Alternattive or compensatory means exist to achieve the underlying purpose of the regulation;
- The exemption would result in an overall benefit to the public health and safety that compensates for any decrease in safety that may result from the grant of the exemption; or
- Application of the regulation would result in treatment of the particular applicant or licensee in a manner substantially different than other similarly situated applicants or licensees; or
- The exemption would provide only temporary relief from the applicable regulation; or
- There is present any other material circumstance not considered when the regulation was adopted.

Proposed § 50.12(a)(2)(i) would address those situations where application of a regulation in a particular circumstance would be in conflict with other rules or the Commission. This provision is designed for those rare situations where an applicant or licensee would be in the anomalous position of satisfying two or more conflicting requirements.

Proposed § 50.12(a)(2)(ii) would address those situations where application of the regulations in the particular circumstances is not necessary to achieve, or would not serve, the underlying purpose of the rule. This would include those situations considered in requests for exemptions under 10 CFR 2.758(b), where circumstances peculiar to that case, as opposed to any alleged generic inadequacy of the regulation, may result in the frustration of the underlying purpose of the rule. For example, *see, In the Matter of Pacific Gas and Electric Company* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB–653, 16 NRC 55 (1981); *In the Matter of Metropolitan Edison Company* (Three Mile Island Nuclear Station, Unit No. 1), CLI–80–16, 11 NRC 674 (1980); *In the Matter of Duke Power Company* (Catawba Nuclear Station, Units 1 and 2), CLI–79–9, 2 NRC 180 (1985).

Proposed § 50.12(a)(2)(iii) addresses situations where alternative or compensatory means exist to achieve the underlying purpose of the regulation. This would allow an exemption request to be considered where it could be shown that satisfactory alternative or compensatory mechanisms exist to achieve the regulatory objective. It must be understood here that the underlying purpose of the rule should be something more specific than achieving adequate safety protection. Otherwise all of the safety requirements in 10 CFR Part 50 become subject to open litigation, and the exemption process becomes open ended. Rather, the specific objective of the regulation must be ascertained from the rule itself or the underlying rulemaking proceeding (for example, the specific purpose of 10 CFR 50.46 would be assuring a coolable core during and after postulated loss-of-coolant accidents).

Proposed § 50.12(a)(2)(iv) would address situations where the exemption would result in an overall benefit to health and safety. This provision would focus on those circumstances where, on balance, the exemption would actually result in a net increase in overall safety or quality of plant operations.

Proposed § 50.12(a)(2)(v) would address those situations where the application of the regulation would result in treating a particular applicant or licensee in a manner substantially different than other similarly situated applicants or licensees. This is intended to provide equitable treatment to applicants or licensees who, because of some unusual circumstance, are affected in a manner different than that of other similarly situated licensees or applicants. For example, *see In the Matter of Duke Power Company* (Catawba Nuclear Station, Units 1 and 2), CLI–79–9, 2 NRC 180 (1975).

Proposed § 50.12(a)(2)(iv) establishes a condition where the exemption would provide only temporary relief from the applicable regulation. This would cover the so-called "schedular" exemption where the relief sought is limited to a specific amount of time or until a specific event occurs. The applicant's good faith efforts to comply with the required schedule would be one of the factors considered under § 50.12(a)(1) in determining whether to grant the exemption.

Proposed § 50.12(a)(2)(vii) establishes a category of any other material circumstances not considered when the regulation was adopted. Although the Commission believes that the conditions in proposed § 50.12(a)(2)(i) through (vi) will cover most requests in which an exemption could reasonably be granted, proposed § 50.12(a)(2)(vii) recognizes that there may be circumstances, which could not have been foreseen in developing the conditions in proposed § 50.12(a)(2)(i) through (vi), in which it would be equitable to provide relief from the regulations. In these cases, after documentation of a material circumstances not considered when the regulation was adopted and meeting the general criteria, including "no undue risk", in proposed § 50.12(a)(1), an exemption could issue. However, this provision would also require the Executive Director for Operations to consult with the Commission before the exemption could be granted.

The Commission would once again exphasize that although one of the above provisions of proposed § 50.12(a)(2) may be satisfied, the exemption request must still be evaluated in the overall context of the general standards in § 50.12(a)(1). It is conceivable that one of the conditions in § 50.12(a)(2) will be satisfied, but the general standards of § 50.12(a)(1) cannot be met.

The Commission directs the staff to utilize existing staff practice, pre-*Shoreham*, in evaluating exemptions, pending the effective date of this rulemaking.

Separate Views of Commissioner Asselstine

Commissioner Asselstine would like comments on the following proposed rule as an alternative to that proposed by the Commission:

Section 50.12 Specific exemptions.

(a)(1) The Commission may, upon application by any interested person or upon its own initiative, grant exemptions from the requirements of the regulations in this part.

(2) The Commission will not consider granting an exemption unless special circumstances are present. Special circumstances are present whenever:

(i) compliance with the regulations would be inconsistent with some other Commission requirement;

(ii) compliance with the regulation would decrease overall facility safety, or would not acheive or not be necessary to achieve the purpose of the regulation;

(iii) compliance would result in undue hardship or other costs that are significantly in excess of those contemplated when the regulation was adopted, or that are significantly in excess of those incurred by others similarly situated;

(iv) a compliance issue is raised late in the licensing review that cannot be fully resolved in a timely fashion despite good faith efforts;

(v) compliance would result in applicant or licensee being treated in a manner significantly different from others similarly situated; or

(vi) there is present any other material circumstance not considered when the regulation was adopted.

(3) No exemption will be granted unless the Commission finds that it would be authorized by law and would be in accord with the common defense and security, and that there would be no undue risk to the health and safety of the public.

Finding of No Significant Environmental Impact

The Commission has determined under the National Environmental Policy Act of 1969, as amended, and the Commission's regulations in Subpart A of 10 CFR Part 51, that this rule is not a major Federal action significantly affecting the quality of the human environment. The proposed rule modifies the criteria for the consideration of exemption requests under 10 CFR Part 50. The adoption of such criteria does not have an environmental effect in and of itself. The potential environmental impact of a specific exemption will be evaluated at that time, as appropriate.

Paperwork Reduction Act

This proposed rule does not contain a new or amended information collection requirement subject to Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). Existing requirements were approved by the Office of Management and Budget, approval number 3150–0011.

Regulatory Analysis

The Commission has prepared a draft regulatory analysis on this proposed regulation. The analysis examines the costs and benefits of the alternatives considered by the Commission. The draft analysis is available for inspection in the NRC Public Document Room, 1717 H Street NW, Washington, DC. Single copies of the analysis may be obtained from: F.X. Cameron, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone 301–492–8689.

The Commission requests public comment on the draft regulatory analysis. Comments on the draft analysis may be submitted to the NRC as indicated under the **ADDRESSES** heading.

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission hereby certifies that this rule, if adopted, will not have a significant economic impact upon a substantial number of small entities. The proposed rule primarily affects commercial power reactor licensees and license applicants, none of whom constitute a "small entity."

List of Subjects in 10 CFR Part 50

Antitrust, Classified information, Fire prevention, Incorporation by reference, Intergovernmental relations, Nuclear power plants and reactors, Penalty, Radiation protection, Reactor siting criteria, Reporting and recordkeeping requirements.

For the reasons set out in the preamble, and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 553, the NRC is proposing to adopt the following amendments to 10 CFR Part 50.

PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

1. The authority citation for Part 50 continues to read as follows:

Authority: Secs. 103, 104, 161, 182, 183, 186, 189, 68 Stat. 936, 937, 948, 953, 954, 955, 956, as amended sec. 234, 83 Stat. 1244, as amended (42 U.S.C. 2133, 2134, 2201, 2232, 2233, 2236, 2239, 2282); secs. 201, 202, 206, 88 Stat. 1242, 1246 as amended (42 U.S.C. 5841, 5842, 5846), unless otherwise noted.

Section 50.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2952 (42 U.S.C. 5851). Sections 50.57(d), 50.58, 50.91, and 50.92 also issued under Pub. L. 97–415 Stat. 2071, 2073 (42 U.S.C. 2133, 2239). Section 50.78 also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Section 50.80–50.81 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 50.100–50.102 also issued under sec. 186, 68 Stat. 955 (42 U.S.C. 2236).

For the purposes of sec. 223, Stat. 958, as amended (42 U.S.C. 2273), §§ 50.10(a), (b), and (c), 50.44, 50.46, 50.48, 50.54, and 50.80(a) are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); §§ 50.10(b) and (c) and 50.54 are issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 50.55(e), 50.59(b), 50.70, 50.71, 50.72, 50.73, and 50.78 are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. In § 50.12, paragraph (a) is revised to read as follows:

§ 50.12 Specific exemptions.

(a) The Commission may, upon application by an interested person or upon its own initiative grant exemptions from the requirements of the regulations of this part, which—

(1) Are authorized by law, will not present an undue risk to the public health and safety, are consistent with the common defense and security, are in the public interest, and

(2) Meet one of the following—

(i) Application of the regulation in the particular circumstances would be in conflict with other rules of the Commission; or

(ii) Application of the regulation in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule; or

(iii) Alternative or compensatory means exist to achieve the underlying purpose of the regulation; or

(iv) The exemption would result in an overall benefit to the public health and safety that compensates for any decrease in safety that may result from the grant of the exemption; or

(v) Application of the regulation would result in treatment of the particular applicant or licensee in a manner substantially different than other similarly situated applicants or licensees; or

(vi) The exemption would provide only temporary relief from the applicable regulation; or

(vii) There is present any other material circumstance not considered when the regulation was adopted. If such condition is relied on exclusively for satisfying paragraph (a)(2) of this section, the exemption shall not be granted until the Executive Director for Operations has consulted with the Commission.

* * * * *

3. In § 50.60, paragraph (b) is revised to read as follows:

§ 50.60 Acceptance criteria for fracture prevention measures for lightwater nuclear power reactors for normal operation.

* * * * *

(b) Proposed alternatives to the described requirements in Appendices G and H of this part or portions thereof may be used when an exemption is granted by the Commission under § 50.12

Dated at Washington, D.C., this 23rd day of April, 1985.

Nuclear Regulatory Commission.
John C. Hoyle,
Assistant Secretary of the Commission.

BILLING CODE 7590-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 85-CE-11-AD]

Airworthiness Directives; Fairchild Aircraft Corporation Models SA226-T, SA226-AT, SA226-T(B), SA226-TC, SA227-AC, SA227-AT and SA227-TT Airplanes

AGENCY: Federal Aviation Administration, (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This amendment proposes to adopt a new Airworthiness Directive (AD) that would require additional inspection and recalibration of certain components critical to the Stall Avoidance System (SAS) on Fairchild Aircraft Corporation Models SA226-T, SA226-AT, SA226-T(B), SA226-TC, SA227-AC, SA227-AT and SA227-TT airplanes. Instances have occurred involving unwarranted actuation of the SAS control stick pusher mechanism at low altitudes. The proposed AD will assure proper operation of the SAS and the stall warning horn, and preclude loss of control due to an unwarranted actuation of the SAS.

DATE: Comments must be received on or before July 1, 1985.

ADDRESSES: Send comments on the proposal in duplicate to the FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 85-CE-11-AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106. The service bulletins applicable to this AD may be obtained from the Fairchild Aircraft Corporation, Post Office Box 32486, San Antonio, Texas 78284.

FOR FURTHER INFORMATION CONTACT: Mr. Sam Lovell, Airplane Certification Branch, ASW-150, Southwest Region, FAA, Fort Worth, Texas 76101; Telephone (817) 877-2448.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Availability of NPRMs

Any persons may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Central Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 85-CE-11-AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Discussion

The National Transportation Safety Board (NTSB) issued a Safety Recommendation (A-84-66) as a result of investigating one incident and receiving a report of another incident involving an unwarranted actuation of the SAS on certain Fairchild Model SA226 and SA227 airplanes. They recommended the FAA review the design, the installation, and the maintenance requirements for the SAS to verify system reliability and maintainability and take action as needed to preclude unwarranted actuation of the system that could present hazards to the airplane.

There are two systems presently being used on the above airplanes, the Rosemount and Conrac Systems. The Rosemount system was used in the earlier production airplanes and was replaced in later production airplanes by the Conrac system.

There have been 16 reports of unwarranted actuation of the SAS over a 5-year period. An additional 133 Malfunction of Defect (M or D) Reports were filed reporting various malfunctions with the SAS system. The majority of the 149 reports were a result of a lack of calibration of critical system components. In addition, proper operation of the stall warning horn is dependent upon a properly calibrated SAS system. Should such an unwarranted actuation occur during takeoff or landing, where the airplane is at a low altitude, an accident or incident could result.

An evaluation of the design, installation, maintenance, and field data regarding these systems disclosed that lack of calibration may have caused the majority of the problems experienced in the field. An established periodic inspection and calibration procedure could have prevented many of the problems that were reported.

Since the condition described herein is likely to exist or develop in other Fairchild Models SA226 and SA227 airplanes, the AD would require inspection and modification of the SAS in accordance with existing manufacturer's bulletins.

The FAA has determined that this proposed regulation involves approximately 582 airplanes. The estimated average cost of compliance with one cycle of the A is $970 per airplane. This cost precludes the proposed AD from having a significant economic impact on any small entity under the criteria of the Regulatory Flexibility Act. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a Regulatory evaluation as the anticipated impact is so minimal; and (4) if promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption **"ADDRESSES"**.

Air transportation, Aviation safety, Aircraft, Safety.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new AD:

§ 39.13 [Amended]

Fairchild Aircraft Corporation: Applies to Models SA226–T (S/N T201 thru T275, T277 thru T291), SA 226–AT (S/N AT001 thru AT 419, AT003E, AT038E, AT062E, AT064E), SA226–TC (S/N TC201 thru TC419, TC208E, TC211E, TC211EE, TC211EEE, TC211EEEE, TC222E, TC227E, TC228E, TC229E, TC234E, TC237E, TC238E, TC239E, TC331E, TC334E), SA226–T)(B) (S/N T(B)276, T(B)292 thru T(B)417, T(B)303E), SA227–AC (S/N AC406, AC415, AC416, AC420 thru AC601, AC603), SA227–TT (S/N TT421 thru TT541), SA227–AT, (S/N AT423 thru AT585) airplanes certificated in any category.

Compliance: Required within 100 hours time-in-service after the effective date of this AD unless previously accomplished and thereafter as indicated below:

To assure proper operation of the Stall Avoidance System (SAS) system, accomplish the following:

(a) Except as noted in paragraph (b) of this AD, modify and/or inspect the applicable airplanes in accordance with the manufacturer's service bulletins, at the initial and repetitive time-in-service intervals, as specified for the model and serial numbered airplanes, set forth in Table 1 below:

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 85-ANE-2]

Airworthiness Directives: Rolls-Royce Limited, Dart Model 542-4, 542-4K, 542-10, 542-10J, and 542-10K Turboprop Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to amend an existing airworthiness directive (AD) applicable to Rolls-Royce Dart Model 542-4, 542-4K, 542-10, 542-10J, and 542-10K engines, by exempting certain propeller shafts from repetitive inspections, requiring the inspection of additional serial numbered propeller shafts and incorporating other minor editorial changes. This proposed amendment is needed to align the requirements of the AD with the current revision of the Rolls-Royce service bulletin (SB).

DATE: Comments must be received on or before July 5, 1985.

ADDRESSES: Comments on the proposal may be mailed in duplicate to: Federal Aviation Administration, New England Region, Office of the Regional Counsel, Attention: Rules Docket No. 85-ANE-2, 12 New England Executive Park, Burlington, Massachusetts 01803 or delivered in duplicate to Room Number 311 at the above address.

Comments delivered must be marked: Docket Number 85-ANE-2.

Comments may be examined at the New England Regional Office, Office of the Regional Counsel, Room Number 311, between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday, except Federal holidays.

The applicable SBs may be obtained from Rolls-Royce Limited, Manager—Dart Service, East Kilbride, Glasgow G74 4PY, Scotland.

Copies of the SBs are contained in Rules Docket Number 85-ANE-2 in Office of the Regional Counsel, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT: Kenneth W. Steeves, General Aviation Engine Branch, ANE-142, Engine Certification Office, Aircraft Certification Division, FAA, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone (617) 273-7097.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available for examination in the Rules Docket, both before and after the closing date for comments, at the address given above. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 84-ANE-2." The postcard will be date/time stamped and returned to the commenter.

The FAA has determined that (1) propeller shafts marked "CU" have shown a complete absence of defects and consequenlty, no longer require repetitive in-service inspections at 1,200 hour intervals, (2) additional propeller shaft serial numbers which are shown in the current revision of Rolls-Royce SB Da72-367 should be included in the AD, and (3) minor editorial changes should be incorporated.

Therefore, the proposed amendment amends the existing AD as follows:

(a) Allows propeller shafts marked "CU" to be exempt from the repetitive in-service inspection requirements.

(b) Includes the additional serial numbered propeller shafts which are listed in the current revision of the SB.

(c) Incorporates minor editorial changes.

Conclusion

The FAA has determined that this proposed regulation will be less burdensome on the operators. Even though this proposed AD includes additional serial number propeller shafts it is believed that, if any of these shafts are in the United States, they have been inspected. In addition, the elimination of the repetitive inspection will reduce the cost of this AD for each affected engine by $400 per year. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as there is no anticipated impact; and (4) if promulgated, will not have a signficant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Engines, Air transportation, Aircraft, Aviation safety, Incorporation by reference.

The Proposed Amendment

Accordingly, the FAA proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by amending Amendment 39–1119, AD 70–25–06 to read as follows:

Rolls-Royce Limited: Applies to Rolls-Royce Dart Models 542–4; 542–4K, 542–10, 542–10J, and 542–10K engines.

Compliance is required as indicated, unless already accomplished.

To prevent cracking and subsequent failure of the engine propeller shaft and damage to the coarse pitch oil line due to material inclusions in that part of the shaft between the annulus gear support diaphragms, accomplish the following:

(a) For all airplanes with Rolls-Royce Dart Models 542–4, 542–4K, 542–10, 542–10J, and 542–10K engines installed except those having engine propeller shafts installed which have been supplied by Rolls-Royce with "CU" marked on the front end of the shaft, or in which each engine propeller shaft has been overhauled (including ultrasonic inspection for cracks and material inclusions) in accordance with Rolls-Royce Dart Overhaul Manual O-Da1O-AC and identified with "CU" marked on the front end of the shaft, and which are not listed in Appendix A and B of Rolls-Royce SBs Da72–367, Revision 3, dated June 2, 1978, within the next 50 hours' time in service after the effective date of this AD, install the following placard in clear view of the pilot and as close to the R P.M. indicators as practicable: "In the event of abnormal, short duration R.P.M. increase (500–600 R.P.M.) accompanied by a drop in TGT and torque pressure at a fixed power setting, immediately feather affected propeller per Aircraft Flight Manual feathering instructions."

(b) For engines which have been feathered in accordance with the placard in paragraph (a), before further flight, overhaul the engine propeller shaft (including ultrasonic inspection) in accordance with Rolls-Royce Dart Overhaul Manual O-Da1O-AC to determine whether material inclusions or cracks exist in the part of the engine propeller shaft between the annulus gear support diaphragms, and whether the propeller coarse pitch oil line has been damaged. If material inclusions or cracks in the propeller shaft or damage to the propeller coarse pitch oil line are found, before further flight replace the cracked propeller shaft and damaged propeller coarse pitch oil line with an approved serviceable part.

(c) For all engines having propeller shafts with 1,200 or more hours' time in service on the effective date of this AD, within the next 450 hours' time in service and thereafter at intervals not to exceed 1,200 hours' time in service since the last inspection, inspect each engine propeller shaft (including ultrasonic inspection) in accordance with Rolls-Royce SB Da72–367. If material inclusions or cracks are detected during any inspection, before further flight replace the engine propeller shaft with an approved serviceable part.

(d) For all engines having propeller shafts with less than 1,200 hours' time in service on the effective date of this AD, within a total of 1,650 hours' time in service, and thereafter at intervals not to exceed 1,200 hours' time in service since the last inspection, inspect each engine propeller shaft (including ultrasonic inspection) in accordance with Rolls-Royce SB Da72–367. If material inclusions or cracks are detected during any inspection, before further flight replace the engine propeller shaft with an approved serviceable part.

(e) For all engines the repetitive in-service inspections required by paragraphs (c) and (d) may be discontinued when propeller shaft are installed which have been supplied by Rolls-Royce with "CU" marked on the front end of the shaft, or which have been overhauled (including ultrasonic inspection for cracks and material inclusions) in accordance with Rolls-Royce Dart Overhaul Manual O–Da10–AC and identified with "CU" marked on the front end of the shaft.

(f) For all engines with propeller shafts installed bearing the serial numbers listed in Appendix A and B of Rolls-Royce SB Da72–367, Revision 3, the placard required by paragraph (a) may not be removed.

(g) For all engines with propeller shafts installed bearing the serial number listed in Appendix A and B of Rolls-Royce SB Da72–367, Revision 3, the propeller shafts must be inspected at engine overhaul per the procedures described in paragraph 4B of Rolls-Royce SB Da72–367, Revision 3.

Upon request, an equivalent means of compliance may be approved by the Manager, Engine Certification Office, Aircraft Certification Division, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

This proposed amendment will amend AD 70–25–06 Amendment 39–1119.

The FAA will request the permission of the **Federal Register** to incorporate by reference the manufacturer's SB identified and described in this document.

(Sec. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); 14 CFR 11.85)

Issued in Burlington, Massachusetts, on April 16, 1985.

Robert E. Whittington,

Director, New England Region.

BILLING CODE 4910–13–M

Federal Highway Administration

23 CFR Parts 625 and 655

[FHWA Docket No. 85–18]

National Standards for Traffic Control Devices; Manual on Uniform Traffic Control Devices; Standards for Performance of Retroreflective Traffic Control Devices; Request for Comments

AGENCY: Federal Highway Aministration (FHWA), DOT.

ACTION: Advance notice of proposed amendments to the manual on uniform traffic control devices; request for comments.

SUMMARY: The FHWA is inviting comments on a petition from the Center for Auto Safety (CAS) to initiate rulemaking consideration on the issue of standards for retroreflective illumination of traffic control devices. If adopted, these standards could be incorporated into the Manual on Uniform Traffic Control Devices (MUTCD). The MUTCD is incorporated by reference in the design standards for Federal-aid highways found in Part 625 of Title 23, Code of Federal Regulations (CFR). It is also recognized in 23 CFR Part 655 as the national standard for traffic control devices on all public roads.

DATE: Comments must be received on or before February 15, 1986.

ADDRESS: Submit written comments, preferably in triplicate, to FHWA Docket No. 85–18, Federal Highway Administration, Room 4205, HHC–10, 400 Seventh Street SW., Washington, D.C. 20590. All comments received will be available for examination at the above address between 7:45 a.m. and 4:15 p.m. e.t., Monday through Friday. those desiring notification of receipt of comments must include a self-addressed, stamped postcard. The

MUTCD is available for inspection and copying as prescribed in 49 CFR Part 7, Appendix D. It may be purchased for $30.00 from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Stock No. 050–001–81001–8.

FOR FURTHER INFORMATION CONTACT: Mr. Philip O. Russell, Office of Traffic Operations, (202) 426–0411, or Mr. Michael J. Laska, Office of the Chief Counsel, 426–0762, 400 Seventh Street SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. e.t., Monday through Friday.

SUPPLEMENTARY INFORMATION: The FHWA both receives and initiates requests for amendments to the MUTCD. The MUTCD presents traffic control device (TCD) standards for all streets and highways open to public travel regardless of type or class or the governmental agency having jurisdiction.

The MUTCD fulfills a statutory responsibility imposed on the Secretary of Transportation in sections 109(b), 109(d), and 402(a) of Title 23 of the U.S.C. and delegated to the Federal Highway Administrator in 49 CFR 1.48 (b), (c), and (n). Generally, 23 U.S.C. 109 authorizes the Secretary to develop, approve, and apply standards for the construction of highways in which Federal funds participate. Section 109(b) calls for standards for the Interstate System to be applied "uniformly throughout the States." Section 109(d) directs the secretary to approve only such standards for "the location, form, and character" of signs, signals, and markings on Federal-aid highways "as will promote the safe and efficient utilization of the highways." Section 402(a) authorizes to Secretary to promulgate uniform national standards relating to "highway design and maintenance (including lighting, markings, and surface treatment), traffic control, vehicle codes and laws, surveillance of traffic," etc., for use on all public roads.

This advance notice is being issued so that interested persons and/or organizations may have the opportunity to participate in the consideration of this request for amendments to the MUTCD. Based upon comments received in response to this advance notice and upon its own experience, the FHWA may prepare a notice of proposed amendments. Any final amendments which result from that action wil be published in the **Federal Register** and incorporated by reference in the Code of Federal Regulation.

The basic requirements for highway signs and pavement markings are that they be legible and understood in time to permit a proper response. This means high visibility lettering or symbols of adequate size, and a short, accurate legend for driver comprehension at highway speed. Standard colors and shapes are specified so that special classes of traffic signs can be promptly recognized. Simplicity and uniformity in color, shape, position, and application are stressed throughout the MUTCD. The MUTCD presently provides that: (a) Regulatory and warning signs, unless excepted in the standards covering a particular sign or group of signs, shall be retroreflectorized or illuminated to show the same shape and color both by day and night, (b) pavement markings, which must be visible at night, shall be retroreflectorized unless ambient illumination assures adequate visibility, and (c) all pavement markings on Interstate highways shall be retroreflectorized.

The MUTCD contains no minimum initial or maintained retroreflective requirements for retroreflective traffic signs, pavement markings, or other traffic control devices. Minimum initial retroreflective requirements for new sheeting materials do exist. They are contained in General Services Administration's (GSA) Federal Specifications L–S–300C [1] and in "Standard Specifications for Contruction of Roads and Bridges on Federal Highway Projects FP–79" [2] (FP–79) U.S. DOT FHWA. The FP–79 is issued primarily for use in the construction of roads and bridges on Federal highway projects under the direct supervision of the FHWA. The State and local highway agencies have direct supervision of their respective systems including the Federal-aid highway systems and, therefore, are not bound by the FP–79. Many State and local highway agencies have elected to use either the GSA or the FP–79 specification for procurement of sign sheeting material. The FP–79 also contains minimum maintained retroreflective intensity specifications for sheeting materials in construction and maintenance zones. The FHWA is not aware of any State or highway agency that has adopted these standards.

The CAS petition acknowledges that the MUTCD sets forth standards for size, shape, and color as well as legend size and spacing for traffic control devices. However, the petition contends that the range of legally licensable drivers is not accommodated by the traffic control devices allowed in the MUTCD with respect to nighttime conspicuity dependent upon retroreflective illumination.

Copies of the CAS petition will be distributed to everyone currently appearing on the FHWA mailing list for MUTCD matters. Those wishing to be added to the mailing list or receive a copy of the petition should write to FHWA, Office of Traffic Operations, HTO–21, 400 Seventh Street SW., Washington, D.C. 20590.

Discussion of Problem

In the mid-1970's, approximately 55 percent of all vehicle deaths were reported to have occurred during the hours of darkness. By the early 1980's, the proportion of fatalities occurring at night had increased steadily to about 60 percent. Given the facts that hours of darkness constitute only about 40 percent of a 24-hour day and only about 25 percent of all travel occurs during this same period, nighttime accidents are over-represented in accident statistics. The night fatality rate is more than three times that of the daytime rate. The rural driver has a significantly greater nighttime risk than the driver in urban areas when compared on the basis of relative exposure (per vehicle miles of travel). Approximately two-thirds of nighttime fatalities occur on unlighted roadways mainly in rural areas. The proportion of single vehicle fatalities occurring at night has increased from 62 to 68 percent between 1975 and 1982.

It is generally recognized that a single causal factor cannot be assigned to night accidents. A driver's night vision characteristics and a lack of adequate visual guidance information are significant factors in the greater accident and fatality rates at night. Fatigue, intoxication, inclement weather, higher speeds of travels on some roadways, and other factors all contribute to the hazards of night driving. For example, accident risks are considerably greater on wet pavements at night than on dry pavements. The problem is even more extreme for operation on wet roads with control of accesss. The risk of an accident under night, wet conditions on a freeway appears to be about 10 to 15 times greater than that during dry, daytime conditions.

All of the above mentioned factors are made worse by poor visibility. The great majority of information that the road user requires to effectively carry out

[1] This document is available for inspection and copying at the Federal Highway Administration, Office of Traffic Operations, HTO–21, Room 3419, 400 7th Street SW., Washington, D.C. 20590.

[2] This document is available for inspection and copying at the Federal Highway Administration, Office of Traffic Operations, HTO–21, Room 3419, 400 7th Street SW., Washington, D.C. 20590.

driving in an efficient manner is obtained through the visual senses. The driver at night is presented with an extremely difficult task in a moving vehicle where the luminance level of the background scene and on the roadway itself often shifts very rapidly. The driver's light/dark adaptation must change quickly and continually as the light level is changed. The ability to detect and recognize objects falls off rapidly as the light level decreases to the level typical of night driving. Glare from oncoming vehicles and adjacent roadside developments present problems. Visual acuity, contrast sensitivity, distance judgment, speed of seeing, and color discrimination are all impaired by the relative darkness of the night driving environment. Therefore, anything done to enhance night visibility is likely to improve driver performance.

In addition to lighting, the primary techniques used to ameliorate the night visibility problem has been through the retroreflective treatment of signs, pavement markings, and delineators, and improved vehicular headlamp systems. Prior to 1980, there had been considerable research involving those techniques in simple, uniform backgrounds, aimed at improving legibility of signs and the detection distance at which objects are seen along the highway. For many roadway situations, particularly on low volume, rural roads, these studies showed vehicular headlamp illumination with limited pavement markings (i.e., center lines) and signing was sufficient to provide the driver with the needed guidance information. However, as the roadway environment becomes more complex, vehicular headlamps and deteriorating traffic control devices (TCDs) cannot provide the information needed for efficiently carrying out the driving task.

Laboratory studies suggest that only a modest level of illumination, far lower than daylight, is required to provide the necessary conditions for effective performance in almost any night driving environment. The difficulty of the driver's task and, therefore, the quality of visual information needed, is largely dependent upon the complexity of inputs presented to the visual senses. Visual complexity is determined by road geometry, maneuvering of other traffic, adjacent land uses, advertising signs, pedestrian activity, weather, traffic control devices, lighting, and maintenance of road features, and many other factors. Also important is the degree of driver impairment by such factors as alcohol and drugs, age, vision problems, and fatigue.

At the present time the FHWA's research plans which address these subjects are based on the recognition that the most pressing research need is to develop an understanding of how operational complexity of the driving environment affects the various techniques being used to provide visual guidance information to the driver and how these techniques interact. This research builds on past knowledge to determine what techniques and equipment should be used in which specific situations and how often and by what methods TCDs should be refurbished or replaced.

Even upon the completion of the above research, the FHWA recognizes that a significant gap will exist between the new information (research results) and the successful adoption of acceptable minimum maintained retroreflection standards for TCDs. Therefore, the FHWA has decided to open a public docket to receive information concerning the practicality of developing retroreflection standards for TCDs as well as research and measuring methods/devices which would be needed to determine and to objectivity measure retroreflection standards.

The FHWA has formulated the following questions and invites responses concerning the retroreflective performance of traffic control devices during periods of reduced visibility:

1. Are standards needed for minimum maintained retroreflective performance requirements for traffic control devices (traffic signs, barricades, pavement markings, delineators, hazard markers, etc.) including those devices used in work zones? Are maximum initial and maintained retroreflective performance requirements needed for any specific colors or applications?

2. Should standards be based on retroreflectivity measurements or on minimum distances at which traffic control devices need to be visible and comprehensible to a motorist under a wide range of driving environments and conditions?

3. Have any highway agencies established retroreflective performance standards for their traffic control devices? If so, what are the basis of the performance standards? How long have they been in use and are they adequate? What problems have developed through their use? How cost-effective are they? Are these existing practices or procedures being used by highway agencies to determine when traffic control devices need to be replaced or refurbished?

4. In establishing minimum maintained retroreflective requirements for traffic control devices, are there special needs to be considered such as the "design driver", driver information processing, aging motorists, glare sensitivity, vehicle characteristics (i.e., head lights, windshields, eye height), complex visual backgrounds, high information load, and weather? Should a table be developed similar to Table II–1, "A Guide for Advance Warning Sign Placement Distance" as shown on page 2c–2a of the MUTCD?

5. Should there be retroreflection uniformity within a single sign or of signs within a single display or should certain signs have higher retroreflection than other signs for example, Stop signs as compared to Do Not Litter signs)? Are there available data or research results for classifying (in order of sign of importance) traffic sign retroreflection needs?

6. Should traffic control devices retroreflective requirements be indicated in Specific Intensity per unit Area (SIA) [3], Coefficient of Luminous Intensity (CIL) per unit area,[4] luminance [5], or other units?

7. What instruments and procedures for measuring retroreflection of traffic control devices should be specified, are being used, or are available for use? If instruments or procedures have been used, were they practical and satisfactory?

8. What research studies are needed to develop reasonable performance standards?

9. What research studies are needed to develop performance measuring instruments?

10. Would comprehensive standards be cost-effective? Why or why not?

This advance notice of proposed rulemaking to the MUTCD is issued under the authority of 23 U.S.C. 109(d), 315, and 402(a), and the delegation of authority in 49 CFR 1.48(b).

It is anticipated that any proposed changes to the MUTCD resulting from the comments received would be included in a subsequent Notice of Proposed Rulemaking.

The FHWA had determined, at this time, that this document contains neither a major rule under Executive Order 12291 nor a significant proposal under the regulatory policies and procedures of the Department of Transportation. This determination will

[3] SIA: Candelas per footcandle per square foot.

[4] CIL per unit area: Candelas per lux per square metre (Metric equivalent of SIA).

[5] Luminance: Foot-loberts (English), Candelas per square metre (Metric).

be reevaluated and a draft regulatory evaluation will be prepared, if necessary based upon the data received in response to this advance notice. Based upon the information available to the FHWA at this time, the action proposed in this advance notice will not have a significant economic impact on a substantial number of small entities.

Correction

In FR Doc. 85-9564 beginning on page 15754 in the issue of Monday, April 22, 1985, make the following correction: On page 15756, in the first column, the section heading "§ 207.2598" should read "§ 207.258".

BILLING CODE 1505-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 936

Permanent State Regulatory Program of Oklahoma

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is proposing to modify the deadline for Oklahoma (1) to promulgate rules governing the training, examination and certification of blasters and (2) to develop and adopt a program to examine and certify all persons who are directly responsible for the use of explosives in a surface coal mining operation. On April 5, 1985, Oklahoma requested an extension of time for the development of a blaster certification program until August 5, 1985. All States with regulatory programs approved under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act) were required to develop and adopt a blaster certification program by March 4, 1984. Section 850.12(b) of OSM's regulations provides that the Director, OSM, may approve an extension of time for a State to develop and adopt a program upon a demonstration of good cause.

DATE: Comments not received by May 28, 1985 at the address below, no later than 5:00 p.m. will not necessarily be considered.

ADDRESS: Written comments should be mailed or hand delivered to Mr. Robert L. Markey, Director, Tulsa Field Office, Office of Surface Mining, Room 3014, 333 West 4th Street, Tulsa, Oklahoma 74103.

FOR FURTHER INFORMATION CONTACT: Mr. Robert L. Markey, Director, Tulsa Field Office, Office of Surface Mining, Room 3014, 333 West 4th Street, Tulsa, Oklahoma 74103; Telephone: (918) 581-7927.

SUPPLEMENTARY INFORMATION: On March 4, 1983, OSM issued final rules effective April 14, 1983, establishing the Federal standards for the training and certification of blasters at 30 CFR Chapter M (48 FR 9486). Section 850.12 of these regulations stipulates that the regulatory authority in each State with an approved program under SMCRA shall develop and adopt a program to examine and certify all persons who are directly responsible for the use of explosives in a surface coal mining operation within 12 months after approval of a State program or within 12 months after publication date of OSM's rule at 30 CFR Part 850, whichever is later. In the case of Oklahoma's program, the applicable date is 12 months after publication date of OSM's rule, or March 4, 1984.

On April 11, 1984, the State of Oklahoma submitted to OSM a draft proposed amendment its permanent regulatory program intended to implement the provisions of 30 CFR Part 850 relating to blaster training, examination and certification. As a result of OSM's preliminary review, deficiencies were identified in Oklahoma's draft proposal. After reviewing OSM's concerns in light of available staff resources and existing workload commitments, it became apparent that additional time would be needed; therefore, the State on April 5, 1985, requested a four month extension of time, until August 5, 1985, to submit to OSM a comprehensive and complete proposed program amendment concerning the development and adoption of a blaster certification program in Oklahoma.

Therefore, OSM is seeking comment on the State's request for additional time to develop and adopt a blaster certification program. Section 850.12(b) of OSM's regulations provides that the Director, OSM, may approve an extension of time for a State to develop and adopt a program upon a demonstration of good cause.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no evironmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 721

[OPTS-50523; FRL-2743-3]

4,4'-Methylenebis(2-Chlorobenzenamine); Proposed Determination of Significant New Use

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing a significant new use rule (SNUR) for the chemical substance 4,4'-methylenebis (2-chlorobenzenamine) (MBOCA). The substance also is called 4,4'-methylenebis (2-chloroaniline). The Agency is proposing that the manufacture of MBOCA in the United States be designated as a significant new use of that chemical substance. Persons intending to engage in this significant new use would be required to submit a significant new use notice to EPA at least 90 days prior to the commencement of that use. The purpose of this SNUR is to ensure that EPA will receive notification of any proposed manufacture of MBOCA, allowing the Agency to regulate this activity before it occurs, if necessary.

DATE: Written comments on this proposed rule should be submitted by May 29, 1985.

ADDRESS: Comments should bear the docket control number OPTS-50523 and should be submitted to the following address: TSCA Public Information Office (TS-793), Office of Toxic Substances, Environmental Protection Agency, Rm. E-108, 401 M. St., SW., Washington, D.C. 20460.

All written comments on this proposed rule will be available for public inspection in Rm. E-107 at the address given above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT:
Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St., SW., Washington, D.C. 20460,

In Washington, D.C.: (554-1404),
Outside the USA: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION: OMB Control Number 2070-0038.

I. Authority

Section 5(a)(2) of TSCA (15 U.S.C. 2604(a)(2)) authorizes EPA to determine that a use of a chemical substance is a significant new use. This determination is made by rule after consideration of all relevant factors, including those listed in section 5(a)(2). Once a use of a chemical substance is determined to be a significant new use, persons must, under TSCA section 5(a)(1)(B), submit a notice to EPA at least 90 days before they commence that significant new use.

Chemical substances subject to proposed or final SNURs are subject to the export reporting requirements to TSCA section 12(b). These requirements appear at 40 CFR Part 707. Chemical substances subject to final SNURs also must comply with TSCA section 13 import certification requirements, which are codified at 19 CFR 12.118 through 12.127 and 127.28. The EPA policy in support of these requirements is codified at 40 CFR Part 707.

II. Applicability of General Provisions

In the **Federal Register** of September 5, 1984 (49 FR 35011), EPA promulgated general provisions applicable to SNURs (40 CFR Part 721, Subpart A). EPA is proposing that these general provisions apply to this SNUR, except as discussed in this preamble and as provided in the rule. The general provisions are discussed in detail in the cited **Federal Register** document, and interested persons should refer to that document for further information.

III. Summary of This Proposed Rule

The chemical substance identified in this proposed SNUR is 4,4'-methylenebis(2-chlorobenzenamine) (CAS No. 101-14-4). The substance also is called 4,4'- methylenebis(2-chloroaniline). For purposes of convenience, the substance will be referred to as MBOCA in this proposed rule. The rule proposes that the manufacture of MBOCA in the United States be designated as a significant new use. The SNUR would apply to manufacturing processes of any type, regardless of the exposure controls used. Under this rule, persons intending to manufacture MBOCA in the United States would be required to notify EPA at least 90 days before they begin production.

Persons subject to this SNUR would be subject to the same notice requirements under TSCA section 5(a)(1) as submitters of premanufacture notices (PMNs). In particular, these requirements include the information submission requirements of sections 5(b) and (d)(1), and the exemptions authorized by section 5(h). EPA has codified these notice requirements and the procedure for submitting notices in Subpart A of Part 721. Generally persons submitting a notice under this rule would be required to complete a PMN form with regard to their intended production of MBOCA. Note that potential manufacturers of MBOCA would be required to provide EPA with data on any processing and/or packaging of the substance that will occur at the manufacturing plant site.

Once EPA has received a SNUR notice, EPA may take regulatory action pursuant to sections 5(e), 5(f), 6, or 7 to control the substance. If no action is taken, section 5(g) requires the Agency to explain in the **Federal Register** its reasons for not taking action.

Although importation is included in the TSCA definition of "manufacture," importers of MBOCA would be exempted specifically from the requirements of this rule because the substance currently is being imported into the United States; this activity is an ongoing use and therefore cannot be identified as a significant new use. The SNUR also would not cover processing and use activities which occur away from the MBOCA manufacturing site, nor would it require information on the method of commercial distribution outside of the plant site. The Agency is considering a different regulatory approach to address potential health and environmental risks associated with these activities.

IV. Background Information on MBOCA

Based on information available to EPA, from 1 to 3.5 million pounds of MBOCA is used in the United States per year, mostly in the production of a variety of products having industrial and consumer uses. The primary use of MBOCA is as a hardener, or curing agent, in the manufacture of polyurethane elastomer products. The Agency believes that, at present, the entire amount of MBOCA used in the United States is imported; there is no current manufacture of the chemical substance in the United States, nor has there been since 1979.

EPA believes that MBOCA is a potential human carcinogen. Several chronic bioassays indicate that the substance causes malignant tumors in mice, rats, and dogs when administered orally. The bioassay in rats provided particularly strong evidence of carcinogenicity, involving a number of sites in the body. In addition, several structural analogues of MBOCA cause

malignant tumors in the urinarey bladder of dogs (as does MBOCA) and are known inducers of malignant urinary bladder tumors in humans.

EPA has identified a number of differnt routes through which MBOCA can enter the human body: absorption through the skin, inhalation, and oral ingestion. Manufacture of the substance prior to 1979 is known to have resulted in the creation of MBOCA dust particles; human exposure to MBOCA in dust form would increase the likelihood that the substance will be absorbed into the body.

EPA has idenitified industrial workers (involved with MBOCA manufacture, processing, and/or distribution) as the population facing the greatest risk of exposure to the substance. The families of these workers may come in contact with MBOCA particles carried home on the clothing of the workers, although the degree of potential exposure is much less than for the workers themselves. Residents in communities surrounding plants that manufacture or process MBOCA also may be exposed to the substance—particularly children who play in dirt containing MBOCA particles. Because most of the substance is consumed during use in the polyurethane hardening process, the likelihood of consumer exposure is negligible.

Most of the background information discussed above was drawn from an Agency document entitled: Office of Toxic Substances Priority Review Level-1, Risk Assessment on MBOCA. This document is contained in the public record for this rulemaking.

V. Objectives and Rationale for the Proposed Rule

EPA is proposing this SNUR because the Agency wishes to achieve the following objectives with regard to the manufacture of MBOCA in the United States:

1. The Agency wants to ensure that it will receive notice of any company's intent to manufacture MBOCA before production begins.

2. The Agency wants to ensure that it will have an opportunity to review and evaluate data submitted in a SNUR notice (generally, the proposed method of manufacture and on-site processing and packaging) before manufacture of the substance begins.

3. The Agency wants to ensure that it will be able to regulate prospective manufacturers of MBOCA before risks from manufacture and related on-site activities occur, provided that the degree of potential health risk is sufficient to warrant such regulation.

There is no current exposure risk posed by MBOCA manufacture in the United States because the substance is not being produced in this country at this time. However, significant quantities of the substance are used in the United States as intermediates in the manufacture of polyurethane plastics, utilizing imported MBOCA. In view of the size of the market for MBOCA in the United States and the fact that there is no Federal restriction on manufacture of the substance at present, it is possible that one or more companies may commerce manufacture of MBOCA in this country (provided they meet any state restrictions that may apply). EPA knows of a company that intends to begin producing the substance in the United States sometime in the near future (see Unit VI). EPA believes that the likelihood that the substance will be produced in the United States forms a basis for this rule.

Because MBOCA is a potential human carcinogen, the Agency wishes to ensure that all future manufacture of the substance in the United States will restrict the release of MBOCA dust. Previous manufacture of the substance at a plant site in Adrian, Michigan resulted in the release of a considerable amount of MBOCA dust particles, and resulting human exposure. EPA wishes to avoid a recurrence of this type of incident. The Agency believes that a SNUR which designates the manufacture of MBOCA in the United States as a significant new use of the substance is the best available regulatory means of achieving this objective.

This type of SNUR will ensure that EPA receives timely notification of any intent to manufacture MBOCA, thus enabling the Agency to conduct a complete assessment of the health and environmental risks associated with manufacturing and on-site processing of the substance. Moreover, the SNUR will provide mechanisms for immediate follow-up regulatory action through sections 5(e) and (f) of TSCA, thus enabling EPA to control (if necessary) the intended manufacture of MBOCA before unreasonable health or environmental risk occur.

EPA has considered the four factors listed in section 5(a)(2) (and others), as required by TSCA, and believes that the manufacture of MBOCA in the United States would be a significant new use of the substance. The Agency interprets the phrase "significant new use" as an exposure-related term, with the potential for release of a chemical substance and exposure to that substance determined by the factors listed in section 5(a)(2) and other factors that EPA finds relevant on a case-by-case basis. A resumption of MBOCA manufacture in the United States would cause a significant increase in the potential for release of MBOCA and subsequent human exposure to the substance. Moreover, that use is not currently ongoing, nor has it occurred for over five years. Thus, the Agency believes that the commencement of the use designated in this proposed rule would present EPA with a significant new exposure concern that warrants the promulgation of a SNUR for that use.

VI. Applicability of Proposed Rule to Uses Occurring Before Promulgation of Final Rule

EPA finds that the intent of section 5(a)(1)(B) is best served by determining whether a use is a significant new use as of the proposal date of the SNUR rather than as of promulgation of the final rule. If uses begun during the proposal period of the SNUR were not considered to be significant new uses, it would be very difficult for the Agency to establish SNUR notice requirements, because any person could defeat the SNUR by initiating a proposed significant new use before the rule became final. Based on this interpretation of TSCA section 5, EPA will determine whether the manufacture of MBOCA in the United States is a significant new use of the substance as of the date this rule is proposed.

EPA recognizes that this interpretation of the Act may disrupt the commercial activities of persons who begin manufacturing MBOCA in the United States after this rule is proposed but before promulgation of the final rule. These persons would be required to cease production and submit a SNUR notice as of the effective date of the final rule. However, this proposed rule provides any such persons with notice that the Agency intends to promulgate a SNUR for the manufacture of MBOCA, and any person commencing manufacture of MBOCA in the United States prior to promulgation of this SNUR would do so at their own risk.

This policy will have a direct impact on the company that already has indicated to EPA its intent to manufacture MBOCA. The company is developing a new process for manufacturing the substance. EPA intends that this company will be subject to the SNUR, because the Agency wishes to evaluate the company's manufacturing process and the potential exposure risks associated with that process. However, because EPA currently is aware of the company's intent to commence manufacture of

MBOCA, the Agency also does not want to cause the company unnecessary delay in beginning manufacture. (It should be emphasized that EPA will use its full TSCA authority to control the company's manufacturing and on-site processing of MBOCA should the Agency determine that such activity will present an unreasonable risk to human health or the environment.)

In view of the unique circumstances of this case, EPA has included language in the proposed rule which would allow any company to comply with the SNUR before the rule is promulgated. If a company were to meet all of the conditions of advance compliance, as specified in the regulatory language and described below, the company would be exempt from the requirements of the final SNUR. EPA is proposing this provision for public comment as part of this SNUR. However, the Agency also is considering the addition of an advance compliance exemption to the general provisions of 40 CFR 721, Subpart A (§ 721.19, Exemptions).

The first requirement for advance compliance with this SNUR would be to submit a complete significant new use notice to EPA. Any firm that submits an advance SNUR notice for MBOCA would be required to follow the general notification requirements of Subpart A, § 721.10. The company would have to submit the notice to the Agency at least 90 days before it begins manufacturing MBOCA. EPA would expect to complete its review of the notice within 90 days of receipt, but the Agency could extend its review period for up to 90 additional days, if necessary. The notice would have to contain all requisite SNUR data, with limitations described in this rule, including information on the company's intended method of manufacture and on-site processing of MBOCA.

EPA's procedures for the receipt, handling, and evaluation of advance significant new use notices under this rule would be the same as for any other significant new use notices. The Agency would publish a notice of receipt in the **Federal Register**, as required by section 5(d)(2) of TSCA. Non-confidential data from the advance notice would be added to EPA's public file for SNUR notices. The Agency then would conduct an evaluation of all data from the advance SNUR notice, together with any other relevant data in EPA's possession. The Agency would determine whether the planned manufacture and on-site processing of MBOCA would adequately control release of the substance (and thus not present an unreasonable risk to human health or the environment), and whether further regulatory action would be required.

There are four possible situations which may occur after EPA completes its review of an advance significant new use notice.

1. If there is sufficient information for EPA to conclude that the company's intended method for manufacturing and on-site processing of MBOCA would present no unreasonable risk to human health or the environment under any reasonable risk to human health or the environment under any reasonably foreseeable circumstances, the Agency would take no further regulatory action with regard to the company. Under his option, EPA would notify the company that it could begin the significant new use after the Agency's review period ends. The company would be allowed to continue such use after the final SNUR becomes effective, without delay or the need to comply further with the rule.

2. If there is no sufficient information for EPA to reasonably determine whether the company's method for manufacturing and on-site processing of MBOCA would present an unreasonable risk under any reasonable foreseeable circumstances, but the Agency believes that the intended methodology would not pose such a risk if certain procedures or restrictions are followed (until additional data demonstrated them to be unnecessary), the Agency would attempt to negotiate a section 5(e) consent order with the company. The consent order would specify that the firm must use the approved methodology (as modified by EPA) in its manufacture and on-site processing of MBOCA. If a consent order is signed, it would go into effect on the effective date of the final rule. The company would not be able to deviate from the terms of the order after the effective date without being in violation of the Act.

Once a consent order is signed, the company would be allowed to begin the significant new use under the terms of the order, once the review period for the significant new use notice ends. The firm would not be allowed to deviate from the conditions of the consent order prior to the effective date of the order and the final SNUR; if the firm should deviate from those conditions, the company would not qualify for an advance compliance exemption. In such a case, the company would be required to cease manufacture of MBOCA on the effective date of the SNUR; the firm then would have to submit a significant new use notice and wait until completion of the statutory review period before resuming production. After submission of that notice, EPA would be able to take action under section 5(e) in an adversarial context, if necessary.

3. If there is not sufficient information for EPA to reasonably determine whether the company's method for manufacturing and on-site processing of MBOCA would present an unresonable risk under any reasonably foreseeable circumstances, and EPA and the company are not able to negotiate the terms of a consent order, the firm would not qualify for an advance compliance exemption under this SNUR. The company therefore would be subject to the requirements of the final SNUR as though it had not submitted an advance significant new use notice.

4. If there is sufficient information for EPA to reasonably conclude that the company's intended method for manufacturing and on-site processing of MBOCA would present an unreasonable risk to human health and the environment, and the Agency believes that the risk requires immediate control, EPA could take action under TSCA section 6(a) (made immediately effective under section 5(f)) or section 7 to control the risk. The Agency would not pursue a section 5(e) consent order in this case; the company therefore would not have met all of the conditions of the advance compliance exemption. The firm would be required to cease production (if not already done) on the effective date of the final SNUR, submit a significant new use notice, and wait until completion of the statutory review period before resuming production.

The Agency believes that its approach to advance SNUR compliance is an acceptable means of accomplishing its risk assessment and risk management objectives regarding possible significant new uses, without causing members of the regulated community to suffer unnecessary delays in their business activities. The advance compliance exemption in this rule would not waive EPA's enforcement authority with regard to any SNUR notice submitter. EPA solicits comment on this approach.

EPA is allowing the company that currently intends to manufacture MBOCA in the United States to seek an exemption from the final SNUR under the advance compliance provision that is being proposed in this rule. The Agency is doing so to enable the company to avoid a major delay in its manufacture of MBOCA, provided that the firm's intended method of manufacturing and on-site processing will not present an unreasonable risk to human health or the environment. EPA has allowed the company to submit an advance significant new use notice for MBOCA, and the Agency is handling the

notice as though the advance compliance exemption were in effect. EPA published a Notice of Receipt in the **Federal Register** of September 24, 1984 (49 FR 37460). The company now will have to meet all SNUR notice requirements, but will be able to avoid a delay in its intended manufacture of MBOCA if it meets all terms of the advance compliance exemption.

If that exemption is included in the final rule, the company will be able to benefit from it. However, if the advance compliance exemption is not included in the final rule, the company (and all other persons intending to manufacture MBOCA in the United States) will be required to comply with the final SNUR when it goes into effect.

VII. Test Data

EPA recognizes that under TSCA section 5 a person is not required to develop any particular test data before submitting a significant new use notice. Rather, a person is only required to submit test data in that person's possession or control and to describe any other data known to or reasonably ascertainable by that person.

However, in view of the potential health and environmental risks that may be posed by the manufacture of MBOCA, EPA encourages SNUR notice submitters to provide the Agency with any relevant test data on MBOCA that they may wish to develop. Generally, SNUR notices (for MBOCA or any other chemical substance) submitted with relevant test data would improve EPA's ability to conduct a reasoned evaluation of the health and environmental effects of the subject chemical substance. Persons choosing to develop test data voluntarily in response to the SNUR should provide data that conform with the standards of TSCA good laboratory practices, which are codified at 40 CFR Part 792 and were published in the **Federal Register** of November 29, 1983 (48 FR 53923). EPA encourages persons who intend to conduct testing of MBOCA to consult with the Agency before selecting a protocol for testing the substance.

Finally, EPA urges persons submitting SNUR notices on MBOCA to provide information on the potential benefits of MBOCA, plus information on the risks posed by the substance compared to risks posed by potential substitutes. Again, the more information EPA receives on MBOCA, the better the Agency's evaluation of health and environmental risks will be.

VIII. Economic Impact

EPA estimates that the cost of submitting an individual SNUR notice in response to this rule would be between $1,400 and $8,000. The SNUR notice submitter also may incur the costs of some voluntarily adopted exposure control measures that would not have been utilized but for the existence of the SNUR; it is not possible to quantify these costs without knowing what control measures are adopted, because exposure control methodologies vary within the chemical industry. In addition, the notice submitter may incur up to a 3.2 percent reduction in profits due to delays in manufacture resulting from the Agency's notice review period, plus the cost of compliance with any regulatory follow-up action that may be taken by EPA.

In the case of a company that submits a SNUR notice to EPA prior to promulgation of the final rule, the firm will be less likely to experience delays in manufacture of reduction in profits if it complies with all of the requirements of the advance compliance exemption in the rule.

EPA is not able to determine the total cost of this rule for the industry as a whole, because it is not possible to estimate accurately the number of companies that will submit SNUR notices in response to this rule; at present, the company that is seeking to comply with this SNUR prior to promulgation of the rule is the only respondent known or anticipated by EPA.

The Agency believes that this rule may have a slight impact on innovation within the chemical industry, because certain companies that intend to manufacture MBOCA in the United States may abandon their plans to do so as a result of this SNUR (without submitting a SNUR notice). Although these firms will not incur the direct cost of SNUR compliance, they (and society) may lose some of the benefits that would have been derived from the manufacture of MBOCA. However, the rule also may encourage innovation by companies that seek new methods to control MBOCA release and exposure.

This SNUR will provide health and environmental benefits to society by enabling the Agency to monitor and, if necessary, control exposure to MBOCA resulting from manufacture of the substance in the United States. As with total industry cost, it is not possible to quantify these benefits with any degree of accuracy, because it is not possible to determine the number of companies that will submit SNUR notices.

For a more detailed discussion of economic impact, see the Economic Analysis of the Proposed SNUR for MBOCA. This document is contained in the public record for this rule (OPTS–50523).

IX. Judicial Review

When the final version of this rule is promulgated, judicial review may be available under section 19 of TSCA in the United States Court of Appeals for the District of Columbia Circuit or in the circuit in which the person seeking review resides or has its principal place of business. To provide all interested persons an equal opportunity to file a timely petition for judicial review and to avoid so called "races to the courthouse," EPA intends to promulgate this rule for purposes of judicial review two weeks after publishing the final rule in the **Federal Register.** The effective date will be calculated from the promulgation date.

X. Rulemaking Record

EPA has established an administrative record for this rulemaking (docket control number OPTS–50523). The record includes basic information considered by the Agency in developing this proposed rule. EPA will supplement the record with additional relevant information as it is received. The record now includes the following:

1. Office of Toxic Substances Priority Review Level-1 Document, Risk Assessment on MBOCA, U.S.E.P.A., 1982.

2. Economic Analysis of Proposed Significant New Use Rule for 4,4'-methylenebis(2-chlorobenzenamine) (MBOCA), Economics and Technology Division, U.S.E.P.A., 1984.

3. Other relevant factual information and support documents.

The Agency will accept additional materials for inclusion in the record at any time between the date of publication of this proposed rule and the designation of the complete record. EPA will identify the complete rulemaking record by the date of promulgation of the final rule.

The record is available to the public in the OTS Public Information Office, from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays. The Public Information Office is located in Rm. E–107, 401 M St., SW., Washington, D.C.

XI. Regulatory Assessment Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore requires a Regulatory Impact Analysis. EPA has determined that this SNUR would not be a "major" rule because it will not have an impact on the economy of $100

million or more, and it will not have a significant effect on competition, costs, or prices. EPA estimates that the reporting cost for submitting a notice under this rule will be approximately $1,400 to $8,000. At this time, the Agency knows of only one potential manufacturer of MBOCA. Furthermore, while the expense of a notice and the uncertainty of possible EPA regulation may discourage certain innovation, that impact will be limited because such factors are unlikely to discourage an innovation that has high potential value. Moreover, the rule may encourage SNUR respondents to develop new methods for controlling release and exposure to MBOCA.

This regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), EPA certifies that this proposed rule, if promulgated, will not have a significant impact on a substantial number of small businesses. The Agency has not determined whether parties affected by this rule are likely to be small businesses. However, EPA believes that few manufacturers would submit SNUR notices under this rule. Therefore, although the costs of preparing a SNUR notice might be significant for some small manufacturers, the number of such firms affected is not expected to be substantial.

C. Paperwork Reduction Act

OMB has approved the information collection requirements contained in this proposed rule, under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). OMB has assigned control number 2070–0038 to the rule. Comments on these information requirements should be submitted to the OMB Office of Information and Regulatory Affairs and marked "Attention: Desk Officer for EPA." The final rule package will respond to any OMB or public comments on the information collection requirements.

(Sec. 5, Pub. L. 94–469, 90 Stat. 2012 (15 U.S.C. 2604))

List of Subjects in 40 CFR Part 721

Environmental protection, Chemicals, Hazardous materials, Recordkeeping and reporting requirements, Significant new uses.

Dated: April 17, 1985.

Lee M. Thomas,

Administrator.

PART 721—[AMENDED]

Therefore, it is proposed that Part 721 of Chapter I of Title 40 be amended by adding § 721.275 to read as follows:

§ 721.275 4,4'-methylenebis(2-chlorobenzenamine) (MBOCA).

(a) *Chemical substance and significant new use subject to reporting.* (1) The chemical substance 4,4'-methylenebis(2-chlorobenzenamine) (CAS No. 101–14–4) is subject to reporting under this section for the significant new use described in paragraph (a)(2) of this section. The substance also is identified as 4,4'-methylenebis(2-chloroaniline) and MBOCA.

(2) The significant new use is the manufacture of the substance in the United States.

(b) *Specific requirements.* The provisions of Subpart A of this Part apply to this section except as modified by this paragraph.

(1) *Exemptions.* The following persons are exempt from the reporting requirements of this section:

(i) A person who imports MBOCA into the customs territory of the United States and does not otherwise manufacture the substance in the United States.

(ii) A person who complies with the requirements of this section and Subpart A of this Part prior to the effective date of this section and receives written notification of compliance from EPA at the end of the notice review period specified in § 721.10. EPA will so notify the person only if one of the following occurs:

(A) EPA determines that there is no need for immediate regulatory action concerning the activities described in the significant new use notice.

(B) EPA and the person negotiate a consent order under section 5(e) of the Act, such order to go into effect on the effective date of this section, and the person complies with the terms of any such consent order before the order goes into effect.

(2) *Notice requirements and procedures.* A person who is required to submit a significant new use notice under this section must complete only Parts I.A., I.B., I.C.1., I.C.3, II.A., and III. of the notice form specified in § 721.10. The person is not required to submit information about processing or use by other persons of the substance identified in paragraph (a)(1) of this section.

Notices

Federal Register
Vol. 50, No. 81
Friday, April 26, 1985

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Programmatic Memorandum of Agreement on the Activities of the Department of the Army at Fort Leavenworth, KS

AGENCY: Advisory Council on Historic Preservation.

ACTION: Notice.

SUMMARY: This notice provides information about and invites comments on a proposed Programmatic Memorandum of Agreement that provides for the development of a Preservation Plan for the identification, inventory, evaluation and treatment of historic, architectural and cultural properties at Fort Leavenworth, Kansas.

Comments Due: Comments must be submitted on or before May 28, 1985.

ADDRESS: Executive Director, Advisory Council on Historic Preservation, The Old Post Office, 1100 Pennsylvania Avenue, NW., Room 809, Washington, DC 20004.

The Council proposes to execute a Programmatic Memorandum of Agreement pursuant to § 800.8 of its regulations (36 CFR Part 800) with the Department of the Army and the Kansas State Historic Preservation Officer. The proposed Agreement establishes standards for a Preservation Plan at Fort Leavenworth which will coordinate the management of historic, architectural and cultural properties with the activities of the Army on the Fort. The Army's responsibilities at the Fort pursuant to sections 106 and 110(f) of the National Historic Preservation Act will be fulfilled by implementation of the proposed Agreement. Interested parties are encouraged to obtain a copy of the proposed Agreement from the Council and submit comments.

Dated: April 23, 1985.

Robert R. Garvey,

Executive Director.

BILLING CODE 4310-10-M

DEPARTMENT OF AGRICULTURE

Competitive Research Grants Program for Forest and Rangeland Renewable Resources for Fiscal Year 1985; Solicitation of Applications

Competitive Research Grants Program for Forest and Rangeland Renewable Resources

Notice is hereby given that pursuant to the authority contained in Section 5 of the Forest and Rangeland Renewable Resources Research Act of 1978, as amended (16 U.S.C. 1644), Competitive Research Grants (CRG) of the Office of Grants and Program Systems (OGPS), United States Department of Agriculture (USDA), anticipates awarding standard project grants for basic research in the areas of harvesting, wood utilization and forest biology. The total amount expected to be available for this program during Fiscal Year 1985 is approximately $7,500,000. Long-term projects, up to a limitation of five years, are encouraged. Grants will be awarded by CRG to the extent that funds are available.

Pursuant to the Secretary's Memorandum number 1030-12 dated April 12, 1985, the authority to administer the $7,840,000 made available by section 101(c) of the Continuing Appropriations Act for Fiscal Year 1985 for a competitive research grants program for forest research authorized by Section 5 of the Forest and Rangeland Renewable Resources Research Act of 1978 has been transferred along with the funding to the Office of Grants and Program Systems. Under this authority the Office of Grants and Program Systems may award grants to Federal, State, and other governmental agencies, public or private agencies, institutions, universities, and organizations, and businesses and individuals in the United States. Proposals received from scientists at non-United States organizations or institutions will not be considered for support.

For purposes of this program in Fiscal Year 1985, CRG is adopting the Administrative Provisions governing the Competitive Research Grants Program, 7 CFR Part 3200 (excluding Sections 3200.1, 3200.3(a), 3200.4(c), modifying the second sentence of 3200.6(c)(3) by deleting the words "food and agricultural sciences" and inserting in lieu thereof "protection, management and utilization of forest and rangeland renewable resources," and deleting the parenthetical phrase in the last sentence of 3200.7(c)), found at 49 FR 5570, February 13, 1984, as amended by 50 FR 5499, February 8, 1985. These provisions set forth procedures to be followed when submitting grant proposals, rules governing the evaluation of proposals and awarding of grants, and regulations relating to the post-award administration of grant projects. Copies of these provisions and of the Research Grant Application Kit may be obtained by writing to the address listed below or by calling (202) 475-5049. For reasons set forth in the Final rule related notice related to 7 CFR Part 3015, Subpart V (48 F.R. 29115, June 24, 1983), this program is excluded from the scope of Executive Order 12372, which requires intergovernmental consultation with State and local officials.

An original and 15 copies of each proposal submitted under this program are requested. This number of copies is necessary to permit thorough, objective peer evaluation of all proposals received before funding decisions are made. In addition to other required forms and certifications included in the Research Grant Application Kit, it is requested that an original and 15 copies of Form S&E-661, "Grant Application," also be submitted. Proposers should note that one copy of this form must contain pen-and-ink signatures of the principal investigator(s) and the authorized organizational representative.

All copies of each proposal should be mailed in one package if at all possible. Due to the volume of proposals received, applications submitted in several packages are very difficult to identify. If copies of a proposal must be mailed in more than one package, however, the number of pages should be clearly marked on the outside of each. It is important that *all packages be mailed at the same time.* Also, please see that each copy of each proposal is *stapled securely* in the upper left-hand corner. DO NOT BIND. Information should be typed on one side of the page only.

Every effort should be made to ensure that the proposal contains all pertinent information when submitted. Prior to mailing, compare your proposal with the Application Requirements checklist contained in the Research Grant Application Kit and instructions found in 7 CFR Part 3200.

Each research grant application must be submitted by the time limit set below to: Proposal Services Unit, Grants Administrative Management, Office of Grants and Program Systems, U.S. Department of Agriculture, Room 010, Justin Smith Morrill Building, 15th and Independence Avenue, SW., Washington, D.C. 20251.

To be considered for funding during Fiscal Year 1985, proposals must be received in Grants Administrative Management by the close of business on June 7, 1985.

One copy of each proposal not selected for funding will be retained for a period of one year. The remaining copies will be destroyed.

Introduction to Program Description

Standard research grants will be awarded to support basic research in selected areas of (1) harvesting, processing, and utilization of timber resources, with special emphasis on the chemical, mechanical, and engineering properties of wood and wood materials and (2) forest biology, including biotechnology, that are considered by a number of scientific groups to possess exceptional opportunity for fundamental scientific discovery and for contributing, in the long run, to applied research and development vitally needed on important wood utilization and forestry problems. This grants program recognizes that new, innovative approaches and enhanced levels of funding are essential as we seek ways to improve the economic and environmental value of our forest resources.

Consideration will be given to research proposals that address fundamental questions in the areas noted below and that are consistent with the long-range missions of USDA. Basic guidelines are provided to assist members of the scientific community in assessing their interest in the program areas and to delineate certain important areas where new information is vitally needed. However, these guidelines are also meant to be flexible and should not detract from the creativity of potential investigators. The Competitive Research Grants office encourages the submission of innovative projects in the so-called "high-risk" category, as well as those that may have greater probability of success.

Workshops or symposia that bring together scientists to identify research needs, update information, or advance an area of research are recognized as an integral part of research efforts. Support for a limited number of such meetings covering subject matter encompassed by this Competitive Research Grants Program for Forest and Rangeland Renewable Resources will be considered for partial or, if modest, complete support.

This program is divided into the two program areas outlined below, and funding will be divided equally between them. Proposals submitted in response to this solicitation must be identified as to the program area under which they are to be considered for funding (e.g., 1.1).

First, the Department will fund proposals concerning the improved utilization of wood and wood fiber. Public and private forests in the United States contain one of our most important renewable natural resources, providing a continuing supply of wood for industrial materials, chemicals, and energy, as well as other resources and benefits. National requirements for wood, wood fiber, and chemical products, however, increasingly demand the development of innovative and economical conversion processes that effectively utilize total available wood resources. Thus, as the diverse demands placed upon forest resources grow, the Department of Agriculture is encouraging the development of more efficient harvesting, utilization, and management practices.

Second, the Department will fund proposals concerning forest biology (including biotechnology). Forest systems generally are dominated by long-lived trees in either planted or naturally regenerated stands that may vary in composition from one species to complex mixtures of many. These primarily undomesticated populations of forest trees, while dominant, are but one component of larger communities of diverse numbers and combinations of associated organisms. Productivity of the forest ecosystem is thus dependent upon the many complex processes and interactions among trees, other organisms and the physical factors of the environment. While many of these processes and interactions have been identified, studied and described, very little is known of the basic biological mechanisms that underlie and determine their directions and rates.

The following guidelines are provided as a base from which proposals may be developed.

Specific Areas of Research To Be Supported in Fiscal Year 1985

1.0 Improved Utilization of Wood and Wood Fiber

Improved wood utilization practices depend upon a continually advancing scientific foundation of basic research in wood properties and fundamental components of wood science. This program area encourages research that addresses critical barriers to improved wood utilization, and that will provide the scientific base from which new research and development can proceed. Grants will be awarded to support basic research in the following three categories of wood science:

1.1 *Wood Chemistry and Biochemistry* represents an important area where new basic information is vitally needed and where breakthroughs have a virtually unlimited potential for expanding wood utilization. Basic questions that need to be addressed include the nature of underlying principles governing enzymatic, microbial, and other chemical reactions. Examples of research subjects of interest include bioconversion and deterioration mechanisms, lignin and cellulose polymer modification, surface chemisry, bonding chemistry, and thermal reactions.

1.2 *Physical/Mechanical Properties of Wood and Basic Processing Techology* constitutes an area of investigation in which an improved base of scientific knowledge can ensure future development of new products and processes. Research is encouraged that furthers our understanding of basic mechanisms that impinge upon the structure, physical properties, and basic processing characteristics of wood and reconstituted wood materials. Examples of such research include, but are not limited to, anatomical, viscoelasticity and quality investigations, cutting processes, heat and mass transfer phenomena, lignocellulose modification, particle/fiber consolidation, non-destructive property evaluation, and materials science principles.

1.3 *Structural Wood Engineering* has developed empirically over time and has typically involved incremental improvements upon conventional concepts. Significant improvements depend upon developing an expanded scientific base of knowledge about the use and performance of wood as a structural material. The goal of basic research in this field is to support and encourage innovative approaches to the structural use of wood. Examples of research in this category include reliability-based design, systems

modeling and validation, wood/non-wood composites, fasteners, and basic failure mechanisms.

To be considered for support, grant proposals should demonstrate applicability to one of the described areas of research emphasis and must offer a reasonable probability of contributing significantly to the present body of scientific knowledge. The Department encourages proposals that emphasize innovative approaches to solving fundamental problems in the field of wood science and technology. Although this program area will emphasize research in the above categories, other new or unusual approaches will not be excluded.

If necessary, further information may be obtained from the Associate Program Manager at (202) 475–5022.

2.0 Forest Biology (Including Biotechnology)

The primary goals of the Forest Biology program area are to promote and fund research that will further the basic knowledge of mechanisms of biological processes in forest organisms and systems, and that will contribute to overcoming barriers to optimize the health and productivity of the forest resource. Emphasis will be placed on research proposals that deal with the woody plant component of the forest system. Also, grants will be awarded to support basic studies in the following two categories of forest biology research, each of which has been judged to offer exceptional opportunities for scientific advancement. Thus, proposals in this area of fundamental research are encouraged, but the program will not exclude other new or unusual research approaches.

2.1 *Genetic Structure and Function* is an area of research in which new basic knowledge and technology development are critically needed to support future efforts in more intensive forest management. Forest organisms, by virtue of their wide distribution and occurrence in both natural and manipulated ecosystems, offer unique opportunities to analyze, identify and utilize a broad spectrum of variations and adaptations that still persist in the gene pools of existing populations.

Research should address the genetic limits to the health and productivity of woody species, including: Development of techniques for genetic engineering, including those for DNA transfer systems and for determining molecular mechanisms of gene expression; elucidation of mechanisms of morphogenesis at the cellular and organismal levels, including those controlling the development of productive plants from tissue or cell culture; identification and characterization of valuable genes and simply-inherited traits; and determinations of the organization, structure, and function of genomes.

2.2 *Mechanisms of Interactions in Forest Systems* is an area of research which requires a significant increase in basic knowledge to support subsequent studies of a more applied nature. Forest productivity is determined by complex climatic, geochemical and physical forces interacting with the living component of the ecosystem, the diverse mixtures of woody species of varying genotype, size and age that exist in various stages of equilibria with each other and with a host of other forest organisms. Understanding basic mechanisms that underlie the dynamic changes that occur as a forest regenerates and matures is essential to determining constraints and opportunities to improve the health and productivity of the forest resource.

Areas in which basic research is needed to understand mechanisms involved in some of those processes include, but are not limited to: Determining the mechanisms driving the co-evolved synergistic processes of forest organisms such as mycorrhizal symbioses and nitrogen fixation; elucidating mechanisms involved in antagonistic relationships between forest organisms (interspecific interference) such as allelopathy and host-parasite interactions.

To be considered for support, grant proposals should demonstrate applicability to one of the described areas of research emphasis and must offer a reasonable probability of contributing significantly to the present body of scientific knowledge. It is especially important that proposals emphasize innovative approaches to solving fundamental problems in forest biology.

If necessary, further information may be obtained from the Associate Program Manager at (202) 447–7417.

Supplementary Information

It has been determined that, because of the need to implement this program so that the research can be initiated in the late spring or early summer of 1986, compliance with the notice and public procedure provisions of 5 U.S.C. 553, made applicable to this solicition by Departmental Policy, 36 FR 13804 as (1971), is impracticable and contrary to the public interest. Further, this action has been reviewed under Executive Order 12291 and it has been determined that it is not a major rule. Although this Notice establishes the procedures and criteria under which the recipients of these grants in Fiscal Year 1985 will be selected, and the terms and conditions under which such grants will be administered, it does not involve a substantial or major impact on the Nation's economy or on large numbers of individuals or businesses.

There will be no major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3504 (h)), the collection of information requirements contained in this rule have been approved under OMB Document No. 0525–0001. In addition, this regulation will not have a significant impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, Pub. L. 96–354 (5 U.S.C. 601). No regulatory analysis is required.

Done at Washington, D.C., this 23rd day of April 1985.

Edgar L. Kendrick,

Administrator, Office of Grants and Program Systems.

[FR Doc. 85–10175 Filed 4–25–85; 8:45 am]

BILLING CODE 3410-MT-M

Commodity Credit Corporation

Uniform Grain Storage Agreement; Uniform Rice Storage Agreement Annual Contract Fees

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of proposed determination of 1985–86 contract fees.

SUMMARY: The purpose of this notice is to propose changes in the amount of the contract fees which are collected from warehousemen by the Commodity Credit Corporation (CCC) in accordance with the regulations governing the Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed, (7 CFR 1421.5551 *et seq.*). The fees are charged by CCC to defray the costs which are incurred in the periodic examination of warehouses operated by warehousemen who have storage agreements with CCC and do not have a Federal warehouse license or State warehouse license issued by a State having a cooperative agreement with CCC for warehouse examination services.

DATE: Comments must be received on or before–May 28, 1985—in order to be assured of consideration.

ADDRESS: Send comments to Paul W. King, Director, Warehouse Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013, (202) 447–4018.

FOR FURTHER INFORMATION CONTACT: Steven Closson, Chief, Storage contract Branch, Warehouse Division, ASCS, USDA, Room 5962—South Building, P.O. Box 2415, Washington, D.C. 20013, (202) 382–8053.

SUPPLEMENTARY INFORMATION: This notice has been reviewed in conformity with Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "not major." This action has been classified "not major" since implementation of these proposed determinations will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local governments, or geographical region; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, the environment or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 28115 (June 24, 1983).

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since CCC is not required by 5 U.S.C. 553 or any provisions of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice.

The Commodity Credit Corporation Charter Act (15 U.S.C. 714) provides authority for CCC to conduct a number of operations to stabilize, support, and protect farm income and prices. CCC is authorized to carry out such activities as making price support available with respect to various agricultural commodities, removing and disposing of surplus agricultural commodities, exporting or aiding in the exportation of agricultural commodities, and procuring agricultural commodities for sale both in the domestic market and abroad.

Section 4(h) of the CCC Charter Act provides that the Corporation shall not acquire real property in order to provide storage facilities for agricultural commodities unless CCC determines that private facilities for the storage of such commodities are inadequate. Further, Section 5 of the CCC Charter Act provides that in carrying out the Corporation's purchasing and selling operations, and in warehousing, transporting, or handling of agricultural commodities, CCC is directed to use, to the maximum extent practicable, the usual and customary channels, facilities, and arrangements of trade and commerce.

Section 10 of the United States Warehouse Act, as amended (7 U.S.C. 251) provides that the Secretary of Agriculture shall charge, assess, and cause to be collected user fees with respect to all warehouses licensed under the United States Warehouse Act (USWA). The user fees are paid by federally licensed warehousemen to the Agricultural Stabilization and Conservation Service (ASCS) to defray the costs which are incurred with respect to (1) warehouse examinations under the USWA; (2) licenses issued to classify, inspect, grade, sample, or weigh agricultural commodities stored or to be stored under the USWA; and (3) warehouse licenses issued, amended, modified, extended, or reinstated under the USWA. CCC contracts with federally licensed warehouses and others in the conduct of its business and requires the periodic examination of all federally licensed warehouses which are the subject of a storage agreement with CCC. Because similar warehouse examination services are required for other warehousemen having a storage agreement with CCC, it was determined that CCC should collect an annual contract fee to offset the costs resulting from the periodic examination of those warehouses. CCC now collects an annual contract fee from warehousemen having a storage contract with CCC who do not have a Federal warehouse license or who do not have a State warehouse license issued by a State having a cooperative agreement with CCC for warehouse examination services.

The present contract fee schedule is found at 7 CFR 1427.5558. However, CCC has issued proposed regulations (FR) which would delete that fee schedule from the Code of Federal Regulations and provide that the amount of contract fees would be determined and announced annually in a publication in the **Federal Register**.

When contract fees were first established in 1981, CCC did not perform warehouse examinations directly but in accordance with a cooperation agreement under which CCC reimbursed the Agricultural Marketing Service (AMS) for performing this service. The warehouse licensing and examination responsibilities of AMS have since been transferred to the ASCS, one of the agencies within the Department of Agriculture which provides support services for CCC.

A study of the present annual contract fees and warehouse license user fee assessments indicated that some adjustments are necessary to address two areas of concern. First, several large mergers of warehouse locations under a single CCC warehouse code or USWA license have occurred resulting in the assessment of the currently applicable maximum contract fee which is $1,250. This has resulted in a disproportionate share of program costs incurred for warehouse examinations being collected from single location users. Because examination resources spent conducting multi-location examinations, including the examinations of multipe location warehouses which may have been merged under a single CCC warehouse code or USWA license, exceed resources spent examining a single location of the same capacity, it was felt the method of assessment should be changed to more equitably assess all users. Second, the placement of warehouse licensing, storage contract and examination warehouse functions within one agency (i.e., ASCS) are expected to lower overall program costs. The continued assessment of fees at present levels is unnecessary and these reduced costs should be passed along to all users of these services through a reduction of total fees assessed. Accordingly, it is proposed that the following schedule of fees and the method of determining such fees would be applicable to the 1985–86 contract year.

Proposed Determinations

Comments are requested on the following proposed determinations with respect to contract fee schedule and method of fee determination to be used during the 1985–86 contract year. The fees set forth in the proposed schedule will be collected by the Commodity Credit Corporation (CCC) from warehousemen who have a storage contract with CCC but who do not have a Federal warehouse license or a State warehouse license issued by a State having a cooperative agreement with CCC for warehouse examination services.

FEE SCHEDULE

Location grain capacity (bushels)	Annual contract fees (dollars)
1 to 150,000	$100
150,001 to 250,000	200
250,001 to 500,000	300
500,001 to 750,000	400

FEE SCHEDULE—Continued

Location grain capacity (bushels)	Annual contract fees (dollars)
750,001 to 1,000,000	500
1,000,001 to 1,200,000	600
1,200,001 to 1,500,000	700
1,500,001 to 2,000,000	800
2,000,001 to 2,500,000	900
2,500,001 to 5,000,000	1,000
5,000,001 to 7,500,000	1,100
7,500,001 to 10,000,000	1,200
10,000,001 +	[1] 1,200

[1] Plus $30 per million bushels of capacity above 10 million or fraction thereof

The location capacity shall be determined by the Secretary of Agriculture and shall be the capacity of a fully functional facility operated as a public warehouse or functional unit of a group of warehouses usually within the same town or freight tariff point. A functional facility is one which could operate independently if it was separated from other facilities in the merger. Any outlying unit which is not a fully functional facility would have its capacity included as part of the combined capacity of the nearest fully functional operating location.

The annual contract fee shall be the sum total of the fees for all functional units within the warehouse code and shall be assessed as required in the applicable storage agreement.

Signed at Washington, D.C., on April 23, 1985.

Everett Rank,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410–05–M

COMMISSION ON CIVIL RIGHTS

Georgia Advisory Committee; Amendment

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights that a meeting of the Georgia Advisory Committee to the Commission originally scheduled for May 17, 1985, at Atlanta, Georgia, has a new convening date.

The meeting address and time will remain the same. The meeting date will change to May 10, 1985.

Bert Silver,

Assistant Staff Director for Regional Programs.

[FR Doc. 85–10121 Filed 4–25–85; 8:45 am]

BILLING CODE 6335–01–M

Hawaii Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Hawaii Advisory Committee to the Commission will convene at 4:00 p.m. and will end at 8:00 p.m., on May 16, 1985, at the Ala Moana Americana Hotel, 410 Atkinson Drive, the Board Room, Honolulu, Hawaii. The purpose of the meeting is to review information submitted by the public at its last meeting and conduct program planning for the remainder of fiscal year 1985.

Persons desiring additional information, or planning a presentation to the Committee, should contact Philip Montez, the director of the Western Regional Office at (213) 688–3437.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., April 22, 1985.

Bert Silver,

Assistant Staff Director for Regional Programs.

[FR Doc. 85–10118 Filed 4–25–85; 8:45 am]

BILLING CODE 6335–01–M

Idaho Advisory Committee; Agenda for Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Idaho Advisory Committee to the Commission will convene at 9:00 a.m. and will end at 5:00 p.m., on May 16, 1985, at the Lewiston Community Center, 1424 Main Street, Lewiston, Idaho. The purpose of the meeting is to hold a community forum on Indian education—high drop out rate among Indian students in grades K–12.

Persons desiring additional information, or planning a presentation to the Committee, should contact Susan McDuffie, the director of the Northwestern Regional Office at (206) 442–1246.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., April 22, 1985.

Bert Silver,

Assistant Staff Director for Regional Programs.

[FR Doc. 85–10124 Filed 4–25–85; 8:45 am]

BILLING CODE 6335–01–M

Maryland Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Maryland Advisory Committee to the Commission will convene at 3:30 p.m. and will end at 4:30 p.m. on May 16, 1985, at the Baltimore Convention Center, 1 West Pratt Street, Room 302, Baltimore, Maryland. The purpose of the meeting is for an orientation of new members and discussion of program plans.

Persons desiring additional information, or planning a presentation to the Committee, should contact Edward Rutledge, director of the Mid-Atlantic Regional Office, at (202) 254–6717.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, DC, April 22, 1985.

Bert Silver,

Assistant Staff Director for Regional Programs.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

[A-122-004]

Steel Reinforcing Bars From Canada; Preliminary Results of Administrative Review of Antidumping Finding and Tentative Determination To Revoke in Part

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding and tentative determination to revoke inpart.

SUMMARY: The Department of Commerce had conducted an administrative review of the antidumping finding on steel reinforcing bars from Canada. The review covers the only manufacturer covered by this finding, Western Canada Steel Limited, and the two other known exporters to the United States of this merchandise manufactured by Western Canada Steel Limited. The review period is April 1, 1983 through March 31, 1984. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

As a result of the review, the Department has preliminary determined to require cash deposits of estimated antidumping duties on future entries equal to the margin calculated on the last known shipments. The Department has tentatively determined to revoke the finding with respect to Western Canada Steel Limited.

Interested parties are invited to comment on these preliminary results and tentative determination to revoke in part.

EFFECTIVE DATE: April 26, 1985.

FOR FURTHER INFORMATION CONTACT: Sheila Forbes or John Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC. 20230, telephone: (202) 377-2923/3601.

SUPPLEMENTARY INFORMATION:

Background

On May 8,1984, the Department of Commerce ("the Department") published in the **Fedral Register** (49 FR 19560) the final results of its last administrative review of the antidumping finding on steel reinforcing bars from Canada (29 FR 5341, April 21, 1964) and announced its intent to conduct the next administrative review. The Department has now conducted that administrative review.

Scope of Review

Imports covered by the review are shipments of steel reinforcing bars from Canada, manufactured by Western Canada Steel Limited, currently classifiable under items 606.7900 and 606.8100 of the Tariff Schedules of the United States Annotated.

The review covers Western Canada Steel Limited and the two other known exporters to the United States, Rhovaco Holdings Limited and Russelsteel Limited, to the United States of Canadian steel reinforcing bars manufactured by Western Canada Steel Limited. The review period is April 1, 1983 through March 31, 1984. There were no known shipments of this merchandise to the United States during the period, and there are no known unliquidated entires.

Preliminary Results of the Review and Tentative Determination To Revoke in Part

As a result of our review, we preliminarily determine that, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties of 6.40 percent shall be required on all shipments of Canadian steel reinforcing bars manufactured by Western Canada Steel Limited entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this review.

Western Canada Steel Limited requested partial revocation of the finding and, as provided for in § 353.54(e) of the Commerce Regulations, Western Canada Steel Limited has agreed in writing to an immediate suspension of liquidation and reinstatement in the finding under circumstances as specified in the written agreement. Western Canada Steel Limited has not shipped this merchandise to the United States for more than ten years.

Therefore, we tentatively determine to revoke the antidumping finding on steel reinforcing bars from Canada with respect to Western Canada Steel Limited. If this partial revocation is made final, it will apply to all unliquidated entries of this merchandise exported by Western Canada Steel Limited entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice.

Interested parties may submit written comments to these preliminary results and tentative determination to revoke in part within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

This administrative review, tentative determination to revoke in part, and notice are in accordance with sections 751(a)(1) and (c) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1), (c)) and §§ 353.53 and 353.54 of the Commerce Regulations (19 CFR 353.53, 353.54).

Alan F. Holmer,

Deputy Assistant Secretary for Import Administration.

April 19, 1985.

[FR Doc. 85-10200 Filed 4-25-85; 8:45 am]

BILLING CODE 3510-DS-M

Minority Business Development Agency

Minority Business Development Center Program; Solicitation of Applications

AGENCY: Minority Business Development Agency.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting applications under its Minority Business Development Center (MBDC) Program to operate a MBDC for a 3 year period, subject to available funds. The cost of performance for the first 11 months is estimated at $171,417 for the project performance period of August 1, 1985 to June 30, 1986. The MBDC will operate in the Tucson Metropolitan Statistical Area (MSA). The first year cost for the MBDC will consist of $145,704 in Federal funds and a minimum of $25,713 in non-Federal funds (which can be a combination of cash, in-kind contribution and fees for services).

The I. D. Number for this project will be 09–10–85023–01.

The funding instrument for the MBDC will be a cooperative agreement and competition is open to individuals, nonprofit and for-profit organization, local and State governments, American Indian tribes and educational institutions.

The MBDC will provide management and technical assistance to eligible clients for the establishment and operation of businesses. The MBDC program is designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be judged on the experience and capability of the firm and its staff in addressing the needs of minority business individuals and organizations; the resources available to the firm in providing management and technical assistance; the firm's proposed approach to performing the work requirements included in the application; and the firm's estimated cost for providing such assistance. It is advisable that applicants have an existing office in the geographic region for which they are applying.

The MBDC will operate for a three (3) year period with periodic reviews culminating in annual evaluations to determine if funding for the project should continue. Continued funding will be at the discretion of MBDA based on such factors as the MBDC's satisfactory performance, the availability of funds, and Agency priorities.

A pre-application conference to assist all interested applicants will be held at the following address and time: Minority Business Development Agency, U.S. Department of Commerce, 450 Golden Gate Avenue, Room 15015, San Francisco, California 94102, May 8, 1985 at 10:00 a.m.

Proposals are to be mailed to the following address: Minority Business Development Agency, U.S. Department of Commerce, San Francisco Regional Office, 450 Golden Gate Avenue, Box 36114, San Francisco, California 94102, 415/556–6734.

Closing Date: The closing date for applications is May 15, 1985. Applications must be postmarked on or before 5:00 pm—May 15, 1985.

FOR FURTHER INFORMATION CONTACT: Dr. Xavier Mena, Regional Director, San Francisco Regional Office.

SUPPLEMENTARY INFORMATION: Questions concerning the preceding information, copies of application kits and applicable regulations can be obtained at the above address.

11.800 Minority Business Development (Catalog of Federal Domestic Assistance)

Xavier Mena,

Regional Director, San Francisco Regional Office.

BILLING CODE 3510–16–M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1985, Additions and Deletions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to and deletions from procurement list.

SUMMARY: This action adds to and deletes from Procurement List 1985 commodities, military resale commodities and services to be provided by workshops for the blind and other severely handicapped.

EFFECTIVE DATE: April 26, 1985.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: On August 3, August 31, November 9, November 26, December 7, and December 21, 1984, and January 4, February 1 and February 15, 1985, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (49 FR 31126, 49 FR 34555, 49 FR 44789, 49 FR 46458, 49 FR 47980, 49 FR 49694, 50 FR 522, 50 FR 4726, 50 FR 6375 and 50 FR 6376) of proposed additions to and deletions from Procurement List 1985, October 19, 1984 (49 FR. 41195).

Additions

After consideration of the relevant matter presented, the Committee has determined that the commodities, military resale commodities and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c, 85 Stat. 77 and 41 CFR 51–2.6.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The actions will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The actions will not have a serious economic impact on any contractors for

the commodities, military resale commodities and services listed.

c. The actions will result in authorizing small entities to produce the commodities and military resale commodities and provide the services procured by the Government.

Accordingly, the following commodities, military resale commodities and services hereby added to Procurement List 1985.

Class 7340

Medium Weight Plastic Cutlery: 7340–00–NIB–0005 (Teaspoon) 7340–00–NIB–0006 (Soupspoon), 7340–00–NIB–0007 (Fork), 7340–00–NIB–0008 (Knife)
(Requirements for the Army and Air Force Exchange Service)

Class 8340

Line, Tent (Manila): 8340–00–252–2268, 8340–00–252–2271, 8340–00–252–2273, 8340–00–252–2291, 8340–00–556–9689

Class 8465

Strap, Shoulder, Quick Release, Right Hand: 8465–01–078–9282
(Requirements for Mechanicsburg, Pennsylvania and Richmond, Virginia depots only)

Military Resale Item Nos. and Names

No. 521, Candles, Air Freshening, Fruit
No. 522, Candles, Air Freshening, Holiday
No. 523, Candles, Air Freshening, Floral
No. 524, Candles, Air Freshening, Berry
No. 525, Candles, Air Freshening, Forest
No. 526, Candles, Air Freshening, Carnival
No. 527, Candles, Air Freshening, Festival
No. 528, Candles, Air Freshening, Herbal,
No. 529, Candles, Air Freshening, Assorted Scents with Holders

SIC 7331

Mailing Service, National Endowment for the Humanities, 1100 Pennsylvania Avenue NW., Room 202, Washington, D.C.

SIC 7349

Janitorial/Custodial, U.S. Court of Appeals, and Post Office, 7th and Mission Streets, San Francisco, California
Janitorial/Elevator Operator, Navy Yard Annex Buildings 159, 195E and 160, 2nd and M Street, SE., Washington, D.C.
Janitorial/Custodial, Indiana Dunes National Lakeshore, 1100 North Mineral Springs Road, Porter, Indiana
Janitorial/Custodial, for the following locations in Greenville, South Carolina: Kukowski-Donaldson Center, Perimenter Road, U.S. Army Reserve Center #1, 2201 Laurens Road, 3273rd U.S. Army Reserve Hospital, Suite B & C, 1003 Grove Road
Janitorial/Custodial, Federal Executive Institute, Route #29 North Charlottesville, Virginia

SIC 7369

Commissary Shelf Stocking and Custodial, Myrtle Beach Air Force Base, South Carolina

Deletions

After consideration of the relevant matter presented, the Committee has detemined that the commodities listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 46–48c, 85 Stat. 77 and 41 CFR 51–2.6.

Accordingly, the following commodities are hereby deleted from Procurement List 1985:

Class 7210

Mattress, Innerspring: 7210–38–75–100, 7210–53–75–100

Class 7690

Decalcomania, ¾" Black: 7690–00–329–0538 For Official Use Only
Decalcomania, 1" Black: 7690–00–857–9572, Max Speed; 7690–00–857–9573, No Riders; 7690–00–857–9574, No Smoking; 7690–00–857–9575, U.S. Army

BILLING CODE 6820–33–M

Procurement List 1985, Proposed Additions and Deletion

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to and deletion from procurement list.

SUMMARY: The Committee has received proposals to add to and delete from Procurement List 1985 a commodities to be produced by and services to be provided by workshops for the blind and other severely handicapped.

Comments must be received on or before: May 29, 1985.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77 and 41 CFR 51–2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Additions

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities and services to Procurement List 1985, October 19, 1984 (49 FR 41195):

Class 8405

Poncho, Wet Weather: 8405–01–100–0976

Class 8465

Strap, Shoulder with Quick Release: 8465–00–269–0482
(Requirements for Richmond, Virginia Depot only)

SIC 7349

Janitorial/Custodial: Federal Building, 500 Quarrier Street, Charleston, West Virginia

SIC 7369

Commissary Shelf Stocking and Custodial: Patrick Air Force Base, Florida
Commissary Shelf Stocking and Custodial, Fort Benjamin Harrison, Indianapolis, Indiana

Deletion

It is proposed to delete the following service from Procurement List 1985, October 19, 1984 (49 FR 41195):

SIC 7699

Repair and Maintenance of Electric Typewriters: Railroad Retirement Board, 844 N. Rush Street, Chicago, Illinois.

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Meeting

April 24, 1985.

The USAF Scientific Advisory Board Ad Hoc Committee on Advanced Air Vehicle Surveillance and Warning Technologies will meet at the Pentagon, Room 5D982, Washington, D.C., on May 13, 1985, from 9:00 a.m. to 5:00 p.m. to review the committee's previous activities and to draft a report.

This meeting will involve classified defense matters listed in Section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at (202) 697-4648.

Norita C. Koritko,

Air Force Federal Register, Liaison Officer.

BILLING CODE 3910-01-M

Department of the Navy

Chief of Naval Operations, Executive Panel Advisory Committee, China Task Force; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Advisory Committee China Task Force will meet May 16-17, 1985, from 9 a.m. to 5 p.m. each day, at 2000 North Beauregard Street, Alexandria, Virginia. All sessions will be closed to the public.

The purpose of this meeting is to examine the broad policy issues related to maritime aspects of U.S.-P.R.C. relations. The entire agenda for the meeting will consist of discussions of key issues related to maritime policy aspects of U.S.-P.R.C. relations and related intelligence. These matters constitute classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting, contact Lieutenant Thomas E. Arnold, Executive Secretary of the CNO Executive Panel Advisory Committee, 2000 North Beauregard Street, Room 392, Alexandria, Virginia 22311. Phone (703) 756-1205.

Dated: April 23, 1985.

William F. Roos, Jr.,

Lieutenant, JAGC, U.S. Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Naval Surface Weapons Center (NSWC) Review Team of the Naval Research Advisory Committee (NRAC) Panel on Laboratory Oversight will meet on May 13-14, 1985. The meeting will take place at Information Spectrum, Inc., 1745 South Jefferson Davis Highway, Arlington, Virginia, on May 13 and 14. Sessions of the meeting will commence at 8:30 A.M. and terminate at 5:00 P.M. on May 13 and 14, 1985. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to examine the scientific, technical and engineering health of NSWC. The agenda for the meeting will consist of Executive Sessions during which Review Team members will discuss presentations received and the preparation of a draft report. These discussions will contain classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and is in fact properly classified pursuant to such Executive order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander M. B. Kelley, U.S. Navy, Office of Naval Research (Code 100N), 800 North Quincy Street, Arlington, VA 22217-5000, Telephone number (202) 696-4870.

Dated: April 23, 1985.

William F. Roos, Jr.,

Lieutenant, JAGC, U.S. Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

Navy Resale System Advisory Committee; Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Navy Resale System Advisory Committee will meet on June 17, 1985, in the Four Seasons Olympic Hotel, 411 University Street, Seattle, Washington. The meeting will consist of two sessions: the first from 8:00 a.m. to 8:50 a.m; and the second from 9:00 a.m. until 3:45 p.m. The purpose of the meeting is to examine policies, operations and organization of the Navy Resale System and to submit recommendations to the Secretary of the Navy. The agenda will include discussions of the organization of the Resale System, planning, financial management, merchandising, field support, and industrial relations.

The Secretary of the Navy has determined in writing that the public interest requires that the second session of the meeting be closed to the public because it will involve discussions of matters relating solely either to internal agency personnel rules and practices, or to trade secrets and confidential commercial or financial information. These matters fall within the exemptions listed in subsections 552b, (c)(2), (c)(4), and (c)(9)(B) of title 5, Unted States Code. Therefore, the second session will be closed to the public.

For further information concerning this meeting, contact: Commander R. F. Hendricks, SC. USN, Naval Supply Systems Command, NAVSUP 09B, Room 516, Crystal Mall, Building No. 3, Arlington, Virginia 22202, Telephone number: (202) 695-5457.

Dated: April 23, 1985.

William F. Roos, Jr.,

Lieutenant, JAGC, U.S. Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF EDUCATION

Office of Elementary and Secondary Education

Magnet Schools Assistance Program for Fiscal Year 1985; Applications

AGENCY: Department of Education.

ACTION: Application Notice for New Projects under the Magnet Schools Assistance Program for Fiscal Year 1985.

Applications are invited for new projects under the Magnet Schools Assistance Program.

Authority for this program is contained in Title VII of the Education for Economic Security Act, Pub. L. 98–377. (20 U.S.C. 4051–4062).

The program issues awards to local educational agencies.

The purpose of the awards is to assist eligible local educational agencies in the planning, establishment, and operation of magnet schools that are a part of an approved desegregation plan. A "magnet school" is defined by the Act as a school or education center that offers a special curriculum capable of attracting substantial numbers of students of different racial backgrounds.

Closing date for transmittal of applications: Applications for new awards must be mailed or hand delivered by June 18, 1985.

Applications delivered by mail: Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: (CFDA No. 84.165) Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

Applications delivered by hand: Applications that are hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building #3, 7th and D Streets, SW., Washington, D.C.

The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

Applications that are hand delivered will not be accepted by the Application Control Center after 4:30 p.m. on the closing date.

Program information: Proposed regulations under the Magnet Schools Assistance Program were published in 49 FR 46169–46173 on November 23, 1984.

The proposed rules describe eligibility requirements for applicants, the types of projects that the Secretary assists, and the criteria to be used to evaluate applications.

Applications are being accepted based on the proposed regulations for the Magnet Schools Assistance Program. If any substantive changes are made in the final regulations for this program, applicants will be given an opportunity to revise or resubmit their applications.

Intergovernmental review: On June 24, 1983, the Secretary published in the **Federal Register** final regulations (34 CFR Part 79, published at 48 FR 29158–29168), implementing Executive Order 12372 entitled "Intergovernmental Review of Federal Programs." The regulations took effect September 30, 1983.

This program is subject to the requirements of the Executive Order and the regulations in 34 CFR Part 79. The objective of Executive Order 12372 is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

The Executive Order—

- Allows States, after consultation with local officials, to establish their own process for review and comment on proposed Federal financial assistance;
- Increases Federal responsiveness to State and local officials by requiring Federal agencies to accommodate State and local views or explain why those views will not be accommodated; and
- Revokes OMB Circular A–95.

Transactions with nongovernmental entities, including State postsecondary educational institutions and federally recognized Indian tribal governments, are not covered by Executive Order 12372. Also excluded from coverage are research, development, or demonstration projects that do not have a unique geographic focus and are not directly relevant to the government responsibilities of a State or local government within that geographic area.

The Magnet Schools Assistance Program is a new program, and States have not made a determination as to whether it will be included or excluded from review under the State review process. Therefore, immediately upon receipt of this notice, applicants that are governmental entities, including local educational agencies, must contact the appropriate State single point of contact to find out about and to comply with the State's process under the Executive Order. Applicants proposing to perform activities in more than one State should contact, immediately upon receipt of this notice, the single point of contact for each State and follow the procedures established in those States under the Executive Order. A list containing the single point of contact for each State is included in the application package for this program.

All comments from State single points of contact and all comments from State, areawide, regional, and local entities must be mailed or hand delivered by August 19, 1985, to the following address:

The Secretary, U.S. Department of Education, Room 4181, (84.165) 400 Maryland Avenue, SW., Washington, D.C. 20202. Proof of mailing will be determined on the same basis as applications.

Please note that the above address is not the same address as the one to which the applicant submits its completed application. *Do not send applications to the above address.*

Length of awards: The proposed project period for an award may not exceed 24 months.

Available funds: The appropriation for this program for fiscal year 1985 is $75,000,000. No eligible local educational agency may receive more than $4,000,000 of that amount. However, the President has proposed budget rescissions to the Congress that may eliminate the funds for this program. The deadline in this notice will not be extended unless needed because of changes in the final regulations, and applicants should prepare and submit applications pending further notification.

Application forms: Application forms and program information packages are expected to be ready for mailing by May 3, 1985. They may be obtained by writing to the Division of Educational

Support, U.S. Department of Education, Room 2007, 400 Maryland Avenue, SW., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. However, the program information is only intended to aid applicants in applying for assistance under this program.

Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirements beyond those imposed under the statute and regulations.

Applicants are encouraged to limit the narrative section to a maximum of 30 pages. The Secretary strongly urges that applicants not submit information that is not requested.

(The application is approved by the Office of Management and Budget under OMB control number 1810–0516.)

Applicable regulations: The regulations applicable to this program include the following:

(a) Regulations governing the Magnet Schools Assistance Program as proposed to be codified in 34 CFR Part 280.

(b) Education Department General Administrative Regulations, (EDGAR) 34 CFR Parts 74, 75, 77, 78, and 79.

FOR FURTHER INFORMATION CONTACT: For further information contact M. Patricia Goins, Division of Education Support, U.S. Department of Education, Room 2007, 400 Maryland Avenue, SW., Washington, D.C. 20202. Telephone: (202) 245–7965.

(20 U.S.C. 4051–4062)

(Catalog of Federal Domestic Assistance No. 84.165, Magnet Schools Assistance Program)

Dated: April 16, 1985.

William J. Bennett,

Secretary of Education.

BILLING CODE 4000–31–M

DEPARTMENT OF ENERGY

Waste Management Activities for Groundwater Protection at the Savannah River Plant, Aiken, SC; Intent To Prepare an Environmental Impact Statement

AGENCY: Department of Energy.

ACTION: Notice of Intent to prepare an environmental impact statement on the implementation of hazardous, low-level radioactive, and mixed waste management activities for the protection of groundwater, human health, and the environment at the Savannah River Plant near Aiken, South Carolina.

SUMMARY: The Department of Energy (DOE) announces its intent to prepare an environmental impact statement (EIS), in accordance with section 102(2)(C) of the National Environmental Policy Act (NEPA), as amended, to assess the potential environmental effects of modifying waste management activities for low-level radioactive, hazardous, and mixed wastes at SRP for the protection of groundwater, human health and the environment. These modifications will be based on compliance with applicable regulatory requirements. Waste management activities to be assessed in the EIS are:

1. The implementation of remedial and closure actions at active and inactive hazardous, low-level radioactive, and mixed waste sites.

2. The establishment of new onsite waste disposal facilities for hazardous, low-level radioactive, and mixed wastes.

3. Discharge of disassembly basin purge water from the C-, K-, and P-Reactors.

Scoping: DOE invites interested agencies, organizations, and the general public to submit comments or suggestions for consideration in the preparation of the EIS by May 28, 1985. Written comments and requests for additional information should be directed to Mr. C.G. Halsted, Jr., at the address below. Written comments post-marked after May 28, 1985, will be considered to the degree practicable. DOE will also hold two public scoping meeting at the locations and times indicated below:

1. Aiken, South Carolina on May 14, 1985, at 9:00 a.m. and 6:00 p.m. at the Odell Weeks Activity Center, 1700 Whiskey Road, Aiken, South Carolina 29801.

2. Beaufort, South Carolina on May 16, 1985, at 9:00 a.m. and 6:00 p.m. at the Ramada Inn-Beaufort, 3127 Boundary Street, Beaufort, South Carolina 29902.

Individuals desiring to make oral presentations at one of these meetings should notify Mr. Halsted at the address listed below as soon as possible after the appearance of this notice in the **Federal Register** so that the Department may arrange a schedule for the presentations. Persons who have not submitted a request to speak in advance may register to speak at the meetings before each meeting commences. They will be called on to present their comments as time permits. In order to assure that everyone who wishes to present oral comments has the opportunity to do so, five minutes will be allotted to indivisuals, and ten minutes will be allotted to individuals representing groups. Comments received at these scoping meetings will also be considered in the preparation of the draft EIS. Transcripts of the scoping meetings will be prepared by DOE and will be available for inspection at the DOE Public Reading Room located at the University of South Carolina, Aiken Campus, University Library, 2nd Floor, University Parkway, Aiken, South Carolina, and the Fredom of Information Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue SW, Washington, DC.

ADDRESS: Written comments or suggestions on the scope of the EIS may be submitted to: Mr. C.G. Halsted, Jr., Assistant Manager for Health, Safety, and Environment, U.S. Department of Energy, Savannah River Operations Office, P.O. Box A, Aiken, South Carolina 29802, (803) 725–1380.

Envelopes should be marked "Attention: EIS for Waste Management Activities for Groundwater Protection at SRP."

For general information on the DOE EIS process, please contact: Office of the Assistant Secretary for Policy, Safety, and Environment, U.S. Department of Energy, Attn: Ms. Carol M. Borgstrom (PE–252), Room 3G–092, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252–4600.

Background Information

SRP is a major DOE installation established in the early 1950's for the production of nuclear materials for national defense. Operations at SRP generate a variety of chemically hazardous, radioactive, and mixed (hazardous and radioactive) wastes.

Waste management activities for groundwater protection have been studied and implemented on an ongoing basis at the Savannah River Plant since 1952. In 1977, an assessment of waste management operations at SRP (Final Environmental Impact Statement, Waste Management Operations, Savannah River Plant, ERDA–1537) was completed that resulted in the implementation of a waste management practices improvement program in accordance with DOE policies and standards. included in this program are regular assessments and improvements to ongoing waste management practices, studies of improved waste management storage techniques, and studies designed to reduce the volume of waste being generated.

Recent regulatory requirements for groundwater protection—such as those enacted pursuant to the Resource Conservation and Recovery Act (RCRA), as amended, and the Comprehensive Environmental Response Compensation and Liability Act (CERCLA), as amended—have been adopted that require changes in the SRP waste management program. In response to these recent requirements and the Fiscal Year 1984 Supplemental Appropriations Act (Pub. L. 98–181 enacted in November 1983), DOE developed and submitted to Congress on June 13, 1984, the "Groundwater Protection Plan for the Savannah River Plant." This plan—which will be made available upon request—and its supporting appendices provide strategies, funding requirements, and schedules for remedial and closure actions at selected hazardous, low-level radioactive, and mixed SRP waste sites to ensure continued protection of groundwater, human health and the environment.

Projects are currently underway at SRP to comply with recently enacted RCRA and CERCLA regulatory requirements for groundwater protection and to protect public health and the environment. These projects include wastewater effluent treatment plants in the M-, F- and H-Areas, and TNX Area to discontinue use of seepage basins; a remedial action program in the M-Area to manage and control existing groundwater contamination; the removal of buried wastes and contaminated soil at the Chemicals, Metals, and Pesticides (CMP) pits; and continuation of the expanded program begun in 1981 to monitor and characterize groundwater quality and resources at SRP.

Further project decisions are necessary to comply with applicable regulatory requirements, including those pursuant to RCRA and CERCLA, and to meet DOE's continuing commitment to protect groundwater resources, human health and the environment; to perform actions necessary to comply with current applicable hazardous, low-level radioactive, and mixed wastes regulations; and to meet the commitments made during the L-Reactor environmental impact statement process. These project decisions are the subject of this EIS.

Alternatives

The Groundwater Protection Plan for the Savannah River Plant discusses remedial and closure measures for certain waste sites. Proposed new waste disposal facilities and the discharge of disassembly basin purge water from the C-, K-, and P-Reactors to seepage basins are not covered in the Groundwater Protection Plan.

Alternatives for closure and remedial actions at existing hazardous, low-level radioactive, and mixed waste sites that will be evaluated in the EIS are:

1. Removal of waste to the extent practicable from existing waste sites, and implementation of cost-effective closure and remedial actions as required;
2. Removal of waste at selected existing waste sites, and implementation of cost-effective closure and remedial actions as required;
3. No removal of waste at existing waste sites, and implementation of cost-effective closure and remedial actions as required;
4. No action (no removal of waste at existing waste sites, and no closure or remedial actions).

Alternatives for new onsite hazardous, low-level radioactive, and mixed waste disposal facilities are:

1. Retrievable storage.
2. Shallow land burial.
3. Above ground disposal.
4. A combination of retrievable storage, shallow land burial, and above ground disposal.
5. No action (no new facilities).

Pre-disposal techniques (e.g., incineration and compaction) for hazardous, low-level radioactive, and mixed wastes will be discussed in the EIS.

Alternatives for the discharge of disassembly basin purge water from the C-, K-, and P-Reactors are:

1. Detritiation.
2. Evaporation.
3. Direct discharge to onsite streams.
4. No action (continuation of discharge to seepage basins).

Identification of Environmental Issues

The following issues will be analyzed in this EIS. This list is not intended to be all inclusive; nor is it intended to be a predetermination of impacts.

1. Effects of remedial actions on groundwater quality and use.
2. Protection of human health and the environment.
3. Identification of "cleanup levels" at existing waste sites.
4. Dedication of selected waste sites.
5. Protection of groundwater including important aquifers for domestic and agricultural use.
6. Effects on endangered species, floodplain/wetlands, and archeological/historical sites.
7. Changes in surface water quality.
8. Interactive effects of remedial action measures.
9. Disposal of waste treatment material.

Referenced Documents

Members of the public may inspect the documents referenced in this notice during normal business hours at the DOE Public Reading Room located at the University of South Carolina, Aiken Campus, University Library, 2nd Floor, University Parkway, Aiken, South Carolina 29801.

Dated in Washington, DC, this 19th day of April, for the United States Department of Energy.

William A. Vaughan,

Acting Assistant Secretary for Policy, Safety, and Environment.

BILLING CODE 6450-01-M

Civilian Radioactive Waste Management; Oak Ridge Operations; Monitored Retrievable Storage Analyses

AGENCY: Department of Energy.

ACTION: Program solicitation announcement.

SUMMARY: On April 25, 1985, the Department of Energy, Oak Ridge Operations Office in support of the Office of Civilian Radioactive Waste Management issued Program Solicitation No. DE–PS05–85OR21555 to the State of Tennessee requesting grant application(s). The purpose of the grant is to provide the host State with sufficient information, funds and technical assistance to understand the potential impacts of siting a Monitored Retrievable Storage (MRS) facility in its jurisdiction and, subsequently, to form an independent opinion regarding its acceptability. Upon receipt of the grant, the grantee may institute liaison activities with other concerned states, Indian tribes, and local governments as well as Federal representatives about MRS activities and related issues.

SUPPLEMENTARY INFORMATION:

Background

The Nuclear Waste Policy Act of 1982 (Pub. L. 97–425) was signed into law by the President January 7, 1983 (see **Federal Register** Notification dated January 7, 1983). The major objectives of the Act are to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent fuel, and for other purposes related to disposal and storage of spent fuel and high-level radioactive waste. The Office of Civilian Radioactive Waste

Management was established to carry out provisions of the Act.

The Act established a schedule and step-by-step process by which the President, the Congress, the States, affected Indian tribes, the U.S. Department of Energy (DOE) and other Federal agencies must work together in the siting, construction and operation of geologic repositories for disposal of high-level radioactive waste generated by civilian nuclear reactors. This law has provided a mandate and, more important, a set of rules—including unprecedented collaboration among the Federal Government, the States and the public—for proceeding with the identification and selection of sites for a repository as well as for interim storage facilities in the event they are needed.

Principal Support Areas

Financial assistance will be provided the grantees in support of the following activities:

1. Obtaining technical assistance and evaluation services in determining any potential economic, social, public health and safety, and environmental impacts that are likely as a result of the development of a MRS facility in the State.

2. Conducting workshops within the State in order to familiarize local governments and/or other interested groups with the MRS as key program documents are developed and providing a forum for information transfer.

3. Scheduling and conducting technical assistance meetings with the State's technical contractors.

4. Discussing specific assumptions and analyses relating to the MRS facility and its siting with DOE. DOE shall provide access to its technical specialists and resources in furtherance of project objectives.

Eligibility and Limitations

Proposals from States other than the above-referenced prospective grantee are not requested.

The Department of Energy will consider applications from the State of Tennessee requesting grant support for up to three (3) sites. Grant support is expected to cover a performance period of 12 months.

Application Forms

Applications must be prepared and submitted in accordance with the instructions and forms included in the program solicitation.

Closing Date for Transmittal of Applications

Applications must be received by the Department of Energy by 4:00 p.m., May 27, 1985.

FOR FURTHER INFORMATION CONTACT: All communications or questions regarding the business/administrative aspects of this program solicitation should be directed to: Mr. Walker K. Love, Procurement and Contracts Division, Department of Energy, Oak Ridge, TN 37830, Telephone Number: (615) 576–0791.

All communications or questions regarding the technical aspects of this program solicitation should be directed to: Mr. Peter J. Gross, MRS Office, Department of Energy, Oak Ridge, TN 37831, Telephone Number: (615) 576–6694.

(Catalog of Federal Domestic Assistance Number 81.065 Nuclear Waste Disposal Siting)

Effective Date: April 26, 1985.

Peter D. Dayton,

Director, Procurement and Contracts Division.

BILLING CODE 6450–01–M

Announcement of Identification of Candidate Sites for a Proposal to Congress for a Monitored Retrievable Storage Facility and Availability of a Preliminary Analysis of the Need for and Feasibility of the Facility

AGENCY: Office of Civilian Radioactive Waste Management, DOE.

ACTION: Notice of announcement by the Office of Civilian Radioactive Waste Management (OCRWM) of the identification of three candidate sites for a proposal to Congress for a Monitored Retrievable Storage (MRS) facility. In addition, a document, "Need for and Feasibility of Monitored Retrievable Storage—A Preliminary Analysis" is available for review, and a report, "Screening and Identification of Sites for a Proposed Monitored Retrievable Storage Facility" is available for public distribution.

SUMMARY: OCRWM plans to study these sites for inclusion in a proposal to Congress for the construction of an MRS facility. The Department of Energy (DOE) plans to submit the proposal to Congress in January 1986.

Congress will then consider whether or not construction of an MRS facility will be authorized. The document now available for review will be used as a resource to develop the Needs and Feasibility Study which will accompany the proposal to Congress.

The technical program to develop the proposal is being implemented by the DOE Operations Office in Richland, Washington. In order to facilitate communication and interactions with the potential host State, an MRS office is being established in the DOE Oak Ridge Operations Office in Oak Ridge, Tennessee.

FOR FURTHER INFORMATION CONTACT:

For Press information:

Mr. James Alexander, Public Information Office, Oak Ridge Operations Office, U.S. Department of Energy, P.O. Box E, Room 1012, Oak Ridge, TN 37831, (615) 576–0885

—Ms. Ginger King, Office of Policy, Integration and Outreach, U.S. Department of Energy, RW–40, Washington, D.C. 20585, (202) 252–2835

For copies of documents:

—Mr. Ron Izatt, U.S. Department of Energy, Richland Operations Office, 825 Jadwin Avenue, P.O. Box 550, Richland, WA 99352

—Mr. Peter Gross, Monitored Retrievable Storage Office, Oak Ridge Operations Office, P.O. Box E, U.S. Department of Energy, Oak Ridge, TN 37831, (615) 576–6694

—Mr. James Carlson, Office of Storage and Transportation Systems, U.S. Department of Energy, RW–32, Washington, D.C. 20585, (202) 252–9433

Announcement

The U.S. Department of Energy (DOE) announced yesterday, April 25, 1985, that based upon its preliminary analysis it expects to propose to Congress in January 1986 an integrated nuclear waste disposal system which would include a Monitored Retrievable Storage (MRS) facility for consolidating, packaging, handling and temporary storage of spent nuclear fuel prior to disposal in deep geologic repositories. Disposal of nuclear waste is scheduled to begin in 1998.

The Nuclear Waste Policy Act of 1982 (the Act) established Federal policy and responsibility for the management of commercial spent nuclear fuel and high-level radioactive waste. The primary focus of the Act is the construction of a geologic repository by 1998. The Act also directed DOE to examine monitored retrievable storage as an option for storage of spent fuel. The Act clearly states that permanent disposal of high-level radioactive waste and spent nuclear fuel in a geologic repository should proceed in any case.

The Act charges DOE with development of a system to dispose of the nation's nuclear waste. It is expected that 43,000 metric tons of spent nuclear fuel will be awaiting disposal in 1998. The need and feasibility preliminary analysis has concluded that a waste system which integrates deep geologic repositories for disposal with an MRS to consolidate, package and, if necessary, temporarily store the waste would be the best strategy to serve the nation's needs.

It should be noted that Congress has not authorized construction of an MRS facility. The MRS was seen by Congress as an option for the long-term storage of nuclear wastes. The Act specifically directs the Department to prepare a proposal for construction of one or more MRS facilities and submit this proposal to the Congress. The proposal is to include a recommendation of the preferred site for an MRS. Proposal documentation will include plans for funding, constructing, operating and integrating MRS facilities, and site specific designs and cost estimates. An environmental assessment which compares the advantages and disadvantages of the various combinations of proposed sites and facility designs must accompany the proposal. In addition, a Needs and Feasibility Study will also accompany the proposal. While the Act requires that this be done by June 1, 1985, the Department will not be able to meet that deadline. The proposal is expected to be ready for submittal by January 15, 1986.

If approved by Congress, the MRS facility would begin operation in the 1996–1997 timeframe as an integral part of the federal nuclear waste management system. DOE expects to propose that spent nuclear fuel from the nation's commercial nuclear power plants be transported to an MRS facility for preparation and packaging, prior to delivery to a repository for final disposal. An MRS facility could provide temporary storage, with room for expansion if additional storage is needed.

With a large majority of the nation's commercial nuclear reactors located in the eastern, sourthern and midwestern portions of the United States, locating an MRS facility at any one of the candidate MRS sites would significantly reduce spent fuel transportation impacts. With most of the spent fuel being shipped to a centrally located MRS, the largest number of shipments will be shorter in duration than they would if travelling directly to a repository. The majority of shipments to an MRS are expected to be by truck. Once at the MRS, the spent fuel would be consolidated and repackaged. Shipments from the MRS to the repository could then be made by dedicated train. Since rail shipments can carry much heavier loads than truck shipments, fewer rail shipments would be needed between the MRS and the repository than truck shipments. This would significantly reduce the number of long distance shipments and transportation impacts.

The three MRS candidate sites, which include a preferred and two alternatives, have been identified by DOE following a screening and evaluation process. This has been documented in a report titled "Screening and Identification of Sites for a Proposed Monitored Retrievable Storage Facility" (DOE/RW–0023) which is available for public distribution. The preferred candidate site is located at the cancelled Clinch River Breeder Reactor site; the two alternative candidate sites are located on the DOE Oak Ridge Reservation and at the cancelled Tennessee Valley Authority Hartsville Nuclear Plant site. These sites will be further evaluated and two alternative facility designs will be prepared for each site. Evaluation of the six design/site combinations will accompany the DOE proposal to Congress.

It is the intent of the Department to prepare a proposal which will allow Congress to make an informed decision regarding the MRS and the integrated system; provide full opportunity for affected parties to express their views during proposal development; and, provide the States, Indian Tribes and public an opportunity to gain an understanding of the proposal which will allow their informed participation in the Congressional decision-making process.

The DOE is prepared to work closely with the States, Indian Tribes and public to prepare the best supporting documentation possible for the proposal to be delivered to Congress in January 1986. The Department's mission is to provide high quality technical documents for use in the Congressional decision-making process. It is DOE's intent to provide information and technical assistance to give interested parties an opportunity to gain an understanding of the impacts of siting an MRS and, subsequently, to form independent opinions regarding MRS acceptability.

Workshops, technical briefings and public meetings are methods that could be employed to involve interested States, Indian Tribes and the public in the MRS process. The Department believes it is important to receive the benefit of public feedback from diverse viewpoints during preparation of the proposal and its supporting documentation. The views expressed at such workshops, briefings and meetings could be summarized in proceedings reports and forwarded to Congress with the proposal for consideration during its deliberations.

An environmental assessment which evaluates the relative advantages and disadvantages of the design/site combinations will be prepared in the coming months to accompany the MRS proposal to Congress. The Act states that this environmental assessment is to be based on available information. The DOE solicits the help of States, affected Indian Tribes and the public to provide available information which may be useful in preparation of the environmental assessment. It is requested that available information be provided no later than July 1, 1985, so that the information may be considered in development of the environmental assessment. Such information should be sent to:

Mr. Ron Izatt, U.S. Department of Energy, Richland Operations Office, 825 Jadwin Avenue, P.O. Box 550, Richland, WA 99352

In addition to the environmental assessment, a Needs and Feasibility Study which will consider several MRS options, including the "No MRS" option, will accompany the proposal to Congress. The preliminary analysis has been made available for public review (DOE/RW–0022) will be used as a resource to develop the Needs and Feasibility Study. (Copies of the document may be obtained from Mr. Ron Izatt, Mr. Peter Gross or Mr. James Carlson at the addresses listed above.) Any person wishing to do so, should submit their views in writing to Mr. Carlson, at the address listed above by July 1, 1985. This cutoff date is necessary so that public views may be considered in developing the Needs and Feasibility Study.

Effective Date: April 26, 1985.

Ben C. Rusche,

Director, Office of Civilian Radioactive Waste Management.

[FR Doc. 85–10199 Filed 4–25–85; 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

[Docket No. ERA-FC-84-021; OFP Case No. 61051-9257-20-24]

Applied Energy Sciences, Inc.; Order Granting Exemption From Prohibitions

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Order granting to Applied Energy Sciences, Inc., exemption from prohibitions of the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice that it has granted a permanent cogeneration exemption from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et seq.* ("FUA" or "the Act"), to Applied Energy Sciences, Inc. (AES Geismar of "the petitioner"), of Geismar, Louisiana. The permanent cogeneration exemption permits the use of natural gas as the primary energy source for a planned AES Geismar facility located in Geismar, Louisiana. The facility will include one combustion turbine generator, one heat recovery steam generator, one steam turbine and other support equipment. The cogeneration facility will produce approximately 280,000 lb/hr of process steam and 123,400 kilowatts of electrical power. The final exemption order and detailed information on the proceeding are provided in the

Supplementary Information section, below.

DATE: The order shall take effect on June 25, 1985.

The public file containing a copy of the order, other documents, and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue SW., Room 1E-190, Washington, D.C. 20585, Monday through Friday, 9:00 a.m. to 4:00 p.m., except Federal holidays.

FOR FURTHER INFORMATION:

Frank Duchaine, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA-0456, Washington D.C. 20585, Telephone (202) 252-8233

Steven E. Ferguson, Office of the General Counsel, Department of Energy, Forrestal Building, Room 6A-113, 1000 Independence Avenue, SW., Washington D.C. 20585, Telephone (202) 252-6947

SUPPLEMENTARY INFORMATION: The proposed cogeneration facility will include one Westinghouse 501-D5 gas turbine/generator or equivalent as the fuel burning unit. The heat recovery steam generator will be unfired, except during emergency conditions when the gas turbine is not operating. Natural gas will be the only fuel used and there will be no emergency standby fuel.

Under normal operating conditions the capacity of the proposed combined cycle plant will be approximately 280,000 lb/hr of process steam and 123 MWe (net) of electrical power at average ambient air conditions. Under minimum process steam conditions the capacity of the plant will be approximately 120,000 lb/hr of process steam and 140 MWe (net) of electrical power at average ambient air conditions. Under maximum process steam conditions the capacity of the plant will be approximately 340,000 lb/hr of process steam and 117 MWe (net) of electrical power at average ambient air conditions.

The primary purpose of the proposed facility is to provide process steam for use by the adjacent Uniroyal Chemical Plant. Electric power will also be generated for sale to Gulf States Utilities as a secondary benefit derived from efficient facility operation.

Basis for Permanent Exemption Order

The permanent exemption order is based upon evidence in the record including AES Geismar's certification to ERA, in accordance with § 503.37(a)(1), that:

1. The oil or natural gas to be consumed by the cogeneration facility will be less than that which would otherwise be consumed in the absence of the proposed powerplant, where the calculation of savings is in accordance with 10 CFR § 503.37.(a)(1)(i); and

2. The use of a mixture of natural gas and coal or oil and coal in the cogeneration facility will not be technically feasible, in accordance with 10 CFR § 503.37(a)(1)(ii).

Procedural Requirements

In accordance with the procedural requirements of section 701(c) of FUA and 10 CFR § 501.3(b), ERA published its Notice of Acceptance of Petition and Availability of Certification in the **Federal Register** on December 18, 1984 (49 FR 35221), commencing a 45-day public comment period.

A copy of the petition was provided to the Environmental Protection Agency for comments as required by section 701(f) of the Act. During the comment period, interested persons were afforded an opportunity to request a public hearing. The comment period closed on February 1, 1985; no comments were received and no hearing was requested.

NEPA Compliance

After review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act (NEPA).

Order Granting Permanent Cogeneration Exemption

Based upon the entire record of this proceeding, ERA has determined that AES Geismar has satisfied the eligibility requirements for the requested permanent cogeneration exemption, as set forth in 10 CFR § 503.37. Therefore, pursuant to section 212(c) of FUA, ERA hereby grants a permanent cogeneration exemption to AES Geismar to permit the use of natural gas as the primary energy source for its cogeneration facility in Geismar, Louisiana.

Pursuant to section 702(c) of the Act and 10 CFR § 501.69, any person aggrieved by this order may petition for judicial review thereof at any time before the 60th day following the publication of this order in the **Federal Register.**

Issued in Washington, D.C., on April 18, 1985.

Robert L. Davies,

Director, Coal & Electricity Division, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 85-10127 Filed 4-25-85; 8:45 am]

BILLING CODE 6450-01-M

Western Area Power Administration

California-Oregon Transmission Project; Intent To Conduct Public Scoping Meetings

AGENCY: U.S. Department of Energy, Western Area Power Administration.

ACTION: Notice of intent to conduct public scoping meetings.

SUMMARY: In accordance with the National Environmental Policy Act of 1969 (NEPA), Western Area Power Administration (Western), Department of Energy (DOE), and the Transmission Agency of Northern California (Agency) will jointly conduct a series of public meetings to determine the scope of environmental issues to be addressed during the preparation of the environmental impact statement/environmental impact report (EIS/EIR) for the California-Oregon third 500-kilovolt (kV) alternating current (AC)

transmission line. This transmission line is proposed to extend from the California-Oregon border to the Central Valley of California east of the San Francisco Bay Area. Western and the Agency will coordinate the environmental analysis and review of the project with the Bonneville Power Administration; U.S. Department of Agriculture, Forest Service (USFS); and the California Public Utilities Commission.

Background

Since the Notice of Intent to prepare an EIS for the subject project was published in the **Federal Register** (Vol. 49, No. 217, page 44546, November 7, 1984), new developments have occurred. Western will represent DOE as the lead Federal agency in the preparation of the EIS. The USFS will be a cooperating agency.

The Agency has been designated as the Project Manager and lead State agency in accordance with the California Environmental Quality Act, and will be responsible for preparing an FIR. The California Public Utilities Commission will have the role of a responsible State agency in the process due to the participation of California investor-owned utilities. To reduce time and costs, the Federal and State lead agencies have agreed to combine efforts and prepare a joint EIS/EIR.

The project will be owned by municipal and investor-owned utilities in California and Western. The project participants include: (1) Municipal utilities represented by the Agency, which include the cities of Alameda, Biggs, Gridley, Healdsburg, Lodi, Lompoc, Palo Alto, Redding, Roseville, Santa Clara, and Ukiah, the Modesto and Turlock Irrigation Districts, the Sacramento Municipal Utility District, and the Plumas-Sierra Rural Electric Cooperative; (2) Investor-owned utilities including Pacific Gas and Electric Company (PGandE), San Diego Gas and Electric Company, and Southern California Edison; (3) the Southern California Public Agencies, which include the cities of Anaheim, Azuza, Banning, Colton, Glendale, Vernon, and Riverside; and (4) the Western Area Power Administration. The California Department of Water Resources also has an option to participate starting in the year 2005. The proposed line would provide approximately 1,600 megawatts of power transmission capacity to the project participants.

The proposed facilities would include a new 500-kV transmission line which would begin at a northern terminal in southern Oregon and extend to the vicinity of Redding, California. From Redding to Tracy, California, an existing 230-kV line may be upgraded to 500-kV, or a new line may be built if it is shown to be environmentally and economically preferable. A new 500-kV transmission line would also be constructed between Western's Tracy Substation and PGandE's Tesla Substation, a distance of about 8 miles. A new 500-kV line may be built between the Round Mountain and Redding areas. The entire project would include approximately 350 miles of 500-kV line and three new or upgraded substations. The purpose of the project is to permit sales of power from the Pacific Northwest to California, to displace relatively more expensive oil- and gas-generated power, and to provide more reliability to the existing transmission system. The purpose of the environmental studies is to identify the potential environmental impacts and to identify possible routes for the transmission lines and sites for the new substations which minimize impacts to the environment.

Meetings

Western and the Agency will jointly conduct a series of public scoping meetings during 1985 in California and Oregon. The purposes of the meetings are: (1) To inform private citizens, organizations, Federal, State, and local agencies, and public and private utilities of the proposed project; and (2) to receive comments and information that will assist in identifying the environmental issues to be addressed in the EIS/EIR. The meetings will be conducted on the dates and at the locations listed below.

Northern Schedule

May 13, 1985, 7:30 p.m., City Council Chambers, 1313 California Street, Redding, CA
May 14, 1985, 7:30 p.m., City Council Chambers, 1175 East Main Street, Ashland, OR
May 15, 1985, 9:00 a.m., Board of Supervisors Chambers, 526 West Sycamore, Willows, CA (combined w/ Planning Commission meeting)
May 15, 1985, 7:30 p.m., Multipurpose Room, Newell Elementary School, Highway 139, Newell, CA (9 miles south of Tulelake)
May 16, 1985, 7:30 p.m., American Legion Hall, Highway 299 at Long Street, Fall River Mills, CA
May 21, 1985, 7:30 p.m., City Council Chambers, 550 Main Street, Weed, CA
May 22, 1985, 7:30 p.m., Board of Supervisors' Chambers, 633 Washington Street, Red Bluff, CA
May 23, 1985, 1:30 p.m., Airport Sheraton Inn, 8235 Northeast Airport Way, Portland, OR

Southern Schedule

May 13, 1985, 7:30 p.m., City Hall Auditorium, 425 Webster Street, Colusa, CA
May 14, 1985, 7:30 p.m., Board of Supervisors Chambers, 25 County Center Drive, Oroville, CA
May 15, 1985, 7:30 p.m., Yolo County Planning Commission Meeting Room, 292 West Beamer Street, Woodland, CA
May 16, 1985, 7:30 p.m., City Council Chambers, 1201 Civic Center Boulevard, Yuba City, CA

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS–59186A; FRL–2822–6]

Certain Chemicals; Approval of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for a test marketing exemption (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA), TME–85–28. The test marketing conditions are described below.

EFFECTIVE DATE: April 12, 1985.

FOR FURTHER INFORMATION CONTRACT: Candy Brassard, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–609C, 401 M Street SW., Washington, DC 20460 (202–382–3394).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury.

EPA hereby approves TME–85–28. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions (if any) specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, use and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME–85–28. A bill of lading accompanying each shipment must state that use of the substance is restricted to that approved in the TME. In addition, the Company shall maintain the following records until five years after the dates they are created, and shall make them available for inspection or coping in accordance with section 11 of TSCA:

1. The applicant must maintain records of the quantity of the TME substance produced and must make these records available to EPA upon request.

2. The applicant must maintain records of the dates of shipment to each customer and the quantities supplied in each shipment, and must make these records available to EPA upon request.

3. The applicant must maintain copies of the bill of lading that accompanies each shipment of the TME substance.

4. The applicant must maintain the following information on disposal of the TME substance: dates waste material is disposed of, location of disposal sites, volume of any disposed solid material, estimated volume of any aqueous wastes contining the TME substance, and method of disposal.

TME 85–28

Dated of Receipt: February 27, 1985.

Notice of Receipt: March 8, 1985 (50 FR 9509).

Applicant: CP Chemicals, Inc.

Chemical: (S) Stannous (Tin 2+) methanesulfonate.

Use: (S) Component in electroplating bath.

Production Volume: 4,545 Kilograms.

Number of Customers: Six.

Worker Exposure: Manufacture: A total of 3 workers at 1 site for 1 to 2 hours per day, 20 days per year. Use: a total of 6 workers at up to 6 sites for 2 to 8 hours per day, 7 to 28 days per year.

Test Marketing Period: One year.

Commencing on: April 12, 1985.

Risk Assessment: EPA identified no significant concerns for health effects. Therefore, the test market substance will not present any unreasonable risk of injury to health. The Agency did identify potential adverse effects on aquatic organisms. However, since the low releases from manufacture and use will be sent to a POTW or on-site treatment facility, the test market substance will not pose any unreasonable environmental risk.

Additional Restrictions: The applicant and its customers will be required to send the releases from manufacture and/or use to a POTW or an on-site treatment facility.

Public Comments: None.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to health or the environment.

Dated: April 12, 1985.

Don R. Clay,

Director, Office of Toxic Substances.

BILLING CODE 6560–50–M

[OPTS–59192; FBL–2825–9]

Adduct of Polymer 4,4'-Phenylmethane Diisocyanate and Hydroxyester of Terephthalic Acid; Test Marketing Exemption Application

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5 (a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA's final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722. This notice, issued under section 5(h)(6) of TSCA, announces receipt of one application for an exemption, provides a summary, and requests comments on the approriateness of granting the exemptions.

DATE: Written comments by May 13, 1985.

ADDRESS: Written comments, identified by the document control number "[OPTS–59192]" and the specific TME number should be sent to: Document Control Officer (TS–973), Chemical Information Branch, Information Management Division, Office of Toxic Substances, Environmental Protection Agency, Rm. E–4201, 401 M Street SW., Washington, DC 20460 (202–382—3532).

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–611, 401 M Street SW., Washington, DC 20460 (202–382–3725).

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the TME received by EPA. The complete non-confidential document is available in the Public Reading Room E–107 at the above address.

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). This notice announces receipt of twenty-one PMNs and provides a summary of each.

DATES: Close of Review Period:

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidental version of the submission provided by the manufacturer on the PMNs received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address.

P 85-800

Manufacturer. Olin Corporation.

Chemical. (G) Sodium salt of polycarboxylic acid.

Use/Production. (S) Industrial and commercial surfactant—general industrial cleaning. Prod. range: Confidential.

Toxicity Data. Acute oral: >5.0 g/kg; Acute dermal: >2.0 g/kg; Irritation: Skin-Mild or slight, Eye-Mild; Ames Test: Not determined; Skin sensitization: Sensitizer.

Exposure. Manufacture: Dermal, a total of 5 workers, up to 1 hr/da, up to 200 da/yr.

Environmental Release/Disposal. Greater than 2 kg/da to greater than 2,500 kg/yr released to water with greater than 4 kg/da to land.

Disposal by incineration, landfill and activated sludge treatment plants.

P 85-801

Manufacturer. Confidential.

Chemical. (G) adduct of polymeric 4,4' phenylmethane diisocyanate and hydroxyester of terephthalic acid.

Use/Manufacture. (G) Insulation. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Confidential.

Environmental Release/Disposal. No release. Disposal by waterway.

P 85-802

Manufacturer. Confidential.

Chemical. (G) Functionalized styrene methacrylic polymer.

Use/Production. (G) Component for industrial specialty coatings. Prod. range: 40,000-252,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and processing: Dermal, a total of 58 workers, up to 8 hrs/da, up to 32 da/yr.

Environmental Release/Disposal. 5 to 135 kg/batch released to land. Disposal by incineration and landfill.

P 85-803

Manufacturer. The Minnesota Mining and Manufacturing Company.

Chemical. (G) 4,4'phenylmethane diisocyanate adduct of polyether polyol.

Use/Production. (S) Commercial primer for repair of urethane foam roof coating. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture: Dermal, a total of 2 workers/shift up to 2 hrs/da, up to 30 da/yr.

Environmental Release/Disposal. 71 kg/batch released. Disposal by incineration.

P 85-804

Manufacturer. Eastman Kodak Company.

Chemical. (S) 2-Methyl-6-quinolinamine hydrochloride.

Use/Production. (G) Chemical intermediate. Prod. range: 2-4 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and use: Dermal, inhalation and ocular, a total of 2 workers, up to 0.4 hr/da, up to 3 da/yr.

Environmental Release/Disposal. Less than 0.01 kg/batch incinerated.

P 85-805

Manufacturer. Eastman Kodak Company.

Chemical. (S) 2-Methyl-6-quinolinamine.

Use/Production. (G) Chemical intermediate. Prod. range: 2-3 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and use: Dermal, inhalation and ocular, a total of 4 workers, up to 1.1 hr/da, up to 3 da/yr.

Environmental Release/Disposal. Less than 0.5 kg/batch incinerated.

P 85-806

Manufacturer. Eastman Kodak Company.

Chemical. (S) 2-Methyl-6-nitroquinoline.

Use/Production. (G) Chemical intermediate. Prod. range: 2.5-4.0 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and use: Dermal, inhalation and ocular, a total of 6 workers, up to 1.3 hr/da, up to 4 da/yr.

Environmental Release/Disposal. Less than 0.2 kg/batch incinerated.

P 85-807

Manufacturer. Confidential.

Chemical. (G) Polyperester of ketopolycyclic polyacid.

Use/Production. (G) A formulation component for open non-dispersive use. Prod. range: 50-250 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture: Dermal, a total of 18 workers.

Environmental Release/Disposal. 0.05 to 0.10 kg/batch released to land. Disposal by landfill

P85-808

Manufacturer. Confidential.

Chemical. (G) Polyester resin.

Use/Production. (S) Electrical insulation intermediate. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Confidential.

Environmental Release/Disposal. Confidential.

P85–809

Manufacturer. Confidential.

Chemical. (G) Terpolymer with styrene and methyl methacrylate.

Use/Production. (G) Industrial coating polymer. Prod. range: 40,000–252,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and processing: Derma, a total of 58 workers, up to 8 hrs/da, up to 32 da/yr.

Environmental Release/Disposal. 5 to 135 kg/batch released to land. Disposal by incineration and landfill.

P85–810

Manufacturer. Confidential.

Chemical. (S) (Z)-1-bromo-3-hexene.

Use/Production. (G) Chemical synthetic intermediate-destructure use. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture and use: Dermal, a total of 6 workers, up to 2 hr/da, up to 5 da/yr.

Environmental Release/Disposal. 0.020 to 0.17 kg/batch released to air. Disposal by incineration.

P85–811

Manufacturer. Confidential.

Chemical. (G) Polyurethane polyol.

Use/Production. (G) Industrially applied coating product. Prod. range: 225,000–500,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and processing: Dermal, a total of 29 workers, up to 8 hrs/da, up to 260 da/yr.

Environmental Release/Disposal. 4 to 180 kg/batch released to land. Disposal by incineration and landfill.

P85–812.

Importer. Confidential.

Chemical. (G) 2-[3',5'-disubstituted-2'-hydroxyphenyl]benzotriazole.

Use/Import. (G) Open, non-dispersive use; additive for coatings. Import range: Confidential.

Toxicity Data. Acute oral: Male and female—>5,000 mg/kg; Acute dermal: Male and female—>2,000 mg/kg; Irritation: Skin Non-irritant, Eye—Non-irritant; Ames Test: Non-mutagenic; Skin sensitization: Strong sensitizer; Ready biodegradability test: Not readily biodegradable; LC_{50} 96 hr (Bluegill sunfish): 3.8 mg/l; LC_0 96 hr (Bluegill sunfish): 1.8 mg/l; LC_{100} 96 hr (Bluegill sunfish): 5.8 mg/l; LC_{50} 96 hr. (Rainbow trout): 2.8 mg/l; LC_0 96 hr (Rainbow trout): 1.2 mg/l; LC_{100} 96 hr. (Rainbow trout): 4.95 mg/l; EC_{50} 48 hr. (Daphnia magna): 4.0 mg/l; EC_0 48 hr Daphnia magna): 1.0 mg/l; EC_{100} 48 hr (Daphnia magna: 10.0 mg/1.

Exposure. Processing: Dermal, up to 2 hrs/da, up to 100 da/yr.

Environmental Release/Disposal. No release to air, water and land. Disposal by incineration.

P85–813

Importer. Marubeni America Corporation.

Chemical. (G) Copolymer of unsaturated polyester and allylcompounds.

Use Import. (S) Coating for woodwork. Import range: 30,000–120,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. No data submitted.

Environmental Release/Disposal. No data submitted. Disposal by incineration.

P 85–814

Importer. Marubeni America Corporation

Chemical. (G) Copolymer of unsaturated polyester and allyl-compounds.

Use/Import. (S) Coating for woodwork. Import range: 30,000–120,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. No data submitted.

Environmental Release/Disposal. No data submitted. Disposal by incineration.

P 85–815

Importer. Marubeni America Corporation.

Chemical. (G) Copolymer of unsaturated polyester and allyl-compounds.

Use/Import. (S) Coating for woodwork. Import range 30,000–120,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. No data submitted.

Environmental Release/Disposal. No data submitted. Disposal by incineration.

P 85–816

Importer. Marubeni America Corporation.

Chemical. (G) Copolymer of unsaturated polyester and allyl-compounds.

Use/Import. (S) Putty for vehicle. Import range: 20,000–80,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. No data submitted.

Environmental Release/Disposal. No data submitted. Disposal by incineration.

P 85–817

Importer. Marubeni America Corporation.

Chemical. (G) Copolymer of unsaturated polyester and allyl-compounds.

Use/Import. (S) Putty for vehicle. Import range: 20,000–80,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. No data submitted.

Environmental Release/Disposal. No data submitted. Disposal by incineration.

P 85–818

Importer. Confidential.

Chemical. (G) Benzenesulfonic acid, 4-[[4-substituted]-3-methyl-5-oxo-2-pyrazolin-1-yl]-, salt

Use/Import. (G) Open, non-dispersive use. Import range 1,500–5,000 kg/yr.

Toxicity Data. No data on the PMN substance submitted.

Exposure. Import and processing: dermal and inhalation, a total of 5 workers, up to 2 hrs/wk at 400 man hours/yr.

Environmental Release/Disposal. No data submitted.

P 85–819

Manufacturer. Resinall Corporation.

Chemical. (G) Tall oil fractions, unsaturated hydrocarbon resin, dieneophile modified polymer with pentaerythritol.

Use/Production. (G) Resin binder for printing inks. Prod. range: confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture: Dermal, a total of 7 workers, up to 6 hrs/da, up to 300 da/yr.

Environmental Release/Disposal. 50 lbs released to air, with 5 to 50 lbs to land. Disposal by sanitary landfill.

P 85–820

Manufacturer. Resinall Corporation.

Chemical. (G) Carboxylic modified rosin.

Use/Production. (S) Industrial processing aid in rubber compounding, pigment resination and tackifier for adhesives. Prod. range: 100,000–300,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture: Dermal, a total of 5 workers, up to 6 hrs/da, up to 20 da/yr.

Environmental Release/Disposal. 180 kg/batch released to air with 20 to 180 kg/batch land.

Dated: April 19, 1985.

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). In the **Federal Register** of November 11, 1984, (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. PMNs for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of three such PMNs and provides a summary of each.

DATES: Close of Review Period:

Y 85-55—May 2, 1985.

Y 85-56, Y 85-57—May 6, 1985.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-611, 401 M Street SW., Washington, DC 20460 (202-382-3725).

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission by the manufacturer on the exemption received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

Certain Companies; Pesticide Tolerance Petitions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide petitions relating to the establishment, amendment, and/or correction of tolerances for certain pesticide chemicals in or on certain agricultural commodities.

ADDRESS: By mail, submit comments identified by the document control number [PF-409] and the petition number, attention Product Manager (PM) named in each petition, at the following address:

Information Services Section (TS-757C), Program Management and Support Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

In person, bring comments to:

Information Services Section (TS-757C), Environmental Protection Agency, Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed in response to this notice will be available for public inspection in the Information Services Section office at the address given above, from 8 a.m., to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT:

By mail: Registration division (TS-767C), Attn: (Product Manager (PM) named in each petition), Environmental Protection Agency, Office of Pesticide Programs, 401 M St., SW., Washington, D.C. 20460.

In person: Contact the PM named in each petition at the following office location/telephone number:

Product manager	Office location/ telephone number	Address
PM-12, Jay Ellenberger.	Rm. 202, CM#2 (703-557-2386).	EPA, 1921 Jefferson Davis Hwy, Arlington, VA 22202
PM-17, Timothy A. Gardner.	Rm. 207, CM#2 (703-557-2690).	Do.

SUPPLEMENTARY INFORMATION: EPA has received pesticide petitions (PP) relating to the establishment, amendment, and/or correction of tolerances for certain pesticide chemicals in or on certain agricultural commodities.

I. Initial Filing

PP 5F3208. Union Carbide Agricultural Products Co., Inc., P.O. Box 12014, Research Triangle Park, NC 27709. Proposes amending 40 CFR 180.169 by establishing a tolerance for residues of the insecticide carbaryl (1-naphthyl *N*-methylcarbamate) in or on the commodity pineapples at 2.0 parts per million (ppm). The proposed analytical method for determining residues in high pressure liquid chromatography using fluorescent detection. PM-12

II. Amended Petition

PP 2F2657. Shell Oil Co., 1025 Connecticut Ave., NW., Washington, D.C. 20036. EPA issued a notice,

published in the **Federal Register** of February 8, 1984 (49 FR 4841), which announced that Shell Oil Co. had submitted PP 2F2657 to the Agency proposing to amend 40 CFR 180.379 by establishing tolerances for residues of the insecticide cyano (3-phenoxyphenyl)methyl-4-chlora-alpha-(1-methylethyl) benzeneacetate in or on certain commodities.

Shell Oil Co. has amended the petition by adding the commodity raisins at 30 ppm. The proposed analytical method for determining residues is gas chromatography. (PM–17)

III. Pesticide Petition; Correction

EPA issued a notice, published in the **Federal Register** of March 6, 1985 (50 FR 9122), which announced that Mobay Chemical Corp., P.O. Box 4913, Hawthorne Road, Kansas City, MO 64120, proposes amending 40 CFR Part 180 by establishing tolerances for the residues of the insecticide (*Z*)-alpha-[[(diethoxyphosphinothioyl) oxy]imino]benzeneacetonitrile and its cholinesterase-inhibiting metabolities in or on the agricultural commodity corn, sweet (kernels plus cobs with husk removed) at 0.05 ppm.

In the FR Doc. 85–4992, appearing at page 9123, in the first column, the pesticide petition (PP) number in item 2 under **Initial Filings** was inadvertently filed a "PP 5E3187", and is corrected to read "PP 5E3205". (PM–12)

(Sec. 408(d)(2) 68 Stat. 512, (21 U.S.C. 346a(d)(2))

Dated: April 19, 1985.

Robert V. Brown,

Acting Director, Registration Division, Office of Pesticide Programs.

[FR Doc. 85–10144 Filed 4–25–85; 8:45 am]

BILLING CODE 6560-50-M

[OPTS–51529B; FRL–2826–2]

Certain Chemicals; Premanufacture Notice; Termination of Review Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is revoking effective April 20, 1985, immediately following the signing of a Consent Order for the new chemical substance subject to premanufacture notice (PMN) P84–968, the remaining portion of a 90-day extension of the review period for PMN P84–968, under the authority of section 5(c) of the Toxic Substances Control Act (TSCA).

FOR FURTHER INFORMATION CONTACT: Anna Coutlakis, Chemical Control Division (TS–794), Environmental Protection Agency, Rm. E–613–B, 401 M St., SW., Washington, D.C. 20460, (202) 382–2252.

SUPPLEMENTARY INFORMATION: The original 90-day review period for PMN P84–968 was scheduled to expire on October 14, 1984. EPA published a section 5(c) extension notice for the PMN in the **Federal Register** of October 19, 1984 (49 FR 41101) to provide the Agency with sufficient time to issue an order under section 5(e). The Order would have prohibited the Company from manufacturing the PMN substance in, or importing it into, the United States pending the submission and evaluation of test data addressing the potential risk of injury to human health. After the Order was proposed, the Company suspended the notice review period and submitted more data and information. In light of this new data and information, EPA concluded that, if the Company were willing to enter into an appropriate Consent Order, the risks from the PMN substance would be reduced to acceptable levels. The Company agreed to such an approach. The review period, including the extension under section 5(c), would have expired May 18, 1985. The Consent Order was signed April 19, 1985 and goes into effect April 20, 1985. Therefore, EPA is revoking the remaining portion of the extended review period effective April 20, 1985.

Dated: April 18, 1985.

Edwin F. Tinsworth,

Acting Director, Office of Toxic Substances.

Science Advisory Board Clean Air Scientific Advisory Committee; Open Meeting

Under Pub. L. 92–463, notice is hereby given of a meeting of the Clean Air Scientific Advisory Committee (CASAC) of the Science Advisory Board. The meeting will be held May 13–15, 1985, starting at 9:00 am on May 13 and ending at approximately noon on May 15. The meeting will be held at the Rosslyn Westpark Hotel, 1900 North Fort Myer Drive, Arlington, Virginia.

The purpose of the meeting is to allow the Committee to review and provide its advice to the Agency on: (1) The August 1984 external review draft of the EPA's revised *Air Quality Criteria Document for Lead;* and (2) the EPA's first draft of the *Review of the National Ambient Air Quality Standards for Lead: Assessment of Scientific and Technical Information Draft Staff Paper.* The purpose of the staff paper is to evaluate and interpret the most relevant scientific and technical information reviewed in the criteria document in order to better specify the critical elements which the EPA staff believes should be considered in the possible revision of the primary and secondary National Ambient Air Quality Standards for lead. This assessment is intended to help bridge the gap between the scientific review contained in the criteria document and the judgments required of the Administrator in setting ambient standards for lead.

Copies of the August 1984 draft criteria document may be obtained by writing or calling the Office of Research and Development Publications Center, CERI–FRN, U.S. EPA, 21 West St. Clair Street, Cincinnati, Ohio, 45268 (513) 684–7562. Please ask for EPA document 600/8–83–028B, Vols. I–IV, August 1984. Copies of the draft staff paper may be obtained from Jeff Cohen, Strategies and Standards Division, Office of Air Quality Planning Standards (MD–12), U.S. EPA, Research Triangle Park, North Carolina, 27711, (CML) (919) 541–5531, (FTS) 629–5531. Written comments on the draft staff paper will be accepted through the 15th of July. Comments should be sent to Jeff Cohen at the previous address.

The meeting is open to the public. Any member of the public wishing to attend or obtain information should contact Mr. Robert Flaak, Executive Secretary, Clean Air Scientific Advisory Committee (CASAC), Science Advisory Board (A–101–F), U.S. EPA, Washington, DC, 20460 (202) 382–2552, prior to the meeting. Persons wishing to make statements at the meeting must contact Mr. Flaak no later than close of business on May 7, 1985.

Terry F. Yosie,

Director, Science Advisory Board.

April 15, 1985.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared April 8, 1985 through April 12, 1985 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at

(202) 382–5075/76. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated October 19, 1984 (49 FR 41108).

Draft EISs

ERP No. D–AFS–C65001–PR, Rating EC2, Caribbean Nat'l Forest and Luquillo Experimental Forest, Land and Resource Mgmt. Plan, Puerto Rico. **SUMMARY:** EPA expressed its concern that the DEIS did not adequately analyze potential long-term soil erosion impacts and water quality issues associated with timber harvesting activities. Overall, EPA agreed that the selected alternative represents a balance of the forests uses and resources. However, EPA believes the FEIS should include appropriate mitigating measures for potential long-term impacts to water quality and soil resources.

ERP No. D–AFS–D65012–00, Rating EC2, Jefferson Nat'l Forest Land and Resource Mgmt. Plan, WV, VA, and KY. **SUMMARY:** EPA's review suggests that the combined effects of proposed timbering and mineral extraction may result in significant cumulative impacts for which mitigation is not provided. Further, EPA believes that increased emphasis must be given to water quality issues and its more dependent ecosystem in order to assure that existing water quality and ecosystems are not significantly impacted. Finally, EPA believes that the proposed plan should incorporate a more comprehensive watershed management scheme than is identified.

ERP No. DS–COE–E32026–AL, Rating EO2, Mobile Harbor Channel Improvements, Construction and Maintenance, Offshore Dredged Material Disposal Site, Designation, AL. **SUMMARY:** EPA believes even though the current proposal has been downsized from the original onshore design, its impact remains geographic in scope, severe and irreversible. While EPA endorses the ocean disposal concept, we have significant environmental objections to utilizing a portion of the dredged material to create a 1000 acre island in Mobile Bay to function as an island terminal facility. EPA feels that practical and more environmentally sensitive alternatives exist for both dredged material disposal and port related developments and would like to continue discussions on this issue.

ERP No. DS–FHW–H40133–IA, Rating EC2, IA–58 and US 218 (formerly 518) Relocation and Improvement, Relocated US 20 in Cedar Falls to IA–3 in Waverly, IA. **SUMMARY:** EPA requested that the noise section be expanded to include information on the number and location of sites adversely impacted by noise.

ERP No. DS–FRC–L05018–AK, Rating EC2, Bradley Lake Hydroelectric Project, Construction and Operation, Permit, AK. **SUMMARY:** EPA suggested that the FSEIS place greater emphasis on summarizing the many volumes of supporting documents associated with the project. Also, expansion of the access alternatives evaluation was requested. Finally, EPA requested the opportunity to review monitoring plans and reports pertinent to a variety of project impacts and mitigation measures.

ERP No. RD–NOA–B91021–MA, Rating LO, Northeast Multi-Species Fishery Mgmt. Plan, Adoption, Approval, MA, ME, NH, RI, and CT. **SUMMARY:** EPA believes, from its areas of jurisdiction and expertise, that the fishery management plan will not cause significant adverse impacts on the environment.

ERP No. D–SCS–E36152–MS, Rating LO, Tallahaga Creek Watershed Flood Protection Plan, MS. **SUMMARY:** EPA does not have any significant and or long-term environmental objections to the current proposal and believes that sufficient information is provided in the DEIS.

ERP No. D–UMT–K54015–CA, Rating LO, San Diego East Urban Corridor Transportation Improvement, CA. **SUMMARY:** EPA has not identified any potential environmental impacts requiring substantive changes to the proposal.

FINAL EISs

ERP No. F–COE–D36082–VA, Roanoke R. Upper Basin Flood Damage Reduction, Headwaters Area, VA. **SUMMARY:** EPA reviewed the FEIS and found no objections to the project's implementation. The COE had addressed and incorporated each of EPA's requested modifications as noted in the DEIS.

ERP No. F–COE–G39012–LA, Louisiana Coastal Area, Freshwater Diversion to Barataria and Brenton Sound Basins, LA. **SUMMARY:** The FEIS adequately responds to EPA's comments issued on the DEIS and EPA did not identify any new concerns with regard to the proposed action.

ERP No. F–FHW–F40195–MN, TH–55/ Hiawatha Ave. Reconstruction, 59th St. to Franklin Ave., and CSAH 62 (Crosstown Highway) Extension, TH–55 to 46th Ave. South, MN. **SUMMARY:** EPA's review of the FEIS did not identify any significant environmental impacts requiring changes to the proposed project.

ERP No. F–USN–K40148–CA, Port Chicago Hwy., Main St. and Waterfront Rd., Explosive Safety Closure, Naval Weapons Station, CA. SUMMARY: EPA had no comments on the FEIS.

Amended Notices

The following review was completed during the week of February 25, through March 1, 1985 and should have appeared in the FR Notice published on March 15 March 15, 1985.

ERP No. F–BLM–K03012–00, Celeron/ All American and Getty Crude Oil Pipeline Project, Construction and Operation, Right-of-Way Permits, Emidio Station, CA. **SUMMARY:** The FEIS adequately responds to most of the environmental concerns raised in EPA's review of the DEIS. However, EPA continues to have environmental concerns with the action taken to initiate the construction of the McCameys to Freeport Extension and believes that the FEIS is deficient in providing information to assess related environmental impacts of the extension. The EIS does not address the impacts and related mitigation requirements with respect to the Edwards aquifer. ERP suggested that a supplement to the EIS would be required to satisfy the NEPA requirements associated with the McCamey to Freeport Extension. The following review was published in the April 12, 1985 FR Notice and with the incorrect summary paragraph. The correct summary of the EPA comments is below.

ERP No. F–OSM–L67014–WA, John Henry No. 1 Mine Operation, Permit, WA. **SUMMARY:** EPA suggested several stipulations for inclusion in the Record of Decision for the FEIS, and conditions on the Office of Surface Mining permit, if approved. The stipulations and conditions were suggested in order to more formally define the monitoring program, and to establish a firm commitment from the project sponsor for their proposed reclamation plan.

Intent To Prepare an Environmental Impact Statement

Responsible Office: U.S. Environmental Protection Agency Region III, Philadelphia, Pennsylvania.

Purpose: In accordance with section 511(c) of the Clean Water Act and section 102(2)(c) of the National Environmental Policy Act, EPA is notifying government agencies and the public that an EIS will be prepared to address wastewater management in the West Rehoboth Sanitary Sewer District, Sussex County, Delaware.

FOR FURTHER INFORMATION CONTACT: Mr Richard V. Pepino Environmental Impact and Marine Policy Branch U.S. Environmental Protection Agency Region III 841 Chestnut Building Philadelphia, Pennsylvania 19107 Phone No. (215) 597–9301.

Summary

1. Description of Proposed Action

The Environmental Protection Agency will prepare an Environmental Impact Statement (EIS) in conjunction with the planning of wastewater treatment needs for the West Rehoboth Sanitary Sewer District, Sussex County, Delaware. This action is in accordance with requirements of the National Environmental Policy Act, the Clean Water Act Amendments, and related EPA regulations.

2. Significant Issues

The EIS will consider the impacts of implementing alternative wastewater treatment strategies developed through the planning process. The major issues to be evaluated include increased development pressure, impacts on prime agricultural land and environmentally sensitive areas, water quality impacts, and feasibility of alternative technologies.

3. Public Participation Program

If you or your organization would like additional information, wish to submit information to EPA, or wish to be placed on the project mailing list please contact Richard V. Pepino of the Environmental Impact and Marine Policy branch at the above address.

Dated: April 23, 1985.

Allan Hirsch,

Director Office of Federal Activities.

State of Michigan National Pollutant Discharge Elimination System (NPDES) Pretreatment Program Reapproval

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: On April 16, 1985, the Environmental Protection Agency (EPA) reapproved the State of Michigan's NPDES State pretreatment program. This action reauthorizes the State of Michigan to administer the National pretreatment program as it applies to municipalities and industries within the State.

ADDRESS: The documents that form the basis for EPA's reapproval of the Michigan NPDES State pretreatment program are located at the EPA Region V Office, 230 South Dearborn Street, Chicago, Illinois, 60604. Please contact John J. O'Grady, Water Quality Permits Section (5WQP), (312) 353–2105.

FOR FURTHER INFORMATION CONTACT: John J. O'Grady, Water Quality Permits Section (5WQP), U.S. Environmental Protection Agency, Region V Office, 230 South Dearborn Street, Chicago, Illinois, 60604, (312) 353–2105.

2. Legal Authority Reviews.
c. Modifying POTWs' NPDES Permits to Incorporate Pretreatment Conditions.
3. Summary and Conclusion.
IV. Federal Register Notice of Approval of State NPDES Programs or Modifications.
V. Review Under Executive Order 12291 and the Regulatory Flexibility Act.

I. Background

On June 26, 1978, EPA promulgated the General Pretreatment Regulations (40 CFR Part 403). Amendments to the General Pretreatment Regulations were promulgated on January 28, 1981 (46 FR 9404). These regulations, mandated by the Clean Water Act of 1977 (Pub. L. 95–217), govern the control of industrial wastes introduced into Publicly Owned Treatment Works (POTWs), commonly referred to as municipal sewage treatment plants. The objectives of the regulations are to: (1) Prevent the introduction of pollutants into POTWs which will interfere with the operation of a POTW, including interference with its use or disposal of municipal sludge; (2) prevent the introduction of pollutants into POTWs which will pass through the treatment works or otherwise be incompatible with such works; and (3) improve opportunities to recycle and reclaim municipal and industrial wastewaters and sludges.

The guidelines and regulations which EPA has promulgated at 40 CFR Part 123, under the authority of sections 304(i)(2) and 402(b) of the Clean Water Act, apply to all aspects of state NPDES programs, including NPDES state pretreatment program applications. In addition, EPA has promulgated regulations at 40 CFR 403.10 that are particularly applicable to NPDES state pretreatment program applications. These regulations, among other things, require each state applicant to provide a description of the funding and personnel available to implement the program and demonstrate that the funding and qualified personnel are sufficient to carry out the program (40 CFR 403.10 (f)(3) & (g)(2)).

On October 28, 1982, Michigan submitted an application to EPA to add the pretreatment program to its approved NPDES program. On December 3, 1982, EPA published a notice in the **Federal Register** seeking comment on Michigan's application (47 FR 54477). One of the commentors on Michigan's application was the National Wildlife Federation (NWF). NWF stated that in light of the December 20, 1982, internal reorganization within the Michigan Department of Natural Resources (MDNR), the State agency which administers the NPDES and pretreatment program in Michigan, clarificaiton of the resulting administrative responsibilities for the Michigan pretreatment program was needed.

In response, on January 28, 1983, representatives from EPA Region V and the State of Michigan met with NWF and other environmental groups to listen to their concerns, and to explain why MDNR had been reorganized and how the reorganization would strengthen the pretreatment program. MDNR detailed the number of personnel from various MDNR offices to be committed to the pretreatment program and explained the pretreatment role to be played by experts from MDNR's Toxic Chemical Evaluation Section (TCES) in the regulation of toxic pollutants. The State agreed to provide NWF with a written description of pretreatment personnel responsibilities.

On February 10, 1983, Charles H. Sutfin, Water Division Director for EPA Region V, informed NWF that after considering the comments made by NWF and others, EPA Regional staff had decided to recommend that the EPA Administrator approve the Michigan pretreatment program.

On February 18, 1983, NWF wrote to EPA to express continued concern whether MDNR was committing sufficient staff expertise to the pretreatment program and requesting written documentation of internal Michigan task assignments. EPA mailed this information to NWF on April 4, 1983. On April 26, 1983, NWF wrote to EPA to again express their concern that Michigan had not yet demonstrated that qualified personnel were available to implement the pretreatment program. NWF argued that the task assignments document, transmitted to them on April 4, did not demonstrate the necessary academic credentials or relevant experience of personnel assigned to the program and did not formally assign TCES personnel into the pretreatment process.

On June 7, 1983, EPA approved Michigan's NPDES State pretreatment program (48 FR 27291, June 14, 1983). This action authorized the State of Michigan to administer the National pretreatment program as it applies to municipalities and industries within the State. On September 5, 1983, NWF and the Michigan United Conservation Clubs (MUCC) filed a petition with the U.S. Court of Appeals for the Sixth Circuit (Case No. 83–3616) for review of EPA's approval, under the Clean Water Act, of Michigan's application to administer the NPDES pretreatment program. In response, EPA filed a motion on May 16, 1984, requesting that the Sixth Circuit remand the approval to EPA for reconsideration, without requiring withdrawal of the program prior to that reconsideration. In its brief, EPA acknowledged that it had not adequately procedurally documented the factual premises and reasons supporting its approval of Michigan's application. EPA moved the Sixth Circuit Court for an order: (1) Remanding for reconsideration EPA's approval of the State of Michigan's NPDES State pretreatment program; (2) allowing Michigan's approved NPDES State pretreatment program to continue in effect pending final action on its reconsideration; and (3) staying further proceedings pending final action on its reconsideration.

II. Court Order

The U.S. Court of Appeals for the Sixth Circuit granted EPA's motion on September 27, 1984. The Sixth Circuit Court, at EPA's request, allowed Michigan's NPDES State pretreatment program to continue in effect pending final action on EPA's reconsideration. The Sixth Circuit Court did not rule on the substantive validity of the Michigan NPDES State pretreatment program. The lawsuit was stayed pending the reconsideration. The Court Order required EPA to take final action upon Michigan's NPDES State pretreatment program within 180 days of entry of the Court Order (by March 26, 1985*), including a detailed written statement of the basis for its decision and a response to all comments submitted. The Court Order also required EPA to take the following interim steps:

1. EPA was to file monthly reports with the Sixth Circuit Court, beginning October 27, 1984, describing the status of its reconsideration of the Michigan NPDES State pretreatment program application. Monthly reports have been filed with the Sixth Circuit Court on October 24, 1984; November 27, 1984; January 2, 1985; January 24, 1985; March 1, 1985; and March 26, 1985.

2. EPA was to publish a **Federal Register** notice soliciting additional comments on the approval of Michigan's NPDES State pretreatment program application. The public notice appeared in the **Federal Register** on December 27, 1984 (49 FR 50199 et seq.).

3. EPA was to hold a public hearing on the Michigan NPDES State pretreatment program application. The public hearing was conducted in January 29, 1985.

4. EPA was to make a new final decision, accompanied by a detailed written statement of the basis for its decision and a response to all comments submitted. EPA was to take final action upon Michigan's pretreatment program application within 180 calendar days of the date of the Court Order (March 26, 1985*).

*NB: This date has been extended for 40 days until May 5, 1985.

III. Responsiveness Summary (Pursuant to 40 CFR 123.61(b))

A. Summary of Significant Activities

MDNR drafted proposed amendments to the Michigan Water Resources Commission (WRC) Part 21 Rules: *Wastewater Discharge Permits—Pretreatment Program,* which were approved by the WRC for public notice on June 21, 1984. EPA provided comments dated June 29, 1984, on the rules. MDNR subsequently published a notice soliciting additional comments on both the proposed pretreatment rules and the EPA comments, and informed the public of hearings to be held on the public notice package. Public hearings were held in Lansing, Michigan on August 13, 1984, and in Houghton, Michigan on August 15, 1984. On August 28, 1984, the public hearing record closed, with written statements postmarked by August 24, 1984, being introduced into the hearing record.

Subsequent to the public hearings and notice period, and based upon the EPA components, MDNR made additional revisions to the rules and mailed them to EPA on October 26, 1984, as well as to WRC members, and interested industrial user and environmental groups for further review. On November 15, 1984, revisions to the administrative rules for the pretreatment program were approved by the WRC. The rules had received the support of the Michigan Water Pollution Control Federation, the Michigan Clean Water Coalition, the Ford Motor Company, the National Council of the Paper Industry for Air and Stream Improvements, Inc. (NCASI), NWF, and MUCC.

On November 19, 1984, EPA received MDNR's NPDES State pretreatment program application amendments, dated November 16, 1984, that included the proposed pretreatment rules, a revised narrative, and attachments to the program narrative on funding sources, organizational changes, position descriptions, and personnel qualifications. The revised program narrative addressed changes in the staffing and organization, the addition of a pretreatment program coordinator, utilization of available expertise within MDNR for toxicant evaluation, financial resources, and legal review of ordinances.

On December 17, 1984, Valdas V. Adamkus, Regional Administrator for EPA Region V, transmitted a letter to Ronald O. Skoog, Director of MDNR, informing MDNR of the public notice in the **Federal Register** on the reconsideration of EPA's approval of the Michigan pretreatment program, and of the public hearing to be held on January 29, 1985, in Lansing, Michigan. On December 27, 1984, the public notice appeared in the **Federal Register** (49 FR 50199 et seq.), soliciting additional comments on Michigan's pretreatment program and announcing the public hearing scheduled for January 29, 1985; that document was characterized as a Proposed Rule, but should have been classified as a Notice.

On January 3, 1985, a workload analysis was performed by the EPA Region V Office on the Michigan pretreatment program that concluded that MDNR had sufficient staff to operate the pretreatment program in Michigan.

On January 7, 1985, MDNR submitted a revised pretreatment program narrative, dated January 4, 1985, to EPA.

On January 11, 1985, the Michigan Legislative Service Bureau certified the proposed pretreatment rules' format. On January 18, 1985, the Michigan Attorney General certified the proposed pretreatment rules' legality.

On January 29, 1985, the public hearing for the reconsideration of the Michigan pretreatment program was held at the Law Building Auditorium in Lansing, Michigan. EPA formally requested additional comments on Michigan's NPDES State pretreatment program, and MDNR's ability to effectively administer this program consistent with Federal and State requirements. Thirty individuals were in attendance representing industries, municipalities, environmental groups, MDNR, and the EPA Region V Office.

Only two statements were presented before the hearing panel. Paul D. Zugger, Executive Secretary of the WRC, and Chief of MDNR's Surface Water Quality Division (SWGD), presented a statement reaffirming Michigan's commitment to the pretreatment program, and urging EPA to reapprove Michigan's pretreatment program. He also stressed that MDNR desired to be treated on an equal basis with other States in the Region, and not preferentially treated as a result of the Court Order. Mark Van Putten, on behalf of NWF and MUCC, presented a statement that noted significant positive changes in MDNR's program, and that praised Mr. Zugger for effectively turning the Michigan pretreatment program around, under the auspices of the EPA Region V Office.

He commented that NWF and MUCC were generally pleased with the significant progress that had occurred in the program. He urged EPA to continue to assist MDNR in the development of its pretreatment program, and for EPA to continue in its overview role of that program.

The public comment period closed on February 9, 1985. The only comments received by the EPA Region V Office, were from Mark Van Putten, on behalf of NWF and MUCC. His comments were dated February 8, 1985, and were received via Express Mail on February 11, 1985.

On March 13, 1985, the proposed pretreatment rules package was approved by the Michigan Joint Legislative Rules Committee. On Marcy 21, 1985, the WRC approved the proposed pretreatment rules. On March 22, 1985, the rules were transmitted to the Office of the Governor of Michigan. On March 26, 1985, the proposed pretreatment rules were filed with the Office of the Secretary of State and with the *Michigan Register.* On April 11, 1985, the proposed amendments to the WRC Part 21 Rules: *Wastewater Discharge Permits—Pretreatment Program* became effective.

B. Response to Comments Submitted

In response to the public notice in the **Federal Register** (49 FR 50199 et seq., December 27, 1984) soliciting additional comments on the reconsideration of EPA's approval of the Michigan pretreatment program, EPA received only one set of comments. The comments were from Mark Van Putten on behalf of NWF and MUCC, dated February 8, 1985, and were received at the EPA Region V Office on February 11, 1985.

The combined comments of NWF and MUCC, will be referred to as, "NWF's comment(s)".

1. Review, Analysis, and Response to NWF's Original Comments

This review, analysis, and response is based upon the NWF comments which were expressed in the following correspondence:

- Letter to Robert R. Robichaud from Mark Van Putten, dated December 30, 1982;
- Letter to Charles H. Sutfin from Mark Van Putter, dated April 26, 1983;
- Letter to Charles H. Sutfin from Mark Van Putten, dated September 2, 1983;

• Petition to the U.S. Court of Appeals for the Sixth Circuit from Mark Van Putten, dated September 5, 1983; and

• Pre-argument statement to the U.S. Court of Appeals for the Sixth Circuit from Mark Van Putten, dated September 16, 1983.

a. *Integration of Toxic Chemical Evaluation Section (TCES) Staff*—(1) *NWF's Comments:* (a) There was no formal integration of MDNR's staff with demonstrated credentials in toxicants control, into the implementation and administration of the pretreatment program.

(b) The assignment of only 1.5 full-time equivalents (FTEs) from the TCES staff to the pretreatment program, effectively isolated the MDNR staff with the demonstrated credentials for toxicant evaluation from the program. TCES's organizational role was vague, ad hoc, and advisory.

(2) *NWF's Rationale:* NWF's comments stemmed from three basis areas of concern.

(a) First, NWF felt that the reorganization of MDNR's Environmental Protection Bureau (which was effective on December 20, 1982, and which had occurred after MDNR had submitted its formal application for pretreatment program approval) had left the Michigan application vague in regard to the integration of the TCES staff into the pretreatment program, and therefore, deficient (in NWF's opinion) in terms of 40 CFR 403.10 ((f)(2) and (g)(1)(iii)) requirements.

(b) Second, NWF was looking for a formal, structured role for the TCES experts in the following areas:

• Identifying and categorizing industrial users;

• Reviewing reports for and making determinations on fundamentally different factors (FDF) variance requests;

• Monitoring compliance and deciding upon appropriate compliance follow-up activities;

• Providing technical assistance to POTWs in program development and implementation; and

• Reviewing POTW program submissions and requests for authorization to revise categorical pretreatment standards to reflect POTW removal (removal credit requests).

(c) Third, NWF was skeptical of MDNR's ability to adequately ensure protection of POTWs from interference or pass-through of toxics and MDNR's ability to protect public health, in light of the limited commitment of TCES staff to the pretreatment program.

(3) *Response by the U.S. EPA: Amendments to Application.* MDNR submitted its State NPDES pretreatment program application amendments, dated November 16, 1984, to the EPA Region V Office, which included amendments to the WRC Part 21 Rules: *Wastewater Discharge Permits—Pretreatment Program,* and a revised program narrative, dated January 4, 1985, that described the administration, implementation, review, compliance, overview, and personnel resource requirements for its pretreatment program. The revised program narrative addressed changes in the staffing and organization, the addition of a pretreatment program coordinator, utilization of available expertise within MDNR for toxicant evaluation (TCES, etc.), financial resources, and legal review of ordinances. In addition, Michigan included revised attachments to the program narrative on funding sources, organizational changes, position descriptions, and personnel qualifications. In these revised attachments, Michigan has formally assigned 1.0 FTE from the TCES staff to the pretreatment program.

The revised pretreatment program narrative clearly delineated the task responsibilities for the TCES Staff, as presented below from pages 4, 8, 9, 10, and 11, of the program narrative.

Page 4 (Task Assignments). "Toxic Chemical Evaluation Section, Environmental Services Division, is responsible to review user surveys to determine whether organic toxicants are present in sufficient quantities to warrant control in the POTW's NPDES permit.

Task Responsibilities

—Provide technical assistance to SWQ Districts in review of nondomestic user survey submittals.
—Assist SWQ Districts in the review of categorical industry baseline reports.
—Assist SWQ Districts and SWQ Permits Section in toxic chemical evaluations, including determining POTW effluent limits, sludge quality requirements, etc."

Page 8 (Integration and Coordination with TCES Staff). "The pretreatment program will be integrated with other state programs related to the control of toxics. This integration will result in a variety of cross-checks and balances among agency staff. For example, major municipal dischargers have been required by their NPDES discharge permits to sample and analyze (on a short term basis) for toxic substances of concern. These substances were chosen by staff of the Toxic Chemical Evaluation and Water Quality Surveillance Sections based on information available at the time the permit was drafted."

"Michigan law requires all industries to annually report use or production of critical materials. By having the District coordinate pretreatment activities with the Toxic Chemical Evaluation Section, better information will be available to improve compliance with the critical materials reporting requirements. This should result in a more effective toxics control program."

NB: "Critical materials" are the inorganic and organic elements or compounds which are listed in the Critical Materials Register compiled by the Michigan Water Resources Commission (Part 9, WRC Rules, promulgated under the authority of Act 245, P.A. 1929, as amended).

Page 9 (Concern for Public Health). "Our concern is to ensure that none of these toxicants pass through the POTW in sufficient quantities to create public health and water quality problems. Regulation of these pollutants is accomplished through timely modification of the POTW's NPDES permit. The NPDES permit will set discharge standards and/or monitoring requirements on the POTW."

Page 9 (Formal, Structured Role for TCES). "All program elements (requests for removal credits, master plans user surveys, legal authority, and final programs) are submitted to district offices for review and approval. These reviews are aided by guidance and checklists developed in cooperation with EPA. The Districts receive a considerable amount of assistance from the Toxic Chemical Evaluation (TCE) and Water Quality Surveillance (WQS) Sections in the review of User Surveys. These sections advise the Districts as to what organic and inorganic toxicants, respectively, are being or may be discharged at a level of concern to POTW's. This review and the determination of the resultant discharge requirements are done in accordance with Water Resources Commission Rules, particularly R 321.1057."

NB: "Level of concern" refers to the concentration arrived at by an MDNR procedure that utilizes WRC Rule 321.1057 and that evaluates the impacts of a particular toxic pollutant on public health and water quality, and whether that pollutant must be limited in the POTW'S NPDES permit.

Page 10 and 11 (Formal Structures Role for TCES): "Upon approval of a POTW's pretreatment program responsibility for determining industrial compliance with categorical pretreatment standards, will be delegated to the POTW's with the state providing program overview."

"In the interim prior to POTW program approval, SWQD Districts will be responsible for review of industrial submittals and determination of acceptability. Districts may also receive assistance in this review from Treatment Technology Unit, Water Quality Surveillance Section, Toxic Chemical Evaluation Section and Point Source Studies Section. The following categorical industrial submittals will be received and reviewed by the state, pending POTW program implementation."

A. Categorical Determination Request.

B. Baseline Reports, Progress Reports, Final Compliance Reports and Periodic Compliance Reports.

C. Notice of Slug Loading.

D. Net/Gross Calculations.

Status of Michigan Pretreatment Program. The following number are current as of April 5, 1985, for the status of Michigan's NPDES State pretreatment program:

- Total Programs Required.....110
- Master Plans Submitted.....110
- Master Plans Approved.....103
- Nondomestric User Surveys Submitted.....110
- Nondomestic user Surveys Approved.....94
- Legal Authority Documents Submitted.....108
- Legal Authority Documents Approved.....85
- Request to Implement Documents Submitted.....101
- Request to Implement Documents Approved.....83
- Total Programs Approved as of 4/5/85.....13
- Total Programs Expected to be Approved by 9/30/85.....110

The involvement of the TCES staff is minimal in the review and approval of the Request to Implement documents. The bulk of the TCES staff's review of Nondomestic User Surveys has already been accomplished. Consequently, it appears that only 16 Nondomestic User Surveys (and 25 Legal Authority documents) remain for review by the TCES staff. However, due to multi-jurisdictional issues, there may be a few cities what will need to complete the process of reviewing the Nondomestic User Surveys for some of their outlying jurisdictions, during the first two quarters of Fiscal Year 1986 (until about April, 1986). Subsequently, there will be portions of Nondomestic User Surveys for review by the TCES staff as the cities submit these surveys to MDNR for approval. Therefore, it is anticipated that the TCES staff's involvement in the review of these Nondomestic User Surveys will not be completed until the end of Fiscal Year 1986.

Indentifying and Categorizing Industrial User. EPA, in coordination with the State of Michigan, has temporarily assumed responsibility for the review of the baseline monitoring reports (BMRs). This decision was made in order to allow the State to dedicate all of its pretreatment resources towards the review and approval of pretreatment programs. Once all of the cities required to develop pretreatment programs in the State are reviewed, approved, and incorporated into NPDES permits with the appropriate conditions, the State will be in a better positions to actively track BMRs, compliance reports, etc. At a meeting with State Directors on January 9, 1985, Paul D. Zugger requesated that EPA begin transferring BMR informatoin to the State and requested a sample of EPA's tracking system, which was subsequently provided. Once the cities in Michigan become the Control Authority with responsibility for the review of BMRs, the responsibility for control of the categorical industries will be shared between MDNR and the cities with approved pretreatment programs.

MDNR has committed itself to provide adequate personnel to operate the program. This includes adequate personnel to review BMRs, a function not specifically addressed by the workload analysis performed by the EPA Region V Office.

Fundamentally Different Factors Variance Requests. The review of fundamentally different factors (FDF) variance requests for the State of Michigan is the responsibility of the EPA. Michigan does not have any rules that govern their participation in the review of FDFs. The State recognizes that they can neither deny nor approve FDF requests. On page 4 of the Michigan pretreatment program narrative, the State has offered to: "Review and comment to EPA on FDF requests received from categorical industries". Since EPA has primacy in making final determinations, the State has no mandatory review responsibilities. However, EPA has solicited MDNR's input and MDNR has agreed to provide it to EPA.

Technical Assistance of TCE and WQS Sections. The Toxic Chemical Evaluation (TCE) and Water Quality Surveillance (WQS) Sections review the Nondomestic User Surveys and develop toxicant limits that are or will be incorporated into the POTW's NPDES permits. Alternatively, the TCE and WQS Sections develop toxicant monitoring requirements that are placed into the POTW's NPDES permits in order to generate data sufficient to make informed judgements about the potential for interference or pass-through of those specified toxicants. These toxicant limitations/monitoring requirements are then taken into account when the POTWs set their local limitations that are codified in their sewer use ordinances or in the permits issued to their nondomestic users.

Explicit Procedure for Local Limitations Development. The POTWs set their own local limitations in accordance with extensive guidance provided by MDNR. The local limitations development guidance specifies an explicit procedure that must be followed for the calculation of local limits including the use of prescribed mathematical equations, established values for treatment plant interference and water quality, consideration of land application of sludge, evaluation of the actual or potential for pass-through of pollutants, and the review and evaluation of past operational problems. In addition, when the POTWs set their local limitations, they take into account the toxic pollutants identified by the TCE and WQS Sections that are incorporated into their NPDES permits as either toxicant limits or toxicant monitoring requirements.

MDNR Review of Local Limitations Development. The MDNR District Offices review the local limits developed by the POTWs and ensure that the POTWs have followed the approved guidance and have taken into account any toxicants identified by the TCE and WQS Sections.

Monitoring Compliance. In addition, MDNR has assigned 7.0 FTEs from the TCES staff to the Standards and Waste Loan Allocation Program and 2.0 FTEs from the TCES staff to the Compliance Program. Both of these programs have impacts on the pretreatment program. About 2.0 FTEs out of the 9.0 FTEs from the TCES staff assigned to these two programs work on pretreatment related projects. These activities include the following: Reviewing and, where appropriate, revising water quality standards with emphasis on the control of toxic substances; conducting bioassays/biomonitoring to develop water quality standards for toxic pollutants; and ensuring effective implementation of local pretreatment programs by initiating enforcement actions against POTWs which fail to enforce categorical standards requirements in approved local programs and/or initiating direct enforcement action against non-complying categorical industries, where appropriate.

Summary. Therefore, based upon the items listed below, we believe that: (1)

NWF's original comments regarding the integration and assignment of TCES staff into the implementation and administration of the pretreatment program is more than adequate to ensure, (a) protection of POTWs from interference of pass-through of toxics, and (b) MDNR's ability to protect public health:

- The revised pretreatment program nararative and attachments clearly delineate the task responsibilities of the TCES staff, and formally integrate TCES staff into the implementation and administration of the pretreatment program.
- Most of the program development work has already been accomplished, and only a small number of removal credit requests are expected to be received for review by MDNR involving the participation of the TCES staff.
- The responsibility for the review of BMR's has temporarily been assumed by EPA. MDNR is currently reassuming this responsibility. By the time this transfer of responsibility is completed, most of the cities required to develop pretreatment programs will have been approved. Thus, the workload of the TCES staff will not be significantly increased.
- The review of FDF variance requests for Michigan is the responsibility of the EPA. Michigan provides review comments to EPA from the SWQD Permits Section, Treatment Technology Unit. This does not directly involve the TCES staff.
- There are about 2.0 additional FTEs from the TCES staff involved in the Standards and Waste Loan Allocation, and Compliance programs that work on pretreatment related projects.

b. *Qualifications of Other MDNR Pretreatment Staff—(1) NWF's Comment:* NWF felt that MDNR had not demonstrated that "qualified personnel were available to carry out the authorities and procedures [to implement the pretreatment program]", as required by 40 CFR 403.10([f) (3) & (g) (2)]. Therefore, NWF believed that Michigan's application was deficient in terms of the requirements of 40 CFR 403.10(f) (3) "Funding", and 403.10(g) (2) "Content of State Pretreatment Program Submission."

(2) *NWF's Rationale:* This comment stemmed basically from MDNR's reorganization of the Environmental Protection Bureau, which was effective on December 20, 1982. NWF believed that Michigan's application for pretreatment program authorization was difficult to review because the administrative responsibility for the program was described in terms of the superseded administrative structure. NWF desired a demonstration of the necessary academic credentials and relevant experience of personnel assigned to the program.

(3) *Response by the U.S. EPA: Amendments to Application.* MDNR submitted its NPDES State pretreatment program application amendments, dated November 16, 1984, and a revised program narrative, dated January 4, 1985, to the EPA Region V Office that described the administration, implementation, review, compliance, overview, and personnel resource requirements for its pretreatment program. The revised program narrative addressed the changes in the staffing and organization, and the addition of a pretreatment program coordinator. In addition, Michigan included revised attachments to the program narrative with position descriptions, personnel qualifications, and revised organizational charts.

Demonstration of Qualified Personnel. In the revised attachments to the amended pretreatment program narrative, MDNR has specified the qualifications required for the various classes of its employees: Aquatic Biologists, Environmental Engineers, General Engineers, Laboratory Scientists, Soil Scientists, and Water Quality Specialists.

There are several levels within each class series that vary based upon the education required, the experience of a given employee, and the work assignment. The following are excerpts taken from the revised attachments to MDNR's NPDES State pretreatment program application amendments. These class series descriptions demonstrate the appropriateness of the specified qualifications.

Class Series Description: Aquatic Biologist. "Employees in this class series, as aquatic biologists, participate in, oversee, and direct the performance of a variety of professional biological activities designed to measure the effects of water pollution on aquatic life. Work is performed through the application of a body of knowledge related to professional aquatic appraisal methods, practices, procedures, policies and regulations, and materials and equipment of the aquatic biology service."

Class Series Description: Environmental Engineer. "Employees in this class series participate in, oversee, and direct the performance of a variety of environmental engineering activities designed to protect and improve land and water resources, occupational health and air quality in order to provide a clean and healthful environment. Work is performed through the application of a body of knowledge related to professional environmental engineering methods, practices, procedures, policies and regulations, and materials and equipment of the environmental engineering service."

Class Series Description: General Engineer. "Employees in this class series, as engineers "in-training", participate in the performance of a variety of professional engineering activities. Work is performed through the application of a body of knowledge related to professional engineering methods, practices, procedures, policies and regulations, and materials and equipment of the engineering service."

Class Series Description: Laboratory Scientist. "Employees in this class series participate in, oversee, and direct the performance of a variety of tests, analyses, and production and research activities as they relate to chemical, biochemical, and biological samples, specimens, and products. Work is performed through the application of a body of knowledge related to professional scientific laboratory methods, practices, procedures, policies and regulations, and materials and equipment of the laboratory scientist service."

Class Series Description: Soil Scientist. "Employees in this class series participate in and direct the performance of a variety of professional activities in soil science designed to survey, classify, and map soils throughout the state. Work is performed through the application of a body of knowledge related to professional methods, practices, procedures, policies and regulations, and materials and equipment of the Soil Scientist Service."

Class Series Description: Water Quality Specialist. "Employees in this class series participate in, oversee, and direct the performance of a variety of water quality activities designed to protect and improve the water resources of the state through the application of a body of knowledge related to professional environmental protection methods, practices, procedures, policies and regulations."

MDNR Staffing Figures. From EPA's detailed review of the revised attachments to the amended pretreatment program narrative, the following are approximate figures for MDNR staffing of the Environmental Services Division, the Groundwater Quality Division, and the Surface Water Quality Division. These divisions are the one most directly involved in the pretreatment program in Michigan.

Class series	Number of staff
● Aquatic Biologist	22
● Environmental Engineer	64
● General Engineer	4
● Laboratory Scientist	33
● Soil Scientist	4
● Water Quality Specialist	111

Summary. Therefore, we believe that Michigan's NPDES State pretreatment program application amendments of November 16, 1984, as revised on January 4, 1985, and the accompanying attachments have completely and fully satisfied NWF's comment that MDNR had not demonstrated that "qualified personnel were available to carry out the authorities and procedures [to implement the pretreatment program]", as required by 40 CFR 403.10(f)(3) & 40 CFR 403.10(g)(2).

c. *MDNR Environmental Protection Bureau Reorganization*—(1) *NWF's Comment:* In light of the outdated organizational structure relied upon in the Michigan application, NWF felt that EPA's approval of the program should have been delayed pending a clarification of the program responsibilities in the reorganized MDNR Environmental Protection Bureau. NWF believed that the reorganization was so significant in terms of the pretreatment program that it constituted a "changed circumstance" pursuant to 40 CFR 123.62(d) (formerly § 123.13(d)).

(2) *NWF's Rationale:* MDNR's Environmental Protection Bureau was reorganized subsequent to Michigan's submission of its application to EPA, and prior to the public comment period and EPA's approval of Michigan's request. NWF believed that the reorganization significantly altered the administrative structure of the proposed pretreatment program, but the reorganization was not reflected in Michigan's application.

NWF did not feel that the concerns it had expressed with regard to the reorgnization could be handled best through in-process changes. NWF believed that the assignment of qualified staff and the development of a viable organizational structure were critical pieces in the administration of MDNR's pretreatment program. NWF felt that the reorganization constituted a "changed circumstance" as that term is used at 40 CFR 123.62(d) (formerly § 123.13(d)). Therefore, NWF felt that EPA had erred in proceeding with its consideration of Michigan's application. As a result, NWF felt that EPA should have required a supplemental program statement which demonstrated the assignment of qualified personnel to the pretreatment program, prior to its approval of the program revision.

(3) *Response by the EPA: Reorganization Reflected in Application Amendments.* MDNR submitted its NPDES State pretreatment program application amendments, dated November 16, 1984, and a revised program narrative, dated January 4, 1985, that clarified the program responsibilities in the reorganized MDNR Environmental Protection Bureau, and demonstrated the assignment of qualified personnel to the pretreatment program. In particular, the revised program narrative addressed the changes in the staffing and organization, the addition of a pretreatment program coordinator, and the utilization of available expertise within MDNR for toxicant evaluation. In addition, the revised attachments to the program narrative included position descriptions, personnel qualifications, and revised organizational charts that were current with the reorganization of MDNR's Environmental Protection Bureau. *Please also refer to sections (III)(B)(1)(a)(3) and (III)(B)(1)(b)(3) above.*

Summary. Therefore, we believe that regardless of whether the reorganization of MDNR's Environmental Protection Bureau did or did not constitute a "changed circumstance" pursuant to 40 CFR 123.62(d), necessitating a supplemental program statement, NWF's concern has been completely and fully satisfied by MDNR's NPDES State pretreatment program application amendments, dated November 16, 1984, and as revised on January 4, 1985.

Summary of EPA's Position on NWF's Original Comments

Based upon the responses discussed above (i.e., (III)(B)(1)(a)(3), (III)(B)(1)(b)(3), and (III)(B)(1)(c)(3)), we believe that NWF's original comments have been completely and fully satisfied by MDNR's NPDES State pretreatment program application amendments, dated November 16, 1984, and as revised on January 4, 1985.

2. *Review, Analysis, and Response to NWF's Comments, Dated February 8, 1985, on the Reconsideration of EPA's Approval of Michigan's Pretreatment Program*

a. Michigan's Revised Pretreatment Rules

(1) *NWF's Comment:* NWF opposed the approval of Michigan's revised application to administer the pretreatment program unless the Michigan Joint Legislative Rules Committee approved the revised pretreatment rules package and it had been delivered to the *Michigan Register* for publication prior to the court-ordered deadline for the EPA's reconsideration of Michigan's application.

(2) *NWF's Rationale:* NWF and MUCC were represented on the advisory committee which helped MDNR draft the new administrative rules needed to implement the pretreatment program. NWF and MUCC supported these rules in comments submitted to MDNR and in testimony given before the Michigan WRC. These rules were adopted by the WRC on November 15, 1984. However, before they could take effect, these rules had to be approved by the Joint Legislative Rules Committee of the Michigan legislature.

Without these rules, MDNR did not have sufficient legal authority to implement the pretreatment program as required by 40 CFR 403.10(f)(1). Moreover, absent these rules, Michigan's revised NPDES State pretreatment program application did not contain a "complete description of procedures to administer its program in conformance with the requirements of [40 CFR 403.10(g)(1)(iii)]." For example, without these rules MDNR could not enforce pretreatment standards against industrial users, since they are not controlled by State discharge permits or existing State regulations.

(3) *Response by the EPA: Pretreatment Rules Effective.* On March 13, 1985, the proposed pretreatment rules package was approved by the Michigan Joint Legislative Rules Committee. On March 21, 1985, the WRC approved the proposed pretreatment rules. On March 22, 1985, the rules were transmitted to the Office of the Governor of Michigan. On March 26, 1985, EPA requested an extension for 40 days, until May 5, 1985, from the Sixth Circuit Court. On March 26, 1985, the proposed pretreatment rules were filed with the Office of the Secretary of State and with the *Michigan Register.* On April 11, 1985, the proposed amendments to the WRC Part 21 Rules: *Wastewater Discharge Permits—Pretreatment Program* became effective.

Summary. Therefore, we believe that NWF's concerns that the pretreatment rules become effective in a timely manner have been adequately addressed by Michigan's expeditious adoption of the pretreatment rules, which were filed with the Michigan Secretary of State on March 26, 1985, and which became fully effective on April 11, 1985.

b. "Quality Control" of Pretreatment.

(1) *Local Limits.*—(a) *NWF's Comment:* NWF urged EPA to require a stepped-up training and "quality control" program by MDNR to ensure that it had the procedures required to adequately "review and approve requests for approval of POTW pretreatment programs (40 CFR 403.10(f)(2)(vi)".

(b) *NWF's Rationale:* Where local limits are required to prevent "interference" or "pass-through", POTWs developing pretreatment programs are required to develop these limits as a prerequisite to program approval by the approval authority (40 CFR 403.5).

Based upon NWF's review of several local program submissions, NWF was concerned that MDNR staff were not requiring the generation of data sufficient to make informed judgments about the potential for interference of pass-through. In addition, NWF was concerned that MDNR District staff were not consistently requiring the submission of quantitative analyses of industrial dischargers' wastestreams or of POTWs' influent, effluent, and sludge. Finally, NWF was concerned that MDNR staff were not consistently requiring POTWs to review past operational problems and to consider the effect of their discharge on receiving water quality in evaluating the need for local limits.

Therefore, since MDNR staff must provide a uniform level of scrutiny of the adequacy of industrial user surveys, of POTW's assessment of the need for local limits, and of calculations of such limits, NWF urged the EPA to require a stepped-up training and "quality control" program by NDNR to ensure that this was accomplished.

(c) Response by the EPA:

Utilization of Checklists and Guidance. MDNR in cooperation with the EPA Region V Office, has developed an extensive series of checkists and guidance for the pretreatment program (master plan, interim elements, and request to implement). The checklists and guidance documents are utilized by MDNR staff when reviewing pretreatment program submittals. These documents ensure that all such reviews are uniform, fair, and that the programs are completely and fully in compliance with the requirements of the General Pretreatment Regulations (40 CFR 403).

MDNR Training Program. In addition, within the past year, MDNR has conducted an extensive training program which involved approximately 25 individual training sessions with the District staffs by the MDNR Central Office. These sessions included training in the review of local limitations development in accordance with the approved guidance, and the procedures as described in Michigan's NPDES State pretreatment program application amendments, dated November 16, 1984, and as revised on January 4, 1985.

Revisions to Pretreatment Program Narrative. MDNR has included in their revised pretreatment program description, narrative portions that delineate the process MDNR will follow in setting limitations at the POTW, and in ensuring that local limitations are developed by POTWs to prevent "interference" or "pass-through". Please refer to the following portions from the Michigan pretreatment program narrative.

Page 8 (Involvement of TCE and WQS Sections). "The pretreatment program will be integrated with other state programs related to the control of toxics. This integration will result in a variety of cross-checks and balances among agency staff. For example, major municipal discharges have been required by their NPDES discharge permits to sample and analyze (on a short term basis) for toxic substances of concern. These substances were chosen by staff of the Toxic Chemical Evaluation and Water Quality Surveillance Sections based on information available at the time the permit was drafted. Following a review of the analytical results, effluent concentrations are calculated for those substances that continue to be a concern. A long term sampling program may then be required or an effluent concentration limitation proposed for the discharger. The discharger is notified that the agency intends to include the effluent concentrations as effluent limitations in a future discharge permit. These concentrations would become the basis upon which industrial discharge restrictions would be based in the POTWs pretreatment ordinance. Substances found in low concentrations or absent would not be a continued concern of the agency. The substances found in significant concentrations would be limited through discharge permit modifications."

NB:"Significant concentration" refers to the concentration at which a toxic pollutant reaches a "level of concern". "Low concentration" refers to the concentration at which a toxic pollutant is below a "level of concern". Please refer to the note below on "level of concern".

"Michigan law requires all industries to annually report use of production of critical materials. By having the District coordinate pretreatment activities with the Toxic Chemical Evaluation Section, better information will be available to improve compliance with the critical materials reporting requirements. This should result in a more effective toxics control program."

NB: "Critical materials" are the inorganic and organic elements or compounds which are listed in the Critical Materials Register compiled by the Michigan Water Resources Commission (Part 9, WRC Rules, promulgated under the authority of Acts 245, P.A. 1919, as amended).

Page 9 (WRC Rule 321.1057). "All program elements (requests for removal credits, master plans, user surveys, legal authority, and final programs) are submitted to district offices for review and approval. These reviews are aided by guidance and checklists developed in cooperation with EPA. The Districts receive a considerable amount of assistance from the Toxic Chemical Evaluation (TCE) and Water Quality Surveillance (WQS) Sections in the review of User Surveys. These sections advise the Districts as to what organic and inorganic toxicants, respectively, are being or may be discharged at a level of concern to POTWs. This review and the determination of the resultant discharge requirements are done in accordance with Water Resources Commission Rules, particularly R 321.1057."

NB: "Level of concern" refers to the concentration arrived at by an MDNR procedure that utilizes WRC Rule 321.1057 and that evaluates the impacts of a particular toxic pollutant on public health and water quality, and whether that pollutant must be limited in the POTW's NPDES permit.

Page 9 (Concern for Public Health). "Our concern is to ensure that none of these toxicants pass through the POTW in sufficient quantities to create public health and water quality problems. Regulation of these pollutants is accomplished through timely modification of the POTW's NPDES permit. The NPDES permit will set discharge standards and/or monitoring requirements on the POTW."

Generation of Sufficient Data. The Toxic Chemical Evaluation (TCE) and Water Quality Surveillance (WQS) Sections review the Nondomestic User Surveys and develop toxicant limits that are or will be incorporated into the POTW's NPDES permit. Alternatively, the TCE and WQS Sections develop toxicant monitoring requirements that are placed into the POTW's NPDES permits in order to generate data sufficient to make informed judgements about the potential for interference or pass-through of those specified toxicants. These toxicant limitations/

monitoring requirements are then taken into account when the POTWs set their local limitations that are codified in their sewer use ordinances or in the permits issued to their nondomestic users.

Explicit Procedure for Local Limitations Development. The POTWs set their own local limitations in accordance with extensive guidance provided by MDNR. The local limitations development guidance specifies an explicit procedure that must be followed for the calculation of local limits including the use of prescribed mathematical equations, established values for treatment plant interference and water quality, consideration of land application of sludge, evaluation of the actual or potential for pass-through of pollutants, and the review and evaluation of past operational problems. In addition, when the POTWs set their local limitations, they take into account the toxic pollutants identified by the TCE and WQS Sections that are incorporated into their NPDES permits as either toxicant limits or toxicant monitoring requirements.

MDNR Review of Local Limitations Development. The MDNR District Offices review the local limits developed by the POTWs and ensure that the POTWs have followed the approved guidance and have taken into account any toxicants identified by the TCE and WQS Sections.

EPA Audits. The EPA Region V Office has conducted pretreatment file audits at four of the nine MDNR District Offices and has found that the State's review comments have improved in timeliness, and are reasonable, appropriate, and thorough. The resulting programs are of high quality, and contain both local limits to control industrial toxicants and monitoring requirements. The EPA Region V Office plans to audit the remaining five District Offices during the third and fourth quarters of the 1985 fiscal year in order to continue to ensure that MDNR's reviews remain satisfactory.

Summary. Therefore, based upon the information and procedures summarized below, we believe that NWF's concern regarding quality control to ensure that local limits are adequately developed to prevent pass-through and interference has been fully and completely satisfied by EPA and MDNR:

- The checklist and guidance developed for the review of local limitations development;
- The training program administered to the District Offices by the Central Office;
- The overview conducted by the Central Office in the course of the training sessions, as well as during its audits of the District staffs' work;
- The advice of applicable MDNR staff (Toxic Chemical Evaluation Section, Water Quality Surveillance Section, etc.) on what organic and inorganic toxicants are being or may be discharged at a level of concern to the POTWs;
- The utilization of WRC Rule R321.1057 in setting effluent limitations at the POTW; and
- The audits and overview of the EPA Region V Office on all phases of program development, including the development of local limitations.

(2) *Legal Authority Reviews*—(a) *NWF's Comment:* The EPA must require MDNR to develop specific procedures, either generically or on a case-by-case basis, to provide the MDNR District staff with the legal expertise needed to make an independent judgment as to the adequacy of POTWs' legal authorities. These procedures should include rulings from the Michigan Attorney General on the legal questions raised by NWF (multi-jurisdictional issues, and enforcement of categorical pretreatment standards), and the assignment of staff from the Attorney General's Office to respond to questions from the MDNR District staff.

(b) *NWF's Rationale:* The General Pretreatment Regulations require that States proposing to administer the pretreatment program must have "procedures [which] enable the Director to . . . [p]rovide . . . legal assistance to POTWs in developing pretreatment programs (40 CFR 403.10(f)(2)(ii))." Also, Approval Authorities must review POTW pretreatment programs to ensure that POTWs have sufficient legal authority to perform the tasks specified in 40 CFR 403.8(f)(1). In order to fulfill this responsibility, Approval Authorities must: (1) Determine whether a POTW has the necessary legal authorities embodied in a sewer use ordinance or where the municipality does not have the authority to enact such an ordinance, in contracts with nondomestic users; and (2) independently determine that the legal mechanism proposed by a POTW is consistent with Federal, State and local laws.

NWF had identified several recurring problems with the legality of POTWs implementing and enforcing the pretreatment program in the manner they have proposed. NWF had also raised questions about the legality of specific pretreatment program submissions. NWF's concern was that these legal questions would not be resolved until a POTW attempted to enforce its program.

(c) *Response by the EPA: Utilization of Guidance.* MDNR independently reviews POTWs' ordinances and contracts through the utilization of guidance in order to determine whether those ordinances and contracts contain the necessary legal authority, are consistent with Federal and State laws, and are complete. MDNR has committed itself to ensure that this guidance is consistent with Federal requirements and the NPDES State pretreatment program application amendments, dated November 16, 1984, and the revised pretreatment program narrative, dated January 4, 1985.

MDNR Training Program. In addition, within the past year, MDNR has conducted an extensive training program which involved approximately 25 individual training sessions with the District staffs by the MDNR Central Office. These sessions included training in legal authority reviews in accordance with the approved guidance, and the procedures as described in Michigan's NPDES State pretreatment program application amendments, dated November 16, 1984, and as revised on January 4, 1985.

Utilization of EPA Contractor Assistance. The EPA Region V Office has provided contract assistance to MDNR in the review of draft sewer use ordinances, legal authority statements, contracts, agreements, and other pertinent legal documents, in order to ensure that the POTWs have the necessary legal authority to operate the pretreatment program.

Revisions to Program Narrative. MDNR has included specially redrafted sections to their amended NPDES State pretreatment program application narrative that address NWF's comments on the legal authority reviews (in particular Section III, *Program Implementation*, (a) Legal Assistance; and Section IV, *Review of POTW Programs).*

Page 7 (Involvement of Environmental Enforcement Division and Michigan Attorney General). "The PPC [Pretreatment Program Coordinator] will provide general guidance to POTWs in terms of providing copies of available regulations and guidance documents. Specific guidance and regulations interpretation will be provided to POTWs upon request on a case-by-case basis. These requests will be coordinated through the PPC, who will contact the Environmental Enforcement Division, Attorney General, or other legal support to obtain the desired confirmation."

Page 9 (Utilization of EPA Assistance and Guidance). "The Michigan

Department of Natural Resources (MDNR) has received the assistance of the U.S. EPA in the review of draft sewer use ordinances from POTW's required to develop pretreatment programs. This review is made consistent with guidance developed jointly by the U.S. EPA and the MDNR. The review guidance has been prepared in accordance with 40 CFR 403.8(f) and requires a determination that the proposed ordinance contains all of the necessary elements as set forth in that regulation. This guidance is incorporated into these procedures and is made applicable to these reviews."

MDNR has committed itself to ensure that this guidance is consistent with Federal requirements and the NPDES State pretreatment program application amendments, dated November 16, 1984, and the revised pretreatment program narrative, dated January 4, 1985.

Page 10 (Independent Authority Review). "This review includes an independent review that the POTW has the authority to carry out the program and to administer the authorities that are required to be incorporated into the POTW's ordinance by virtue of 40 CFR 403.8(f). Unless MDNR determines that the required proposed ordinance, as applied by the review guidance, and that the POTW's attorney certification fully addresses the POTW's ability to carry out and administer the programs described by 40 CFR 403, MDNR shall not approve the POTW's pretreatment program."

EPA Audits and Overview. The EPA Region V Office, through audits and continuing reviews of the MDNR District Offices, has found that the State's reviews of legal authority are consistent with the established procedures, and are in accordance with 40 CFR 403.10(f)(1) and (f)(2). The EPA Region V Office plans to continue its reviews and audits during the third and fourth quarters of the 1985 fiscal year to ensure that MDNR's reviews remain satisfactory.

Summary. Therefore, based upon the following items summarized below, we believe that this comment by NWF that MDNR must develop specific procedures to provide the District staff with the legal expertise necessary to make an independent judgment as to the adequacy of POTW's legal authorities, has been fully and completely satisfied by EPA and MDNR:

- The guidance developed for the review of legal authority and sewer use ordinances;
- The training program administered to the District Offices by the Central Office.
- The overview conducted by the Central Office in the course of the training sessions, as well as during its audits of the District staffs' work;
- The utilization of the EPA contractor for technical reviews of legal authority statements, sewer use ordinances, contracts, agreements, and other pertinent legal documents;
- The revisions to the pretreatment program narrative (as cited above);
- The involvement of the Environmental Enforcement Division and the Michigan Attorney General's Office in legal opinions and determinations; and
- The audits and overview by the EPA Region V Office on all phases of the legal authority reviews.

c. *Modifying POTW's NPDES Permits to Incorporate Pretreatment Conditions*

(1) *NWF's Comment:* Michigan's revised application to administer the pretreatment program must be accompanied by a revision to the 1985 water program plan to require prompt modification of municipal NPDES permits to incorporate approved pretreatment programs. These modifications should be presented to the WRC within 60 days of the approval of the pretreatment programs.

(2) *NWE's Rationale:* The General Pretreatment Regulations require that NPDES permits issued to POTW's developing pretreatment programs must provide that the permit will be "promptly modified or, alternatively, revoked and reissued . . . to incorporate into the POTW's permit an approved POTW pretreatment program. . . ." (40 CFR 403.10(d)(1)).

NWF did not believe that modification of significant municipal permits tb incorporate approved pretreatment programs should await elimination of the backlog of expired discharge permits that MDNR has committed to be reissued in 1985. NWF was particularly concerned that municipal dischargers such as the Cities of Detroit, Grand Rapids, and Kalamazoo have their permits promptly modified to ensure that approved pretreatment programs are properly implemented. Until program requirements become enforceable permit conditions, the enforcement options available to EPA, MDNR, and interested citizens may be limited.

(3) *Response by the EPA:*

Fiscal Year 1985 Water Pollution Control Program Plan. We believe that this comment by NWF has been addressed by the EPA Region V Office in the MDNR, Surface Water Quality Division, Management Strategy and Water Pollution Program Plan for Fiscal Year 1985 (commonly referred to as the "Fiscal Year Water Pollution Control Program Plan"). This program plan describes the activities that the State will carry out for water pollution control during the fiscal year, and the staff years, and resources allocated to these activities. These activities are mutually agreed to by both EPA and MDNR, and include MDNR's management objectives for implementing the pretreatment program.

National Goal and Regional priority. It is a National goal and a Regional Priority to get all local pretreatment programs approved and to have the approved programs incorporated into NPDES permits by September 30, 1985. This goal was reiterated by Charles H. Sutfin, Director of the EPA Region V Water Division, at the December 20, 1984, meeting of the WRC. Mr. Sutfin stressed the fact that the NPDES permits must be modified to include approved pretreatment programs this fiscal year (1985).

MDNR has committed itself to this National goal and Regional priority in their management objective "PE–2" on page 22 of the "Surface Water Quality Division, Fiscal Year 1985, Management Strategy and Water Pollution Program Plan".

"PE–2. Approve local pretreatment programs. Complete review of local pretreatment programs, incorporate approved pretreatment programs into municipal permits and ensure development, adoption and implementation of adequate programs."

Incorporation of Approved Pretreatment Program Into POTW's NPDES Permit. In addition, as stated on page 10 of Michigan's NPDES State pretreatment program application narrative, dated January 4, 1985, MDNR has committed to: "As quickly as possible * * * incorporate[d] [the approved pretreatment program] into the POTW's NPDES permit. If the Pretreatment Program is approved with any conditions, these conditions will also become enforceable requirements of the POTW's NPDES permit."

Approved Pretreatment Program Permit Language. The general pretreatment program language that will be incorporated into POTW permits by MDNR, once a pretreatment program is approved, will cover the following five areas: (1) The general pretreatment program goals; (2) specific language prohibiting changes to the program without prior approval; (3) provisions for record retention; (4) reporting requirements for the POTWs; and (5) a schedule for the completion of specific

programmatic tasks in implementing the pretreatment program.

Opportunity for Public Comment. We feel that the proper forum for discussing this and similar such concerns is during the opportunity provided by MDNR to comments on the Fiscal Year Water Pollution Control Program Plan. We feel that NWF is asking us to do more than our regulations require. 40 CFR 403.10(d)(1) states that, "* * * such Permits be promptly modified or, alternatively, revoked and reissued * * * to incorporate into the POTW's Permit an approved POTW Pretreatment Program * * *" There is no time requirement to modify the permit within 60 days of the program approval.

Summary. Therefore, we believe that: (1) This comment by NWF that modifications to municipal NPDES permits be presented to the WRC within 60 days of the approval of the pretreatment program, asks the Agency to go beyond the requirements of the regulations, in particular 40 CFR 403.10(d) (1); and (2) this comment has been adequately responded to and has been completely and fully satisfied with the present National goal and Regional priority of this Agency, and by MDNR's management objective (PE–2) and plan for incorporating approved POTW pretreatment programs into permits, which we believe is adequate and consistent with the applicable Federal requirements.

Summary and Conclusion. Based upon EPA's review of the Michigan NPDES State pretreatment program application amendments and the actions taken and programmatic overview conducted by the MDNR and EPA Region V staffs, as described in this notice, we believe that:

(1) NWF's original comments on the Michigan application to administer the pretreatment program have been fully and completely satisfied by the MDNR NPDES State pretreatment program application amendments, dated November 16, 1984, and as revised on January 4, 1985.

(2) NWF's comments of February 8, 1985, have been completely and fully satisfied by the MDNR NPDES State pretreatment program application amendments, dated November 16, 1984, and as revised on January 4, 1985, and by the actions and programmatic overview of the MDNR and EPA Region V staffs, as previously described in this notice.

Federal Register Notice of Approval of State NPDES Programs or Modifications

EPA will provide **Federal Register** notice of any action by the Agency approving or modifying a State NPDES program. The following table will provide the public with an up-to-date list of the status of NPDES permitting authority throughout the country.

STATES NPDES PROGRAM STATUS

	Approved State permit program	Approved to regulate Federal Facilities	Approved State pretreatment

VI. Review Under Executive Order 12291 and the Regulatory Flexibility Act

The Office of Management and Budget has exempted this action from the OMB review requirements of Executive Order 12291 pursuant to section 8(b) of that Order.

Pursuant to section 605(d) of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), I certify that this State pretreatment program approval will not have a significant impact on a substantial number of small entities. Approval of the Michigan NPDES State pretreatment program established no new substantive requirements, but merely transfers responsibility for administration of the program from EPA to the State.

Dated: April 16, 1985.

Robert Springer,

Deputy Planning and Management Division.

BILLING CODE 6560-50-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Cooperative Agreements; Study of Transmission of Human T-Lymphotropic Virus Type III (HTLV–III) From Infected Mothers to Their Infants; Availability of Funds for Fiscal Year 1985

The Centers for Disease Control (CDC) announces the availability of funds in Fiscal Year 1985 for cooperative agreements for collaborative studies of the transmission of HTLV–III from infected mothers to their infants. This program is authorized by section 301(a) of the Public Health Service Act (42 U.S.C. 241(a)), as amended. The catalog of Federal Domestic Assistance Number is 13.118.

The objectives of this program are as follows:

1. To determine the frequency of and risk factors for transmission of HTLV–III to infants born to infected mothers including those with Acquired Immunodeficiency Syndrome (AIDS), AIDS-related complex (ARC), or who are asymptomatic and seropositive for the virus.

2. To determine the frequency of an risk factors for clinically-evident illness attributable to infection with HTLV–III in the infected infants. Because many of the signs and symptoms associated with AIDS are quite nonspecific in the pediatric population (e.g., lymphadenopathy, failure-to-thrive), infants of both seropositive and seronegative women, matched for confounding factors, would need to be followed.

3. To determine possible modes of transmission from mother to infant and the frequency with which these occur. To meet this objective, infants would need to be tested at birth and at varying intervals thereafter.

4. To determine the effects of pregnancy and HTLV–III infection on immune function by comparing the immune status of infected women before and after pregnancy.

The collaborative and programmatic involvement of the recipient(s) of funds and CDC is as follows:

1. *Recipient(s) Activities.*

a. Design and conduct a study of the transmission of HTLV–III from infected mothers to their infants.

b. Identify, enroll, and follow a group of pregnant women and their infants.

c. Interview, provide physical examinations, and obtain biological specimens from all study participants.

d. Design and establish a data management system for the study.

e. Analyze and publish study results.

f. Provide or arrange for counselling for participants based on the findings of the study.

2. *Centers for Disease Control Activities.*

a. Assist in the development of the study protocol and the design of the interview instrument, including training and pretesting as necessary by individual applicants.

b. Perform all or a portion of the laboratory studies.

c. Assist in designing a data management system.

d. Assist in data analysis and in the presentation and publication of study findings.

Progress reports of cooperative agreement activities will be submitted by the recipient(s) of the funds quarterly for the first year and semiannually thereafter. Financial status reports are required no later than 90 days after the end of each budget period. Final financial status and progress reports are required 90 days after the end of a project period.

Approximately $500,000 will be available to fund 1–2 cooperative agreements for one year. Applications should be submitted for a 1-year budget period and 2-year project period. Continuation awards within the project period will be made by CDC on the basis of satisfactory progress in meeting project objectives and on the availability of funds. Funding estimates outlined above may vary and are subject to change due to budgetary uncertainties. Cooperative agreement funds may be used to support personnel and to purchase supplies and services directly related to conducting a study of pregnant women and their infants. Funds may not be used to support construction or renovation costs.

Eligible applicants are the official public health agencies of State, city, county, city-county, district and territorial governments, and other public and private organizations which are able to enroll and follow HTLV–III seropositive and seronegative pregnant women and their infants.

Evaluation and ranking of applications will be based on the following factors:

1. The ability of the applicant to enroll and follow approximately 200 pregnant women and their infants. It is estimated that a sample size of approximately 100 seropositive and 100 seronegative pregnant women is needed to determine certain pregnancy and infant outcomes with confidence. Although women of any risk groups would be acceptable (e.g., women who abuse intravenous drugs, women of Haitian origin), it is preferable that both the seropositive and seronegative cohorts be homogenous with respect to risk factor or at least matched for risk group proportions.

2. The details of how the applicant plans to develop and implement a study of infected women and their infants describing how both infected and noninfected women will be identified, enrolled, and followed.

3. The applicant's understanding of the study objectives and the purpose of the cooperative agreement.

4. The applicant's current activities in HTLV–III research and their relationship with other investigators in the area who may participate in the project.

5. The size, qualifications, and time allocation of the proposed staff and the availability of facilities to be used during the study.

6. How the project will be administered.

7. A proposed schedule for accomplishing the activities of the cooperative agreement including time frames.

Applications must include a narrative which summarizes:

1. The background and need for project support, including information that relates to factors by which the applications will be evaluated.

2. The objectives of the proposed project which are consistent with the purpose of the cooperative agreement and which are measurable and timephased.

3. The methods which will be used to accomplish the objectives. [Of special importance will be the methods used to identify, contact, schedule for interview, and collect biologic specimens from mothers and their infants.]

4. The methods which will be used to evaluate the success of study components.

5. Fiscal information pursuant to utilization of awarded funds in a manner consistent with the purpose and objectives of the project.

6. Any other information that will support the request for assistance.

The original and one copy of the application must be submitted to Leo A. Sanders, Chief, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE, Room 321, Atlanta, Georgia 30305, on or before 4:30 pm (e.d.t.) on June 24, 1985.

Applications shall be considered as meeting the deadline if they are either:

1. Received on or before the deadline date, or

2. Sent on or before the deadline date and received in time for submission to the independent review group. (Applicants should request a legibly-dated U.S. Postal Service postmark or obtain a legibly-dated receipt from a commercial carrier or U.S. Postal service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

3. Late Applications—applications which do not meet the criteria in either paragraph 1. or 2. immediately above are considered late applications and will not be considered in the current competition.

Applications are not subject to the review requirements of the National Health Planning and Resource Development Act of 1974, as amended, nor to intergovernmental review pursuant to Executive Order 12372.

Information on application procedures, copies of application forms, and other material may be obtained from Nancy Bridger, Grants Managements Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE, Room 321, Atlanta, Goergia 30305, or by calling (404) 262–6575 or FTS 236–6575. Technical assistance may be obtained from Martha Rogers, M.D., and Harold W. Jaffe, M.D., AIDS Activity, Center for Infectious Diseases, Centers for Disease Control, Atlanta, Georgia 30333, telephone (404) 329–3162 or FTS 236–3162.

Dated: April 23, 1985.

William E. Muldoon,

Director, Office of Program Support, Centers for Disease Control.

BILLING CODE 4160–18–M

Food and Drug Administration

[Docket No. 85P–0152]

Canned Collards, Mustard Greens, Spinach, Turnip Greens, and Turnip Greens with Turnips Deviating From Identity Standards; Temporary Permit for Market Testing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a temporary permit has been issued to the Allen Canning Co. and Heekin Can, Inc., to market test experimental packs of canned collards, mustard greens, spinach, turnip greens, and turnip greens with diced turnips containing added zinc chloride. The purpose of the temporary permit is to

allow the applicant to measure consumer acceptance of the food.

DATES: The permit is effective for 15 months, beginning on the date the test product is introduced or caused to be introduced into interstate commerce, but no later than July 25, 1985.

FOR FURTHER INFORMATION CONTACT: F. Leo Kauffman, Center for Food Safety and Applied Nutrition (HFF–214), Food and Drug Administration, 200 C Street SW., Washington, DC. 20204, 202–485–0107.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 130.17 concerning temporary permits to facilitate market testing of foods deviating from the requirements of a standard of identity promulgated under section 401 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 341), FDA is giving notice that a temporary permit has been issued to the Allen Canning Co., 305 East Main St., P.O. Box 250, Siloam Springs, AR 72761, and Heekin Can, Inc., 11310 Cornell Park Dr., Cincinnati, OH 45242.

The permit covers limited interstate marketing tests of experimental packs of canned collards, mustard greens, spinach, turnip greens, and turnip greens with diced turnips. The test products deviate from the standards of identity for canned collards, mustard greens, spinach, turnip greens, and turnips prescribed in 21 CFR 155.200 (certain other canned vegetables) in that they will contain added zinc chloride in an amount reasonably necessary to retain the green color of the product (up to 75 parts per million of zinc in the finished food). The test product meets all requirements of § 155.200, with the exception of the variation.

The permit provides for the temporary marketing of 5,000 cases each of twenty-four number 303 cans and of six number 603 cans of chopped collards, chopped mustard greens, chopped turnip greens, and chopped turnip greens with diced turnips. The permit also provides for the temporary marketing of 10,000 cases of twenty-four number 300 cans and 10,000 cases of six number 603 cans of spinach. The experimental packs of the test products will be distributed in the contiguous 48 States. The test product is to be manufactured at the Allen Canning Co. plants located in Alma, AR 72921, Johnson, AR 72741, Lowell, AR 72745, Siloam Springs, AR 72761, Springdale, AR 72764, and Van Buren, AR 72956.

The principal display panels of the labels state the product names as "Chopped Collard Greens," "Chopped Mustard Greens," "Chopped Turnip Greens," "Chopped Turnip Greens with Diced Turnips," and "Spinach."

Each of the ingredients used is stated on the label as required by the applicable sections of 21 CFR Part 101. The permit is effective for 15 months, beginning on the date the test product is introduced or caused to be introduced into interstate commerce, but no later than July 25, 1985.

Dated: April 19, 1985.

Sanford A. Miller,

Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 85–10090 Filed 4–25–85; 8:45 am]

BILLING CODE 4160–01–M

[Docket No. 85P–0150]

Food for Human Consumption; Enriched Bread Deviating From Identity Standard; Temporary Permit for Market Testing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a temporary permit has been issued to the American Bakeries Co. to market test a bread enriched to the nutrient levels recommended by the National Academy of Sciences, Food and Nutrition Board (FNB), in 1974 (with the exception that iron will remain at the level required by the standard of identity for enriched bread). The purpose of the temporary permit is to allow the applicant to measure consumer acceptance of the food.

DATES: This permit is effective for 15 months, beginning on the date the food is introduced or caused to be introduced into interstate commerce, but no later than July 25, 1985.

FOR FURTHER INFORMATION CONTACT: F. Leo Kauffman, Center for Food Safety and Applied Nutrition (NFF–214), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–485–0107.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 130.17 concerning temporary permits to facilitate market testing of foods deviating from the requirements of a standard of identity promulgated under section 401 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 341), FDA is giving notice that a temporary permit has been issued to the American Bakeries Co., 100 Park Ave., New York, NY 10017.

The permit covers limited interstate marketing tests of enriched special formula bread. The test product deviates from the standard of identity for enriched bread (21 CFR 136.115) in that it will contain in each 2-slice (approximately 2 ounces) serving: (1) 6 percent of the U.S. Recommended Daily Allowance (RDA) of vitamin A, (2) 8 percent of U.S. RDA of vitamin B–6, (3) 8 percent of the U.S. RDA of folic acid, (4) 6 percent of the U.S. RDA of magnesium, and (5) 6 percent of the U.S. RDA of zinc. The test product meets all requirements of § 136.115, with the exception of these deviations.

The permit provides for the temporary marketing of 50,000,000 pounds of the product. The test product is to be manufactured at the American Bakeries Co. plants located in Flushing, NY 11355, and Detroit, MI 48210. The test product will be distributed in the States of Connecticut, Michigan, New Jersey, Ohio, and Pennsylvania.

The principal display panel of the lable states the product name as "enriched special formula bread," and each of the ingredients used is stated on the label as required by the applicable sections of 21 CFR Part 101. A side-by-side comparison of the percentage of U.S. RDA's for nutrients in the test product and in regular enriched bread is shown on the label for the applicable nutrients. This permit is effective for 15 months, beginning on the date the test product is introduced or caused to be introduced into interstate commerce, but no later than July 25, 1985.

Dated: April 19, 1985.

Sanford A. Miller,

Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160–01–M

[Docket No. 84G–0095]

Miles Laboratories, Inc.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Miles Laboratories, Inc., has filed a petition proposing that the food additive regulations be amended to provide for the safe use of a polyamine-epichlorohydrin resin and glutaraldehyde, together, as fixing agents for immobilizing glucose isomerase enzyme in the production of high fructose corn syrup.

FOR FURTHER INFORMATION CONTACT: Leonard C. Gosule, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–426–9463.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 4B3806) has been filed by Miles Laboratories, Inc., Elkhart, IN 46515, proposing that § 173.357 *Materials used as fixing agents in the immobilization of enzyme preparations* (21 CFR 173.357) be amended to provide for the safe use of a polyamine-epichlorohydrin resin and glutaraldehyde, together, as fixing agents in the immobilization of glucose isomerase enzyme preparations for use in the manufacture of high fructose corn syrup.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c) (proposed December 11, 1979; 44 FR 71742).

Dated: April 18, 1985.

Sanford A. Miller,

Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160-01-M

National Institutes of Health

Division of Research Grants; Meetings

Pursuant to Pub. L. 92-463, notice is hereby given of the meetings of the following study sections for May through June 1985, and the individuals from whom summaries of meetings and rosters of committee members may be obtained.

These meetings will be open to the public to discuss administrative details relating to study section business for approximately one hour at the beginning of the first session of the first day of the meeting. Attendance by the public will be limited to space available. These meetings will be closed thereafter in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Grants Inquiries Office, Division of Research Grants, Westwood Building, National Institutes of Health, Bethesda, Maryland 20205, telephone 301-496-7441 will furnish summaries of the meetings and rosters of committee members. Substantive program information may be obtained from each executive secretary whose name, room number, and telephone number are listed below each study section. Since it is necessary to schedule study section meetings months in advance, it is suggested that anyone planning to attend a meeting contact the executive secretary to confirm the exact date, time and location. All times are A.M. unless otherwise specified.

Study section	May-June 1985 meetings	Time	Location
Allergy & Immunology, Dr. Eugene Zimmerman, Rm. 320, Tel. 301-496-7380.	June 13-15	8:30	Ramada Inn, Bethesda, MD
Bactenology & Mycology-1, Dr. Milton Gordon, Rm. 304, Tel. 301-496-7340.	June 12-14	8:30	Holiday Inn, Georgetown, DC
Bactenology & Mycology-2, Dr. William Branche, Jr., Rm. 306, Tel. 301-496-7681.	June 5-7	8:30	Holiday Inn, Georgetown, DC
Behavioral Medicine, Dr. Joan Rittenhouse, Rm. 232, Tel. 301-496-7109.	June 12-14	9:00	Georgetown Hotel, Washington, DC
Biochemical Endocrinology, Dr. Norman Gold, Rm. 226, Tel. 301-496-7430.	June 3-6	8:30	Holiday Inn, Bethesda, MD.
Biochemistry-1, Dr. Adolphus P. Toliver, Rm. 318B, Tel. 301-496-7516.	June 17-19	8:30	Georgetown Hotel, Washington, DC.
Biochemistry-2, Dr. Alex Liacouras, Rm. 318A, Tel. 301-496-7517	June 27-29	8:30	Linden Hill Hotel, Bethesda, MD
Bio-Organic & Natural Products Chemistry, Dr. Michael Rogers, Rm. A-27, Tel. 301-496-7107.	June 20-22	9:00	Holiday Inn, Golden Gateway, San Francisco, CA.
Biophysical Chemistry, Dr. John B. Wolff, Rm. 236B, Tel. 301-496-7070.	June 13-15	8:30	Room 8, Bldg. 31C, Bethesda, MD.
Bio-Psychology, Dr. A. Keith Murray, Rm. 220, Tel. 301-496-7058.	June 10-14	9.00	Ramada Inn, Bethesda, MD.
Cardiovascular & Pulmonary, Dr. Anthony C. Chung, Rm. 2A-04, Tel. 301-496-7316.	June 12-14	8:30	Linden Hill Hotel, Bethesda, MD
Cardiovascular & Renal, Dr. Rosemary Morris, Rm. 321, Tel. 301-496-7901.	June 17-19	8:30	Holiday Inn, Bethesda, MD.
Cellular Biology and Physiology-1, Dr. Gerald Greenhouse, Rm. 336, Tel. 301-496-7396.	June 12-14	8:30	Room 4, Bldg. 31A, Bethesda, MD
Cellular Biology and Physiology-2, Dr. Evelyn Horenstein, Rm. 306, Tel. 301-496-7681.	June 24-26	8:30	Linden Hill Hotel, Bethesda, MD
Chemical Pathology, Dr. Edmund Copeland, Rm. 353, Tel. 301-496-7078.	June 19-21	8:30	Keystone Intern'l. Resort, Keystone, CO.
Diagnostic Radiology, Dr. Catharine Wingate, Rm. 219B, Tel. 301-496-7650.	June 19-21	8:30	Linden Hill Hotel, Bethesda, MD.
Endocrinology, Dr. Harry Brodie, Rm. 333, Tel. 301-496-7346.	June 16-18	12:00 noon	Holiday Inn, Inner Harbor, Baltimore, MD
Epidemiology & Disease Control-1, Dr. Phyllis B. Eveleth, Rm. 203C, Tel. 301-496-7246.	June 4-6	8:30	Linden Hill Hotel, Bethesda, MD
Epidemiology & Disease Control-2, Dr. Ann Schluederberg, Rm. 203B, Tel. 301-496-7246.	June 4-6	8:30	Linden Hill Hotel, Bethesda, MD
Experimental Cardiovascular Sciences, Dr. Richard Peabody, Rm. 234, Tel. 301-496-7940.	June 25-27	8:00	Ramada Inn, Bethesda, MD.
Experimental Immunology, Dr. David Lavrin, Rm. 222B, Tel. 301-496-7238.	June 12-14	9:00	Holiday Inn, Chevy Chase, MD
Experimental Therapeutics, Dr. Morris Kelsey, Rm. 221, Tel. 301-496-7597.	June 12-14	8:30	Holiday Inn, Bethesda, MD.
Experimental Virology, Dr. Garrett V. Keefer, Rm. 206, Tel. 301-496-7474.	June 10-12	8:30	Room 8, Bldg. 31C, Bethesda, MD
General Medicine A-1, Dr. Harold Davidson, Rm. 354A, Tel. 301-496-7797.	June 12-14	8:30	Room 10, Bldg. 31C, Bethesda, MD
General Medicine A-2, Dr. Donna J. Dean, Rm. 354B, Tel. 301-496-7140.	June 19-21	8:30	Room 6, Bldg. 31C, Bethesda, MD.
General Medicine B, Dr. Antonia Novello, Rm. 322, Tel. 301-496-7730.	June 4-6	8.30	Holiday Inn, Georgetown, DC
Genetics, Dr. David Remondini, Rm. 349, Tel. 301-496-7271.	June 13-15	9.00	Room 6, Bldg. 31C, Bethesda, MD.
Hearing Research, Dr. Joseph Kimm, Rm. 225, Tel. 301-496-7494.	June 12-14	8:30	Georgetown Hotel, Washington, DC
Hematology-1, Dr. Clark Lum, Rm. 355A, Tel. 301-496-7508.	June 13-15	8:00	Wellington Hotel, Washington, DC
Hematology-2, Dr. Bruce Maurer, Rm. 355B, Tel. 301-496-7508.	June 12-14	8:00	Holiday Inn, Georgetown, DC
Human Development & Aging-1, Dr. Teresa Levitin, Rm. 303, Tel. 301-496-7025.	June 19-21	9:00	Georgetown Hotel, Washington, DC
Human Development & Aging-2, Dr. Samuel Rawlings, Rm. 305, Tel. 301-496-7640	June 26-28	9:00	Holiday Inn, Georgetown, DC

BILLING CODE 4140–01–M

Division of Research Resources; Subcommittee on Animal Resources of the Animal Resources Review Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Subcommittee on Animal Resources, Animal Resources Review Committee, Division of Research Resources, on May 21, 1985, at 8:30 a.m., National Institutes of Health, Building 31, Conference Room 8, 9000 Rockville Pike, Bethesda, Maryland 20205.

The meeting will be open to the public on May 21, from 2:00 p.m. to approximately 4:00 p.m., for a brief staff presentation on the current status of the Animal Resources Program and the selection of future meeting dates. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on May 21 from 8:30 a.m. to approximately 2:00 p.m. for the review, discussion, and evaluation of individual grant applications submitted to the Laboratory Animal Sciences Program. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Information Officer, Division of Research Resources, National Institutes of Health, Building 31, Room 5B13, Bethesda, Maryland 20205, (301) 496–5545, will provide summaries of the meeting and rosters of the committee members. Dr. Carl E. Miller, Executive Secretary of the Animal Resources Review Committee, Division of Research Resources, National Institutes of Health, Building 31, Room 5B55, Bethesda, Maryland 20205, (301) 496–5175, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Programs No. 13.306, Laboratory Animal Sciences, National Institutes of Health)

Dated: April 16, 1985.

Betty J. Beveridge,

NIH Committee Management Officer.

[FR Doc. 85–10099 Filed 4–25–85; 8:45 am]

BILLING CODE 4140–01–M

National Cancer Institute; Board of Scientific Counselors, Division of Cancer Prevention and Control; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, Division of Cancer Prevention and Control, National Cancer Institute, National Institutes of Health, May 9–10, 1985, Wilson Hall, Building 1, 9000 Rockville Pike, Bethesda, Maryland 20205. This meeting will be open to the public on May 9, from 8:30 a.m. to 3:00 p.m. and on May 10 from 8:30 a.m. to adjournment to review programs and policies of the Division of Cancer Prevention and Control. Attendance by the public will be limited to space available.

In accordance with provisions set forth in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, a portion of the meeting will be closed to the public on May 9 from approximately 3:00 p.m. to recess for review, discussion and recommendations regarding the disposition of a cooperative agreement project. The discussion regarding the process of the review and subsequent recommendations could reveal personal information concerning individuals associated with the project, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20205 (301–496–5708) will provide summaries of the meeting and rosters of committee members upon request.

Mr. J. Henry Montes, Executive Secretary, Board of Scientific Counselors, Division of Cancer Prevention and Control, National Cancer Institute, Blair Building, Room 1A07, National Institutes of Health, Bethesda, Maryland 20205 (Telephone: 301–427–8630) will furnish substantive program information.

Dated: April 17, 1985.

Betty J. Beveridge,

Committee Management Officer, NIH.

[FR Doc. 85–10104 Filed 4–25–85; 8:45 am]

BILLING CODE 4140–01–M

National Cancer Institute; National Cancer Advisory Board and Board Subcommittees; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Cancer Advisory Board, May 13–15, 1985, National Cancer Institute, Building 31C, Conference Room 6, 6th floor, National Institutes of Health, Bethesda, Maryland 20205. Meetings of Subcommittees of the Board will be held May 12–14 at the times and places listed below. Portions of the Board meeting and its Subcommittees will be open to the public to discuss committee business as indicated in the notice. Attendance by the public will be limited to space available.

Portions of these meetings will be closed to the public as indicated below in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, NCI, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20205 (301/496–5708) will provide summaries of the meetings and rosters of Board members, upon request.

Mrs. Barabara S. Bynum, Executive Secretary, National Cancer Advisory Board, National Cancer Institute, Building 31, Room 10A03, National Institutes of Health, Bethesda, Maryland 20205 (301/496–5147) will furnish substantive program information.

Name of committee: *National Cancer Advisory Board.*

Dates of meeting: May 13–15, 1985.

Place of meeting: Building 31C, Conference Room 6, 6th floor, National Institutes of Health.

Open: May 13, 8:30 a.m.–recess, May 15, 8:30 a.m.–adjournment.

Agenda: Reports on activities of the President's Cancer Panel and the Director's Report on the National Cancer Institute: Presentation on NIH Peer Review, and a Presentation on NCI Centers Programs; Subcommittee Reports and New Business.

Closed session: May 14, 8:30 a.m.–recess.

Closure reason: To review grant applications.

Name of committee: *Subcommittee on Organ Systems.*

Date of meeting: May 12, 1985.

Place of meeting: Building 31, C Wing, Conference Room 8, Sixth Floor, National Institutes of Health.

Open: May 12, 7:00 p.m.–adjournment.

Agenda: A discussion on the update of the organ systems program.

Name of committee: *Ad hoc Subcommittee on Construction.*

Dated of meeting: May 13, 1985.

Place of meeting: Building 31, C Wing, Conference Room 6, 6th Floor, National Institutes of Health.

Closed: May 13, 5:00 p.m.–adjournment.

Closure reason: To review grant applications.

Name of committee: *Subcommittee on Special Actions for Grants.*

Date of meeting: May 14, 1985.

Place of meeting: Building 31, C Wing, Conference Room 6, 6th Floor, National Institutes of Health.

Closed: May 14, 8:30 a.m.–adjournment.

Closure reason: To review grant applications.

Name of committee: *Subcommittee on Cancer Control for the Year 2000.*

Date of meeting: May 14, 1985.

Place of meeting: Building 31, C Wing, Conference Room 2, 1st Floor, National Institutes of Health.

Open: May 14, 5:00 p.m.–adjournment.

Agenda: To review the report on cancer control for the Year 2000 and tax subsidies on tobacco.

Name of committee: *Subcommittee on Cancer Information.*

Date of meeting: May 14, 1985.

Place of meeting: Building 31, C Wing, Conference Room 6, Sixth Floor, National Institutes of Health.

Open: May 14, 7:30 p.m.–adjournment.

Agenda: A discussion of the cancer information program.

Name of committee: *Subcommittee on Innovations in Surgical Oncology.*

Date of meeting: May 14, 1985.

Place of meeting: Building 31, A Wing, Conference Room 4, 1st Floor, National Institutes of Health.

Open: May 14, 8:00 p.m.–adjournment.

Agenda: A progress report on the surgical oncology program.

(Catalog of Federal Domestic Assistance Program Numbers.
13.392, project grants in cancer construction.
13.393, project grants in cancer cause and prevention.
13.394, project grants in cancer detection and diagnosis.
13.395, project grants in cancer treatment.
13.396, project grants in cancer biology.
13.397, project grants in cancer centers support.
13.398, project grants in cancer research manpower.
13.399, project grants and contracts in cancer control.)

Dated: April 16, 1985.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140–01–M

National Eye Institute; Board of Scientific Counselors; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Eye Institute, June 10–11, 1985, Building 31C, Conference Room 7, National Institutes of Health, Bethesda, Maryland.

This meeting will be open to the public on June 10 from 8:30 a.m. until approximately 3:00 p.m. for general remarks by the Institute's Scientific Director on matters concerning the intramural programs of the National Eye Institute. Attendance by the public will be limited to space available.

In accordance with provisions set forth in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 10 from approximately 3:00 p.m. until recess and on June 11 from 8:30 a.m. until adjournment for the review, discussion, and evaluation of individual projects conducted by the Visual Processing Section of the Clinical

Branch. These evaluations and discussions could reveal personal information concerning individuals associated with the projects, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Consequently, this meeting is concerned with matters exempt from mandatory disclosure.

Ms. Kay Valeda, Committee Management Officer, National Eye Institute, Building 31, Room 6A03, National Institutes of Health, Bethesda, Maryland 20205 (301) 496–4903, will provide summaries of the meeting and rosters of committee members.

Substantive program information may be obtained from Dr. Jin Kinoshita, Scientific Director, National Eye Institute, Building 31, Room 6A04, National Institutes of Health, Bethesda, Maryland 20205 (301/493–7483).

Dated: April 17, 1985.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140–01–M

National Eye Institute; National Advisory Eye Council and the Vision Research Program Planning Subcommittee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Advisory Eye Council, National Eye Institute, May 30–31, 1985, Building 31, Conference Room 8, National Institutes of Health, Bethesda, Maryland, and the subcommittee meeting on May 29, Building 31, Conference Room 3, National Institutes of Health.

This meeting will be open to the public from 9:00 a.m. until approximately 12:00 noon on Thursday, May 30. Following opening remarks by the Director, National Eye Institute, there will be a report on mid-course evaluation of *Vision Research: A National Plan, 1983–1987*, and other presentations by the staff of the Institute.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from approximately 12:00 noon until recess on Thursday, May 30, and from 9:00 a.m. to adjournment on Friday, May 31, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable materials, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

There will also be a meeting of the Vision Research Program Planning Subcommittee on Wednesday, May 29 from 7:00 p.m. to 9:00 p.m. to discuss the mid-course evaluation of *Vision Research: A National Plan, 1983–1987*. Attendance by the public will be limited to space available.

Ms. Kay Valeda, Committee Management Officer, National Eye Institute, Building 31, Room 6A03, National Institutes of Health, Bethesda, Maryland 20205 (301) 496–4903, will provide summaries of meetings and rosters of committee members.

Dr. Ronald G. Geller, Associate Director for Extramural and Collaborative Programs, National Eye Institute, Building 31, Room 6A03, National Institutes of Health, Bethesda, Maryland 20205, (301) 496–4903, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program, Nos. 13.867, Retinal and Choroidal Diseases Research; 13.868, Corneal Diseases Research; 13.869, Cataract Research; 13.870, Glaucoma Research; and 13.871, Sensory and Motor Disorders of Visual Research; National Institutes of Health.

Dated: April 16, 1985.

Office of The Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on April 19, 1985.

Public Health Service

Food and Drug Administration

Subject: Reporting and Recordkeeping Requirements Imposed by the Methadone Regulations—Reinstatement (0910–0140)

Respondents: Individuals, state/local governments, businesses, non-profit institutions, small businesses

OMB Desk Officer: Bruce Artim

Social Security Administration

Subject: State Agency Budget List of Part-time and Temporary Positions for Disability Programs—SSA 4516—Existing Collection

Respondents: State disability determination staffs

Subject: Supplement to Claim of Person Outside the United States—SSA–21—Revision (0960–0051)

Respondents: Individuals

Subject: State Agency Budget List of Full-time positions for SSA Disability Review—SSA 4515—Existing Collection

Respondents: State disability determination staffs

OMB Desk Officer: Judy A. McIntosh.

Copies of the above information collection clearance packages can be obtained by calling the HHS Reports Clearance Officer on 202–245–6511.

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, D.C. 20503, Attn: (name of OMB Desk Officer).

Dated: April 23, 1985.

Harry A. Hadd,

Acting Deputy Assistant Secretary for Management Analysis and Systems.

BILLING CODE 4150–04–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Environmental Impact Statement; Hoopa Valley Indian Reservation, CA

April 19, 1985.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice advises the Public that the Draft Environmental Impact Statement (DEIS) for a Proposal to Modify Indian Fishing Regulations to Authorize Commercial Harvesting of Anadromous Fish on the Hoopa Valley Indian Reservation is available for public review. The Hoopa Valley Indian Reservation is located in Humbolt County in Northwestern California.

DATE: Written comments are due June 25, 1985.

Comments should be addressed to: Mr. M.W. Babby, Area Director, Sacramento Area Office, 2800 Cottage Way, Sacramento, California 95825.

FOR FURTHER INFORMATION CONTACT: Mr. Donald Knapp, Area Environmental Quality Specialist, Sacramento Area Office, Bureau of Indian Affairs, 2800 Cottage Way, Sacramento, California 59825, Telephone (916) 484–4391.

Individuals wishing copies of this Draft Environmental Impact Statement should contact the above mentioned individual.

SUPPLEMENTARY INFORMATION: The Bureau of Indian Affairs has prepared a Draft Environmental Impact Statement on its proposal to modify the fishing reglations for the Hoopa Valley Indian Reservation which will authorize commercial harvesting of anadromous fish by tribal members of the reservation. Prior to authorization, a harvest management plan will be prepared for each species of fish by the Bureau of Indian Affairs in cooperation with the U.S. Fish and Wildlife Service and existing tribal governments. The plans will form the basis for initial regulations. The plans will be reviewed each year and any necessary changes in regulations will be made. In season adjustments or closures will be made by observing run strengths. Each plan will establish the number of fish required to meet spawning goals and the number of fish needed to meet any subsistence or ceremonial needs. Commercial quotas and schedules in the plans will provide tribal members of the reservation with an equal opportunity to the fishery resource. Commercial fishing will be permitted on a species by species basis in those years when subsistence,

ceremonial, and spawning allotments are exceeded by the expected run. In season closure of the commercial fishery will occur if the expected run does not materialize. Alternatives under consideration which were evaluated and analyzed during planning are: (1) No Action, (2) Open Fishing and (3) Phased Commercial Fishing.

Public Meetings will be held at times, locations and on the dates listed below:

Bureau of Indian Affairs, Klamath Field Office Courtroom, Salmon Boulevard, Klamath, California, 10:30 a.m., May 22, 1985;

Ramada Inn, Room 102, 4975 Valley West Boulevard, Arcata, California, 7:00 p.m., May 22, 1985,

Bureau of Indian Affairs, Northern California Agency, Conference Room, Loop Road, Hoopa, California, 10:30 a.m., May 23, 1985.

During the public hearings, oral comments on the contents of the DEIS will be limited to ten minutes and should be accompanied with a written text.

John W. Fritz,

Deputy Assistant Secretary, Indian Affairs.

[FR Doc. 85-10116 Filed 4-25-85; 8:45 am]

BILLING CODE 4310-02-M

Bureau of Land Management

Worland District Grazing Advisory Board; Meeting

AGENCY: Bureau of Land Managment, Interior.

ACTION: Notice of meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463) and the Federal Land Policy and Management Act (Pub. L. 94-579), notice is hereby given of a meeting of the Worland District Grazing Advisory Board to be held at 9:00 a.m., May 30, 1985, in a conference room of the Elks Club, 604 Coburn Ave., Worland, Wyoming.

The agenda for this meeting includes:

1. Amendments to the Grazing Regulations (Subleasing of grazing preference).
2. Update on range improvement project planning.
3. Review of approved FY 1985 range improvement projects.
4. Review of current Allotment Management Plan development.
5. Discussion and Recommendations for proposed FY 1986 and 1987 range improvement projects.
6. Procedures in processing delinquent grazing bills.
7. Range Program Update: Grazing Decisions, Allotment Categorization, livestock operator consultation and coordination.
8. Assigning maintenance responsibility for rangeland improvements.
9. Opportunity for the public to present information or make comments.

The meeting will be open to the public. Interested persons may make oral statements to the Board during the public comment period, or file written statements for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager by May 24, 1985.

DATE: May 30, 1985, 9:00 a.m.

ADDRESS: Elks Club, 604 Coburn Avenue, Worland, Wyoming.

FOR FURTHER INFORMATION CONTACT: Chester E. Conard, District Manager, Bureau of Land Management 1700 Robertson Avenue, Worland, Wyoming 82401, (307) 347-9871.

SUPPLEMENTARY INFORMATION: Summary minutes of this meeting will be on file in the District Office and available for public inspection (during regular business hours) within 30 days of the meeting.

Chester E. Conard,

District Manager.

[FR Doc. 85-10179 Filed 4-25-85; 8:45 am]

BILLING CODE 4310-22-M

[Exchange CA-17137]

Realty Action; Public Lands in Mendocino County, CA

In 48 FR 1632 (April 15, 1983), the following parcels of public land were identified for disposal by exchange CA-13880:

Mount Diablo Meridian, California

T. 22 N., R. 14 W., Section 9, SW¼SW¼;
T. 23 N., R. 15 W., Section 32, Lots 3, 4, 5, 6, SE¼NE¼.

Containing 211.27 acres, more or less.

These parcels will not be a part of Exchange CA-13880. It has been determined that these parcels remain suitable for disposal and will become part of Exchange CA-17137.

Pursuant to section 206 of the Federal Land Policy and Management Act of October 21, 1976 (90 Stat. 2756), it has been determined that the above described lands along with the below described public low lands are suitable for disposal in Exchange CA-17137:

Mount Diablo Meridian, California

T. 22 N., R. 14 W., Section 19, Lots 1, 2, 3, 8, NW¼NE¼,
T. 22 N., R. 15 W., Section 24, Lot 1,
T. 24 N., R. 16 W., Section 3, Lots 1, 2, 6.

Containin 335.93 acres, more or less.

The State of California State Lands Commission has applied to acquire the above described public lands in exchange for the following described State owned lands:

Mount Diablo Meridian, California

T. 5 S., R. 36 E., Section 36,
T. 6 S., R. 37 E., Section 16,
T. 6 S., R. 37 E., Section 36,
T. 6 S., R. 38 E., Section 16,
T. 6 S., R. 38 E., Section 36,
T. 7 S., R. 35 E., Section 36,
T. 7 S., R. 37 E., Section 36,
T. 7 S., R. 38 E., Section 16,
T. 8 S., R. 36 E., Section 16, E½, SW¼.

Containing 5,600 acres, more or less.

SUPPLEMENTARY INFORMATION: All the minerals on the public lands will be transferred to the State. A Mineral Evaluation has been requsted on the public lands. If minerals are identified they will be appraised and their value will be included in total value of the exchange.

There will be reserved to the United States in the applied for lands, a right-of-way for ditches and canals constructed by the authority of the United States (43 U.S.C. 945). There will also be a 40-foot wide telephone and telegraph line right-of-way, SAC 045712, reserved to Pacific Telephone and Telegraph Company across Lots 2, 6 in Section 3, T. 24 N., R. 16 W., M.D.M.

The purpose of this exchange is to block up public lands within the Ridgecrest Resource Area to enhance their manageability and resource values.

The publication of this notice in the **Federal Register** shall segregate the applied for public lands from all other forms of appropriation under the public land laws, including the mining laws, for a period of two years. This exchange is expected to be consumated before the end of that period.

FOR FURTHER INFORMATION CONTACT: Bill Dabbs, Realty Specialist, Bureau of Land Management, P.O. Box 940, 555 Leslie Street, Ukiah, CA 95482, Phone: (707) 462-3873. Information for the exchange is available.

DATES: For a period of 45 days from the publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Ukiah District Office, Bureau of Land Management, P.O. Box 940, 555 Leslie Street, Ukiah, CA 95482. Any adverse comments will be evaluated by the California State Director, Bureau of Land Management, who may vacate or modify this realty action and issue a final determination. In the absence of a vacation of modification this realty action will become final determination of the Bureau.

Dated: April 19, 1985.

Von W. Manning,

Ukiah District Manager.

BILLING CODE 4310-84-M

Minerals Management Service

Development Operations Coordination Document; The Louisana Land and Exploration Co.

AGENCY: Minerals Management Service.

ACTION: Notice of the receipt of a proposed development operations coordination document (DOCD).

SUMMARY: Notice is hereby given that The Louisana Land and Exploration Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 4417, Block 66, East Cameron Area, offshore Louisana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Cameron, Louisana.

DATE: The subject DOCD was deemed submitted on March 29, 1985. Comments must be received within 15 days of the date of this Notice or 15 days after the Coastal Management Section receives a copy of the DOCD from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, *Attention OCS Plans*, Post Office Box 44396, Baton Rouge, Louisana 70805.

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service; Gulf of Mexico OCS Region; Rules and Production; Plans, Platform and Pipeline Section; Exploration/Development Plans Unit; Phone (504) 838-0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisana Department of Natural Resources is reviewing the DOCD for consistency with the Louisana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected states, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: April 12, 1985.

John L. Rankin,

Regional Director, Gulf of Mexico OCS Region.

INTERSTATE COMMERCE COMMISSION

Intent to Engage in Compensated Intercorporate Hauling Operations

This is to provide notice as required by 49 U.S.C. 10524(b) (1) that the named corporations intend to provide or use compensated intercorporate hauling operations as authorized in 49 U.S.C. 10524(b).

1. Parent corporation and address of principal office: Leggett & Platt, Incorporated, One Leggett Road, Carthage, MO 64836.

2. The wholly-owned subsidiaries which will participate in the intercorporate operations and their states of incorporation are as follows:

Bedline Manufacturing Company (a California corporation), 12352 Whittier Boulevard, Whittier, CA 90602

Fleet Service Corp. (a California corporation), P.O. Box 4112, Whittier, CA 90607.

I. Parent corporation and address of principal office: Meridian Exploration Corporation, RD ±2, P.O. Box 265 D, Cambridge Springs, PA 16403.

II. Wholly-owned subsidiary which will participate in the operations, and State of incorporation:

Subsidiary	State of incorporation
Energy Trucking Company	Pennsylvania.

1. Parent corporation and address of principal office: Ralston Purina Company, 835 South 8th Street, St. Louis, MO 63164.

2. The wholly-owned subsidiaries which will participate in the operations, and states of incorporation.

(a) Purina Mills, Inc. (DE).

(b) Agricob, Ltd. (DE) and a wholly owned subsidiary of Purina Mills, Inc.

(c) Aid Laboratories, Inc. (DE) and a wholly owned subsidiary of Purina Mills, Inc.

(d) Bay-Mor Pet Feeds, Inc. (DE) and a wholly owned subsidiary of Purina Mills, Inc.

(e) Chek-Tech, Inc. (DE) and a wholly owned subsidiary of Purina Mills, Inc.

(f) Hearty Hound, Inc. (DE) and a wholly owned subsidiary of Purina Mills, Inc.

(g) Kleen Leen, Inc. (DE) and a wholly owned subsidiary of Purina Mills, Inc.

(h) West Willow Farmers Association (PA) and a wholly owned subsidiary of Purina Mills, Inc.

(i) Continental Baking Company (DE).

(j) Bost Bakery, Inc. (NC) and a wholly owned subsidiary of Continental Baking Company.

(k) Bost Bakery, Inc. (NC) and a wholly owned subsidiary of Continental Baking Company.

(l) The Paniplus Company (DE) and a wholly owned subsidiary of Continental Baking Company.

(m) Fiber Sales & Development Corporation (DE) and a wholly owned subsidiary of The Paniplus Company.

(n) Keystone Resorts Management, Inc. (CO).

(o) Foodmaker, Inc. (DE).

(p) Red and White, Inc. (DE).

(q) Van Can Company (DE).

BILLING CODE 7035-01-M

[Docket No. AB-6 (Sub-234)]

Burlington Northern Railroad Co.; Abandonment in Walla Walla County, WA and Umatilla County, OR; Findings

The Commission has issued a certificate authorizing Burlington Northern Railroad Company to abandon its 14.78 mile rail line between Walla Walla, WA (milepost 0.00) and Milton, OR (milepost 14.78) in Walla Walla County, WA and Umatilla County, OR.

The abandonment certificate will become effective 30 days after this publication unless the Commission also finds that: (1) A financially responsible person has offered assistance (through

subsidy or purchase) to enable the rail service to be continued, and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and the applicant no later than 10 days from publication of this Notice. The following notation shall be typed in bold face on the lower left-hand corner of the envelope containing the offer: "Rail Section, AB–OFA." Any offer previously made must be remade within this 10 day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27(b).

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to the Clean Water Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on April 9, 1985 a proposed Consent Decree in *United States* v. *Plastics Universal Corporation, et al.*, Civil Action No. 84–183 was lodged with the United States District Court for the Eastern District of Kentucky. The Amended Compliant filed by the United States alleged violations of the Clean Water Act by Plastics Universal Corporation, a wholly owned subsidiary of Adams Resources and Energy Inc., for discharging pollutants during mining operations from point sources located in Bell and Knox Counties, Kentucky into Little Poplar Creek and Stinking Creek, tributaries of the Cumberland River. The Amended Complaint sought injunctive relief to permanently enjoin defendants from discharging without a permit and civil penalties for past violations of NPDES Permits and Section 301 of the Act, 33 U.S.C. 1311. The proposed Consent Decree requires the defendants to comply with effluent limitations and monitoring requirements required by 40 CFR 434.32 for discharges from all point sources in post-mining areas covered under two (2) NPDES permits until release of reclamation, grading or performance bonds by the Commonwealth of Kentucky. In addition effluent limitations and monitoring requirements established in the previously issued NPDES permits must be complied with for discharges from point sources associated with active mining operations. Plastics Universal Corporation and Adams Resources and Energy, Inc. are required to pay a civil penalty of $50,000 in settlement of the government's civil penalty claims. Stipulated penalties are provided for non-compliance with the terms and conditions of the Consent Decree.

The Department of Justice will receive for a period of thirty (30) days from the date of publication of this notice comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Plastics Universal Corporation, et al.*, D.J. Ref. 90–1–1–2022.

The proposed Consent Decree may be examined at the Office of the United States Attorney, 326 Federal Building, Limestone and Barr Streets, Lexington, Kentucky 40507, the Region IV Office of the Environmental Protection Agency, 345 Courtland Street NE., Atlanta, Georgia 30365 and at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, 10th and Pennsylvania Avenue NW., Washington, D.C. 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please refer to *United States* v. *Plastics Universal Corporation, et al.*, D.J. Ref. 90–5–1–1–2022.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410–01–M

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-15,534]

Asarco, Inc., Tacoma Smelter, Tacoma, WA; Revised Determination on Reconsideration

On March 28, 1985 the Department made an Affirmative Determination Regarding Application for Reconsideration for workers and former workers producing blister copper at the Tacoma, Washington Smelter of Asarco, Inc. This determination was published in the **Federal Register** on April 9, 1985 (50 FR 14034).

The United Steelworkers' application for reconsideration claims that the company's refinery at Amarillo, Texas, the end user of all of Tacoma's production of blister copper, imported blister copper.

The reconsideration findings showed that the Amarillo refinery imported blister copper. The Tacoma smelter was the only smelter of the company that shipped blister copper to Amarillo in 1984. Amarillo initiated the use of imported blister copper in 1984 in volumes that exceeded the decline in Tacoma shipments and that were important relative to Tacoma shipments of blister copper in 1984.

The Tacoma plant ceased all production of blister copper in March 1985 when all production workers were laid off.

Conclusion

After careful review of the facts obtained on reconsideration. It is concluded that increased imports of articles like or directly competitive with blister copper produced at the Tacoma, Washington smelter of Asarco, Inc., contributed importantly to the decline in sales and production of blister copper and to the total or partial separation of workers and former workers at Asarco's smelter in Tacoma, Washington. In accordance with the provisions of the Trade Act of 1974, I make the following revised determination:

All workers of the Asarco Inc., Tacoma smelter, Tacoma, Washington who became totally or partially separated from employment on or after October 25, 1983 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, D.C., this 18th day of April 1985.

Harold A. Bratt,

Deputy Director, Office of Program Management, UIS.

[FR Doc. 85-10182 Filed 4-25-85; 8:45 am]

BILLING CODE 4510-30-M

[TA-W-15, 741]

AT&T Consumer Products, AT&T Technologies, Inc., Indianapolis, IN; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on February 19, 1985 in response to a worker petition received on January 8, 1985, which was filed by the International Brotherhood of Electrical Workers, Local No. 1504 on behalf of workers at AT&T Consumer Products, AT&T Technologies, Inc., Indianapolis, Indiana.

An active certification covering the petitioning group of workers remains in effect (TA-W-15,063). Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, D.C., this 18th day of April 1985.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 85-10180 Filed 4-25-85; 8:45 am]

BILLING CODE 4510-30-M

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period April 15, 1985–April 19, 1985.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separation at the firm.

TA-W-15, 729; AMEDCO Casket Hardware, Connersville, IN

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA-W-15,710; Crown Zellebach Corp., Chimacum Creek Div., Northwest Managed Forest, Port Angeles, WA

Sales declines experienced by the subject firm were attributable to losses in export sales.

TA-W-15,721; Fafnir Bearings, Newington, CT

Separations of workers producing ball bearings from the subject firm resulted from a transfer of production to another domestic facility.

The investigation revealed that criterion (2) has not been met for workers producing roller bearings. Sales and production did not decrease as required for certification.

TA-W-15,722; Fafnir Bearings, New Britain, CT

Separations of workers producing ball bearings from the subject firm resulted from a transfer of production to another domestic facility.

The investigation revealed that criterion (2) has not been met for workers producing roller bearings. Sales and production did not decrease as required for certification.

Affirmative Determinations

TA-W-15,725; Rajah Ventures, Limited, Grand Junction, CO

A certification was issued covering all workers of the firm separated on or after Janaury 4, 1984 and before December 31, 1984.

TA-W-15,711; Extracorporal, Inc., A Johnson & Johnson Co., Norristown, PA

A certification was issued covering all workers separated on or after December 18, 1983 and before February 1, 1985.

TA-W-15,716; Mayr Brothers Logging Co., Hoquiam, WA

A certification was issued covering all workers separated on or before December 28, 1983.

TA-W-15,708; Phelps Dodge Corp., Morenci Branch Smelter, Morenci, AZ

A certification was issued covering all workers separated on or after December 1, 1984 and before February 28, 1985.

TA-W-15,724; Quoddy Manufacturing, Auburn, ME

A certification was issued covering all workers of the firm separated on or after December 27, 1983.

TA–W–15,731; B–W Footwear Co., Inc., East Corinth, ME

A certification was issued covering all workers of the firm separated on or after January 18, 1984 and before February 28, 1985.

TA–W–15,726; Roytype, Division of Triumph-Adler Co., Newington, CT

A certification was issued covering all workers of the firm engaged in employment related to the assembly of ribbon cartridges separated on or after March 31, 1984.

I hereby certify that the aforementioned determinations were issued during the period April 15, 1985–April 19, 1985. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Street, N.W., Washington, D.C. during normal business hours or will be mailed to persons who write to the above address.

Dated: April 23, 1985.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibility under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the proposed forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency forms under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of any particular revision they are interested in.

Each entry will contain the following information:

The Agency of the Department issuing this form.

The title of the form.

The OMB and Agency form numbers, if applicable.

How often the form must be filled out.

Who will be required to or asked to report.

Whether small businesses or organizations are affected.

An estimate of the number of responses.

An estimate of the total number of hours needed to fill out the form.

The number of forms in the request for approval.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202–523–6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, N.W., Room S–5526, Washington, D.C. 20210. Comments should also be sent to the OMB reviewer, Arnold Strasser, Telephone 202–395–6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, NEOB, Washington, D.C. 20503.

Any member of the public who wants to comment on a form which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Revision

Bureau of Labor Statstics

239,600 responses; 74,507 hours; 5 forms

The Consumer Price Index (CPI) is the nation's leading measure of inflation at the retail level. It is widely used to measure the success of national economic policy and to escalate federal and private payments of many kinds. The Commodities and Services Survey provides the measure of price change for about 80 percent of the CPI. As part of a planned 1987 revision of the CPI, the Bureau of Labor Statistics (BLS) has reformatted the data collection forms to improve the data collection and data capture processes. In addition to the item description and price data that are currently collected, BLS has added questions about item-specific sales tax rates to the forms.

BILLING CODE 4510–24–M

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

Proposed Recommendations to the Two Governments for First Stage Treatment and Disposal Facilities for Solution of the Border Sanitation Problem at Tijuana, B.C. and San Diego, CA

AGENCY: United States Section, International Boundary and Water Commission, United States and Mexico.

ACTION: Notice of finding of no significant impact.

SUMMARY: Based on an environmental assessment, the United States Section finds that the proposed action to enter

into an agreement to solve the border sanitation problem in the Tijuana-San Diego area is not a major Federal action that would significantly affect the quality of the human environment. Rather it would be an improvement to the quality of the environment. Therefore, pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Final Regulations (40 CFR Part 1500); and the United States Section Operational Procedures for Implementing Section 102 of NEPA, published in the **Federal Register** September 2, 1981 (46 FR 44083); the U.S. Section gives notice that an environmental impact statement is not being prepared for the Government of the United States to enter into an agreement with the Government of Mexico, through the International Boundary and Water Commission, to solve the border sanitation problem in the Tijuana-San Diego area.

FOR FURTHER INFORMATION CONTACT:
M.R. Ybarra, Secretary of the United States Section, International Boundary and Water Commission, United States and Mexico, United States Section; 4110 Rio Bravo; El Paso, Texas 79902. Telephone: (915) 541–7308, FTS 572–7308.

SUPPLEMENTARY INFORMATION:

Proposed Action

It is proposed that the Government of the United States enter into an agreement with the Government of Mexico, through the International Boundary and Water Commission, to provide that Mexico construct in its territory adequate first stage treatment and disposal facilities for the City of Tijuana, Baja California and operate and maintain the facilities in such manner that there are no discharges of untreated domestic and industrial waters crossing the boundary into the United States.

The recommendations for the proposed agreement relate to the first stage facilities plan proposed by Mexico for construction, operation and maintenance in its territory for treatment and disposal of 34 million gallons per day of sewage from the City of Tijuana. The first stage facilities plan provides for a pumping plant, conveyance system, treatment facility, and an outfall to the Pacific Ocean 5.6 miles south of the international boundary.

Alternatives Considered

Three alternatives were considered:

The Proposed Action Alternative provides for Mexico to construct, operate and maintain sewage treatment in its territory for treatment and disposal of sewage from the City of Tijuana with assurances that there are no discharges of untreated domestic and industrial waters crossing the boundary into the United States.

An alternative of constructing a joint international wastewater treatment plant in the United States near the boundary was proposed by the United States and considered by Mexico. However, for internal reasons Mexico decided against the joint international plant and instead adopted a plan for treatment and disposal works in Mexico.

Under the No Action Alternative, Mexico would be expected to complete construction and put into operation its first stage sewage disposal works for discharges to the ocean without any assurance that Mexico will build, operate and maintain sewage treatment facilities prior to ocean discharge in such a manner that will prevent pollution into the United States.

Environmental Assessment

The United States Section prepared an environmental assessment on April 10, 1985.

Findings of the Environmental Assessment

The environmental assessment finds that:

1. The agreement would assure, to the extent possible, the prevention of discharges of untreated sewage into the United States and the attendant health hazards and odors associated with raw sewage that have occurred in the south San Diego area.

2. The well-being of citizens of both countries living and traveling in the Tijuana-San Diego area would be improved.

3. The quality of the surf water at the international boundary would be maintained to comply with California standards for primary contact recreation and should result in allowing greater use of beaches along the coast without health risks.

4. The prevention of beach quarantines, as have occurred, would have the positive economic impact of reviving businesses in the beach communities.

5. The water in the Tijuana River estuary would not be polluted by sewage overflows, as have occurred, thereby permitting the full range of uses anticipated in that National Estuarine Sanctuary as well as the adjacent Tijuana Slough National Wildlife Refuge.

6. There would be prevented the adverse impacts, as have occurred, on critical habitat in the area, affecting species on the endangered species list, and the improved water quality would benefit all area wildlife.

7. The construction of the works, wholly in Mexico, would not affect any archeological or historical sites in the United States territory now on, or proposed for nomination to, the National Register of Historical Places.

8. Therefore, the proposed action to enter into an agreement to solve the border sanitation problem in the Tijuana-San Diego area is not a major federal action that would significantly affect the quality of the human environment.

On the basis of the foregoing and the environmental assessment, the United States Section determines that an environmental impact statement is not required for the Government of the United States to enter into an agreement with the Government of Mexico to solve the border sanitation problem in the Tijuana-San Diego area and hereby provides notice of a finding of no significant impact.

The Finding of No Significant Impact (FONSI) and Final Environmental Assessment (FEA) have been forwarded to the Environmental Protection Agency and to various governmental and non-governmental entities. A limited number of copies of the FONSI and FEA are available for single copy requests at the above address.

Dated: April 18, 1985.

J. F. Friedkin,

Commissioner.

Advisory Committee for Ocean Sciences (ACOS); Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Ocean Sciences (ACOS).

Date and time: May 23, 24, 1985—9:00 A.M. to 5:00 P.M. each day.

Place: Room 351, National Academy of Sciences, 21st and Pennsylvania Avenue, NW., Washington. DC.

Type of meeting: Open.

Contact person: Dr. M. Grant Gross, Director, Division of Ocean Sciences Room 609, National Science Foundation, Washington, DC. Telephone: (202) 3357–9639.

Summary minutes: May be obtained from the contact person.

Purpose of committee: To provide advice and recommendations concerning oceanographic research and its support by the NSF Division of Ocean Sciences.

Agenda

The Committee will hold morning and afternoon Sessions on both days following opening remarks and introductions. The Committee will hear briefings and status reports of current topical interest from various officials and representatives from NSF, other Governmental Departments and Agencies, and other organizations active in ocean science matters. The Commitee will also hear reports from several Subcommittees and reflect upon a proper course of action based on the information presented. The Committee will also discuss the current status and future directions of the draft Long-Range Plan for Ocean Sciences, and formulate appropriate guidance and direction for the continuing planning process. The Committee guidance also conduct necessary administrative functions in accordance with established practice with respect to approval of the minutes of the previous meeting determination of the time and place of the next meeting; as well as any other appropriate business.

M. Rebecca Winker,

Committee Management Officer.

April 23, 1985.

BILLING CODE 7555-01-M

Advisory Panel for Cell Biology; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Cell Biology.

Date and time: May 13, 14 and 15, 1985—8:30 a.m. to 5:00 p.m. each day.

Place: Room 1242A, National Science Foundation, 1800 G Street, NW., Washington, DC 20550.

Type of meeting: Closed.

Contact person: Antonio H. Romano, Program Director, Cell Biology Program, Room 232, National Science Foundation, Washington, DC 20550. Telephone 202/357–7474.

Purpose of advisory panel: To provide advice and recommendations concerning support for research in cell biology.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b (c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

Advisory Panel for Geography and Regional Science; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Geography and Regional Science.

Date/time: May 13, 1985—8:30 a.m. to 5:00 p.m., Closed; May 14, 1985—8:30 a.m. to 5:00 p.m., Closed.

Place: National Science Foundation, 1800 G St., NW (Rm. 628), Washington, DC 20550.

Type of meeting: Closed.

Contact person: Dr. Ronald F. Abler, Director, Geography and Regional Science, National Science Foundation, Washington, DC 20550, Room 312, Phone (202)357–7326.

Purpose of advisory panel: To provide advice and recommendations concerning research in Regulation and Policy Analysis.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary of confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF on July 6, 1979.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

Advisory Panel for Memory and Cognitive Processes; Meeting:

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the National Science Foundation announces the following meeting.

Name: Advisory Panel for Memory and Cognitive Processes.

Date and time: May 15–17, 1984: 9:00 a.m.–5:00 p.m. each day.

Place: National Science Foundation, 1800 G St., NW., Washington, D.C. 20550, Room 1141.

Type of meeting: Part open.

Closed—5/15 and 5/17 9:00 a.m. to 5:00 p.m. and 5/16 9:00 a.m. to 10:00 a.m. and 1:00 p.m. to 5:00 p.m.

Open—5/16 10:00 a.m. to 12:00 noon.

Contact person: Dr. Joseph L. Young, Program Director, Memory and Cognitive Processes Program, Room 320, National Science Foundation, Washington, D.C. 20550, telephone (202) 357–9898.

Summary minutes: May be obtained from the Contact Person at the above stated address.

Purpose of meeting: To provide advice and recommendations concerning support for research in memory and cognitive processes.

Agenda: Open—General discussion of the current status and future plans of the Memory and Cognitive Processes Program.

Closed—To review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

General Public Utilities Nuclear Corp.; Environmental Assessment and Notice of Finding of No Significant Environmental Impact

[Docket No. 50320]

The U.S. Nuclear Regulatory Commission (the Commission) is planning to issue an Amendment of Order to Facility Operating License No. DPR–73, issued to General Public Utilities Nuclear Corporation (the licensee), for operation of the Three Mile Island Nuclear Station, Unit 2 (TMI–2), located in Londonderry Township, Dauphin County, Pennsylvania.

Environmental Assessment

Identification of Proposed Action: The action being considered by the Commission is an Amendment of the Director of Nuclear Reactor Regulation's Order dated February 11, 1980.

This Amendment of Order is being issued in response to General Public Utilities Nuclear Corporation's (GPUNC) letter dated February 15, 1985.

The Need for the Action: The Amendment of Order is warranted because of the need to modify the Proposed Technical Specifications (PTS) for future recovery operations at TMI–2. The types of actions to be taken include an increase in the minimum required boron concentration in the RCS; the addition of boron concentration requirements in the Spent Fuel Storage Pool "A" and the Fuel Transfer Canal; the addition of water level and water level monitoring requirements in the Spent Fuel Storage Pool "A" and the Fuel Transfer Canal; and limiting heavy load travel over canisters containing core material.

Environmental Impacts of the Proposed Actions: The staff has evaluated the PTS modifications proposed by the Amendment of Order and concluded that it will not result in significant increases in airborne or liquid radioactivity inside the reactor building or in corresponding releases to the environment. There are also no non-radiological impacts to the environment as a result of these actions.

Alternative to this Action: Since we have concluded that there is no significant environmental impact associated with the subject Amendment of Order, any alternatives to these changes will have either no significant environmental impact or greater environmental impact. The principal alternative would be to deny the requested actions. This would not reduce significant environmental impacts of plant operations and would resut in the application of overly restrictive regulatory requirements when considering the unique conditions at TMI–2.

Agencies and Persons Consulted: The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Alternate Use of Resources: This action does not involve the use of resources not previously considered in connection with the Final Programmatic Impact Statement for TMI–2 dated March 1981.

Finding of No Significant Impact: The Commission has determined not to prepare an environmental impact statement for the subject Amendment of Order. Based upon the foregoing environmental assessment, we conclude that this action will not have a significant effect on the quality of the human environment.

For further details with respect to this action see (1) Letter to B.J. Snyder, USNRC, from F.R. Standerfer, GPUNC, Technical Sepcification Change Request No. 47, dated February 15, 1985; and (2) the Director's Order of February 11, 1980.

All of the above documents are available for inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, DC, and at the Commission's Local Public Document Room at the State Library of Pennsylvania, Government Publications Section, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126.

For the Nuclear Regulatory Commission.

Bernard J. Snyder,

Program Director, Three Mile Island Program Office, Office of Nuclear Reactor Regulation.

April 23, 1985

[FR Doc. 85–10189 Filed 4–25–85; 8:45 am]

BUILDING CODE 7590-01-M

[Docket No. 50–320]

General Public Utilities Nuclear Corp. (Three Mile Island Nuclear Station, Unit 2); Amendment of Order

I

GPU Nuclear Corporation, Metropolitan Edison Company, Jersey Central Power and Light Company and Pennsylvania Electric Company (collectively, the licensee) are the holders of Facility Operating License No. DPR–73, which had authorized operation of the Three Mile Island Nuclear Station, Unit 2 (TMI–2) at power levels up to 2772 megawatts thermal. The facility, which is located in

Londonderry Township, Dauphin County, Pennsylvania, is a pressurized water reactor previously used for the commercial generation of electricity.

II

By Order for Modification of License, dated July 20, 1979, the licensee's authority to operate the facility was suspended and the licensee's authority was limited to maintenance of the facility in the present shutdown cooling mode (44 F.R. 45271). By further Order of the Director, Office of Nuclear Reactor Regulation, dated February 11, 1980, a new set of formal license requirements was imposed to reflect the post-accident condition of the facility and to assure the continued maintenance of the current safe, stable, long-term cooling condition of the facility (45 F.R. 11292).

Although these requirements were imposed on the licensee by an Order of the Director of Nuclear Reactor Regulation, dated February 11, 1980, the TMI–2 license has not been formally amended. The requirements are reflected in the Recovery Mode Proposed Technical Specifications (PTS) presently pending before the Atomic Safety and Licensing Board. The revisions that are the subject of this order do not give the licensee authorizations that may be needed to undertake specific cleanup activities. These activities will require separate consideration by the staff per Section 6.8.2 of the PTS, individual staff safety evaluations and/or licensing actions as appropriate. Hereafter in this Amendment of Order, the requirements in question are identified by the applicable Proposed Technical Specification.

III

By letter dated February 15, 1985, GPU Nuclear Corporation (GPUNC) proposed changes to the Proposed Technical Specifications (PTS) for Three Mile Island Unit 2.

The licensee proposed to increase the minimum boron concentration in the Reactor Coolant System (RCS) from 3500 ppm to 4350 ppm to insure that for any conceivable core configuration an adequate shutdown margin below criticality is maintained. The licensee also requested the application of minimum and maximum boron concentration limits to the Spent Fuel Storage Pool "A" (SFSPA) and the Fuel Transfer Canal (FTC) of 4350 and 6000 ppm, respectively. In case the water inventories of the RCS, the FTC and the SFSPA communicated because of a leak or valve misalignment, the possibility of boron dilution of any of these water volumes would be minimized.

The licensee also proposed the addition to the PTS of water level and water level monitoring requirements for the SFSPA and FTC. These requirements would ensure adequate water shielding above fuel canisters. Specific levels will be stated in plant procedures approved by the NRC.

In addition, GPUNC proposed additional load handling requirements for the Fuel Handling Building that would preclude heavy load travel over a fuel canister unless a load drop analysis and associated procedures have been approved by the NRC. Per discussions with GPU, the staff added a requirement that the associated load drop Safety Evaluation be formally submitted to the NRC for approval.

The staff has also added per discussions with the licensee, definitions for Licensed Operator, Senior Licensed Operator and Fuel Handling Senior Reactor Operator.

The associated bases were also modified as requested by the licensee to reflect the above PTS changes.

Other changes proposed by the licensee were applicable to the Recovery Operations Plan (ROP) and are addressed in separate correspondence. Based on discussions herein and those in the attached Safety Evaluation, the staff concurs with the licensee's proposed changes. Minor modifications to the licensee's changes have been made by the staff and concurred with by the licensee as discussed above.

The staff's safety assessment of this matter as discussed above is set forth in the concurrently issued Safety Evaluation. Since the February 11, 1980 Order imposing the Proposed Technical Specifications is currently pending before the Atomic Safety and Licensing Board, the staff will be advising the Licensing Board of this Amendment of Order through a Notice of Issuance of Amendment of Order and a Motion to Conform Proposed Technical Specifications in Accordance Herewith.

It is further determined that the modification does not authorize a change in effluent types or total amounts nor an increase in power level and will not result in any significant environmental impact. In light of this determination and as reflected in the Environmental Assessment and Notice of Finding of No Significant Environmental Impact prepared pursuant to 10 CFR 51.2 and 51.30 through 51.32 issued concurrently herewith, it was concluded that the action is insignificant from the standpoint of environmental impact and that an environmental impact statement need not be prepared.

IV

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, the Director's Order of February 11, 1980, is hereby revised to incorporate the deletions, additions, and modifications set forth in Enclosure 3 hereto. This Amendment of Order shall be effective on April 30, 1985.

For further details with respect to this action, see (1) Letter to B. J. Snyder, USNRC, from F. R. Standerfer, GPUNC, Technical Specification Change Request 47, Recovery Operations Plan Change Request 27 and (2) the Director's Order of February 11, 1980.

All the above documents are available for inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Commission's Local Public Document Room at the State Library of Pennsylvania, Government Publications Section, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126.

Effective Date: May 31, 1985.

Dated at Bethesda, Maryland.

Issuance Date: April 23, 1985.

For the Nuclear Regulatory Commission.

Harold R. Denton,

Director, Office of Nuclear Reactor Regulation.

[FR Doc. 85–10190 Filed 4–25–85; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–323]

Pacific Gas and Electric Co.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from Paragraph III.D.2(b)(ii) of 10 CFR Part 50, Appendix J to Pacific Gas & Electric Company (the applicant). The applicant has applied for a facility operating license for operation of the Diablo Canyon Power Plant, Unit 2 (the facility). This facility is a pressurized water reactor located in San Luis Obispo County, California.

Environmental Assessment

Identification of Proposed Action: The applicant proposed to perform a full pressure air lock test after cold

shutdown only when maintenance is performed on the air lock which could affect the air lock sealing capability and to subsitute the seal leakage test of Paragraph III.D.2(b)(iii) of Appendix J for the full pressure test after cold shutdown.

The Need for the Proposed Action: Without the proposed action, either a cumbersome test method must be used or a major design change would be required in order to perform the full pressure air lock test. If an air lock is opened during Mode 5 or 6, paragraph III.D.2(b)(ii) of Appendix J requires that an overall air lock leakage test at not less than P_a (full pressure test) be conducted prior to plant heatup and startup (i.e., entering Mode 4). The existing air lock doors are so designed that a full pressure of P_a (47.0 psig) test of an entire air lock can only be performed after strong backs (structural bracing) have been installed on the inner door. Strong backs are needed since the pressure exerted on the inner door during the test is in a direction opposite to that of the accident pressure direction. Installing strong backs, performing the test, and removing strong backs, requires several hours per air lock, during which access through the air lock is prohibited.

Environmental Impacts of the Proposed Action: There are no environmental impacts of the proposed action. Whenever the plant is in cold shutdown (Mode 5) or refueling (Mode 6), containment integrity is not required. If the periodic 6-month test of paragraph III.D.2.(b)(i) of Appendix J and the seal test required by paragraph III.D.2(b)(iii) of Appendix J are current, no maintenance has been performed on the air lock that could affect its sealing capability, and the air lock is properly sealed, there is no reason to expect the air lock to leak excessively, even though it has been opened in Mode 5 or Mode 6. Moreover, the proposed exemption does not affect radiological plant effluents nor cause any significant occupational exposures. Thus, the Commission concludes that there are no significant radiological environmental impacts associated with this proposed exemption.

Accordingly, the staff concludes that the applicant's proposed approach of substituting a seal leakage test [as described in paragraph III.D.3(b)(iii)] for the full pressure test of paragraph III.D.2(b)(ii) of Appendix J is acceptable when no maintenance has been performed on an air lock that could affect its sealing capability. Whenever maintenance that could affect its sealing capability has been performed on the air lock, the requirements of paragraph III.D.2(b)(ii) of Appendix J must still be met by the applicant.

With regard to potential non-radiological impacts, the proposed exemption involves systems located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed exemption.

Alternative to the Proposed Action: We have concluded that there is no measurable environmental impact associated with the proposed exemption. The principal alternative would be to deny the requested exemption. This would not reduce environmental impacts of the plant operation.

Alternative use of Resources: This action does not involve the use of resources not previously considered in connection with the "Final Environmental Statement Related to the Nuclear Generating Station Diabol Canyon, Units 1 & 2" dated May 1973 and its Addendum dated May 1976.

Agencies and Persons Consulted: The NRC staff reviewed the applicant's request and did not consult other agencies or persons.

Finding of no Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see Supplement 31 to the Safety Evaluation Report dated April 1985, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at California Polytechnic State University Library, Documents and Maps Department, San Luis Obispo, California 92407.

Dated at Bethesda, Maryland, this 22nd day of April, 1985.

For the Nuclear Regulatory Commission.

Thomas M. Novak,

Assistant Director for Licensing, Division of Licensing.

[FR Doc. 85-10188 Filed 4-25-85; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-327 and 50-328]

Tennessee Valley Authority; Consideration of Issuance of Amendments to Facility Operating Licenses and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR-77 and DPR-79, issued to Tennessee Valley Authority (the licensee), for operation of the Sequoyah Nuclear Plant, Units 1 and 2, located in Hamilton County, Tennessee.

On September 20, 1984, a notice of consideration of issuance of amendments was published on proposed changes to the Sequoyah Units 1 and 2 Physical Security Plan as requested in the licensee's letter dated June 13, 1984. The staff's preliminary views indicated that with the proposed changes, the requirements of 10 CFR Part 70 would remain satisfied. After discussions with the NRC staff, the licensee, by letter dated March 27, 1985, proposed compensatory measures to the system. In addition, the licensee has agreed to provide additional operational and test data to support their initial proposal of June 13, 1984, for the perimeter intrusion detection system. The staff will evaluate these data when available, and those from other sources, to determine the adequacy of the initially proposed system.

The staff now believes that the revised security plan with the compensatory measures satisfies the requirements of 10 CFR 73.55.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from an accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870) of actions likely

to involve no significant hazards consideration. One of the examples of actions likely to involve no significant hazards consideration relates to a change which either may result in some increase to the probability or consequences of a previously analyzed accident or may reduce in some way a safety margin, but where the results of the changes are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan. The proposed change involved here is similar to this example in that, although there is some reduction in security effectiveness, a change in being proposed for the implementation of the new security plan which would be a satisfactory alternative to the systems discussed in Regulatory Guide 5.44. Accordingly, the Commission has made an initial determination that the above change does not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally made a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC. 20555, Attn: Docketing and Service Branch.

By May 28, 1985, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularly the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Elinor G. Adensam: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of the **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Herbert S. Sanger, Jr., Esq., General Counsel, Tennessee Valley Authority, 400 Commerce Avenue, E11B33, Knoxville, Tennessee 37902, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendments which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Chattanooga-Hamilton County Bicentennial Library, 1001 Broad Street, Chattanooga, Tennessee 37401.

Dated at Bethesda, Maryland, this 22nd day of April 1985.

For the Nuclear Regulatory Commission.

Elinor G. Adensam,

Chief, Licensing Branch No. 4, Division of Licensing.

BILLING CODE 7590-01-M

SMALL BUSINESS ADMINISTRATION

Reporting and Recordkeeping Requirement Under OMB Review

ACTION: Notice of Reporting and Recordkeeping Requirement Submitted for OMB Review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed reporting and recordkeeping requirement to OMB for review and approval, and to publish notice in the **Federal Register** that the agency has made such a submission.

DATE: Comments must be received on or before May 19, 1985. If you anticipate commenting on a submission but find that time to prepare will prevent you from submitting comments promptly, advise the OMB reviewer and the Agency Clearance Officer of your intent as early as possible before the comment deadline.

Copies: Copies of forms, request for clearance (S.F. 83), supporting statement, instructions, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Submit comments to the Agency Clearance Officer and the OMB Reviewer.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement; La Porte County, Porter County, City of Michigan City, IN

AGENCY: Federal Highway Administration (FHWA), DOT.
ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project located in LaPorte County, Porter County and the City of Michigan City, Indiana.

FOR FURTHER INFORMATION CONTACT: Mr. James E. Threlkeld, District Engineer, Federal Highway Administration, Federal Office Building, Room 254, 575 North Pennsylvania Street, Indianapolis, Indiana 46204, Phone (317) 269-7474.

SUPPLEMENTARY INFORMATION: The FHWA in cooperation with the Indiana Department of Highways (IDOH) will prepare an environmental impact statement (EIS) on a proposal to construct a 3.5 mile section of new 4-lane roadway between Interstate Route 94 and US Route 12 on the west side of Michigan City. The proposed roadway will be located within a 1.0 mile wide corridor generally following along and to the east of the LaPorte County-Porter County line. The proposed action will include a new interchange on Interstate Route 94 at the LaPorte County-Porter County line.

Completion of this proposed action will permit a direct south to north access from Interstate Route 94 to the planned East Unit Transit Center at the Indiana Dunes National Lakeshore. This proposed action will also improve access to the Lake Michigan recreational areas located within the Indiana Dunes National Lakeshore and in Michigan City. A reduction in traffic congestion along US Route 421 (Franklin Street) in Michigan City is also anticipated.

Various alternative alignments within the 1.0 mile by 3.5 mile corridor will be developed and evaluated in the EIS. Grade separation structures at the US Route 20 intersection and at three (3) railroad crossings will be considered. The evaluation of alternatives in the EIS will include a do-nothing action.

To ensure that the full range of issues related to this proposed action are addressed and that all significant issues are identified, those agencies, groups or individuals affected by or interested in the proposed action are invited to participate by sending their written comments to the FHWA. A formal Scoping Meeting will be held at 10:00 A.M., May 23, 1985, at the offices of the IDOH, Room 1201, State Office Building, 100 North Senate Avenue, Indianapolis, Indiana 46204. Public Information Meetings will be held during the early development phase of the proposed project. Dates and locations of such meetings will be advertised in newspapers having local distribution within the project area.

(Catalog of Federal Domestic Assistance Program No. 20.205 [Highway Research, Planning and Construction], the provisions of Executive Order 12372 regarding State and local inter-governmental review of Federal and Federally-assisted programs and projects apply to this program)

Issued on: April 18, 1985.

James E. Threlkeld,
District Engineer.

[T.D. 85-73]

Tuna Fish—Tariff-Rate Quota

The tariff-rate quota for the calendar year 1985, on tuna classifiable under item 112.30, tariff schedules of the United States (TSUS).

AGENCY: U.S. Customs Service, Department of the Treasury.
ACTION: Announcement of the quota quantity for tuna for Calendar Year 1985.

SUMMARY: Each year the tariff-rate quota for tuna fish described in item 112.30, TSUS, is based on the United States pack of canned tuna during the preceding calendar year.

EFFECTIVE DATES: The 1985 tariff-rate quota is applicable to tuna fish entered, or withdrawn from warehouse, for consumption during the period January 1, through December 31, 1985.

FOR FURTHER INFORMATION CONTACT: William J. Wagner, III, Head, Quota Section, General Programs Branch, Duty Assessment Division, Office of Commercial Operations, U.S. Customs Service, Washington, D.C. 20229 (202-566-8592).

It has now been determined that 97,495,800 pounds of tuna may be entered for consumption or withdrawn from warehouse for consumption during the Calendar Year 1985, at the rate of 6 percent ad valorem under item 112.30, TSUS. Any such tuna which is entered, or withdrawn from warehouse, for consumption during the current calendar year in excess of this quota will be dutiable at the rate of 12.5 percent ad valorem under item 112.34, TSUS.

Dated: April 23, 1985.

In FR Doc. 85–9688 beginning on page 16038 in the issue of Tuesday, April 23, 1985, make the following correction on page 16039: In the first column, in the seventh line, "120 days" should read "20 days".

BILLING CODE 1505–01–M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Implementation of Proclamation Concerning Duty-Free Treatment for Certain Articles in Trade in Civil Aircraft

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: This notice provides the effective date for implementation of duty-free treatment for certain articles in trade in civil aircraft.

EFFECTIVE DATE: April 29, 1985.

FOR FURTHER INFORMATION CONTACT: Alexander Platt, Associate General Counsel, Office of the United States Trade Representative (202) 395–7305.

SUPPLEMENTARY INFORMATION: Section 234 of the Trade and Tariff Act of 1984 (Pub. L. 98–573) authorized the President to proclaim modifications in enumerated items of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202) in order to provide duty-free coverage comparable to the expanded coverage provided by all other signatories to the Agreement on Trade in Civil Aircraft. Pursuant to that section, Presidential Proclamation 5291 of December 28, 1984 (50 FR 223) proclaimed modifications in various TSUS items and directed the United States Trade Representative to determine and publish the effective date of such modifications.

Accordingly, I have determined that the expanded coverage provided by other signatories to the Agreement is comparable to the expanded coverage to be provided by the United States under the terms of Presidential Proclamation 5291. I have further determined that the effective date of the additional duty-free treatment to be accorded by the United States shall be effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after the day after publication of this Notice.

William E. Brock,
United States Trade Representative.

LEGAL SERVICES CORPORATION BOARD OF DIRECTORS

Cancellation of Board Meeting

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: Published April 16, 1985, 50 FR 15035.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 9:00 a.m., Friday, April 26, 1985.

CHANGE IN MEETING: The Meeting of the Board of Directors of the Legal Services Corporation scheduled for April 26, 1985, at 9:00 a.m. is cancelled.

EXPLANATION OF CHANGE: The Chairman of the Operations and Regulations Committee, due to scheduling problems, will be unable to present any recommendations to the Board on April 26, 1985. It is the sense of the Chairman of the Audit and Appropriations Committee that the Committee will be unable to make any recommendations for Board action by April 26, 1985. Because action on recommendations of the two Committees constitute the major action items on the agenda of the previously announced meeting, the meeting is cancelled since there will be no items before the Board upon which action will be required.

CONTACT PERSON FOR MORE INFORMATION: Dennis Daugherty, Executive Office, (202) 272–4040.

Date Issued: April 24, 1985.

Dennis Daugherty,

Acting Secretary.

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES, INSTITUTE OF MUSEUM SERVICES

SUMMARY: This notice sets forth the agenda of a forthcoming meeting of the National Museum Services Board. This notice also describes the functions of the Board. Notice of this meeting is required under the Government in the Sunshine Act (Pub. L. No. 94–409) and regulations of the Institute of Museum Services, 45 CFR 1180.84.

TIME AND DATE: 10:00 a.m. May 31–June 1, 1985.

STATUS: Open and closed.

ADDRESS: Room M07, 1100 Pennsylvania Avenue, NW., Washington, D.C. 20506.

FOR FURTHER INFORMATION CONTACT: Mr. Robin N. Rapp, Executive Assistant to the National Museum Services Board, Room 510, 1100 Pennsylvania Avenue, NW., Washington, D.C. 20506 (202) 786–0536.

SUPPLEMENTARY INFORMATION:

The National Museum Services Board is established under the Museum Services Act which is Title II of the Arts, Humanities, and Cultural Affairs Act of 1976, Pub. L. 94–462. The Board has the responsibility for the general policies with respect to the powers, duties, and authorities vested in the Institute under this Title. Grants are awarded by the Institute of Museum Services after review by the Board.

The meeting of May 31–June 1 will be open to the public from 10:30 a.m. through discussion of agenda item number 7. The meeting will be closed to the public for a review of agenda item 8 pursuant to paragraphs 6, 9 (B), and other relevant provisions of subsection (c) of section 552 of Title 5, United States Code because the Board will consider information that may disclose: Information of a personal nature that disclosure of whch would constitute a cleary unwarranted invasion of privacy; and information the disclosure of which might significantly frustrate implementation of proposed agency action related to the award process.

The agenda for the meeting will be as follows:

I. Approval of the Minutes of March 15, 1985 Meeting
II. Director's Report
III. Regulatory and Legislative Update
IV. Conservation Program Update
V. Other Business
VI. Proposed Changes to GOS Application and Regulations
VII. Review of 1985 GOS Applications Processing
VIII. Review of 1985 GOS Applications

Dated: April 22, 1985.

Susan E. Phillips,

Director.

POSTAL SERVICE BOARD OF GOVERNORS

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 CFR 7.5) and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice that it intends to hold meetings at 1:00 p.m. on Monday, May 6, 1985, in Washington, D.C., and at 8:30 a.m. on Tuesday, May 7, 1985, in the Benjamin Franklin Room, U.S. Postal Service Headquarters, 475 L'Enfant Plaza, SW., Washington, D.C. As indicated in the following paragraph, the May 6 meeting is closed to public observation. The May 7 meeting is open to the public. The Board expects to discuss the matters stated in the agenda which is set forth below. Requests for information about the meetings should be addressed to the Secretary of the Board, David F. Harris, at (202) 245–3734.

At its meeting on April 1, 1985, the Board voted in accordance with the provisions of the Government in the Sunshine Act to close to public observation its meeting scheduled for May 6. (See 50 FR 13914, April 8, 1985.)

The meeting will involve a discussion of personnel matters.

Agenda

Monday Session

May 6, 1985—1:00 p.m. (Closed)

1. Discussion of Personnel Matters.

Tuesday Session

May 7, 1985—8:30 a.m. (Open)

1. Minutes of the Previous Meeting, April 1–2, 1985.
2. Remarks of the Postmaster General. (In keeping with its consistent practice, the Board's agenda provides this opportunity for the Postmaster General to inform the Members of miscellaneous current developments concerning the Postal Service. Nothing that requires a decision by the Board is brought up under this item.)
3. Quarterly Report on Financial Performance. (Mr. Cummings, Senior Assistant Postmaster General, Finance Group, will present the quarterly summary on financial performance.)
4. Quarterly Report on Service Performance. (Mr. Jellison, Senior Assistant Postmaster General, Operations Group, will present the quarterly summary on service performance.)
5. Consideration of a Tentative Agenda for the June 3–4, 1985, meeting of the Board in Washington, DC.

David F. Harris,

Secretary.

BILLING CODE 7710-12-M

8

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–909, that the Securities and Exchange Commission will hold the following meetings during the week of April 29, 1985.

A closed meeting will be held on Tuesday, April 30, 1985, at 10:00 a.m. Open meetings will be held on Tuesday, April 30, 1985, at 1:30 p.m. and on Thursday, May 2, 1985, at 2:00 p.m., in Room 1C30.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters amy be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10).

Commissioner Marinaccio, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the closed meeting scheduled for Tuesday, April 30, 1985, at 10:00 a.m., will be:

Formal orders of investigation.
Settlement of injunctive action.
Institution of administrative proceeding of an enforcement nature.
Institution of injunctive actions.
Litigation matter.

The subject matter of the open meeting scheduled for Tuesday, April 30, 1985, at 1:30 p.m., will be.

The Commission will meet the representatives of the Financial Executive Institute's Committee on Corporate Reporting to discuss matters of mutual interest including the accounting and reporting requirements under the Securities Act and the Securities Exchange Act as well as ongoing projects involving the appropriate accounting for pensions, income taxes and inflation. For further information, please contact Robert Burns at (202) 272–2130.

The subject matter of the open meeting scheduled for Thursday, May 2, 1985, at 2:00 p.m., will be.

The Commission will meet with the Investment Dealers Association of Canada to discuss issues of mutual interest relating to the internationalization of the world securities markets. For further information, please contact Andrew E. Feldman at (202) 272–2399.

At times changes in commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: John Stempel at (202) 272–2405.

John Wheeler,
Secretary.

Department of Labor

Employment Standards Administration,
Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions; Notice

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 5.1 (including the statutes listed at 36 FR 306 (1970) following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, 48 FR 19533 (1983) and of Secretary of Labor's Orders 9–83, 48 FR 35736 (1983), and 6–84, 49 FR 32473 (1984). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 5.1 (including the statutes listed at 36 FR 306 (1970) following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, 48 FR 19533 (1983) and of Secretary of Labor's Orders 6–84, 49 FR 32473 (1984). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Program Operations, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

Cancellation of General Wage Determination Decision

General Wage Decision Number TX84–4046, Bexar County, Texas is cancelled. Agencies with construction projects pending to which the cancelled decision would have been applicable should utilize the project determination procedure by submitting form SF–308. See Regulations Part 1, 29 CFR, section 1.5. Contracts for which bids have been opened shall not be affected by this notice. Also consistent with 29 CFR, 1.6(c)(3)(i), the incorporation of the cancelled decision in contract specifications, the opening of bids for which is within ten (10) days of the notice, need not be affected.

Supersedeas Decisions to General Wage Determination Decisions

The numbers of the decisions being superseded and their dates of publication in the **Federal Register** are listed with each State. Supersedeas decision numbers are in parentheses following the number of the decisions being superseded.

Florida: FL83–1084 (FL85–3024)	Oct. 28, 1983.

Signed at Washington, D.C., this 19th day of April 1985.

James L. Valin,

Assistant Administrator.

24 CFR Part 888

Section 8—Fair Market Rents for New Construction and Substantial Rehabilitation—All Market Areas; Interim Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 888

[Docket No. R-85-1224; FR-2079]

Section 8—Fair Market Rents for New Construction and Substantial Rehabilitation—All Market Areas

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Interim rule.

SUMMARY: This rule amends the Section 8 Fair Market Rents applicable to New Construction and Substantial Rehabilitation for all market areas in compliance with the requirements of Section 8(c)(1) of the U.S. Housing Act of 1937. Revised Section 8 Fair Market Rents (FMRs) must be published at least annually in the **Federal Register**. HUD published the last annual revision of the FMRs for Section 8 New Construction and Substantial Rehabilitation on February 8, 1984 at 49 FR 4892.

The amended Fair Market Rents reflect the changes which have occurred in the general level of market rents for recently completed or newly constructed dwelling units of modest design within each market area since their last Annual or Special (Interim) Revision.

DATES: Effective Date: After the comment deadline date set forth below, notice of the effective date of this rule will be published in the **Federal Register**.

Comments must be received by: May 28, 1985.

ADDRESS: Comments should be sent to the Rules Docket Clerk, Room 10276, Office of the General Counsel, Department of Housing and Urban Development, 451–7th Street SW., Washington, DC 20410–0500. Each person submitting a comment should include his/her name and address and refer to the docket number and title shown in the heading of this rule and give reasons for any recommendation. A copy of each comment submitted will be available for public inspection in the Office of the Rules Docket Clerk during regular business hours. In order to expedite consideration of comments, a copy of each comment should also be sent to the HUD Field Office having jurisdiction for the market area involved.

FOR FURTHER INFORMATION CONTACT: Edward M. Winiarski, Chief Appraiser, Valuation Branch, Technical Support Division, Office of Insured Multifamily Housing Development, 451–7th Street SW., Washington, DC 20410–8000, (202) 426–7624. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Fair Market Rents are based primarily on the level of rentals paid for recently completed or newly constructed dwelling units of modest design within each market area, as determined by HUD Field Office staff. They are estimates of rentals that prospective tenants who are not receiving Federal rental subsidies would be willing to pay for recently completed or newly constructed dwelling units of modest design.

The revised Fair Market Rents in Schedule A of Part 888 as adopted by this Interim Rule, have been trended ahead to October 1, 1986, to allow for the period of construction or rehabilitation of the projects involved.

This interim rule includes Fair Market Rents for 0, 1, 2, 3, and 4 or more bedroom units in five structural categories (detached, semi-detached/row, walkup, elevator 2–4 story, and 5 plus story). Construction or rehabilitation of elevator projects for families with children is legally prohibited unless there is no practical alternative. Fair Market Rents for family units in elevator structures have been listed in these schedules for appropriate market areas. However, the determination that there is "no practical alternative" must be made on a project by project basis.

In addition, regulations provide that high-rise elevator projects for *the elderly* may be approved *only* if HUD determines that high-rise construction is appropriate after taking into account land costs, safety and security factors.

Proposals involving combinations of structural types and unit sizes for which Fair Market Rents have not yet been published may not be approved until the applicable Fair Market Rents are published and become effective.

A discussion of the applicability of a particular schedule of Fair Market Rents, where the rents are revised downward, follows:

1. In the State Agency Program (under 24 CFR Part 883) the Fair Market Rents in effect on the date the "Application for Assignment of Portion of Set-Aside to Specific Project" is submitted to HUD shall apply, except in those instances where a Proposal or Preliminary Proposal is submitted before the Application. In the latter cases, the Fair Market Rents that are in effect on the date of the submission of the Proposal or Preliminary Proposal shall apply.

2. For New Construction and Substantial Rehabilitation Projects (Under 24 CFR Parts 880, 881, and 885) which are not subject to a Notice of Fund Availability (NOFA) nor to a deadline in a NOFA, the Fair Market Rents in effect on the date that the Preliminary Proposal or Section 202 Application for Fund Reservation is submitted shall apply.

3. For New Construction and Substantial Rehabilitation Projects which are subject to deadlines stated in NOFAs, the Fair Market Rents stated in the NOFA shall apply.

For all projects where the Fair Market Rents are revised upward after the date of the processing stage specified above, the revised Fair Market Rents shall apply to all subsequent processing in reviewing Contract Rents.

Interested persons will have a 30-day comment period after publication of this Interim Rule in which to submit comments on the revised Fair Market Rents contained in Schedule A. If evaluation of comments submitted during that period indicates a need to change any of the Fair Market Rents in Schedule A, such Fair Market Rents will be withdrawn or revised, as appropriate.

In addition, interested persons may submit comments or other information (with adequate documentation) on Fair Market Rents at any time, even after expiration of the 30-day public comment period provided in this rule. Any data submitted will be considered in initiating interim revisions to the Fair Market Rent schedules. In order to expedite consideration of your submission, please send a copy to the HUD Filed Office having jurisdiction for the market area involved.

HUD regulations in 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, contain categorical exclusions from their requirements for the actions, activities and programs specified in § 50.20. Since the amendments made by this rule are within the exclusion set forth in § 50.20(1), no environmental assessment is required for this rule, and no environmental finding has been prepared.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation. Analysis of the rule

indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in cost or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule is not listed in the Department's Semiannual Agenda of Regulations published on October 22, 1984 (49 FR 41684), pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

Pursuant to the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. Although this rule will have an effect on developers and owners of Section 8 projects, some of whom may constitute small entities, it is not expected that the economic impact on them will be significant.

The Catalog of Federal Domestic Assistance Program number and title for the activities covered by this rule is 14.156, Lower Income Housing Assistance Program (Section 8).

List of Subjects in 24 CFR Part 888

Rent subsidies.

Accordingly, Schedule A of 24 CFR Part 888 is revised to read as set forth below.

Authority: Section 8(c)(1) of the U.S. Housing Act of 1937, 42 U.S.C. 1437f(c)(1); Section 7(d), Department of HUD Act, 42 U.S.C. 3535(d).

Dated: March 19, 1985.

Shirley McVay Wiseman,

General Deputy Assistant Secretary for Housing-Deputy Federal Housing Commissioner.

Schedule A—Fair Market Rents for New Construction and Substantial Rehabilitation (Including Housing Finance and Development Agencies Program)

These Fair Market Rents have been trended ahead to October 1, 1986, to update the current Fair Market Rent schedules which these revised schedules will replace.

Note.—The Fair Market Rents for (1) dwelling units designed for the elderly or handicapped are those for appropriate size, units, not to exceed 2 bedrooms for the elderly, multiplied by 1.05; (2) congregate housing dwelling units are the same as for noncongregate units; (3) single room occupancy dwelling units (applicable only for Substantial Rehabilitation projects) are 75 percent of those for zero bedroom units of the same structural type; (4) living units in a group home (each composed of a bedroom plus a proportionate part of common living space which is ordinarily included in a living unit) are those for zero bedroom or one bedroom units of the walkup structural type (or, if the group home contains an elevator, of the elevator 2–4 story structural type). In group homes, one bedroom Fair Market Rents may be applied only when the bedroom space plus the proportionate part of the common space is at least 450 square feet; (5) manufactured homes (unit and space) shall be 95 percent of the rents for detached units of the appropriate bedroom size (except that where a manufactured home Fair Market Rent is given on the schedule for the area, the amount on the schedule shall be the Fair Market Rent); (6) manufactured home spaces in newly-constructed or substantially rehabilitated manufactured home parks shall be the Fair Market Rents for spaces published for the Existing Housing Program under Schedule D, multiplied by 1.25.

All rents computed in accordance with this note shall be rounded down to the nearest whole dollar.

Similarly, all Fair Market Rents increased by up to 10 percent with the approval of the HUD Field Office Manager, or by up to 20 percent with the approval of the HUD Assistant Secretary for Housing should have the result rounded down to the nearest whole dollar.

The decision relative to the selection of appropriate FMRs for use in project processing must be based upon *an entire schedule* rather than selectively choosing the highest unit rents from both the current effective FMR schedule and a prior published one for that market area.

Since the 1984 FMRs were published, the market areas for the State of New Mexico have been consolidated into five areas. For the convenience of the user, last year's market areas are listed below, under their new market area designations:

Albuquerque

Albuquerque
Isleta

Clovis

Alamogordo
Artesia
Carlsbad
Clovis
Hobbs
Las Cruces
Mescalero
Socorro
Truth or Consequences

Sante Fe

Fort Sumner
Las Vegas
Pojoaque
Raton

21 CFR Part 10 et al.

National Environmental Policy Act; Policies and Procedures; Final Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 79N-0335]

21 CFR Parts 10, 25, 71, 170, 171, 312, 314, 511, 514, 570, 601, 812, 813, and 861

National Environmental Policy Act; Policies and Procedures

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is setting forth its policies and supplemental procedures for compliance with the National Environmental Policy Act of 1969 (NEPA) and the Council on Environmental Quality's (CEQ) regulations.

EFFECTIVE DATE: July 25, 1985. For additional information concerning this effective date, see "Paperwork Reduction Act" appearing in the preamble of this document.

FOR FURTHER INFORMATION CONTACT: John C. Matheson, Center for Veterinary Medicine (HFV-310), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1880.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of December 11, 1979 (44 FR 71742), FDA proposed to revise its rules governing the preparation of environmental impact documents under section 102(2)(C) of the National Environmental Policy Act of 1969. FDA had previously issued regulations (42 FR 19986; April 15, 1977) that responded to guidelines on NEPA issued by CEQ in the **Federal Register** of August 1, 1973 (38 FR 20550). FDA's 1979 proposal responded, in turn, to CEQ's regulations (40 CFR Parts 1500–1508) published in the **Federal Register** of November 29, 1978 (43 FR 55978) that were "designed to make the NEPA process more useful to decisionmakers and the public; to reduce paperwork and the accumulation of extraneous background data; and to emphasize real environmental issues and alternatives" (40 CFR 1500.2(b)). The regulations also implemented Executive Order 11514 (March 5, 1970), as amended by Executive Order 11991 (May 24, 1977). CEQ's 1978 regulations required FDA to review its policies, procedures, and regulations to ensure full compliance with CEQ's implementation of NEPA. To achieve this compliance, FDA must revise its regulations in Part 25 (21 CFR Part 25) that implement NEPA.

After consultation with CEQ, FDA published proposed revisions of Part 25 in the **Federal Register** of December 11, 1979 (44 FR 71742). The agency received comments from 5 trade associations, 10 regulated firms, and 2 other Federal agencies.

I. Subpart A—General Provisions

Subpart A states the purposes of the rule, describes FDA's general approach in implementing NEPA and the CEQ regulations, and provides definitions.

Procedural Issues

1. Comments objected to FDA's decisions, described in the preamble to the proposal, that: (1) FDA would follow the procedures in the proposal pending publication of the final rule, even though applicants and petitioners were not so obligated; and (2) FDA would not provide a detailed preamble with the proposed rule, because it responds to requirements established by the CEQ regulations. The comments contended that one or both of these decisions violated the Administrative Procedure Act.

FDA disagrees with the comments. FDA concluded that as a Federal agency it was required to follow the CEQ regulations on an interim basis before issuing a final rule. Because, as FDA stated in the proposal, the public was not obligated to comply with the revised procedures until they were published as a final rule, the agency's decision to follow its proposal clearly did not violate the Administrative Procedure Act.

FDA did not publish a detailed preamble with the proposal because the proposed regulation itself was unusually detailed and because many of the changes were required by the CEQ regulations, the provisions of which had been discussed by CEQ in its preamble and regulations and at its public meetings on these regulations. FDA has concluded, nevertheless, that the requests for a detailed preamble, and other comments received, revealed that some of the proposed revisions were unclear. Therefore, this final rule contains a detailed preamble, and FDA has clarified several provisions of the final rule.

Changes From Previous Regulations

2. Comments generally expressed a preference for FDA's NEPA regulations now found in Part 25 over the proposed revisions. Several comments contended that the proposal would require excessive paperwork and information. Some comments argued that additional time and money would have to be expended to comply with the rule as proposed.

FDA believes that the comments misunderstood the proposal. Some comments construed certain proposed provisions to require more information and data than FDA intended. Further, based on its experience with the proposed changes since December 1979, FDA believes that the revisions will reduce the time and resources expended by applicants and petitioners to comply with NEPA with no adverse effects on the environment. Although change may at first be a source of confusion, FDA is confident that the revised regulations will simplify compliance with NEPA.

In revising its environmental regulations, FDA has preserved as many of the substantive provisions of Part 25 as is possible consistent with the CEQ regulations and current environmental impact assessment techniques. (To aid discussion of the new revision, FDA will refer to the regulations now found in Part 25 as "the previous regulations".) Preserving to the extent possible the substantive provisions in the previous regulations benefits applicants and petitioners by providing continuity. FDA has, however, attempted to delete or change provisions which experience has indicated were unnecessary, ambiguous, or unrelated to environmental impact review. FDA has also, in this final rule, rearranged certain regulatory provisions to aid readers interested in finding the provisions applicable to particular FDA-regulated articles.

To implement CEQ's regulations, FDA proposed two significant changes in its NEPA process. First, as required by 40 CFR 1507.3, FDA revised its previous three-level classification of actions subject to environmental review to conform to the two-level classification prescribed by CEQ. Second, FDA replaced the Environmental Impact Analysis Report (EIAR) with an Environmental Assessment (EA). These changes carry out the objective of CEQ's regulations of streamlining the NEPA process by concentrating on environmental issues, eliminating considerations irrelevant to environmental impact assessment, reducing the size and number of NEPA documents, decreasing the time required to prepare and review these documents, and increasing the usefulness of NEPA documents as decisionmaking tools.

Of the three classification levels in FDA's previous regulations, the first environmental review level consisted of actions exempted from environmental review under § 25.1(d). The exemptions were roughly equivalent to the categorical exclusions used in this final

rule, but the previous exemptions lacked the criteria that are now being adopted for exclusions.

The second environmental review level in the previous regulations consisted of classes of actions conditionally exempted from detailed environmental analysis. Conditional exemptions were listed in previous § 25.1(f). Their purpose was to establish large classes of actions in which only limited environmental analyses were required. Information requirements, presented as criteria, were included with most § 25.1(f) actions. The information required to satisfy the criteria varied from extensive to minimal, depending on the class of action involved. The intent of this variation within the conditional exemption group was to permit exemption from the requirement of a full environmental analysis only for those specific actions that resulted in limited environmental introductions due to use of a product that would be marketed as a result of FDA's approval. Additionally, for certain actions FDA required limited information on environmental introductions resulting from the manufacture of the product. A person requesting a conditional exemption was required to prepare a publicly available Statement of Exemption containing all the required information, and the agency prepared a determination that the conditional exemption applied and that the requirements for a Statement of Exemption had been met. Frequently, applicants submitted Statements of Exemption which, after agency review, had to be corrected and resubmitted to be suitable for public display.

The third environmental review level in the previous regulations consisted of classes of actions for which an EIAR was required. The previous EIAR is roughly equivalent to the EA under the CEQ regulations and this final rule.

In the present revision of Part 25, the agency has continued the practice found in previous Part 25 of requiring EA's for all major classes of actions (§ 25.22), unless an action also falls in one of the classes of actions qualifying for a categorical exclusion (§§ 25.23 and 25.24, corresponding to an exemption in the previous regulations, § 25.1 (d) and (f)). Hence, although FDA has conformed to CEQ terminology, it has continued in the revisions the same substantive treatment of most classes of actions that they received in previous Part 25, thus providing continuity for applicants and petitioners. In addition, FDA has granted categorical exclusions to several additional classes of actions that did not enjoy exemptions. These additional exclusions were based on experience showing that little or no environmental information on product use or manufacture had been required for actions in these classes. FDA could not, however, convert to categorical exclusions the previous conditional exemptions for some of the classes of actions described in previous § 25.1(f) (1) and (3). These classes require more environmental analysis initially because FDA has sometimes had to require additional extensive submissions to fulfill the agency's environmental review responsibilities, and because the agency could neither justify scientifically, nor prepare criteria for, categorical exclusions for all actions within these classes. Although FDA has thus been unable to grant categorical exclusions for these actions, FDA has granted more limited regulatory relief by providing for abbreviated EA's for these actions (final § 25.31(b); proposed § 25.31(e)).

By categorically excluding 10 classes of actions in the previous regulations for which Statements of Exemption previously were required to be submitted (listed in previous § 25.1(f) (2) and (4) through (12)), FDA is sparing many applicants and petitioners the task of first preparing Statements of Exemption and later submitting corrections of any documents found inadequate. The agency also is conserving its resources by reducing the need for repetitive review and evaluation of these documents.

Furthermore, by eliminating the EIAR in favor of the EA, FDA is adopting the approach that experience has shown was clearer to applicants and petitioners. The EIAR format (previous § 25.1(j)) required applicants and petitioners to address such topics as "pollution," "toxic substances," and "human values" without guidance as to when or in what manner these topics were to be addressed. Without intensive case-by-case guidance, applicants and petitioners usually were unable to prepare satisfactory EIAR's. In 1977, the agency began to provide preparers of EIAR's with guidance in the form of an Environmental Impact Operational Directive. The operational directive emphasized how to identify and evaluate potential environmental impacts using information on the product's physical and chemical properties and on the amounts and concentrations of chemical substances expected to be introduced into various compartments of the environment. If the information submitted suggests potential impacts, laboratory screening tests may be indicated unless the scientific literature provides the needed information. The approach suggested in the operational directive has proved much more successful than the EIAR format in helping applicants and petitioners to prepare adequate EIAR's. Therefore, in the new EA format, FDA has adopted the format of the operational directive rather than that previously used for EIAR's. Applicants and petitioners who have tried the approach suggested in the operational directive will find the new EA procedure quite similar.

Additional changes that will reduce the burden of complying with NEPA, with no adverse effects on the environment, are described elsewhere in this preamble. Among these are a change in § 25.22(c), in response to comments, that reflects current agency practice by specifying that persons who propose to destroy a product that had been recalled at the agency's request or that had been enjoined, seized, or detained in an action initiated by FDA are required to submit an EA or a claim for categorical exclusion only if FDA requests them to do so. The agency is further streamlining this process by first considering, in each case, the information at hand. If this information is sufficient to determine either what the environmental impact is or that a categorical exclusion applies, the person responsible for the product will not be asked to submit an EA or a claim for exclusion.

In another change made in response to comments FDA revised proposed § 25.25 on environmental impact reconsideration of already-approved actions. FDA has concluded that supplements and amendments to already-approved actions need not automatically trigger reconsideration of an original action. The agency will treat a supplement or an amendment as requiring reconsideration of the original action when it has information indicating that there is a need to do so. In addition, in the final rule FDA has revised several proposed requirements in § 25.31a prescribing the format for an EA, partly by tailoring the EA format for industry-initiated actions to omit requirements appropriate only for EA's for FDA-initiated actions. Additional format requirements for agency-initiated actions are specified separately. Also, information requirements relating to the environmental impact of a manufacturing process have been reduced to the items required in the EIAR format in previous § 25.1(j).

In sum, the agency concludes that the revisions made by the final rule will reduce the time and costs associated with the NEPA process, compared both

to FDA's previous regulations and to the proposal, and without a significant increase in the risk of adverse environmental impacts.

FDA encourages industry to consult with the agency before submitting applications or petitions to prevent overlooking applicable categorical exclusions, to obtain guidance in the preparation of EA's and to acquire relevant data. FDA also encourages applicants and petitioners to refer to the scientific literature to obviate unnecessary testing.

3. Nine comments objected that some of the information required in the EA format in proposed § 25.31 duplicated requirements under other Federal, State, and local laws. Three of these comments suggested that, before FDA approves a proposed action, it should obtain from the applicant or petitioner a certification that all EPA regulatory obligations had been met. The suggested procedure would be similar to the conditional exemption process applied to certain of these applications under § 25.1(g)(2) of the previous regulations.

The agency has considered these comments and has concluded that the existence of Federal, State, and local regulation of air and water pollution and of hazardous wastes does not relieve FDA of its independent obligation under NEPA to consider, in its decisionmaking, all relevant environmental effects.

For several reasons, compliance with emissions standards does not satisfy the obligation under NEPA to analyze the environmental effects of a proposed action. First, emissions standards generally apply only to the environmental impacts of production and processing. Because FDA recognizes these impacts as important, the agency requires that any applicable emissions standards be specified in the EA, along with a certification that they are or will be met by the petitioner or applicant. Frequently, however, there are no applicable emissions standards for a new product or chemical subject to FDA approval, in which case certification of compliance with applicable standards would have little meaning.

Second, even assuming compliance with emissions standards that apply to a new chemical, adverse environmental impacts still may occur. In contrast to NEPA's emphasis on environmental impact, as discussed below, emissions standards are often not based solely on this factor. As explained by Cairns, emissions standards are influenced by available treatment technology; the economics of treatment and removal; social factors; and local, State, and national political factors. In sum, emissions standards define concentrations of emissions for which the environmental and health risks are acceptable to society (Cairns, J., Jr., "Estimating Hazard," *Bioscience*, 30:101–107, 1980).

The term "environmental effects," as defined by CEQ, 40 CFR 1508.8, includes effects not usually addressed by the other Federal, State, or local laws referred to in the comments. CEQ defines "effects" to include "ecological * * *, aesthetic, historic, cultural, economic, social, or health [effects], whether direct, indirect, or cumulative. Effects may also include those resulting from actions which may have both beneficial and detrimental effects, even if on balance the agency believes that the effect will be beneficial" (40 CFR 1508.8). Thus, mere compliance with emissions standards does not guarantee compliance with the analysis requirement of NEPA, as implemented by CEQ.

Third, emissions standards do not regulate environmental effects of the use or disposal of an FDA-regulated product. These modes of environmental introduction may be significant, even though manufacturing emissions are minor by comparison. For example, one of the primary sources of chlorofluorocarbons entering the stratosphere was from the use of products containing chlorofluorocarbons as aerosol propellants. Assisted by other Federal agencies, FDA prepared an EIS which analyzed the environmental effects of these products. The agency subsequently prohibited the use of chlorofluorocarbons as aerosol propellants based on the health and environmental effects involved. Because emissions standards do not regulate environmental effects of product use or disposal, FDA has required more environmental information in EIAR's than would be required only to evaluate the environmental effects of the manufacture of FDA-regulated products.

In sum, a certification that all applicable emissions standards are met by an applicant or petitioner would not cover all the potential environmental effects within the scope of FDA's NEPA review when the agency evaluates chemical entities that are proposed to be marketed for new or additional uses.

4. Other comments discussed the potential for duplication in that EPA regulates products, such as pesticides subject to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and products subject to the Toxic Substances Control Act (TSCA), that also may be subject to FDA requirements.

FDA concedes that the same substance may need to be the subject of separate environmental effects analyses for EPA and FDA. Although both agencies have worked to eliminate duplication of effort in the environmental impact evaluation of substances regulated by both agencies, applications or petitions submitted to FDA frequently involve a different use of the product than the use(s) reviewed by EPA, and the patterns of environmental introduction often vary. Accordingly, a document done for one agency may not suffice as a NEPA document for the other agency. Furthermore, data filed with EPA under FIFRA and TSCA are often confidential and not available to FDA, while FDA is required by NEPA to make reports to the public on the environmental impact of its proposed actions and to explain how these effects were considered in decisionmaking. FDA has, nevertheless, provided added guidance in § 25.31a(b)(6) on how data developed for EPA registrations can be used to develop the required NEPA documents for FDA. The applicant or petitioner may use these data to analyze the potential environmental impacts of the FDA-regulated use of a product, but must present it to FDA in an EA that can be made publicly available. This approach is similar in purpose to the CEQ regulations (40 CFR 1500.4, 1506.2, and 1506.3) that provide, where appropriate, for the joint preparation or acceptance, or both, of environmental documents by two or more agencies.

5. Two comments contended that FDA should consider environmental impact considerations other than those covered by NEPA. One comment cited regulations of the Advisory Council on Historic Preservation (36 CFR Part 800) which, among other things, explain how a Federal agency's responsibilities under the National Historic Preservation Act of 1966 should be integrated with its NEPA responsibilities. The comment suggested that FDA's final NEPA regulations include a section on the agency's responsibilities under the National Historic Preservation Act. The other comment noted that there was no apparent integration into FDA's proposed NEPA regulations of the many other statutes and executive orders, all listed in the HHS General Administrative Manual implementing NEPA, requiring various environmental impact considerations. The comment asked whether these considerations would be conducted separately.

FDA agrees that the final regulations should describe FDA's responsibility to consider environmental impact under requirements other than NEPA. FDA has added § 25.5 (b) and (c) to the final rule

to clarify the agency's intent that NEPA reviews cover all relevant environmental considerations. Also, the EA formats in § 25.31 now refer to consideration of effects of an agency action on historic places and endangered species as these may be affected by some actions. The applicability of other statutes and executive orders will be considered on a case-by-case basis. It is FDA's policy that, where feasible, all environmental considerations relating to a proposed action shall be included in the required NEPA document.

Terminology

Certain proposed definitions have not been included in final § 25.15 because the terms defined are not used in the final rule.

6. Two comments were received regarding the agency's definition of "toxic substance," § 25.15(b)(6), intended solely for use in this rule. Toxic substance was defined in general terms, and a working definition also was provided to aid in determining whether a particular substance is "toxic." One comment suggested that the working definition be deleted, and the other suggested that a single test organism be specified in the working definition.

The agency had considered both of the approaches suggested in the comments when it prepared the proposed definition of "toxic substance." The term is important, because it is used in the criteria for categorical exclusions in § 25.24 and in the requirements for EA's in § 25.31. Because the general definition of the term is informative but lacks the precision needed for determining consistently whether proposed actions are categorically excluded, FDA added the working definition as well. Although it might appear to be more convenient to limit the working definition to a single test organism, doing so would not be as sufficiently comprehensive for predicting environmental effects. The varied physical and chemical characteristics of, and the varied uses of, FDA-regulated products result in enormously varied environmental introductions. Many different organisms may be exposed to these varied introductions. Although comparative toxicology data are now quite limited, they nevertheless suggest that considerable variation exists in the sensitivity of aquatic, terrestrial, and microbial organisms to test chemicals.

Accordingly, FDA has no scientific basis to limit to a single test organism the working definition provided in the definition of "toxic substance." The agency may determine later that a single test organism can be specified if an adequate comparative toxicology data base has been developed for environmental impact of substances on test organisms.

Therefore, the agency has left essentially unchanged its proposed definition of "toxic substance." The definition provides guidance but leaves flexibility for individual cases.

II. Subpart B—Agency Actions Requiring Environmental Consideration

Subpart B discusses agency actions subject to environmental consideration as required in § 1507.3 of the CEQ regulations. The EA and the EIS are the two documents used in this consideration. The shorter EA serves as the basis for FDA's determination of the need for an EIS, which is more detailed.

General Procedures

Section 25.20 explains that the environmental consideration procedures in Subpart B apply to all FDA actions not covered by environmental documents prepared under FDA's previous regulations. These actions are individually subject to analyses of their potential environmental effects in an EA or an EIS unless these actions are categorically excluded under § 25.24.

Actions Requiring an EIS

Section 25.21 states that there are no classes of agency actions for which it routinely is necessary to prepare an EIS under 40 CFR 1507.3. Section 25.21 is equivalent to § 25.1(a)(1) of FDA's previous regulations. Because the agency could not identify any classes of actions that would routinely require the preparation of an EIS, any determination to prepare an EIS for a proposed action will be based on the case-by-case evaluation of the EA.

Actions Requiring an EA

Section 25.22 lists 18 classes of actions that generally require the preparation of an EA in the applicable format described in § 25.31. Individual actions in one of these classes may qualify for categorical exclusion under §§ 25.23 and 25.24, in which case no EA is needed. When submitted, an EA is evaluated by FDA to determine whether an EIS is necessary. After review of the EA, FDA issues either a notice of intent to prepare an EIS or a finding of no significant impact (FONSI), in which case no EIS is required. Section 25.22 corresponds to § 25.1(a)(2) of the previous regulations.

In the final rule, FDA has rearranged the listing of actions requiring an EA, unless categorically excluded, to aid readers interested in finding the provisions applicable to particular FDA-regulated articles. A cross-reference list for § 25.22(a) of this final rule, with corresponding provisions of the proposed rule and previous Part 25, follows:

Final rule (Section)	Proposed rule (Section)	Previous part 25 (Section)
25.22(a)(1)	25.22(a)(1)	25.1(b)(1)
25.22(a)(2)	25.22(a)(2)	25.1(b)(2)
25.22(a)(3)	25.22(a)(3)	25.1(b)(3)
25.22(a)(4)	25.22(a)(4)	25.1(b)(4)
25.22(a)(5)	25.22(a)(17)	25.1(b)(13)
25.22(a)(6)	25.22(a)(6)	25.1(b)(6), (7)
25.22(a)(7)	25.22(a)(14)	25.1(b)(15)
25.22(a)(8)	25.22(a)(14)	25.1(b)(15)
25.22(a)(9)	25.22(a)(13)	25.1(b)(16)
25.22(a)(10)	25.22(a)(11), (12)	25.1(b)(11), (12)
25.22(a)(11)	25.22(a)(15)	25.1(b)(6)
25.22(a)(12)	25.22(a)(17)	25.1(b)(16)
25.22(a)(13)	25.22(a)(17)	25.1(b)(16)
25.22(a)(14)	25.22(a)(8)	25.1(b)(8), (14)
25.22(a)(15)	25.22(a)(10)	25.1(b)(10)
25.22(a)(16)	25.22(a)(5)	25.1(b)(5)
25.22(a)(17)	25.22(a)(9)	25.1(b)(9), (14)
25.22(a)(18)	25.22(a)(16)	25.1(b)(16)
25.22(a)(19)	25.22(a)(17)	25.1(b)(16)

7. Many comments on proposed § 25.22(a) suggested that certain actions listed as subject to EA's should be categorically excluded. The comments concerned various applications and petitions for FDA's approval to market products under the Federal Food, Drug, and Cosmetic Act or the Public Health Service Act. These included approval or issuance of licenses for biological products (three comments), approval of new drug applications (NDA's) and abbreviated new drug applications (ANDA's) (six comments); approval of new animal drug applications (NADA's) and supplements and amendments to NADA's (two comments); approval of requests for certification of new antibiotic drugs (four comments); approval of food additive petitions (one comment); approval of color additives (one comment); withdrawal of approvals of drugs, medical devices, food or color additives, and biological products (one comment); amendments of or exemptions from existing approvals (one comment); and approval of device premarket approval applications or declarations that product development protocols have been completed for medical devices (one comment). A comment suggested a limited EA for certain actions. None of these comments included substantive information to support the suggested blanket eliminations of the EA requirement.

Similar comments were submitted when FDA in 1974 proposed revisions of its environmental regulations (39 FR 13742). The agency concluded then, as it does now after several years of experience, that these classes of actions cannot be categorically excluded from preparation of an EA, which enables

FDA to decide whether an EIS is required. CEQ's regulations require agencies to delineate clearly why actions are excluded from environmental consideration (40 CFR 1507.3). FDA cannot state categorically that all actions in each of these broad classes do not "individually or cumulatively have a significant effect on the human environment" (40 CFR 1508.4). These classes of actions therefore cannot be categorically excluded from the requirement to prepare an EA. FDA has, however, developed criteria for categorical exclusion of specified subsets of many of the actions listed in § 25.22(a). With respect to these subsets of actions, FDA can clearly delineate why environmental impact consideration is not needed, and is granting them categorical exclusions in § 25.24 of the final rule.

8. Two comments suggested that for agency-initiated withdrawal of approvals of drugs, medical devices, food or color additives, and biological products, referred to in proposed § 25.22(a)(13) and final § 25.22(a)(9), the agency, not the sponsor, should prepare the EA.

FDA agrees with the comments. The agency has always prepared and will continue to prepare environmental documents for FDA-initiated actions. A major consideration in EA's on actions to withdraw approval of products is the environmental effects that may be expected as a result of substitute products. Adequate EA's submitted by petitioners and applicants before their products were approved are useful later in determining potential impacts of substitution of some products for others. If adequate EA's were filed for the products proposed for withdrawal or for their substitutes, there is less need for FDA to request manufacturers to submit information or for FDA to undertake its own review of the matter.

9. Section 25.22(b) requires petitioners and applicants who request FDA to take certain actions to prepare and submit an EA with these requests unless the action qualifies for categorical exclusion under §§ 25.23 and 25.24. Section 25.22(b) is substantively the same as that in previous § 25.1(h), as well as the proposal.

10. Section 25.22(c) requires persons proposing to dispose of FDA-regulated products under the conditions described in § 25.22(a)(2) and (3) to prepare and submit an EA with those proposals when requested to do so by the agency. The final rule differs from previous § 25.1(a) and (i) and from the proposal in that an EA is required for dispositions of products only when it is requested in writing by the agency. This change was made because such persons generally are unaware of NEPA requirements because of the mechanism through which such actions are initiated, i.e., the persons are not seeking approval of products but responding to regulatory actions involving violative products. Because it is generally necessary for FDA to inform these persons of the requirement of an EA, § 25.22(c) codifies the procedure. FDA will not make a written request for an EA without first determining either that an EA is definitely needed for the proposed action or that FDA cannot decide whether a categorical exclusion in § 25.24 applies without additional information.

11. A comment interpreted proposed § 25.22(c) in conjunction with proposed § 25.24(d)(11) (final § 25.24(a)(4)) to mean that EA's will be required for industry-initiated recalls that were not requested by FDA and that such actions would not qualify for categorical exclusion under proposed § 25.24(d)(11).

FDA did not intend this interpretation. Industry-initiated recalls of FDA-regulated products are not considered to be agency actions and, therefore, do not require consideration under NEPA.

12. A comment suggested that a time limitation be added to § 25.22(c) to require that FDA authorize destruction of the affected article within 60 days of the submission of the EA.

The agency concludes that it cannot set a specific time limit, starting with the submission of an EA, by which it will authorize the destruction of a recalled, detained, or enjoined article. The agency is nevertheless committed to the timely completion of the NEPA requirements applicable to such actions. When relatively safe methods of disposition of toxic substances are available, the identification of these methods in an EA and the subsequent preparation of a finding of no significant impact (FONSI) do not normally require 60 days. However, in those cases where no methods are available that would destroy or contain the toxic substance and it is reasonable to expect that significant environmental effects will occur as a result of one or more of the available methods that are being considered, an EIS may be required. Preparation and public review of EIS's normally require more than 60 days.

13. Section 25.22(d) states that the agency is responsible for assuring the accuracy of information contained in an EA, as required by 40 CFR 1506.5(b), and that the agency will decide whether an EIS is needed based on the information in the EA. The responsible agency official then prepares either a Notice of Intent to prepare an EIS or a FONSI, whichever is appropriate. This paragraph is similar to previous 21 CFR 25.1(m) and is virtually identical to the proposal of this rule.

Procedures for Categorical Exclusions

14. Section 25.23 describes generally the procedures to be followed for actions that are listed in § 25.24 as categorically excluded from the requirement of an EA. To be eligible for an exclusion, sufficient information about each proposed action must be provided to demonstrate to FDA that the action is within an excluded category and meets the criteria for the applicable categorical exclusion. For FDA-initiated actions, the agency determines whether an action is eligible for categorical exclusion. All of the exemptions and some of the conditional exemptions listed in FDA's previous regulations, 21 CFR 25.1 (d) and (f), have been included as categorical exclusions in the revised regulations. New exclusions also have been added.

15. As mentioned above, some classes of actions that were conditionally exempted in previous §§ 25.2(f) (1) and (3) have not been categorically excluded. FDA's experience has been that considerable environmental data and manufacturing information have been required to obtain conditional exemptions for these classes of actions. Under the previous regulations, this information was provided in a publicly available "Statement of Exemption." However, CEQ's regulation, 40 CFR 1507.3, does not allow agencies to require applicants and petitioners to submit such information to qualify for categorical exclusions. One of the objectives of CEQ's regulations is to reduce paperwork and confusion by requiring consistent use of environmental documents throughout the Federal government (43 FR 55979; November 29, 1978). In addition, FDA lacks the information it would need to exclude those actions formerly covered by the conditional exemptions in §§ 25.1(f) (1) and (3) (see § 25.31a(b) of the final rule). Therefore, for these actions FDA is discontinuing the use of conditional exemptions and Statements of Exemption and is instead providing guidance on the information needed for inclusion in abbreviated EA's. The information needed in these abbreviated EA's focuses on the potential environmental impacts at this site(s) of manufacture and on the use of existing data to assess potential impacts resulting from use of the regulated products. This information is comparable to that needed previously to

apply the criteria for conditional exemptions in previous §§ 25.1(f) (1) and (3) and to provide the manufacturing information required in previous § 25.1(g)(2). The previous conditional exemptions treated as abbreviated EA's in this rule are discussed individually in this preamble in § 25.31a below.

16. One comment suggested that the actions that were conditionally exempted in previous § 25.1(f)(1)(iii) be granted a categorical exclusion in the new regulations. Previous § 25.1(f)(1)(iii) provided a conditional exemption for:

> A drug, animal drug, or biological product, which, in chemical structure or biological composition, or known pharmacological properties and indications for use, is identical, similar, or related to a drug, animal drug, or biological product which is already being marketed, and there is no reason to conclude that the marketing of such an additional drug, animal drug or biological product will change the overall use pattern or the existing market for the article involved.

No information was submitted to support this suggestion or to provide for consideration within the categorical exclusion framework of environmental effects due to manufacturing.

The agency concludes that previous § 25.1(f)(1)(iii) will not be incorporated as a categorical exclusion in this rule. The agency has, however, developed categorical exclusions for changes in applications or licenses for previously approved drugs, biological products, and animal drugs (§§ 25.24(c) (1), (2), and (10) and (d)(1), respectively). These categorical exclusions apply to situations in which FDA has previously approved an identical product. For actions that do not qualify for categorical exclusions, § 25.31a provides guidance on the format of the required EA's.

Although the conditional exemption in § 25.1(f)(1)(iii) was intended to reduce environmental consideration by applicants seeking approval to market essentially a duplicate version of a marketed product, the exemption criterion turned out to be too broad, exempting more requested actions than had been intended. A product that was merely similar or related to another product in chemcial structure, biological composition, or pharmacological properties and indications for use was eligible for a conditional exemption. Differing interpretations of the terms "similar," "related," and "change in the overall use pattern" resulted in misunderstanding among applicants and petitioners and variability in decisions on requests for conditional exemptions by different agency reviewers. FDA's experience has shown that the agency can justify a categorical exclusion from environmental considerations only if the product for which approval is sought is essentially identical to a product already being marketed.

17. A comment on § 25.23(c) suggested that an applicant or petitioner should not be required to supply information to establish that a categorical exclusion is applicable to a requested action. It was further suggested that the agency require from applicants and petitioners only a statement that the action contemplated is included within an excluded category and that it meets the criteria for the applicable categorical exclusion.

The agency concludes that submission of only a statement identifying the requested categorical exclusion is sometimes insufficient. CEQ requires both that there be criteria to judge whether an action is excluded (40 CFR 1507.3(b)(2)(ii)), and that the agency be responsible for the accuracy of the information submitted (40 CFR 1506.5). As discussed in § 25.24, many categorical exclusions are for classes of actions that do not result in the introduction of any substance into the environment. Usually, it is self-evident when an individual action belongs to one of these classes and no other information is required. Other exclusions are for classes of actions that do result in environmental introductions. These exclusions contain specific criteria for exclusion which must be met in order for an individual action to be categorically excluded. Therefore, to determine whether criteria for exclusion are met, the agency sometimes requires an applicant or petitioner to submit supporting information. In the cases where it is necessary, the information that must be submitted to show that the criteria for categorical exclusions are satisfied is limited and often has been submitted for other purposes elsewhere in the petition or application. See categorical exclusions under §25.24 (c) (1) and (2), (d)(1), and (e)(4) for examples where exclusion criteria are based upon information presented elsewhere in petitions and applications.

18. The same comment suggested that the agency should not refuse to accept or file an application or petition solely because the applicant or petitioner fails to specify clearly the provision for categorical exclusion or fails to provide information sufficient to establish that the requested action is subject to a categorical exclusion.

The agency concludes that it will continue its policy, applicable to supporting exemptions under the previous regulations, that failure to include in an application or petition either sufficient information to support a categorical exclusion or an adequate EA may be sufficient grounds to refuse to accept or file the application or petition. (See previous § 25.1 (g), (h), and (i).) The objective of the provision is to encourage applicants and petitioners to review the potential environmental impacts of their contemplated actions by considering whether an action is categorically excluded or subject to the requirement of an EA before filing the application or petition with FDA. The requirement also assures that any necessary NEPA documentation is submitted at the time the action is first requested, thus preventing unnecessary delays in the agency's evaluation and decision on the contemplated action. Because of the information available to applicants and petitioners, they are in a better position than is FDA to make an initial decision as to the applicability of an exclusion. However, the agency will not automatically refuse to file or approve applications or petitions for failure to claim and support a categorical exclusion that FDA believes is applicable. Such refusals generally will be reserved for those submissions which claim a categorical exclusion but fail to provide sufficient information for the agency to determine whether the claimed exclusion in fact applies.

Listing of Categorical Exclusions

19. Section 25.24 lists a variety of specific actions that are categorically excluded from the requirement to prepare an EA. The introductory language states the criteria for the exclusions and identifies which of the listed actions are categorically excluded because they generally do not result in the introduction of substances into the environment, which of the listed actions are excluded when they meet specific criteria that are intended to ensure that they will not cause significant environmental effects, and which of the listed actions are excluded because they are routine maintenance or minor construction activities that FDA conducts or contracts for. Certain exclusions listed in the proposed rule (§ 25.24(b) (1), (3), (4), (5), and (8)) are contained in Chapter 30–20–40 B.2. of the HHS General Administration Manual. Therefore, to avoid duplication, these exclusions are not repeated in this final rule.

All previous § 25.1(d) exemptions and most § 25.1(f) conditional exemptions have been redefined as categorical exclusions in this final rule, to conform to CEQ's regulation (40 CFR 1507.3) as explained above in relation to § 25.23. Categorical exclusions differ from FDA's previous § 25.1(d) exemptions in that they are conditional rather than

absolute. Categorical exclusions differ from some of the previous § 25.1(f) conditional exemptions in that no environmental data need be submitted. Further, for all exemptions it was previously necessary to prepare a Statement of Exemption for public review, which is not required for categorical exclusions in this final rule.

In the final rule, FDA has rearranged the listing of categorical exclusions to aid readers interested in finding the provisions applicable to particular FDA-regulated articles. A cross-reference list for § 25.24 of this final rule, with corresponding provisions of the proposed rule and previous Part 25, follows:

Final rule	Proposed rule	Previous part 25[1]
	(a) General	
§ 25.24(a)(1)	§ 25.24(b)(1)	§ 25.1(d) (2), (3)
§ 25.24(a)(2)	§ 25.24(b)(2)	§ 25.1(d)(1)
§ 25.24(a)(3)	§ 25.24(b)(10)	
§ 25.24(a)(4)	§ 25.24(b)(11)	§ 25.1(f)(9)
HHS GAM[2]	§ 25.24(b)(4)	
HHS GAM[2]	§ 25.24(b)(5)	
§ 25.24(a)(5)	§ 25.24(b)(7)	§ 25.1(b)(13)
§ 25.24(a)(6)	§ 25.24(b)(16)	
HHS GAM[2]	§ 25.24(b)(8)	§ 25.1(f)(10)
§ 25.24(a)(7)	§ 25.24(b)(11)	
§ 25.24(a)(8)	§ 25.24(b) (12), (17)	
§ 25.24(a)(9)	§ 25.24(b)(22)

§ 25.24(e)(7)	§ 25.24(d)(15)	§ 25.1(d)(5)
§ 25.24(e)(8)		§ 25.1(d)(7)

[1] Provisions in the proposal or previous Part 25 often are related, not identical. Where blanks appear under the headings for previous or proposed rules, no exemption or exclusion previously applied.

[2] HHS General Administration Manual.

Although the categorical exclusions for most of the classes of actions listed in § 25.24 are self-explanatory, several provisions that require an explanation of the action involved, or of the reasons why the criteria for exclusion are usually met, are discussed below.

Categorical Exclusions: General

20. Section 25.24(a)(4) (proposed § 25.24(d)(11)) excludes destruction or disposal of articles that have been condemned after seizure, articles whose distribution or use has been enjoined, or articles that have been detained or recalled at agency request. Such actions are excluded provided that the method of destruction or disposition of any articles, including packaging material, will not result in the release of a toxic substance into the environment. This categorical exclusion is a clarification of the conditional exemption in § 25.1(f)(9) of the previous regulations. The categorical exclusion applies to those actions in which the agency may be involved and which may be eligible for exclusion from environmental consideration if the articles destined for destruction or other disposition do not contain toxic substances, e.g., they are contaminated due to decomposition or insect or rodent activity, or are misbranded, and their destruction or other disposition does not otherwise result in the release of a toxic substance into the environment.

21. Section 25.24(a)(8) (proposed § 25.24(b)(12)) was clarified by citing examples of **Federal Register** documents subject to these exclusions. FDA has deleted, as unnecessary, proposed § 25.24(b)(9) which described the exclusion of certain **Federal Register** notices from the requirement of an EA. The notices in question, e.g., notices withdrawing proposed rules and notices of intent to develop regulations or EIS's, do not themselves have environmental consequences.

22. Section 25.24(a)(8) was also revised to refer to amendments to or revocations of procedural regulations, as well as to issuance of such regulations. None of these actions results in the production or distribution of any substance and, therefore, will not result in the introduction of any substance into the environment.

23. Section 25.24(a)(10) (proposed § 25.24(d) (12) and (14)) excludes the promulgation by the agency of certain current good manufacturing practice (CGMP) regulations or their equivalents and the issuance or denial under these regulations of certain permits, exemptions, variances, or stays. Such actions are excluded if there will be no increase in the quantities or toxicity of wastes entering the environment as a direct or indirect result of the action. Proposed § 25.24(d)(12) included an additional criterion for exclusion: "if there will be no change in the existing uses of the product." This criterion has been deleted from the final rule because CGMP regulations and related actions are not intended to affect the use of regulated products. As described below, the major factor in determining the potential for these actions to have any effect on the environment is whether they would result in increases in the quantities or toxicity of wastes emitted during the manufacture of the regulated product. These actions were not exempted or conditionally exempted from environmental consideration in the previous regulations.

The criteria for exclusion ensure that in-plant changes required by CGMP regulations and their equivalents, e.g., establishment standards for biological products, receive consideration in an EA when the changes result in increased waste flow or increased toxicity of wastes. For example, an action requiring substantial additional water usage or which results in increases in the wastes discharged at a manufacturing facility for certain products does not meet the criteria for exclusion and therefore requires the preparation of an EA. Examination of mitigation procedures or alternatives to the proposed action could result in choice of a final action which conserves water, decreases the concentration of toxic substances present, or otherwise facilitates treatment or reuse of the wastes.

Included in § 25.24(a)(10) is an exclusion from environmental consideration of certain of FDA's good laboratory practice (GLP) regulations. Present GLP regulations (21 CFR Part 58) establish quality control procedures to be used in laboratories conducting clinical tests to be submitted to FDA, usually in support of an application or petition for approval to test or market an FDA-regulated product. GLP's also apply to FDA's own laboratory activities and those of its contractors. GLP regulations are excluded from environmental consideration when they meet the same criteria, discussed above, that establish when CGMP regulations

are excluded from environmental consideration.

24. Section 25.24(a)(11) (proposed § 25.24(d)(13)) excludes the establishment or repeal by regulation of labeling requirements for marketing articles if there will be no increase in the existing levels of use or change in the intended uses of the product or its substitutes. This categorical exclusion is a modification of a conditional exemption in the previous regulations (§ 25.1(f)(12)). The modification excludes from environmental consideration all FDA-regulated product labeling that meets the criteria for exclusion.

25. A comment suggested that all labeling requirements established by regulation for marketed articles should be excluded, rather than only the labeling meeting the stated criteria for exclusion discussed in the preceding paragraph. No justification for such a change was provided.

The agency concludes that criteria for exclusion are necessary to determine certain labeling requirements for which preparation of an EA is appropriate. Labeling requirements, including warning labels, may result in market shifts and consequently potentially significant environmental impacts. For example, an FDA requirement for warning labels on aerosol cans using chlorofluorocarbon propellants, which preceded action to ban the use of these propellants, contributed to a shift to uses of substitute propellants. Therefore, an environmental assessment was necessary to determine the potential impacts of the action.

26. Section 25.24(a)(12) (proposed § 25.24(c)) was revised by adding two new provisions, paragraph (a)(16) (v) and (vi), for consistency with the NEPA-implementing procedures of the General Services Administration (45 FR 83; January 2, 1980). With these additions, FDA excludes from environmental consideration the acquisition of occupiable space in existing structures, in addition to the exclusions that were proposed for routine maintenance or minor lease construction activities conducted, or contracted for, by the agency. Actions affecting properties listed or eligible for listing on the National Register of Historical Places do not qualify for categorical exclusion.

Categorical Exclusions: Research

27. FDA has categorically excluded its actions concerning certain research conducted or supported by the agency (§ 25.24(a)(6), proposed § 25.24(d)(16)) or conducted by applicants or petitioners seeking FDA's approval to investigate food additives (§ 25.24(b)(2)), human drugs, including biologics (§ 25.24(c)(4)), animal drugs (§ 25.24(d)(4)), and medical devices (§ 25.24(e)(7)). (See proposed § 25.24(d)(15).) These actions are categorically excluded if the wastes generated from the research will be controlled or the amount of waste expected to enter the environment may reasonably be expected to be nontoxic. By "controlled," the agency means the wastes will be contained, recycled, destroyed, or otherwise treated in a manner that renders them environmentally safe.

FDA actions on investigations of drugs and animal drugs were conditionally exempt under § 25.1(f)(11) of the previous regulations. In the proposed rule, categorical exclusions were continued for these FDA actions and extended to include actions on investigations of medical devices (proposed § 25.24(d)(15)), and research conducted or contracted for by the agency (proposed § 25.24(d)(16)) when these investigations and research meet the criteria for exclusion. In the final rule, § 25.24(b)(2) has been added to exclude FDA actions on the investigational use of food additives for use in human or animal food in the use meets these criteria. With these changes, FDA is applying the same environmental consideration standard to all types of research activities that it conducts, funds, or regulates through prior submission requirements.

28. A comment on proposed § 25.24(d)(15) suggested that no criteria for exclusion were needed because there is no conceivable instance in which an action involving a notice of a claimed investigational exemption for a new drug, new animal drug, or medical device would generate waste that could not be controlled or would be toxic in the amounts released. The comment contended that all such activities should be excluded within limitation, but submitted no information to support this contention.

The agency concludes that only those actions on investigational exemptions that meet the stated criteria for exclusion should be excluded. Although most studies for investigation product development are limited in size, some studies have been very broad in scope. For example, many thousands of animals may be used in the final investigational field studies of animal drugs. The agency agrees with the comment that, in most cases, wastes can be controlled. The criteria for exclusion help ensure that these wastes will, in fact, be controlled by requiring the preparation of an EA if they are not.

Categorical Exclusions: Foods, Food Additives, and Color Additives

29. Section 25.24(b)(3) (proposed § 25.24(d)(5)) categorically excludes approvals of color additive petitions to change a provisionally listed color additive to permanent listing for use in food, drugs, devices, or cosmetics if data available to FDA do not establish that, at the expected levels of exposure, it may be toxic to organisms in the environment. The final FDA regulations differ from the proposal in that FDA has deleted the proposed additional criterion that, to be eligible for exclusion, a color additive must already be marketed for the petitioned use. This additional criterion was deleted as unnecessary. Although most provisionally listed color additives already are being used in marketed products for the uses requested in petitions for permanent listing, there may be rare cases in which use of a provisionally listed color additive may cease due to termination of provisional listing, only to resume when a decision is on permanent listing. FDA believes that the remaining exclusion criterion in § 25.24(b)(3) will ensure adequate environmental consideration in these rare cases as well as in the more common situation in which there is no interruption in the use of a color additive when it is moved from the provisional list to the permanent list.

Section 25.24(b)(3) provides clearer exclusion criteria than did the conditional exemption in § 25.1(f)(6) of the previous regulations. In deciding whether the permanent listing of a provisionally listed color additive results in release of substances that in the amounts expected to enter the environment may be toxic to organisms in the environment, FDA will consider the petition and other available information, including the scientific literature. If FDA finds that adverse effects are possible, the petitioner will be required to submit an EA.

30. Section 25.24(b)(4) (proposed § 25.24(b)(14)) categorically excludes the testing and certification of batches of color additives. These actions involve the comparison of a specific batch against a standard for an additive for quality control purposes and are not actions to approve the production and marketing of these products. Disposal of small amounts of wastes from FDA laboratories conducting testing and certification activities is considered for potential environmental impact under § 25.22(a)(4).

31. Section 25.24(b)(5) (proposed § 25.24(b)(6)) categorically excludes the

promulgation of an interim food additive regulation. Interim food additive regulations are promulgated under 21 CFR Part 180 for substances having a history of use in food for human consumption or in food-contact surfaces when the safety or functionality or such substances is brought into question by new information that in itself is not conclusive. Such regulation can be issued only when there is reasonable certainty that the substance is not harmful and that no harm to the public health will result from the continued use of the substance for a limited period of time while the question raised is being resolved. Because an interim food additive regulation provides for the continued use of an already approved substance, such a regulation should be excluded.

32. Section 25.24(b)(6) (proposed § 25.24(b)(15)) categorically excludes establishment of action levels for natural or unavoidable defects in food for humans or animals if these defects present no health hazard. These action levels are established under section 402(a) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 342(a)). It never has been possible to grow, harvest, and process crops that are totally free of natural defects such as insects and insect parts. Action levels represent the limit at which or above which FDA will take legal action against the food to remove it from the market. It is the legal action, rather than the establishment of an action level, that results in any potential for introduction of substances into the environment. Any FDA enforcement of, or action level that results in, the removal of products from the market is considered under §§ 25.22(a) (2) and (3) and 25.24 (a)(4) and (b)(9).

33. Section 25.24(b)(7) (proposed §25.24(d)(6)) categorically excludes affirmations of a food substance as generally recognized as safe (GRAS) if the substance is already marketed in the United States for the use for which affirmation is sought, and data available to the agency do not establish that the substance may be toxic to organisms in the environment at the expected levels of exposure. Under the previous regulations, GRAS regulations were covered under § 25.1(b)(16), which required a case-by-case determination as to whether an environmental document equivalent to an EA, i.e., an EIAR, was required. Under the new rule, many such actions will be excluded because many GRAS substances meet the exclusion criteria. The agency should have sufficient information in the GRAS petition and the scientific literature to determine whether the continued marketing of a substance for which GRAS affirmation is sought may, at the expected levels of exposure, result in toxic effects on organisms in the environment.

34. Section 25.24(b)(8) (proposed § 25.24(d)(7)) categorically excludes the promulgation and enforcement of regulations relating to the control of communicable disease or to interstate conveyance sanitation under 21 CFR Parts 1240 and 1250, respectively. Only those actions under Parts 1240 and 1250 that meet certain criteria are excluded.

Part 1240 restricts the interstate shipment of certain animals and articles and establishes requirements for the source and use of potable water on interstate conveyances. The objective of the requirements is to control the spread of communicable diseases. As a result of findings in FDA inspections under these regulations, there may be an enforcement action or voluntary action that results in measures for the control (including treatment, destruction or other disposition) of animals or other articles that are not in compliance with the regulations. If an action involves an endangered species or the release of a toxic substance into the environment, then an EA is required to address considerations under the Endangered Species Act of 1973 or the release of the toxic substance.

Part 1250 establishes requirements for facilities and procedures in conjuction with interstate conveyances to ensure that all food, potable water, and drink served are clean, wholesome, and free from spoilage and that wastes discharged from conveyances are properly handled. FDA enforces these requirements through inspection and may require corrections to be made in conjunction with conveyances before they may continue in interstate commerce. Environmental introductions that result in the release of a toxic substance into the environment require an EA. When proposed as § 25.24(d)(7)(ii), all actions under Part 1250 were excluded. In this final rule, a criterion for exclusion has been added because FDA has determined that some actions taken under this part can result in environmental introductions.

35. Section 25.24(b)(9) (proposed § 25.24(d)(4)) categorically excludes approvals of requests for diversion of adulterated or misbranded food for humans or animal feed to use as animal feed if the disposition of the article, including packaging material, will not result in the release of a toxic substance into the environment. The Federal Food, Drug, and Cosmetic Act prohibits the sale of products intended as food for humans if the products are adulterated or misbranded. When such products do not contain toxic substances, their diversion to animal feed permits beneficial use of the products and eliminates the need for landfilling, incineration, or some other means of disposal.

Categorical Exclusions: Marketing Approvals

36. A comment on proposed § 25.24(d) suggested categorical exclusions of all approvals of NDA's, ANDA's, NADA's, and biological product licenses, and any supplements or amendments thereto, providing these do not "significantly affect the quality of the human environment."

FDA cannot adopt this suggestion. CEQ's regulation (40 CFR 1507.3) requires that criteria be established for categorical exclusions. The quoted phrase, which restates the basic NEPA standard, does not satisfy this requirement. Because the agency has no prior knowledge about the environmental impact of new products, excluding all the actions described in proposed § 25.24(d) would make it impossible to distinguish those that have the potential for significant environmental impacts from those that do not. Exclusions have been provided, however, for ANDA's (§ 25.24(c)(1)) and for certain approvals of the types referred to in proposed § 25.24(d), as discussed below on the following provisions of the final regulations: § 25.24(c)(2) (NDA's); § 25.24(c) (8), (10), and (11) (biological product licenses); and § 25.24(d) (1), (2) (NADA's). Certain categorical exclusions for medical device premarket approval applications also are provided in § 25.24(e) (4) and (5).

Categorical Exclusions: Human Drugs and Biological Products

37. FDA has added a categorical exclusion for approvals of ANDA's in § 25.24(c)(1). Although ANDA's have been specifically mentioned in the conditional exemption in § 25.1(f)(1) of the previous regulations, they were not specifically mentioned in the proposal. Approvals of ANDA's are categorically excluded because they merely allow on the market generic equivalents of drugs that already have been approved and thus do not change the levels of substances entering the environment. These actions are similar to approvals for supplements and amendments to NADA's for which the proposed exclusion, § 25.24(d)(1), applied.

Therefore, the same criteria for exclusion are applied to ANDA's.

38. FDA has broadened the categorical exclusion in § 25.24(c)(2) (proposed § 25.24 (b)(16) and (d)(18)), for approvals of certain amendments or supplements to NDA's. The proposal would have excluded only amendments and supplements seeking certain types of labeling and packaging changes not requiring prior approval.

FDA has categorically excluded all approvals of changes not requiring prior approval described in § 314.70 (c) and (d), as well as other approvals of amendments or supplements to NDA's, in those cases where the stated criteria are met; that is, the proposed approval provides that the drug will not be administered at higher dosages, for longer duration, or for different indications than were previously in effect.

39. Section 25.24(c)(3) (proposed § 25.24(d)(2)) categorically excludes withdrawals of approvals of NDA's and ANDA's when the drug is no longer being marketed or at the request of the application holder. These actions are not subject to other criteria for exclusion because withdrawals of this type involve discontinued products or products with such small sales that their withdrawals do not result in environmental introductions of substitute drugs.

40. Section 25.24(c)(5) (proposed § 25.24(b)(14)) categorically excludes the testing and certification of batches of antibiotics and insulin. Testing and certification of antibiotics and insulin are excluded for the reasons given in paragraph 30 above.

Although FDA has issued regulations (47 FR 39155; September 7, 1982) exempting all antibiotic drugs and antibiotic-susceptibility devices from certification, these regulations provide for reimposition of testing certification where necessary, and the statute allows manufacturers to request certification even if FDA does not require it. Hence, it still is appropriate to provide in § 25.24(c)(5) a categorical exclusion for antibiotic testing and certification.

41. Section 25.24(c)(6) (proposed § 25.24(d)(9) categorically excludes the promulgation of a monograph for a "not new" drug, antibiotic drug, or over-the-counter (OTC) drug if the drug is already marketed for the proposed use and data available to the agency do not establish that the drug may be toxic to organisms in the environment. The criteria in the final regulations are less restrictive and more appropriate for monograph rulemaking then were those in the proposal. The proposal would have excluded promulgation of a drug monograph only if "the proposed monograph will not permit the article to be administered at higher dosage levels, for longer duration, or for significantly different indications than were previously in effect."

FDA has deleted a reference to monograph regulations for in vitro diagnostic products because of the revocation, in the **Federal Register** of February 1, 1980 (45 FR 7474), of the procedures for promulgating such regulations. Because in vitro diagnostic products are medical devices, standards for them may be issued under the procedures in 21 CFR Part 861 for medical device performance standards, and the categorical exclusion in § 25.24(e)(3) of these regulations would exclude such standards from environmental consideration if the applicable criteria are met.

Promulgation of drug monographs was conditionally exempt under § 25.1(f) (4) and (5) of FDA's previous regulations.

42. A comment asserted that all OTC drug monographs should be excluded from environmental consideration, whether or not they met the proposed exclusion criteria. The comment argued that OTC drugs are chemicals of such "low volume" that they will seldom be present in the environment at concentrations high enough to have any significant environmental effects.

The agency concludes that promulgation of drug monographs may cause changes in the levels at which substances are introduced into the environment and that some of these substances may be bioactive at low concentrations. Therefore, criteria are needed to identify those monographs for which an EA must be prepared. As discussed in the preceding paragraph, the criteria for exclusion in the final regulation are less restrictive than those in the proposal, and will exclude more OTC drug monographs. Furthermore, because the ingredients used in products regulated by monographs are already being marketed and often have been for many years, the agency generally will have sufficient information about the product, in the administrative record of the monograph proceeding and from the scientific literature, to identify any substances to be controlled by a monograph that are toxic to organisms in the environment.

43. FDA has added to the final regulations a provision (§ 25.24(c)(7)) that categorically excludes establishment of bioequivalence requirements for marketed drug products if there is no change in the existing levels of use or intended uses of the products. Bioequivalence requirements, which may be imposed by regulation under 21 CFR 320.1, are established to ensure uniformity among different brands of pharmaceutical products containing the identical therapeutic moiety intended for the same indications. Requirements that affect the levels of use of a product or the intended use of a product might change the amounts or types of wastes entering the environment due to production, use, or disposal of the product or its substitutes. Regulations establishing bioequivalence requirements generally have no effect on the dosage levels or the indications for which the drug products are approved.

Although bioequivalence requirements were neither exempt nor conditionally exempt under FDA's previous regulations, a categorical exclusion of these requirements is consistent with other categorical exclusions, e.g., the exclusion in proposed § 25.24(d)(10) of the issuance of additional standards for a licensed biological product if there is no change in the existing levels of use or intended uses of the products.

44. FDA has added to the final regulations a provision (§ 25.24(c)(8)) that categorically excludes actions on changes reported under 21 CFR 601.12 in biological product or establishment licenses. This categorical exclusion is consistent with other exclusions for actions on certain changes in NDA's (§ 25.24(c)(2)(i), proposed § 25.24(b)(16)) and in NADA's (§ 25.24(d)(1)). In all these cases, the changes have no effect on the environment because they do not result in changes in the environmental introduction of previously approved products.

45. FDA has revised § 25.24(c)(10) (proposed § 25.24(d)(10)) to exclude any biological product standard regulation that meets the exclusion criteria, rather than simply the promulgation of "additional" standards for such products under 21 CFR Parts 620 through 680, as was proposed. Thus, standards for groups of biologic products and general standards, such as those promulgated under 21 CFR 600.16 and Part 610, are categorically excluded if they meet the exclusion criteria.

Animal Drugs

46. Section 25.24(d)(1) categorically excludes NADA's or supplemental NADA's for a previously approved animal drug if the drug product will not be administered at higher dosage levels, for longer duration, or for different indications than were previously in effect and if data available to the agency do not establish that, at the expected level of exposure, the drug

may be toxic to organisms in the environment.

47. A comment argued that excluding an animal drug to be marketed under the same conditions of approval as a previously approved animal drug is inappropriate because this approach gives the new competitor an undue advantage over the original developer.

The agency concludes that considerations of competitive advantages between the original and subsequent manufacturers do not justify the imposition of unnecessary requirements that are not justified by NEPA.

48. Two comments suggested that FDA grant categorical exclusions for FDA approvals of new animal drugs in medicated feed blocks and of new animal drugs in liquid feed supplements.

The agency cannot adopt this suggestion because approvals of these types are likely to lead to the release of substances into the environment. However, certain approvals may be eligible for exclusion under § 25.24(d), e.g., if the approval involves a previously approved new animal drug.

49. Several categorical exclusions concerning actions on animal drugs, § 25.24(d) (3) through (7), correspond to similar exclusions for human drugs in § 25.24(c) (3) through (7).

Devices and Radiation Products

50. FDA has broadened the categorical exclusion in § 25.24(e)(2) (proposed § 25.24(b)(20)) to cover device classification under section 513 of the Federal Food, Drug, and Cosmetic Act and 21 CFR Part 860 as well as reclassification. In any case in which classification or reclassification changes the marketing status of the device, such as by requiring premarket approval, other provisions of the regulations, e.g., §§ 25.22(a)(18) and 25.24(e) (4) and (5), govern when environmental consideration must occur.

51. A comment suggested the categorical exclusion of approvals of device premarket approval applications (PMA's) and of notices of completion of product development protocols (PDP's) for medical devices.

The agency concludes that, in general, an EA must be required in applications seeking premarket approval of medical devices, just as the agency requires EA's in similar applications for other new products it regulates. However, these applications are excluded under § 25.24(e)(4) if the subject device is of the same type and for the same use as a previously approved device and if approval of the device does not result in the release of substances that could cause toxic effects on organisms in the environment. Devices that are excluded by this provision compete for the same market with already approved devices of the same type and use and therefore do not result in increased environmental introduction of the device.

52. FDA has added a provision (§25.24(e)(5)) that categorically excludes changes in a PMA or notice of completion of a PDP for a class III medical device that do not require submission of an amended or supplemental application or notice. This addition corresponds to the exclusion in § 25.24(c)(2) of certain changes in NDA's.

53. FDA also added, in § 25.24(e)(6), a categorical exclusion of a restricted device regulation issued under section 520(e) of the Federal Food, Drug, and Cosmetic Act when the action will not result in increases in the existing levels of use or changes in the intended uses of the product or its substitutes.

Retroactive Environmental Consideration

54. Section 25.25 discusses when FDA will conduct a retroactive environmental review of existing regulations, approvals, or other actions. The proposed section was similar to § 25.1(c) of the previous regulations. Proposed § 25.25(a) stated that an amendment, supplement, or exemption proposed for an existing regulation or approval (§§ 25.21 through 25.24) which had not previously received environmental analysis would trigger retroactive review of the existing regulation or approval when such consideration was determined to be necessary to assess the environmental effects of the amendment, supplement, or exemption. Proposed § 25.25(b) also provided that environmental review would also be necessary for actions that had not previously received environmental analysis after new information was made available to the agency suggesting that potentially significant environmental effects may be occurring.

55. Three comments opposed any retroactive environmental consideration that would require EA's for FDS-regulated products already being marketed. A fourth comment suggested that retroactive environmental review should be conducted only as provided for in proposed § 25.25(b), i.e., where new information comes before the agency that suggests the need for such reconsideration.

Although FDA cannot adopt the approach suggested by the three comments, it agrees with the fourth comment. In any case in which retroactive review of an action is deemed necessary, there will probably be information before the agency suggesting that potentially significant environmental impacts may be occurring. Accordingly, the agency concludes that proposed § 25.25(a) is unnecessary and had deleted this paragraph from the final rule. Proposed § 25.25(b), which is now § 25.25(a), states that retroactive consideration of existing regulations, approvals, or other actions is triggered only by new information indicating such need. The agency has no plans for systematic retroactive review of the environmental impact of existing regulations, approvals, and actions. Nevertheless, the agency has the responsibility to reconsider and revise any such past decisions, in certain cases as part of a general reconsideration of a decision and in others when it learns that environmental problems may have resulted from such a prior decision.

III. Subpart C—Preparation of Environmental Documents

Subpart C describes the content and format of environmental assessments (EA's) (§ 25.31), findings of no significant impact (FONSI's) (§ 25.32), notices of intent to prepare environmental impact statements (EIS's) (§ 25.33), and EIS's (§ 25.34). The only category of document formats in which FDA received significant comments was that for EA's.

EA Format

56. FDA presented a single EA format in proposed § 25.31(b) and provided in proposed § 25.31(e) for abbreviated versions of several format items for certain actions. In the final regulations, FDA has developed five separate EA formats as follows: Format 1—Proposed approvals of FDA-egulated products; Format 2—Withdrawals of approval and other restrictions; Format 3—Grants, extramural contracts, and other research agreements; Format 4—Establishment of tolerances or action levels; and Format 5—Destruction of condemned, enjoined, detained, or recalled articles. In addition, FDA is providing abbreviated versions of Format 1 for six types of proposed approvals in which environmental concerns are more limited than in other approvals subject to the usual EA format requirements. Most of the actions eligible for abbreviated versions of Format 1 were the subject of conditional exemptions under previous § 25.1 (f) and (g), but did not qualify for conversion to categorical exclusions because information had to be submitted to determine whether the actions would have significant environmental effects. The various

formats in the final rule are similar to the proposed format as modified by proposed § 25.31(e), and as further revised in response to comments as described below.

57. FDA received many comments on the proposed EA format. As discussed above in paragraph 2, the comments contended that the format would result in additional paperwork, delays, and costs. Specific objections to the EA format included: (1) that FDA had so significantly expanded the EIAR requirements in previous § 25.1(j) that the new EA requirements would approach, equal, or exceed the requirements for an EIS; (2) that the proposed EA requirements would not result in useful information; and (3) that technology to address some proposed EA requirements is unavailable.

As explained above in paragraph 2, FDA believes that many of these comments misinterpreted the proposed requirements. The EA format differs from the previous EIAR format in describing a systematic approach to environmental review of proposed actions to approve the marketing of chemicals. The EIAR had presented only a list of general topic areas like "Pollution" and "Toxic Substances" to be addressed. The EA format presents formally in regulations an effective approach to environmental review that FDA has used since 1977 in preparing its own EIAR's and in guiding applicants and petitioners using its Environmental Impact Operational Directive (also discussed in paragraph 2 above). Experience has proven that the previous approach of simply providing a list of general topics to be addressed without giving specific accompanying directions often led to the preparation and submission of inadequate environmental documents. The agency then frequently could not accept the documents and had to provide case-by-case guidance on how to correct the documents' deficiencies. The agency seeks to reduce the delay that results from these corrections, consultations, and resubmissions by providing in EA formats a more comprehensive and systematic approach to environmental impact consideration that will yield better results. The additional formats described in the preceding paragraph will assist in these efforts.

FDA recognizes that efforts to predict environmental effects must deal with many uncertainties, some due to limitations of existing technology. To keep track of environmental testing methodology, the agency monitors and evaluates methods developed by the joint committee publishing *Standard Methods* (APHA, Standard Methods for the Examination of Water and Wastewater, 15th Ed., American Public Health Association, Washington, DC, pp. 1134, 1981), EPA, the Organization for Economic Cooperation and Development (OECD), American Society for Testing and Materials (ASTM), and the Society for Environmental Toxicology and Chemistry (SETAC) in addition to reports in the general scientific literature. FDA endorses the efforts of these organizations to seek efficient and economical procedures to predict the environmental impacts of chemicals before they are released into the environment. The agency also continues to offer timely review of environmental testing programs and protocols proposed by applicants and petitioners in preparing EA's as well as written guidance on environmental data acquisition. When technology is absent, or it is infeasible to obtain definitive data to satisfy a given format requirement, FDA accepts the use of predictions developed from calculations or estimates based on available data.

FDA endorses a tiered or step-sequenced scheme for acquiring environmental data in which the first screening tests done are the most simple and generalized, with more complex and detailed tests reserved for chemicals identified by screening as having a potential for adverse effects. Many such schemes are available in the scientific literature (references are available from the contact person listed above). Applications and petitioners are encouraged to choose a scheme for acquiring environmental data that is appropriate for their research and development processes so that they may obtain needed environmental impact data without undue delay and expense.

58. A comment suggested that FDA adopt to the extent possible the premanufacturing notice (PMN) form created by EPA for submission of environmental and other data under section 5 of the Toxic Substances Control Act.

The agency concludes that applicants and petitioners may use PMN forms to organize and summarize environmental data, as described for items 14 and 15 of § 25.31a(a), but not as substitutes for EA's. PMN's involve only the submission of data and do not include the analysis of data that is necessary for NEPA documents.

59. Two comments suggested that FDA delete from the EA format the proposed requirement to consider environmental impacts at the sites of production. The comments claimed that the requirement would duplicate other Federal, State, and local emissions requirements. A third comment suggested that the EA consider impacts only at the sites of production and claimed that these impacts are the only ones that the manufacturer can control.

The agency concludes that it can fulfill its responsibilities under NEPA only by requiring an applicant or petitioner that proposes to market an FDA-regulated product to ascertain carefully, in a public document, the environmental impacts of FDA's approval of the product at the sites of production, during the product's use, and with its disposal. But FDA has decided (as discussed below in paragraph 62) to rely principally on certification of compliance with applicable emissions requirements, along with identification of emissions, in assessing impacts at the sites of production.

FDA acknowledges that neither the preparers nor reviewers of EA's can determine precisely the potential environmental impacts of substances introduced into the environment as a result of the production, use, and disposal of the product permitted by the proposed action. These introductions need not, and indeed often cannot, be measured directly because the FDA-regulated product may not be currently present in the human environment. However, metabolism and excretion data, data on the migration of chemical substances from a packaging material into foods, and information on the potential market for the product frequently are known. Information of this type should be used to make the best possible estimate of the environmental introductions that might occur from use and disposal of the FDA-regulated product. Although many substances may be introduced into the environment at the site of production, usually only the product and its metabolic products and degradative residues, if any, are expected to enter the environment through use and disposal.

60. Two comments objected that socio-economic factors are not considered in the EA process. The previous EIAR format, § 25.1(j)D.9., required a risk-benefit analysis to determine whether the economic benefits to the public of the proposed action outweighed the action's potential risks to the environment.

CEQ regulations state that "economic or social effects are not intended by themselves to require preparation of an environmental impact statement. When an environmental impact statement is prepared and economic or social and

natural or physical environmental effects are interrelated, then the environmental impact statement will discuss all of these effects * * * (40 CFR 1508.14). The agency interprets this provision to mean that these effects do not have to be considered in determining whether an EIS is required for a particular action. It would be an unnecessary burden upon the agency and upon applicants and petitioners to have to address socio-economic Factors in EA's, which merely provide the basis for the agency's determination whether to prepare and EIS or FONSI. Therefore, in the EA formats in the final rule, the only risk-benefit analysis required is to consider the environmental benefits and risks of the proposed action, and of the alternatives when consideration of alternatives is required.

EA's for Proposed Product Approvals: Format 1

61. Section 25.31a(a) prescribes a format for nonexcluded, industry-initiated requests for approval of food and color additives, affirmations of food substances as generally recognized as safe (GRAS), human drugs, biological products, animal drugs, and class III medical devices. In some cases, not all items in the format may apply. Preparers of EA's for such cases should contact an individual designated to handle NEPA questions in the FDA center handling the application or petition and agree on a different format for that individual case. The contact person listed above can provide the names of such individuals. Furthermore, the amounts and kinds of information will vary on a case-by-case basis.

FDA is presenting a basic format in § 25.31a(a), followed by formats in § 25.31a(b) in which certain items are abbreviated for certain classes of actions. In this preamble, FDA is discussing only those format items that require explanations or that were the subject of comments. The following chart shows how the format items in Format 1 of the final regulations correspond to EA format items in the proposal and to EIAR format items in the previous regulations:

Final § 25.31a(a)	Proposed § 25.31(a)	Previous § 25.1(j)
Item 1	Item 1	Item A.
Item 2	Item 2	Item B.
Item 3	Item 3	Item C.
Item 4	Item 4	Item D.1
Item 5	Item 4	Item D.1.
Item 6	Item 5	Item D.2.a., b., c
Item 7	Item 6	Item D.2.a.
Item 8	Item 7	Item D.2.a.
Item 9	Item 8	Item D.2.a., D.6
Item 10	Item 10	Item D.2.b
Item 11	Item 11	Item D.4
Item 12	Item 12	
Item 13	Item 13	Item E
Item 14	Item 14	Item D.2.d
Item 15	Item 15	Item D.2.d

62. A comment on proposed format item 5 suggested that in light of EPA, State, and local regulation of emissions, FDA need not require estimates of quantities, concentrations, and durations of emissions at sites of production. The comment suggested that FDA continue to follow the practice in its previous regulations, § 25.1(j), of simply requiring certification of compliance with applicable emissions controls.

FDA has revised the regulations in response to the comment. FDA has decided to continue its previous practice of reliance on certification of compliance with emissions requirements, coupled with identification of emitted substances sufficient to allow the location in the scientific literature of data on the substances and closely related chemicals. Based on the identification of, and literature about, the emitted substances, FDA can determine whether it needs more information about the potential environmental impacts of the emissions, e.g., quantities, concentrations, and duration of emissions. Such additional information generally will not be needed.

Accordingly, in the final regulations FDA has revised proposed format item 5 as format items 5 and 6. Format item 5 requires identification of the chemical substances that are the subject of the proposed action. Format item 6 requires identification of the substances emitted at the sites of production; a citation of, and statement of compliance with, applicable emissions requirements; and a discussion of how the approval of the proposed action would affect this compliance.

63. Format item 7 (proposed item 6) requires consideration of the fate of substances identified in item 6 that are introduced into the environment as a consequence of product use and/or disposal. When an FDA-regulated product or its potentially harmful byproducts, constituents, derivatives, or metabolites are released into the environment through use or disposal of the product, it is important to determine the potential for these introduced substances to be transported among, transformed by, and accumulated in various "environmental compartments," e.g., air, water, soils, and organisms.

A reasonable, state-of-the art approach for predicting the probable fate of chemicals introduced into the environment is a step-sequenced combination of physical/chemical characterizations and simple laboratory tests that help define the chemicals' potential for degradation, transport, transformation, and accumulation. The mobility and potential accumulation of a chemical in the environment can be estimated from various physical/chemical measures that are obtained quickly and economically in the laboratory. Some of the more important measures predictive of environmental mobility and distribution are *n*-octanol to water partition coefficient, vapor pressure, water solubility, dissociation constant(s), and soil sorption/desorption isotherm.

Chemicals in the environment may be transformed by either of two means: (1) Biodegradation and (2) chemical transformations, including photochemical reactions. For FDA-regulated products that are meant to be ingested by humans or target animals, information is frequently already available on the pharmacokinetics and metabolism of the product. These pharmacokinetic and metabolic patterns, when considered with the structure of the chemical, are useful in predicting the occurrence of biologically mediated transformations in the environment. Mobility and accumulation data are used to determine whether the chemical is retained in biologically active environmental compartments long enough for biological transformations to take place. If biodegradation appears likely, one of a number of available biodegradation laboratory screening procedures can be chosen to determine the rate and extent of degradation that occurs.

Chemical degradation through hydrolysis may be important for organic chemicals with hydrolyzable functional groups, e.g., esters, amides, alkyl halides, epoxides, and phosphoric esters. Oxidation due to reactions with free radicals in the atmosphere or in water may be important routes of chemical transformations, depending on the transport of the chemical into these environments. When an organic chemical absorbs light in the ultraviolet range of the ultraviolet-visible spectrum, this fact is an indication that photolysis in air or water may occur.

64. A comment stated that models to supply environmental fate information have not yet been developed for all chemicals and that, for FDA-regulated products, data are scarce on photochemical reactions, rain-out, leaching, and sorption to soils and sediments.

The agency's approach described above does not necessitate use of holistic environmental fate models, but rather allows extrapolations by recognized methods from physical/chemical laboratory data to actual situations. Upon request, FDA will provide applicants and petitioners with specific, technical guidance on these extrapolation techniques.

65. Five comments concerned the definition of the term "worst case" that was included in proposed format item 7. They questioned whether the term includes catastrophic natural events, e.g., fires, floods, etc., and whether technology is available to make "worst case" predictions, and asserted that the costs of such predictions would be astronomical.

The agency did not intend that the term "worst case" include catastrophic natural events. To avoid confusions, FDA has deleted from the final rule the term worst case analyses." The agency intends that, for FDA-regulated products, the maximum potential environmental introductions due to normal use and/or normal disposal of the products affected by proposed actions be predicted.

Prediction of the fate of substances introduced into the environment nearly always contains elements of uncertainty. When these predictions are made in EA's, preparers of EA's should make conservative estimates in the areas of uncertainty.

Further guidance is available in CEQ's regulation, 40 CFR 1502.22, on incomplete or unavailable information.

66. A comment suggested that the term "ecosystem" should be defined more specifically and narrowly, but did not make any specific suggestions.

The agency concludes that the term "ecosystem" need not be redefined in this regulation. The scope of review of the fate of chemical substances released into the environment will depend on the extent to which the material is transported among various environmental compartments. Although some chemicals may have global effects, e.g., chlorofluorocarbon aerosol propellants, most others have effects limited to the localities where they are introduced, e.g., rapidly degrading or nonmobile substances.

67. Three comments suggested that FDA set ground rules which provide that where the concentration of an environmentally significant substance emitted into an ecosystem can reasonably be predicted to be below the detection capabilities of scientifically or economically feasible analytical methods, then FDA would, for that ecosystem, waive the required predictions of the substance's fate and effects.

The agency believes that the approach described above might well be acceptable, if the EA thoroughly discusses the method used to predict the environmental concentration of the substance, the assumptions made, and the areas of uncertainty, including limitations of analytical test methods or other technology. Furthermore, the method used to make the prediction must be reasonable considering what is known of the physical/chemical characteristics of the substance and the pattern of its production, use, and/or disposal.

68. Format item 8 (proposed item 7) requires that preparers of EA's predict, where applicable, effects on animals, plants, humans, and other organisms and effects at the ecosystem level, using the information presented in items 6 and 7 on the introduction and fate of substances together with relevant toxicological data or other appropriate methods.

FDA interprets section 105 of NEPA to supplement, not duplicate, consideration of effects on humans required by the Federal Food, Drug, and Cosmetic Act and the other health protection statutes it administers. Therefore, consideration of effects on humans is normally addressed through cross-references to actions being taken by FDA under health protection legislation. In addition, occupational exposure to FDA-regulated products may be addressed by cross-references to actions taken in response to requirements established by the Occupational Safety and Health Administration, except that occupational exposure requirements may not exist for new FDA-regulated products.

Effects of chemicals on animals, plants, and other organisms often cannot be predicted without knowledge of the toxicological data showing the concentrations of chemicals or substances at which effects are expected to occur. The types of data required for these predictions obviously vary with each chemical evaluated. When introduction and fate data indicate that a chemical is not transported into a particular environmental compartment or that initially low concentrations degrade rapidly into simple, commonly occurring derivatives, there is little or no need for toxicological data for life in that compartment, and item 8 would consist of a prediction that no harmful effects are likely to occur. If a product's production, use, or disposal will cause intermittent introductions of short-lived chemicals, item 8 would usually be limited to acute effects. If a product's production, use, or disposal will cause continuous introductions of short-lived chemicals, or continuous or intermittent introductions of long-lived chemicals, item 8 should address chronic effects and ecosystem-level effects.

The requirement in item 8 to use any relevant toxicological data includes data already required, for the application or petition, e.g., to show the effectiveness or human or animal safety of the product under the applicable statutory requirements. The same toxicological data may be used to discuss the effects of the environmental residues on, as applicable, microorganisms and nontarget animals. In addition, applicants and petitioners will find that the general scientific literature often contains data applicable to organisms in environmental compartments exposed to FDA-regulated products or to potentially harmful chemicals resulting from the products' production, use, or disposal. In some instances, applicants or petitioners may have to obtain new data needed to predict effects on exposed environmental compartments.

69. Three comments suggested that in items 6, 7, and 8 of the EA format, FDA should confine its attention to the introduction, fate, and effects of new chemicals and of chemicals reasonably expected to have a significant impact on the environment.

The regulations are structured so that most EA's will concern new chemicals or chemicals that may have significant effects. Many of the regulations' categorical exclusions recognize that the agency already has adequate information about most products that are already in the environment to exclude actions on these products from environmental consideration. Even if an action on an already marketed chemical is not categorically excluded, an EA for such an action should not be difficult to prepare because much of the information required for an EA would be readily available.

70. As discussed above in paragraph 5, FDA had modified item 9 to require specification of any effects of the proposed action on historic places and endangered species.

71. Three comments on proposed item 8 stated that because applications and petitions to FDA would be filed considerably in advance of engineering and construction of required facilities, applicants and petitioners could only approximate the natural resources (land, minerals, and energy) required to produce, transport, use, or dispose of a given amount of the product.

FDA agrees with the comments, but must retain this item to fulfill its responsibilities under NEPA. Because uncertainty may well exist in these areas, especially at the time applications and petitions are filed, the level of uncertainty in making estimates and approximations in item 9 should be discussed.

72. The three comments also suggested that some level of significance be established below which requirements for information and data on energy/resource utilization would be waived. One of these comments suggested that FDA set the significance level cut-off for energy at 250 million BTU's/hr and the significance level cut-off for raw material at 10 million kilograms/yr.

FDA believes the suggestion of a threshold significance level for energy and raw materials has merit. FDA will consider applying such levels in its implementation of these regulations, once scientifically supportable threshold levels are developed. FDA lacks the support that it would need to adopt the specific cut-offs suggested in the latter comment described above.

73. Two comments specifically addressed proposed format item 9, which would have required preparers of EA's to discuss disruptions of the physical environment (noise, odors, and traffic congestion) that would be associated directly or indirectly with a proposed action. Both comments suggested such disruptions are normally handled by State and local authorities who are better qualified than a Federal agency to evaluate the impact of these disruptions. These comments recommended that proposed item 9 therefore be deleted or modified so that certain actions were excluded from this requirement. A third comment stated that such information could only be estimated for many proposed actions.

The agency has deleted this item because actions on FDA-regulated products rarely cause physical disruptions of the types described.

74. Format item 10 requires preparers of EA's to describe measures taken to avoid or mitigate any identified potential adverse environmental impacts associated with the proposed action. FDA is interested in information on the mitigation of adverse environmental effects even if the effects being mitigated are not "significant" within the meaning of NEPA. Effective mitigations of proposed actions' adverse environmental effects, even significant effects, can, however, avoid the need for an EIS.

75. A comment questioned the proposed requirement to consider "potential" adverse environmental effects in item 10 on mitigation measures and in item 11 on alternatives. The comment suggested that the word "actual" be substituted.

The agency believes that the use of the word "potential" is appropriate because of the uncertainties associated with the prediction of environmental effects when applications and petitions are filed. Even the best calculations, estimates, and studies can predict only potential environmental effects, and with varying levels of uncertainty, before substances enter the environment.

76. Two comments objected to the proposed requirement in format item 12 of a listing of persons preparing the assessment, their qualifications, and persons and agencies consulted and their areas of expertise.

The agency believes that it needs to know who prepared EA's and their qualifications. The requirement is analogous to one in CEQ's regulations (40 CFR 1502.17) that requires such information from preparers of EIS's. Having this information simplifies the task of obtaining answers to questions about procedures and data described in EA's and thus facilitates the agency's review of EA's

77. A comment suggested that the required reference list in item 14 and appendices in item 15 be modified to allow reference to data in applications and petitions.

Although the agency concludes that items 14 and 15 should remain in the EA format, the agency does not object to the use of cross-references to submissions found in other parts of an application or petition.

When the data are confidential and cannot be appended, summaries of the data may satisfy item 15, with references made to the sections of the application or petition where the data are found.

78. The same comment suggested that, alternatively or additionally, FDA should exempt from items 14 and 15 any action that has no adverse environmental impact.

FDA cannot adopt this suggestion because references and appended studies support the conclusion that a proposed action has or does not have a potential for significant environmental effects.

79. Several comments on proposed § 25.31 (c), (d), and (e) interpreted these provisions as expanding significantly the information requirements in EA's. Proposed § 25.31(c) encouraged the use of existing information in satisfying the information requirements for EA's. Proposed § 25.31(d) encouraged those who prepared EA's to address, to the extent possible, impacts associated with the products' entire production-use-disposal cycle and to use existing scientific and engineering literature in predicting potential environmental effects. Proposed § 25.31(e) provided guidance for applicants, petitioners, and agency preparers on how to abbreviate EA's for certain classes of action. This guidance appears in the final rule in § 25.31a(b) and formats 2 and 3 (§§ 25.31b and 25.31c).

FDA believes it obvious, from the comments, that the agency's intent in proposing these provisions was misunderstood. Paragraphs (c) and (d) of proposed § 25.31 were intended to assist preparers of EA's by informing them of methods of obtaining required information and were not requirements. Section 25.31(e) reduced EA requirements for certain actions.

To avoid the confusion reflected by the comments, FDA has deleted proposed § 25.31 (c), (d), and (e). Much of the guidance found in these proposed provisions is now found in the specialized formats for EA's included in this final rule. Section 25.31(c) as found in this final rule now contains provision for incorporation by reference from other available public documents.

Abbreviated EA, Format 1—Certain Food Additive Approvals

80. Section 25.31a(b)(1) (proposed § 25.31(e)(2); previous § 25.1(f)(1)(v)) permits abbreviated EA's for nonexcluded proposed approvals of food additives that are present in finished food-packaging material, at no greater than 5 percent by weight, for either of two reasons: because they are used in the production of and become nonfunctional components of the finished food-packaging material, or because they are intentionally added in small quantities to improve the properties of the finished food-packaging material.

Previous § 25.1(f)(1)(v) and proposed § 25.31(e)(2) used the term "minor constituents in food-packaging materials" to refer to food additives that are present in food packaging at low levels and therefore have reduced potential for causing significant environmental impacts. These terms are not used in the final rule in order to avoid confusion with the term "constituent" used in FDA's advance notice of proposed rulemaking (47 FR 14464), which concerns a policy for regulating carcinogenic chemicals in food and color additives.

FDA cannot categorically exclude these approvals consistent with CEQ's

definition (40 CFR 1508.4) and guidance. Rather, an EA is needed to assure consideration of: (1) the environmental impacts of the food additives at the sites of their production; (2) the environmental impacts of the food additives at the sites of production of food-packaging material; (3) environmental impacts of the food additives at the site of disposal of the food-packaging material; and (4) any increases inthe consumption of natural resources and energy resulting from the approval of the food additives.

81. Two comments stated that requiring an abbreviated EA for these types of food additives was an unnecessary burden that would not serve a useful purpose and argued for retention of the requirements of previous § 25.1(f)(1)(v). Both comments perceived the proposed abbreviated EA requirement as expanding greatly the environmental impact information necessary to support these types of food additive petitions.

FDA believes that, with certain changes made in response to comments, the environmental information required for these food additives is basically the same as information required to support Statements of Exemption under the previous regulations.

Under the previous regulations, petitioners were required to demonstrate that the food additive and the packaging material in which the food additive would become a component met criteria designed to ensure that approval of the petition would: (1) not create new markets for or affect the environmental impact of the disposal of the packaging material, and (2) not result in the replacement of a substance already in use with one that is not chemically or toxicologically similar. In addition, information on the environmental impact of the manufacture of the food additive was required to be submitted in a Statement of Exemption along with information relating to the criteria for exemption.

Frequently, petitioners have had to submit additional information to enable the agency to reach a conclusion about whether the action qualified for an exemption. For example, although the concentration of these food additives in the food-packaging material may be small, the market volume for these articles may be large. Consequently, a petitioner often had to supplement the Statement of Exemption by estimating the concentration of the food additive entering the environment at the site of disposal of the food-packaging material and by considering this estimate in light of toxicity information. In some cases, additional toxicity studies were required. Other examples of food additives for which additional information has often been requested are preservatives used in the production of food-packaging material that become nonfunctional components of finished food-packaging material. Because such a substance is not a functional component of finished food-packaging material and efforts are made to prevent the preservative from becoming a component of finished food-packaging material, it is quite possible for the preservative to enter the environment at the site of production of the food-packaging material, with resulting potential for toxicity to aquatic organisms or for other adverse environmental effects. In these cases, petitioners were requested to estimate the concentration of the substance entering the environment at the site of production of the food-packaging material and to consider this estimate in light of the concentrations shown by toxicology data to produce harm. Mitigations of adverse environmental effects, such as warning labels on the product, were sometimes necessary.

Thus, the information required in the Statement of Exemption, along with any supplemental information usually requested, was not substantially different from that required in the proposed EA format, as abbreviated by proposed § 25.31(e)(2), with two exceptions. First, the proposed abbreviated assessment contained a reduced requirement, in that petitioners no longer had to show that a proposed additive was intended to replace a chemically or toxicologically similar substance already in use but had, instead, to provide information on whether a proposed additive was for the same use as another additive already in use. Second, the proposed abbreviated EA format required some additional information not required in the previous regulations. Specifically, additional information was required to assess the environmental impact of manufacture of the food additive, and petitioners had to address each item in the full EA format.

FDA has made the following changes in the final format, after considering the comments on the proposal:

(1) The information required to access the environmental impact of production of the food additives has been reduced and is now basically the same as that required under the previous regulations.

(2) Specific guidance informs petitioners how to make predictions on whether the food additives will enter the environment in quantities that will produce toxic effects.

(3) Petitioners ordinarily need not provide documentation on format item 9, utilization of resources and energy, if the proposed food additive is intended for the same use as another additive already in use. Food additives intended to replace other additives having the same use are expected to have comparable energy requirements and will not materially change the potential uses of the packaging material to which they are added.

(4) Less information is required about food additives that are present as functional components of finished food-packaging material than is required about those food additives that are used in the production of food-packaging material and become nonfunctional components of finished food-packaging material. As explained above, the latter type of food additive is more apt to enter the environment at sites of production of food-packaging material of which it is a component due to efforts to prevent the food additive from becoming a component of finished food-packaging material.

(5) Format items 7 and 8 encourage petitioners to rely on existing data in the petition, which may be incorporated by reference, or in the scientific literature in satisfying EA requirements. This guidance should discourage unnecessary testing merely to satisfy the EA requirements.

82. In § 25.31a(b)(2), FDA is providing an abbreviated version of format 1 for nonexcluded proposed approvals of food additives used as components of food-contact surfaces of permanent and semi-permanent equipment or of other food-contact articles intended for repeated use. These additives often have limited market volume. Environmental impact at the site of production of the additives is normally the major environmental concern.

Section 25.1(f)(3) of FDA's previous regulations provided a conditional exemption for food additives to be used as components of food-contact surfaces of permanent or semi-permanent equipment or of other food-contact articles intended for repeated use. Petitioners had to show that the food additive that was the subject of the petition belonged to one of the exempted classes of items, a fact that was nearly always evident from the petition. Also, they had to submit information on the environmental effects of the production of the proposed food additives, as described in previous § 25.1(g), in a Statement of Exemption. The criteria for exemption and information required were relatively straightforward and were not the subject of varying degrees of interpretation.

In § 25.31(e)(3) of the proposed rule, FDA added an information requirement concerning environmental effects at the sites of disposal. In certain instances, environmental introductions of chemicals might occur at the sites of disposal due to leaching of chemicals from food-contact articles. Food additive petitions ordinarily include data on the migration of chemicals from the food-contact articles as part of the showing of safety, and FDA believes that these data can be used to estimate the environmental concentrations that might be present due to the disposal of the food-contact articles.

83. A comment objected to the proposal to require an EA for this class of actions, arguing that such a requirement would increase significantly from the previous regulation the information required and thus the time, paperwork, and costs involved. The comment preferred the conditional exemption under § 25.1(f)(3) of the previous regulations.

The agency acknowledges that the proposed regulations would require additional information not requried by the previous regulation, such as additional information on the environmental impact of the production of the food additive and of the disposal of the food-contact article containing the food additive. Also, FDA proposed to require petitioners to address each item of the EA format.

The agency could not, however, develop previous § 25.1(f)(3) into a categorical exclusion. To assess the environmental impact of manufacture of the food additive and disposal of the food-contact article containing the food additive, FDA needs the kind of information that, under CEQ's regulations, is more appropriately included in an EA. However, because FDA recognizes that it needs much less information for the environmental review of these petitions than it does for other FDA actions, the agency has in the final rule reduced the information requirements so that they are virtually identical to those under the previous regulations.

FDA is providing a special abbreviated format for these food additive petitions, based on proposed § 25.31(e)(3), but with the following changes:

(1) Information required to assess the environmental impact of production of the food additive had been reduced.

(2) To determine the potential environmental impact of the food additive resulting from environmental introductions due to the disposal of food-contact articles containing the proposed additive, petitioners are required to estimate the maximum potential yearly market volume for the proposed food additive.

(3) Documentation for format items 7 through 11 and item 15 is ordinarily not required.

Abbreviated EA Format 1—Certain Human Drug and Biological Product Approvals

84. Section 25.31a(b)(3) provides an abbreviated version of format 1 for nonexcluded proposed approvals of NDA's for human drugs and biological product license applications for products intended for use in the prevention, treatment, or diagnosis of a rare disease, or for a similarly infrequent use; for ophthalmic or topical drug or biological product applications; or for local or general anesthetic drugs. These products ordinarily have limited distribution and use. Environmental impact at the site of production is the principal environmental concern with these relatively low-volume products.

Previous § 25.1(f)(1)(i) provided a conditional exemption for a drug, animal drug, or biological product intended for use in the prevention, diagnosis, or treatment of a rare disease, for infrequent use, or for use in insignificant amounts (taking into account projected effects on animals or humans). Applicants were required to submit a Statement of Exemption demonstrating that the product for which they were requesting action met one of the criteria addressing the frequency of product use and including data on the environmental effects of the manufacturing process for the product.

85. Four comments requested that the previous § 25.1(f)(1)(i) conditional exemption be converted into a categorical exclusion in the new environmental regulations, but did not suggest any clearer criteria for exclusion. Nor did these comments provide justification for eliminating the past requirement for data relating to the environmental effects of the manufacturing process. The basis for one of these comments was that the costs involved in preparing an abbreviated EA, as described in the proposed rule, would greatly reduce any incentive a sponsor might have for the development of these products, most of which provide minimum economic return.

The agency concludes that it cannot develop previous § 25.1(f)(1)(i) into a categorical exclusion. Requested actions of this type which cannot meet other categorical exclusions require the preparation of an abbreviated EA.

As described in the preceding paragraph, FDA encountered difficulties in applying the terms in the previous regulations, and applicants expended considerable efforts attempting to show that they qualified for exemption. These problems would continue with any categorical exclusion. Moreover, FDA connot satisfy its responsibilities under NEPA without requiring submission of environmental data on these proposed approvals. As discussed elsewhere in this preamble, CEQ's regulations on categorical exclusions do not allow agencies to require such data submissions by those seeking exclusions.

Although FDA is not providing a categorical exclusion for these approvals, it is limiting the information required to be included in an EA. As in proposed § 25.31(e)(4), requirements for information on a product's introduction, fate, and effects were limited to the consideration of the environmental impact of the manufacture of the product and to the determination of environmental concentrations of the product, its metabolites, and the degradation products resulting from the use of the product. Environmental introductions from the use of the product were to be estimated based upon knowledge of the frequency of use, mode of administration, and availability of the product. Furthermore, in codifying proposed § 25.31(e)(4) in the final rule's abbreviated format at § 25.31a(b)(3), FDA is making the following revisions to clarify the information required to show the limited use of these types of products, and to make the requirements comparable with those under the previous regulations.

(1) Information required for format item 6 to assess the environmental impact of production of the product is basically the same as that required under the previous regulations.

(2) Information to assess the potential environmental impact resulting from the use of the product is limited to estimating the potential yearly market volume for the product.

(3) Information is ordinarily not required for format items 7 through 11 and item 15.

Abbreviated EA Format 1—Certain New Animal Drug Approvals

86. Section 25.31a(b)(4) provides an abbreviated EA format for nonexcluded proposed approvals of new animal drug applications and supplements and amendments to such NADA's for animal drugs intended for use under prescription or veterinarian's order; for treatment of a disease occurring in minor species animals, as defined in 21 CFR 514.1(d); for use in nonfood

animals; for ophthalmic or topical application; or for local or general anesthesia. These drugs have limited production and use due to their intended uses or availability, or both. Therefore, approvals of these drug products generally result in limited environmental introductions of substances compared with other animal drug approvals.

87. Five comments suggested that the actions in question be categorically excluded from the requirement of an EA.

FDA cannot adopt this suggestion because it needs information on the possible environmental effects of these animal drug product approvals at the sites of production. FDA also needs information to judge whether the environmental introductions that result from use of these products have the potential to cause significant environmental effects.

Although the comments presented information on the density of domestic nonfood animals in rural and urban areas of the United States, they did not explain how FDA could avoid evaluation of environmental effects of the drugs' production. Indeed, the information submitted shows that the total number of nonfood animals treated with drug products may be considerable and that the market volume for such products may be large. This information thus supports the need for the agency to evaluate manufacturing impacts in its decisionmaking, because environmental introductions would be concentrated at no more than a few production sites rather than distributed in small amounts over a relatively large area.

Even though these actions were conditionally exempt from an EIAR under previous § 25.1(f)(1)(ii) due to their limited potential for environmental effects from use or disposal, FDA recognized when it created the exemption that the drugs' production could have environmental effects. Thus, applicants not only had to demonstrate in a Statement of Exemption that the animal drug met the specified criteria for exemption, but also had to submit environmental information on the manufacturing impacts of the product.

Although the previous conditional exemption was sound in theory, FDA found it difficult to apply. There were frequent cases in which actions met the criteria for exemption, but nevertheless were clearly high-volume drugs of wide availability intended to be used frequently in large populations of animals, with consequent large and potentially significant environmental introductions. For example: (1) technological developments have made it economically feasible for some drugs to be administered individually to all members of herds or flocks of food-producing animals; (2) drugs are frequently changed slightly by target animal metabolism, but still are excreted as bioactive compounds; and (3) drugs for prevention of diseases and parasites in nonfood animals, e.g., prevention of heartworm in dogs, may be administered frequently or continously to a very large proportion of the nonfood animal population. When such cases arose, FDA had to interpret the terms "limited number," "significant quantities," "pharmacological use," and "individual dose administration" in light of the original intent of the conditional exemption. Attempting to follow both NEPA and FDA's conditional exemption regulation thus became an unnecessarily long and complicated process.

In summary, FDA found that the conditional exemptions in previous § 25.1(f)(1)(ii) were excessively broad in that the criteria for exemption frequently exempted drug products that were not intended to be exempt. Accordingly, in preparing the proposed rule, FDA determined that those actions subject to this previous conditional exemption could not be developed into categorical exclusions due to the difficulties with the criteria cited above, as well as to the continued need to examine the environmental impacts from manufacture of such drug products. FDA instead provided, in proposed § 25.31(e), that these actions would be subject to an abbreviated EA requirement concentrating on potential impacts at the site of the product's manufacture and on the use of existing data to assess potential impacts resulting from the product's use.

FDA has codified proposed § 25.31(e)(1) in an abbreviated format at § 25.31a(b)(4). The final regulations do not permit the use of this format in three circumstances in which, under the previous regulations, applicants qualified for conditional exemptions.

First, previous § 25.31(f)(1)(ii) conditionally exempted approvals of animal drugs for pharmacological use in animals which metabolize the drug so that no significant quantities of the drug are excreted into the environment; in proposed § 25.31(e) and final § 25.31a(b)(4), FDA did not make these approvals eligible for abbreviated EA's. Rather, these approvals will be handled by the full EA format (Format 1), when the approvals do not belong to any other category that is abbreviated. Even Format 1, however, allows omission of unnecessary information. Based on FDA's experience evaluating environmental documents on animal drug approvals, the agency believes that a showing that a drug or any other FDA-regulated product is not excreted as the parent compound or as bioactive metabolites normally precludes the need to assess further the environmental fate and effects of the compound's use, whether or not the drug is for pharmacological use. Thus, approvals where there is such a showing self-limit the information required for environmental assessment even when the full EA format is used.

Second, in § 25.31a(b)(4) of the final rule, FDA has replaced the phrase "treatment of a disease" in proposed § 25.31(e)(1) with a clearer and more limited term, "treatment of a disease occurring in minor species animals, as defined in 21 CFR 514.1(d)." The proposal would have broadened the criterion in previous § 25.1(f)(1)(ii), which conditionally exempted animal drugs for pharmacological use in the treatment of a disease or condition which requires individual dose administration. At the time of the proposal, FDA believed that the abbreviated information requested in the EA on potential environmental introductions resulting from the use of such a drug would be sufficient for the agency to determine whether the EA needed to be supplemented with information on environmental fate and effects. This proposed provision promised to save time and paperwork for persons requesting approval of animal drugs for treatment of diseases that occur infrequently, that occur in aminal species with small populations in the United States, or that are administered in confined conditions. In developing the final rule, however, FDA decided that the provision would probably mislead some applicants for approval of high-volume, frequently used drugs into thinking that they need not submit information on the environmental fate and effects of use and disposal of the drugs. Delays in FDA's consideration of the application could result when, after FDA had reviewed an EA that lacked such information, the agency informed the applicant of the need to acquire and submit further environmental information. NADA's for drugs to be used in the treatment of animals that are not minor species and that do not belong to any other abbreviated category should include an EA in the full format described in § 25.31a(a). Special attention, however, should be given to the provisions for omitting unnecessary information, using existing information, and consulting with FDA's environmental staff, as discussed above.

Third, FDA has deleted reference to approvals of new animal drugs that are

in vitro diagnostics because such products are now devices, under a revised definition of "device" enacted in 1976 (21 U.S.C. 321(h), Pub. L. 94–295), and are no longer subject to premarket approval requirements.

In addition to the changes described above, FDA has made the following changes in response to comments on the proposed action:

(1) Information required to assess the environmental impact of production of the product is basically the same as was required by the previous regulation.

(2) Information on the environmental introduction of the drug product is limited to an estimate of the maximum yearly market volume. Other information on the introduction, fate, effects, and natural resource use of the drug product associated with its use is not normally required. EA format items 7 through 11 and item 15 are therefore not ordinarily completed for such products. When the estimated maximum yearly market volume and expected use pattern suggest the potential for environmental effects due to the use of the product, FDA will require further specific information to address these format items.

Abbreviated EA Format 1—Substances That Occur Naturally in the Environment

88. Section 25.31a(b)(5) provides for abbreviated EA's for nonexcluded proposed approvals of FDA-regulated substances that occur naturally in the environment. Environmental concerns about such products ordinarily are limited to effects at sites of production.

Previous § 25.1(f)(1)(iv) provided a conditional exemption from an EIAR for approvals of FDA-regulated products that met all of the following criteria:

(1) The article is composed of a substance or its derivatives that occur naturally in the environment and that may reasonably be considered to be nontoxic in the amounts used;

(2) The article is not metabolized in its use and is excreted unchanged back into the environment or, if it is metabolized, the metabolites in the amounts excreted into the environment are naturally occurring in the environment or may reasonably be considered to be nontoxic; and

(3) The use of the article can reasonably be expected on the basis of all available evidence not to alter significantly the prevalence and/or distribution in the environment of the substance or its derivatives or their metabolites.

Applicants and petitioners had to demonstrate that their product met all the above criteria for examption and to submit a Statement of Exemption that provided information on the environmental effects of the manufacturing process. Consequently, FDA included in the proposed rule a provision for abbreviation of EA's for proposed approvals of substances occurring naturally in the environment (proposed § 25.31(e)(6)), using wording similar to that in previous § 25.1(f)(1)(iv).

89. A comment said that the language in proposed § 25.31(e)(6) was ambiguous and subject to wide differences in interpretation.

FDA agrees with the comment. For clarity, FDA has codified proposed § 25.31(e)(6) in the final rule as an EA format at § 25.31a(b)(5). In addition, FDA has clarified information required to assess the environmetal impact of production of the product and limited it to that required under the previous regulations.

Abbreviated EA Format 1—Products Regulated by EPA

90. Section 25.31a(b)(6) (proposed § 25.31(e)(8)) provides for abbreviated EA's for nonexcluded proposed approvals of FDA-regulated products that have been registered with EPA as pesticides for other uses or have been considered by EPA under section 4 or 5 of the Toxic Substances Control Act. Abbreviated EA's for such products are justified because they have already been screeened for environmental fate and effects as a result of satisfying EPA's requirements for the EPA-regulated uses. As discussed in paragraph 4 above, FDA has tried to avoid duplicating the environmental review carried out by EPA under other statutes.

FDA has made the following revisions in the final rule:

(1) The scope of actions eligible for this abbreviated EA has been broadened to include proposed FDA approvals of products regulated by EPA whether or not the EPA-regulated use is similar to the proposed use regulated by FDA. This change was made because it was determined that at least some of the environmental data submitted to EPA in support of an EPA-regulated use of a product should aid also in evaluating the potential environmental impact of a different FDA-regulated use of the same product.

(2) Because FDA-regulated uses are usually different from those considered by EPA, format item 6 usually will require a separate analysis of environmental introductions due to the proposed use.

(3) Proposed § 25.31(e)(8)(i) has been deleted and replaced by specific guidance for completing EA format item 15(b).

(4) Format items 7 and 8 advise applicants and petitioners seeking FDA's approval of the FDA-regulated uses to use information in studies submitted to EPA or found in the scientific literature to satisfy FDA's information requirements on environmental fate and effects of the proposed new use.

EA Format 2—Withdrawals of Approval

91. This format, which is codified in §25.31b, would generally be used by FDA, rather than by applicants and petitioners, for EA's for nonexcluded actions that would withdraw approval to market or otherwise restrict the uses of FDA-regulated products. Environmental consideration of actions to withdraw products from the marketplace includes review of the essentiality of the product for which approval would be withdrawn, the availability of substitute products or procedures, and the increased use of these substitutes. Format 2 was developed based on FDA's experience in preparing EIS's and EA's for withdrawals and similar actions.

Format 2 omits certain items that appear in Format 1 that the agency will include in its finding of no significant impact (FONSI) or EIS: the preparer's (i.e., the agency's) name and address, the date, and the certification of the EA's factual accuracy. Items 5, 6, 7, 8, and 9 of Format 1 are all considered under item 2 of Format 2.

EA Format 3—Extramural Grants, Contracts, and Other Agreements

92. This format, which is codified in § 25.31c, would be used by those submitting proposals to FDA to perform nonexcluded research under a grant by, or contracted other agreement with, FDA. Any subsequent use of research results by FDA, such as to support the approval or withdrawal of approval of an FDA-regulated product, is generally subject to NEPA consideration under other provisions of these regulations. Accordingly, those who conduct FDA-funded research need not include in an EA the potential long-range environmental implications of the various possible findings of proposed research projects. Any attempt to predict such implications at the time research is proposed would be speculative.

EA Format 4—Establishment of Tolerances or Action Levels

93. Format 4, codified at § 25.31d, would be used in nonexcluded actions

to establish tolerances or action levels for unavoidable or deleterious substances in food for human consumption and food packaging. This format would normally be used by FDA rather than by persons submitting applications or petitions requesting agency actions. Examples of such actions which may have environmental implications include the setting of action levels or tolerances for chemical pollutants such as PCB's in fish or in packaging material. The establishment of tolerances or action levels for pollutants may determine whether certain fish can economically be harvested for human food (and, consequently, whether other types of uncontaminated fish will be harvested more intensively). Tolerances and action levels for food packaging may affect whether certain types of waste papers may be recycled for food-packaging uses. Therefore, the environmental impacts associated with setting tolerances and action levels usually center on changes in the use of natural resources, e.g., fisheries, timberland, agriculture, and in the energy required to obtain or make products within the permissible levels. The establishment of new tolerances or action levels, or the lowering of existing tolerances or action levels, for poisonous or deleterious substances that are unavoidable in food or in food-packaging materials may lead to the use of alternate foods or packaging materials. The impacts resulting from these changes should be discussed to the extent that they can be predicted, e.g., impacts on use of energy and natural resources, removal from the marketplace of the substances that caused the contamination and introduction of chemicals resulting from use of alternate food and packaging.

The establishment of higher tolerances or action levels may preserve or increase the market for the contaminated product and decrease the use of alternate foods and packaging materials. The impact of these changes should be addressed as discussed above.

EA Format 5—Destruction of Condemned, Enjoined, Detained, or Recalled Articles

94. This format, which is codified at § 25.31e, would be used when FDA determines under § 25.22(c) that the contemplated method of destruction for an FDA-regulated article that has been condemned, detained, or recalled by FDA, or the distribution or use of which has been enjoined, may result in the release of toxic substances into the environment. An EA must be prepared in such cases, upon FDA's request, by the person who claimed or is otherwise responsible for the article, if no § 25.24 categorical exclusion would apply. The environmental impacts associated with the proposed method of destruction, alternative methods, and mitigation measures are the primary focus of these EA's. In format item 6, alternative methods of destruction (including no action) are considered. Each alternative method of destruction or other methods of disposition, e.g., recycling, should be covered with roughly the same level of detail as was devoted to the proposed method in items 3, 4, and 5.

IV. Subpart D—Agency Decisionmaking

95. Subpart D corresponds to previous §§ 25.25 and 25.30. The subpart states the procedures FDA uses to incorporate environmental considerations into agency decisionmaking. The purpose of these procedures is to ensure that environmental information is provided to decisionmakers in a timely manner and that the NEPA process is integrated into agency decisionmaking, as required by the CEQ's regulations (40 CFR 1500.5, 1501.4(e), 1502.9(c), 1502.14, 1505.1, 1505.2, 1505.3, 1506.5, 1506.6, and 1506.11).

96. A comment on proposed § 25.41(b)(1) suggested that this provision be modified to state that the EA will not be publicly available until final approval of a pending NDA, ANDA, NADA, or biological product license. Section 25.41(b)(1) concerns the public availability of an EA and FONSI on a proposed action that is the subject of a notice of proposed rulemaking or a notice of filing published in the **Federal Register**. Such a notice shall state that no EIS is necessary and that the EA and FONSI are available for public inspection.

The agency plans to continue, with EA's and FONSI's, its current practice with EIAR's of making these documents available at the time of the public notice of proposed rulemaking for actions requiring a proposal or at the time of notices of filing of food and color additive petitions. EA's and FONSI's for approvals not subject to notices of proposed rulemaking or notices of filing, such as approvals of NDA's, ANDA's, and NADA's, will be made available at the time of the drug's approval.

Additionally, FDA has combined proposed § 25.41(b) (2) and (3) in the final rule at § 25.41(b)(2).

97. A comment on proposed § 25.42(b)(5)(iii) urged that FDA set specific time limits for extensions of time requirements for the agency's preparation of an EIS. The comment expressed concern about long delays in FDA's review and decisions on applications.

The agency believes that it is not possible to set a specific time limitation applicable to the issuance of all EIS's. Each action requiring the preparation of an EIS and consideration of potentially significant environmental impacts in agency decisionmaking requires different levels of technical input and presents varying levels of complexity and numbers of regulatory alternatives. Time requirements will be extended, if at all, only as long as necessary to permit the agency to issue an EIS for an action. Further, the applicant or petitioner may request a time limit for the preparation of a specific EIS under 40 CFR 1501.8 of CEQ's regulations. The agency will set such time limits for all or part of the NEPA process, consistent with the factors listed in § 1501.8, provided the limits are consistent with the purposes of NEPA.

V. Subpart E—Other Requirements

98. Subpart E concerns other requirements applicable to environmental effects of the agency's policies.

99. A comment on proposed § 25.50 suggested various changes to clarify the distinction between FDA's evaluation of effects on the environment in the United States (under NEPA) and its evaluation of effects on the environment abroad (under Executive Order 12114). The comment suggested several clarifying changes. Section 25.50 describes the procedures for FDA's consideration of environmental effects abroad of major agency actions in accordance with Executive Order 12114 (44 FR 1957; January 9, 1979). There was no comparable section in FDA's previous regulations in Part 25.

FDA agrees with all of the comment's suggested clarifications and has adopted them in § 25.50 of the final rule

VI. Economic Impact

FDA has assessed the economic effects of these regulations and has determined that they are not a major rule as defined in Executive Order 12291. FDA procedures governing environmental impact considerations have been in effect in one form or another since the agency's implementation of NEPA in 1973. This final rule presents definitions of terms and detailed guidance, particularly on determining the need for environmental impact consideration and preparation of environmental assessments and environmental impact statements (when required), which should eliminate or severely reduce unnecessary

environmental impact submissions. Additionally, numerous agency actions are now categorically excluded and several other actions are relieved of the requirement to produce full environmental assessments. These current revisions further streamline the agency's NEPA process through the additional reduction of delays and paperwork, and, therefore, on balance, do not result in any adverse effect on the economy. The regulatory requirements for a regulatory flexibility analysis in the Regulatory Flexibility Act are inapplicable to this rule because the proposed rule was issued prior to January 1, 1981, and is therefore exempt from these requirements.

Paperwork Reduction Act of 1980

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the collection of information requirements of §§ 25.23(c), 25.31a, 25.31c, and 25.31e in these regulations will be submitted for approval to the Office of Management and Budget (OMB). These requirements will not be effective until FDA obtains OMB approval. FDA will publish a notice concerning OMB approval of these requirements in the **Federal Register** prior to July 25, 1985.

List of Subjects

21 CFR Part 10

Administrative practice and procedure.

21 CFR Part 25

Environmental impact statements.

21 CFR Part 71

Administrative practice and procedure, Color additive cetification, Color additive petitions, Color additives, Cosmetics, Drugs.

21 CFR Part 170

Administrative practice and procedure, Definitions, Food additives, Food additive safety.

21 CFR Part 171

Administrative practice and procedure, Food additive petitions, Food additives.

21 CFR Part 312

Drugs, Medical research.

21 CFR Part 314

Administrative practice and procedure, Drugs.

21 CFR Part 511

Animal drugs, Medical research.

21 CFR Part 514

Administrative practice and procedure, Animal drugs.

21 CFR Part 570

Animal feeds, Animal foods, Food additives.

21 CFR Part 571

Administrative practice and procedure, Animal feeds, Animal foods, Food additives.

21 CFR Part 601

Biologics.

21 CFR Part 812

Health records, Investigational device exemptions, Medical devices, Medical device research, Reporting requirements.

21 CFR Part 813

Intraocular lenses, Medical devices, Medical research.

21 CFR Part 861

Administrative practice and procedure, Medical devices, Performance standards procedure.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 701, 52 Stat. 1055–1056 as amended (21 U.S.C. 371)); under the Public Health Service Act (secs. 351, 354–361, 58 Stat. 702 as amended (42 U.S.C. 262, 263b–264)); under the National Environmental Policy Act of 1969 (sec. 102(2)(C), 83 Stat. 853 (42 U.S.C. 4332)); 40 CFR Parts 1500–1508; Executive Order 11514 as amended by Executive Order 11991; Executive Order 12114; and under 21 CFR 5.11, Chapter I of Title 21 of the Code of Federal Regulations is amended as follows:

PART 10—ADMINISTRATIVE PRACTICES AND PROCEDURES

1. Part 10 is amended in § 10.30(b) by revising item C to read as follows:

§ 10.30 Citizen petition.

* * * * *

(b) * * *

C. Environmental Impact

(A claim for categorical exclusion under § 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter.)

* * * * *

2. By revising Part 25 to read as follows:

PART 25—ENVIRONMENTAL IMPACT CONSIDERATIONS

Subpart A—General Provisions

Sec.
25.1 Purpose.
25.5 Policies.
25.10 NEPA planning.
25.15 Terminology.

Subpart B—Agency Actions Requiring Environmental Consideration

25.20 General procedures.
25.21 Actions requiring preparation of an environmental impact statement.
25.22 Actions requiring preparation of an environmental assessment.
25.23 Actions that are excluded from the requirement to prepare an environmental assessment.
25.24 Categorical exclusions.
25.25 Retroactive environmental consideration.

Subpart C—Preparation of Environmental Documents

25.30 Content and format.
25.31 Environmental asessment formats.
25.31a Environmental assessment for proposed approvals of FDA-regulated products—Format 1.
25.31b Environmental asessment for withdrawals of approval and other restrictions—Format 2.
25.31c Environmental assessment format for extramural contracts, grants, or other research agreements—Format 3.
25.31d Environmental assessment for establishment of tolerances or action levels—Format 4.
25.31e Environmental assessment for destruction of condemned, enjoined, detailed, or recalled articles—Format 5.
25.32 Finding of no significant impact.
25.33 Notice of intent.
25.34 Draft, final, and supplemental environmental impact statements.

Subpart D—Agency Decisionmaking

25.40 Procedures for incorporating environmental considerations into agency decisionmaking.
25.41 Actions for which a finding of no significant impact and an environmental assessment are prepared.
25.42 Actions for which an environmental impact statement is prepared.

Subpart E—Other Requirements

25.50 Environmental effects abroad of major agency actions.

Authority: Sec. 701, 52 Stat. 1055–1056 as amended (21 U.S.C. 371); secs. 351, 354–361, 58 Stat. 702 as amended (42 U.S.C. 262, 263b–264); sec. 102(2)(C), 83 Stat. 853 (42 U.S.C. 4332); 40 CFR Parts 1500–1508; Executive Order 11514 as amended by Executive Order 11991; Executive Order 12114, unless otherwise noted.

Subpart A—General Provisions

§ 25.1 Purpose.

(a) The Food and Drug Administration (FDA) recognizes the National

Environmental Policy Act of 1969 (NEPA) as the national charter for protection, restoration, and enhancement of the environment. NEPA establishes policy, sets goals (section 101), and provides procedures (section 102) for carrying out the policy. This part supplements the regulations for implementing the procedural provisions of NEPA which were published by the Council on Environmental Quality (CEQ) in 40 CFR Parts 1500–1508 and the procedures included in the HHS General Administration Manual, Part 30: Environmental Protection (45 FR 76519–76534, November 19, 1980).

(b) These supplemental procedures provide that: (1) environmental information is to be available to the public and the decisionmaker before decisions are made about actions that may significantly affect the quality of the human environment; (2) FDA actions are to be supported by accurate scientific analyses; and (3) environmental documents are to concentrate on timely and significant issues, not to amass needless detail.

(c) These supplemental procedures for implementing NEPA allow FDA to assist individuals and non-Federal public entities in choosing courses of action that protect and enhance environmental quality.

(d) To avoid delays in decisionmaking, these supplemental procedures make possible the early identification of actions that may significantly affect the quality of the human environment.

(e) References in this part to regulatory sections of the Code of Federal Regulations are to Chapter I of Title 21, unless otherwise noted.

§ 25.5 Policies.

(a) All FDA policies and programs will be planned, developed, and implemented so as to achieve the policies declared by NEPA and required by the CEQ regulations to ensure responsible stewardship of the environment for present and future generations.

(b) If a proposed action for which an EIS will be prepared involves possible environmental effects that are required to be considered under statutes or Executive Orders other than those referred to under **"AUTHORITY"** in this part, these effects shall be considered in the NEPA review, consistent with 40 CFR 1502.25 and the HHS General Administration Manual, Part 30: Environmental Protection.

(c) Part 30 of the HHS General Administration Manual addresses the following statutes, Executive Orders, and other authorities not referred to under **"AUTHORITY"** in this part:

(1) *The Coastal Zone Management Act*, 16 U.S.C. 1456 et seq., directs Federal agencies to conduct activities consistent with an approved State coastal zone management program.

(2) *The Wild and Scenic Rivers Act*, 16 U.S.C. 1278, directs Federal agencies to consider and preserve the values of wild and scenic areas in the use and development of water and land resources.

(3) *Executive Order 11990*, May 24, 1977, directs heads of Federal agencies to avoid the long- and short-term adverse impacts associated with the destruction or modification of wetlands and direct or indirect support of new construction in wetlands whenever there is a practical alternative.

(4) *Executive Order 11988*, May 24, 1977, directs Federal agencies to take action to avoid the occupancy or modification of floodplains and to avoid direct or indirect support of development in floodplain areas whenever there is a a practical alternative.

(5) *U.S. Water Resources Council Floodplain Management Guidelines*, February 10, 1978, provides guidance to Federal agencies for implementing Executive Order 11988.

(6) *Marine Protection, Research and Sanctuaries Act*, 33 U.S.C. 1432f, provides for establishment of marine sanctuaries and directs Federal agencies to ensure that their actions are consistent with the intended use of such areas.

(7) *The Safe Drinking Water Act*, 42 U.S.C. 300f, et seq., authorizes EPA to determine if an action which will have an environmental effect on a sole or principal drinking water source would also constitute a significant hazard to a human population and, if so, to prohibit such an action.

(8) *The Clean Air Act*, 42 U.S.C. 1875h–7, requires EPA to review and comment on a Federal agency action which would create a significant environmental impact.

(9) *Executive Order 11987*, May 24, 1977, directs Federal agencies to prevent the introduction of exotic species into the natural ecosystems of the United States.

(10) *The Endangered Species Act*, 16 U.S.C. 1536, directs Federal agencies to conserve endangered and threatened species and their critical habitats.

(11) *Fish and Wildlife Coordination Act*, 16 U.S.C. 661–666c, directs Federal agencies to prevent loss and damage to, and provide for, development and improvement of wildlife resources.

(12) *The National Historic Preservation Act of 1966*, 16 U.S.C. 470 as amended, directs heads of Federal agencies to preserve cultural heritage, particularly with respect to sites on/or eligible for listing on the National Register of Historic Places.

(13) *Executive Order 11593*, May 5, 1971, implements portions of the National Historical Preservation Act of 1966 and requires the Federal government to nominate eligible properties which it owns, leases, or otherwise controls.

(14) *Regulations of the Advisory Council on Historic Preservation* (36 CFR Part 800) establish procedures for the protection of historic and cultural properties.

(15) *Regulations of the Department of the Interior* (36 CFR Parts 60 and 63) concern nominations to and determinations of eligibility for the National Register of Historic Places.

(16) *The Archaeological and Historic Preservation Act*, 16 U.S.C. 469a–1, et seq., directs Federal agencies to preserve significant scientific, prehistorical, historical, and archaeological data.

§ 25.10 NEPA planning.

(a) Environmental impact consideration is an integral part of FDA's regulatory process. For actions initiated by the agency, the process begins when FDA identifies a problem that requires action by the agency under the statutes it administers. For actions initiated by applicants or petitioners, the process begins when FDA receives from an applicant or petitioner an environmental assessment (EA) or a claim that a categorical exclusion applies, or when FDA personnel consult with applicants or petitioners on the NEPA-related aspects of their requested actions. FDA also may issue a public call for environmental data or otherwise consult with affected individuals or groups when a contemplated action in which it is or may be involved poses potentially significant environmental impacts. Assessment of environmental factors continues throughout planning and is intergrated with other program planning at the earliest possible time. FDA's assessment of environmental factors includes the identification of the parts of the environment that may be affected by the action, the evaluation of pertinent environmental data, and the consideration of alternatives consistent with 40 CFR 1502.14.

(b) FDA will be the lead agency for actions under programs it administers. As lead agency, FDA will coordinate the participation of all concerned agencies

in developing an environmental impact statement (EIS) according to 40 CFR 1501.6(a). If an action affects more than one center within FDA, the Commissioner of Food and Drugs will designate one of these units to be responsible for coordinating the preparation of any required environmental documentation.

(c) FDA and other affected Federal agencies will agree which one will be the lead agency and which will be the cooperating agencies for actions under programs not administered by FDA. If an agreement cannot be reached, the procedures in 40 CFR 1501.5(e) will be followed.

(d) FDA will act as a cooperating agency if requested. FDA may request to be designated as a cooperating agency if proposed actions may affect areas of FDA responsibility. As a cooperating agency, FDA will comply with the procedures in 40 CFR 1501.6(b) to the extent possible depending on priority and the availability of funds and personnel.

§ 25.15 Terminology.

(a) Definitions that apply to the terms used in this part are set forth in the CEQ regulations under 40 CFR Part 1508. The terms and the sections of 40 CFR Part 1508 in which they are defined follow:

(1) Categorical Exclusion (40 CFR 1508.4).

(2) Cooperating Agency (40 CFR 1508.5).

(3) Cumulative Impact (40 CFR 1508.7).

(4) Effects (40 CFR 1508.8).

(5) Environmental Assessment (EA) (40 CFR 1508.9).

(6) Environmental Document (40 CFR 1508.10).

(7) Environmental Impact Statement (EIS) (40 CFR 1508.11).

(8) Federal Agency (40 CFR 1508.12).

(9) Finding of No Significant Impact (FONSI) (40 CFR 1508.13).

(10) Human Environment (40 CFR 1508.14).

(11) Lead Agency (40 CFR 1508.16).

(12) Legislation (40 CFR 1508.17).

(13) Major Federal Action (40 CFR 1508.18).

(14) Mitigation (40 CFR 1508.20).

(15) NEPA Process (40 CFR 1508.21).

(16) Notice of Intent (40 CFR 1508.22).

(17) Proposal (40 CFR 1508.23).

(18) Scope (40 CFR 1508.25).

(19) Significantly (40 CFR 1508.27).

(b) The following terms are defined solely for the purpose of implementing the supplemental procedures provided by this part and are not necessarily applicable to any other statutory or regulatory requirements:

(1) "Agency" means the Food and Drug Administration (FDA).

(2) "Emissions requirements" specifies the limits on the quantities of pollutants allowed to be released into the work place and the area outside a production site or facility. These requirements or standards are set and enforced by local, State, and Federal government components, e.g., Environmental Protection Agency, Occupational Safety and Health Administration.

(3) "Environmental assessment technical guide" means that technical guidance prepared by FDA and intended to assist applicants and petitioners in preparing their environmental assessments.

(4) "Production" includes manufacture, processing, and packaging operations for FDA-regulated articles that are the subject of proposed actions.

(5) "Responsible agency official" means the agency decisionmaker designated in Part 5 of this chapter, the Commissioner of Food and Drugs, or the Commissioner's designated representative.

(6) "Toxic substance" means any substance that is harmful to some biological mechanism or system. Although it is recognized that any substance may produce damage to biological mechanisms or systems under specific conditions, for the purpose of these regulations, a substance is considered to be a toxic substance if it is harmful to appropriate test organisms at expected environmental concentrations even though it may be without effect to humans or other organisms at these concentrations and may even be used by humans because of its toxic properties. A substance is considered toxic in the environment if the maximum concentration of the substance at any point in the environment, i.e., either at any point of entry or any point where higher concentrations are expected as a result of bioaccumulation or other types of concentration processes, exceeds the concentration of the substance that causes any adverse effect in a test organism species (minimum effect level) or exceeds 1/100 of the concentration that causes 50-percent mortality in a test organism species, whichever concentration is less.

(c) The following acronyms are used in this part:

(1) ANDA—Abbreviated New Drug Application.

(2) CAS—Chemical Abstracts Service.

(3) CEQ—Council on Environmental Quality.

(4) CFR—Code of Federal Regulations.

(5) CGMP—Current Good Manufacturing Practice.

(6) EA—Environmental Assessment.

(7) EIS—Environmental Impact Statement.

(8) EPA—Environmental Protection Agency.

(9) FDA—Food and Drug Administration.

(10) FFD&C Act—Federal Food, Drug, and Cosmetic Act.

(11) FIFRA—Federal Insecticide, Fungicide and Rodenticide Act.

(12) FONSI—Finding of No Significant Impact.

(13) GLP—Good Laboratory Practice.

(14) GRAS—Generally Recognized as Safe.

(15) HHS—Department of Health and Human Services.

(16) IDE—Investigational Device Exemption.

(17) INAD—Notice of Claimed Investigational Exemption for New Animal Drug.

(18) IND—Notice of Claimed Investigational Exemption for New Drug.

(19) NADA—New Animal Drug Application.

(20) NDA—New Drug Application.

(21) NEPA—National Environmental Policy Act of 1969.

(22) OTC—Over-the-Counter.

(23) PMA—Premarket Approval Application.

(24) PDP—Product Development Protocol.

(25) TSCA—Toxic Substances Control Act.

(26) U.S.C.—United States Code.

Subpart B—Agency Actions Requiring Environmental Consideration

§ 25.20 General procedures.

(a) These procedures apply to all FDA actions that are not covered by environmental documents prepared under FDA environmental regulations previously in effect.

(b) All agency actions are subject to environmental consideration. Actions are individually examined for potential environmental impact unless excluded as a class by categorical exclusion under § 25.24.

§ 25.21 Actions requiring preparation of an environmental impact statement.

(a) There are no categories of agency actions which routinely significantly affect the quality of the human environment and which therefore ordinarily require the preparation of an EIS.

(b) EIS's are prepared for agency actions when:

(1) Evaluation of data in an EA leads to a finding by the responsible agency official that a proposed action may

significantly affect the quality of the human environment under the criteria in 40 CFR 1508.14 and 1508.27.

(2) Initial evaluation by the responsible agency official of any action, including any action for which an EA would otherwise be required, establishes that significant environmental effects may be associated with one or more of the probable courses of action being considered.

§ 25.22 Actions requiring preparation of an environmental assessment.

(a) Any proposed action of a type specified in this paragraph oridinarily requires the preparation of an EA, unless it qualifies for exclusion under §§ 25.23 and 25.24:

(1) Major recommendations or reports made to Congress on proposals for legislation in instances where the agency has primary responsiblity for the subject matter involved.

(2) Destruction or other disposition of articles condemned after seizure or whose distribution or use has been enjoined.

(3) Destruction or other disposition of articles following detention or recall at agency request.

(4) Disposition of FDA laboratory waste materials.

(5) Intramural and extramural research supported in whole or in part through contracts, other agreements, or grants.

(6) Establishment by regulation of labeling requirements, a standard, or a monograph.

(7) Amendments to, or an exemption or variance from, requirements of existing FDA regulations.

(8) Approval of supplements to existing approvals of FDA-approved articles.

(9) Withdrawal of existing approvals of FDA-approved articles.

(10) Approval of food additive petitions and color additive petitions and approval of requests for exemptions for investigational use of food additives.

(11) Establishment of a tolerance or an action level for unavoidable poisonous or deleterious substances in food or in packaging materials to be used for food.

(12) Affirmation of a food substance as generally recognized as safe (GRAS) for humans or animals, on FDA's initiative or in response to a petition, under Part 182, 184, 186, or 582.

(13) Promulgation and enforcement of FDA regulations relating to the control of communicable disease and to interstate conveyance sanitation.

(14) Approval of new drug applications (NDA's) and abbreviated new drug applications and actions on notices of claimed investigational exemption for new drugs (IND's).

(15) Approval of antibiotic application.

(16) Approval and issuance of licenses for biological products.

(17) Approval of new animal drug applications (NADA's), supplements and amendments to NADA's, and notices of claimed investigational exemptions for new animal drugs (INAD's).

(18) Approval of premarket approval applications (PMA's) for medical devices, notices of completion of product development protocols (PDP's) for medical devices, authorizations to commence clinical investigation under an approved PDP, or applications for an investigational device exemption (IDE).

(19) Action other than one listed in this subsection, unless subject to exclusion under §§ 25.23 and 25.24, that may significantly affect the quality of the human environment.

(b) A person who submits an application or petition requesting action by the agency of a type specified in paragraph (a) of this section shall include an EA for the requested action in the applicable format in § 25.31, unless the action qualifies for exclusion under §§ 25.23 and 25.24. Failure to submit an adequate EA, if one is required, for such an action is sufficient grounds for FDA to refuse to file or approve the application or petition. An EA adequate for filing is one that addresses each of the items specified in the applicable format in § 25.31. An EA adequate for approval is one that contains sufficient information to enable the agency to determine whether the proposed action may significantly affect the quality of the human environment.

(c) A manufacturer, distributor, or dealer who proposes to destroy or otherwise dispose of an FDA-regulated article that has been condemned, detained, or recalled, or whose distribution or use has been enjoined shall, if requested by the agency, submit an EA in the applicable format prescribed in § 25.31 analyzing the environmental impact of the proposed disposition of such article or shall provide information establishing that the action qualifies for exclusion under §§ 25.23 and 25.24.

(d) The responsible agency officials will evaluate the information contained in the EA to determine whether it is accurate and objective, whether the proposed action may significantly affect the quality of the human environment, and whether an EIS will be prepared. FDA is responsible for ensuring the accuracy of the EA, as required by 40 CFR 1506.5(b). If significant effects requiring the preparation of EIS are identified, FDA will publish in the **Federal Register** a Notice of Intent to prepare an EIS in accordance with § 25.33 of this part. If significant effects requiring the preparation of an EIS are not anticipated and the decision is made not to prepare an EIS, the responsible agency official will prepare a finding of no significant impact (FONSI) in accordance with § 25.32.

§ 25.23 Actions that are excluded from the requirement to prepare an environmental assessment.

(a) Actions of a class that individually or cumulatively have been determined under § 25.24 not to significantly affect the quality of the human environment ordinarily are excluded from the preparation of an EA or an EIS.

(b) As required under 40 CFR 1508.4, FDA will require an EA for any specifc action that ordinarily is excluded if the agency has sufficient evidence to establish that the specific proposed action may significantly affect the quality of the human environment.

(c) A person submitting an application or petition of a type subject to categorical exclusion under § 25.24, or proposing to dispose of an article as provided in § 25.24 (a)(4) or (b)(9), is not required to submit an EA if the person specifies the provision of this part that excludes the action from the requirement for an EA and provides information, when appropriate, that establishes to the agency's satisfaction that the action requested is included within an excluded category and meets the criteria for the applicable exclusion.

(d) Failure to provide sufficient information, when appropriate, to establish that the requested action is subject to a categorical exclusion under § 25.24 may result in the agency's refusal to file or to approve the application or petition or to approve the proposed disposition of an article as provided in § 25.24 (a)(4) or (b)(9).

§ 25.24 Categorical exclusions.

Certain FDA actions listed in this section are subject to categorical exclusions and, therefore, ordinarily do not require the preparation of an EA because, as a class, these actions will not result in the production or distribution of any substance and, therefore, will not result in the introduction of any substance into the environment. (These actions are listed in paragraphs (a) (1) through (3), (5), (7) through (9), (b) (1), (4) through (6), and 8(ii), (c) (3), (5), (8), (9), and (11), (d) (2), (3), and (5), (e) (1) through (3) and (5) of this section.) Additional exclusions for actions that will not result in the

introduction of any substance into the environment are contained in Chapter 30–20–40 B.2. of the HHS General Administration Manual. Certain FDA actions listed in this section are subject to categorical exclusions and, therefore, ordinarily do not require the preparation of an EA because these actions meet specific criteria that are intended to ensure that they will not cause significant environmental effects. (These actions are listed in paragraphs (a) (4), (6), (10), and (11), (b) (2), (3), (7), (8)(i), and (9), (c) (1), (2), (4), (6), (7), and (10), (d) (1), (4), (6), and (7), (e) (4), (6), and (7) of this section.) Certain FDA actions listed in this section are subject to categorical exclusions and, therefore, ordinarily do not require the preparation of an EA because, as a class, these actions are routine maintenance or minor leasing or construction activities conducted or contracted for by FDA. (These actions are listed in paragraph (a)(12) of this section.) The classes of actions that are categorically excluded are as follows:

(a) *General.* (1) Routine administrative and management activities, including inspections, and issuance of field compliance programs, program circulars, or field investigative assignments.

(2) Recommendation for an enforcement action to be initiated in a Federal court.

(3) Agency requests for initiation of recalls.

(4) Destruction or disposition of any article condemned after seizure or the distribution or use of which has been enjoined or following detention or recall at agency request if the method of destruction or disposition of the article, including packaging material, will not result in the release of a toxic substance into the environment.

(5) Extramural contracts, other agreements, or grants for statistical and epidemiological studies, surveys and inventories, literature searches, and report and manual preparation, or any other studies that will not result in the production or distribution of any substance and, therefore, will not result in the introduction of any substance into the environment.

(6) Extramural contracts, other agreements, and grants for research for such purposes as to develop analytical methods or other test methodologies if the waste from such research will be controlled or the amount of waste expected to enter the environment may reasonably be expected to be nontoxic.

(7) Activities of voluntary Federal-State cooperative programs, including issuance of model regulations proposed for State adoption.

(8) Issuance, amendment, or revocation of procedural or administrative regulations and guidelines, including procedures for submission of applications for product development, testing and investigational use, and approval.

(9) Corrections and technical changes in regulations.

(10) Promulgation of current good manufacturing practice (GGMP) regulations, establishment standards, emergency permit control regulations, and good laboratory practice (GLP) regulations, and issuance or denial of permits, exemptions, variances, or stays under these regulations, if there is no increase in the quantities or toxicity of wastes entering the environment as a direct or indirect result of the action.

(11) Establishment or repeal by regulation of labeling requirements for marketing articles if there will be no increase in the existing levels of use or change in the intended uses of the product or its substitutes.

(12) Routine maintenance and minor construction activities, except for properties listed on or eligible for listing on the National Register of Historic Places:

(i) Repair to or replacement of equipment or structural components (doors, roof, window, etc.) of facilities controlled by FDA;

(ii) Lease extensions, renewals, or succeeding leases;

(iii) Construction or lease construction of 10,000 square feet or less of occupiable space;

(iv) Relocation of employees into existing owned or currently leased space;

(v) Acquisition of 20,000 square feet or less of occupiable space in a structure that was substantially completed before the issuance of solicitation for offers; and

(vi) Acquisition of between 20,000 square feet and 40,000 square feet of occupiable space if it constitutes less than 40 percent of the occupiable space in a structure that was substantially completed before the solicitation for offers.

(b) *Foods, food additives, and color additives.* (1) Promulgation, amendment, or repeal of a food standard.

(2) Action on a request for exemption for investigational use of a food additive if the food additive to be shipped under the request is intended to be used for clinical studies for research in which waste will be controlled or the amount of waste expected to enter the environment may reasonably be expected to be nontoxic.

(3) Approval of a color additive petition to change a provisionally listed color additive to permanent listing for use in food, drugs, devices, or cosmetics if data available to the agency do not establish that, at the expected levels of exposure, it may be toxic to organisms in the environment.

(4) Testing and certification of batches of a color additive.

(5) Promulgation of an interim food additive regulation.

(6) Establishment of an action level under section 402(a) of the Federal Food, Drug, and Cosmetic Act for natural or unavoidable defects in food for humans or animals if these defects present no health hazard.

(7) Affirmation of a food substance as generally recognized as safe (GRAS) for humans or animals on FDA's initiative or in response to a petition, under Part 182, 184, 186, or 582, if the substance is already marketed for the use for which affirmation is sought and data available to the agency do not establish that, at the expected levels of exposure, the substance may be toxic to organisms in the environment.

(8) Promulgation and enforcement of regulations relating to the control of communicable diseases or to interstate conveyance sanitation under:

(i) Part 1240 if the method of control (including treatments, destruction, or disposition) of any animal or article, including packaging material, does not affect an endangered species or result in the release of a toxic substance into the environment; or

(ii) Part 1250 if the corrective measures do not result in the release of a toxic substance into the environment.

(9) Approval of a request for diversion of adulterated or misbranded food for humans or animals to use as animal feed if such disposition of the article, including packaging material, will not result in the release of a toxic substance into the environment.

(c) *Human drugs and biological products.* (1) Action on an ANDA if the drug product will not be administered at higher dosage levels, for longer duration, or for different indications than were previously in effect and if data available to the agency do not establish that, at the expected level of exposure, the substance may be toxic to organisms in the environment.

(2) Action on an amendment or supplement to an NDA of the following types if the drug product will not be administered at higher dosage levels, for longer duration, or for different indications than were previously in effect and if data available to the agency do not establish that, at the expected levels of exposure, the

substance may be toxic to organisms in the environment.

(i) Changes specified in § 314.70 (c) or (d); or

(ii) Any other type of amendment or supplement to an NDA which meets the above criteria for exclusion.

(3) Withdrawal of approval of an NDA or ANDA when the drug is no longer being marketed or at the request of the application holder.

(4) Action on a Notice of Claimed Investigational Exemption for New Drug (IND), if the drug shipped under such notice is intended to be used for clinical studies or research in which waste will be controlled or the amount of waste expected to enter the environment may reasonably be expected to be nontoxic.

(5) Testing and certification of batches of an antibiotic or insulin.

(6) Promulgation, revocation, or amendment of a monograph for a drug that is not a new drug, for an antibiotic drug, or for an over-the-counter (OTC) drug, if the drug is already marketed for the proposed use and data available to the agency do not establish that, at the expected levels of exposure, the drug may be toxic to organisms in the environment.

(7) Establishment of bioequivalence requirements for a marketed drug product if there is no change in the existing levels of use or intended uses of the product.

(8) Action on changes in a biological product license or an establishment license reported under § 601.12 of this chapter.

(9) Revocation of a license for a biological product when it is no longer being marketed, or revocation of a biological product or establishment license at the request of the license holder.

(10) Promulgation, amendment, or revocation of a standard for a licensed biological product or amendment of the license for a biological product if there is no change in the existing levels of use or intended uses of the product.

(11) Action on a license application for transfusable blood or blood products.

(d) *Animal drugs.* (1) Action on an NADA or supplemental NADA for a previously approved animal drug of the following types if the drug product will not be administered at higher dosage levels, for longer duration, or for different indications than were previously in effect and if data available to the agency do not establish that, at the expected level of exposure, the substance may be toxic to organisms in the environment:

(i) An animal drug to be marketed under the same conditions of approval as a previously approved animal drug;

(ii) A combination of previously approved animal drugs;

(iii) A new premix or other formulation of a previously approved animal drug;

(iv) Changes specified in § 514.8(a) (5), (6), or (d);

(v) A change of sponsor; or

(vi) A previously approved animal drug to be contained in medicated feed blocks under § 510.455 or as a liquid feed supplement under § 558.5.

(2) Approval of an animal feed bearing or containing a drug approved under § 514.2 or 514.9.

(3) Withdrawal of approval of an NADA when the drug is no longer being marketed or at the request of the application holder.

(4) Action on a notice of claimed investigational exemption for a new animal drug (INAD) if the drug to be shipped under such notices is intended to be used for clinical studies or research in which waste will be controlled or the amount of waste expected to enter the environment may reasonably be expected to be nontoxic.

(5) Testing and certification of batches of an antibiotic for animal use.

(6) Promulgation, revocation, or amendment of a monograph for an animal drug that is not a new animal drug, if the drug is already being marketed for the proposed use and data available to the agency do not establish that, at the expected levels of exposure, the drug may be toxic to organisms in the environment.

(7) Establishment of bioequivalence requirements for marketed animal drug products if there is no change in the existing levels of use or intended uses of the product.

(e) *Devices and electronic products.* (1) Action on a device premarket notification submission under Subpart E of Part 807.

(2) Classification or reclassification of a device under Part 860.

(3) Issuance, amendment, or repeal of a standard for a class II medical device or an electronic product, and issuance of exemptions or variances from such a standard.

(4) Approval of a premarket approval application (PMA) or a notice of completion of a product development protocol (PDP) or amended or supplemental applications or notices for a class III medical device if the device is of the same type and for the same use as a previously approved device and data available to the agency do not establish that approval of the PMA, or the notice of completion of the PDP or amended or supplemental applications or notices, will result in release of substances that, at the expected levels of exposure, may be toxic to organisms in the environment.

(5) Changes in the PMA or a notice of completion of a PDP for a class III medical device that do not require submission of an amended or supplemental application or notice.

(6) Promulgation of a restricted device regulation if it will not result in increases in the existing levels of use or changes in the intended uses of the product or its substitutes.

(7) Action on an application for an Investigational Device Exemption (IDE) or an authorization to commence a clinical investigation under an approved Product Development Protocol (PDP), if the devices shipped under such notices are intended to be used for clinical studies or research in which waste will be controlled or the amount of waste expected to enter the environment may reasonably be expected to be nontoxic.

(8) Promulgation of a regulation exempting from preemption a requirement of a State or political subdivision concerning a device, or a denial of an application for such exemption.

§ 25.25 Retroactive environmental consideration.

(a) FDA may consider the need for preparing an EIS for an existing FDA regulation, approval, or other action, whether or not previously subject to environmental analysis, when there is new information before the agency that suggests that the action may significantly affect the quality of the human environment.

(b) If FDA notifies an applicant or petitioner who obtained an existing FDA approval that new information suggests that the approval may have signficant environmental effects and that an EA is therefore required, the applicant or petitioner shall submit an EA as described in § 25.31 for the approval. A notification under this paragraph will be in writing.

Subpart C—Preparation of Environmental Documents

§ 25.30 Content and format.

(a) Sections 25.31 through 25.34 describe the environmental documents that may be required in the course of the agency's consideration of the environmental aspects of an action. These sections delineate the relationships of these documents to each other and their purpose, contents, and format. Additional information

concerning the nature and scope of information that an applicant or petitioner shall submit in an environmental document may be obtained on a case-by-case basis from the bureau, national center, or other office of the agency having responsibility for the action that is the subject of the environmental evaluation. Applicants and petitioners are encouraged to submit proposed protocols for environmental studies for technical review by agency staff. Applicants and petitioners also are encouraged to consult applicable FDA environmental assessment technical guides, which describe protocols for environmental studies and discuss the interpretation results.

(b) Data and information that are protected from disclosure by 18 U.S.C. 1905 or 21 U.S.C. 331(j) or 360j(c) shall not be included in environmental documents prepared under this part. When such data and information are pertinent to the environmental review of a proposed action, an applicant or petitioner may submit such data and information separately as a confidential section of the application or petition, but shall summarize the confidential data and information in the environmental document to the extent possible.

§ 25.31 Environmental assessment formats.

(a) As defined by CEQ in 40 CFR 1508.9, the EA is the public document in which environmental and other pertinent information on a proposed action are presented, providing a basis for the agency's determination whether to prepare as EIS or a FONSI.

(b) An EA shall be prepared in the format presented in this section for each action not categorically excluded in § 25.24. The EA shall be a complete, objective, and well-balanced document that allows the public to understand the agency's decision.

(c) Consistent with 40 CFR 1500.4(j) and 1502.21, EA's may incorporate by reference information presented in other documents that are available to FDA and to the public.

§ 25.31a Environmental assessment for proposed approvals of FDA-regulated products—Format 1.

(a) For proposed actions to approve food or color additives, drugs, biological products, animal drugs, and class III medical devices, and to affirm food substances as generally recognized as safe (GRAS), the applicant or petitioner shall prepare an environmental assessment in the following format:

Environmental Assessment

1. *Date:*
2. *Name of applicant/petitioner:*
3. *Address:*
4. *Description of the proposed action:* Briefly describe the requested approval; need for the action; the locations where the products will be produced; to the extent possible, the locations where the products will be used and disposed of; and the types of environments present at and adjacent to those locations.
5. *Identification of chemical substances that are the subject of the proposed action:* Provide complete nomenclature, CAS Reg. No. (if available), molecular weight, structural formulae, physical description, additives, and impurities. This information is required to be adequate to allow accurate location of data about chemicals in the scientific literature and to allow identification of closely related chemicals.
6. *Introduction of substances into the environment:* For the site(s) of production: list the substances expected to be emitted; state the controls exercised; include a citation of, and statement of compliance with, applicable emissions requirements (including occupational) at the Federal, State, and local level; and discuss the effect the approval of the proposed action will have upon compliance with current emissions requirements at the production site(s). Through use of calculations and/or direct measures, estimate to the extent possible the quantities and concentrations of substances expected to enter the environment as a result of use and/or disposal of products affected by the action.
7. *Fate of emitted substances in the environment:* Predict environmental concentrations of and exposures to substances entering the environment as a consequence (direct or indirect) of the use and/or disposal of the products affected by the action for the following environmental compartments, including consideration of the major environmental transport and transformation processes involved:

(a) Air—taking into account, to the extent possible, factors such as volatilization, photochemical and chemical degradation, rainout, and dispersion;

(b) Freshwater, estuarine, and marine ecosystems—taking into account, to the extent possible, factors such as chemical and biological degradation, exchange between the water column and sediments via sorption/desorption and biological processes, accumulation in animals, plants, and other organisms, introductions due to rainfall and losses due to volatilization;

(c) Terrestrial ecosystems—taking into account, to the extent possible, factors such as chemical and biological degradation, sorption/desorption and leaching in soils, accumulation in animals and plants, introductions due to rainfall, losses due to volatilization, and entry into groundwater.

8. *Environmental effects of released substances:* Given the information developed on the introduction (item 6) and fate (item 7) of substances which would be released as a consequence of the use and/or disposal of the products affected by the action, use any relevant toxicological data or other appropriate measures to predict, to the extent applicable, effects on animals, plants, humans, other organisms, and effects at the ecosystem-level in each of the environmental compartments listed in item 7.

9. *Use of resources and energy:* Specify the natural resources, including land use, minerals, and energy, required to produce, transport, use, and/or dispose of a given amount of any product which is the subject of the action, including the resources and energy required to dispose of wastes generated from production, use, and/or disposal. Effects, if any, upon endangered or threatened species and upon property listed in or eligible for listing in the National Register of Historic Places must be discussed.

10. *Mitigation measures:* Describe measures taken to avoid or mitigate potential adverse environmental impacts associated with the proposed action.

11. *Alternatives to the proposed action:* If potential adverse environmental impacts have been identified for the proposed action, describe in detail the environmental impact of all reasonable alternatives to the proposed action (including no action, and including measures that FDA or another government agency could undertake as well as those the applicant/petitioner would undertake). Describe particularly those alternatives that will enhance the quality of the environment and avoid some or all of the adverse environmental impacts of the proposed action. Discuss the environmental benefits and risks of the proposed action. Discuss the environmental benefits and risks of each alternative.

12. *List of preparers:* Those persons preparing the assessment together with their qualifications (expertise, experience, professional disciplines) shall be listed. Persons and agencies consulted shall also be listed.

13. *Certification:* The undersigned official certifies that the information presented is true, accurate, and complete to the best of the knowledge of the firm or agency responsible for preparation of the environmental assessment.

(Date)_____

(Signature of responsible official)

(Title)_____

14. *References:* List complete citations for all referenced material. Copies of referenced articles not generally available should be attached.

15. *Appendices:* (a) Data summary charts (e.g., structural formula, vapor pressure, water solubility, *n*-octanol/water partition coefficient, biodegradation half-life, LC_{50} for each species tested, etc.).

(b) Test reports (for each experiment: research objective, experimental design and procedure, all data relevant to interpretation of the test result given in item 15(a), sample calculations and statistical analyses).

(b) FDA has determined that, for the following actions, certain requirements of the environmental assessment format in paragraph (a) of this section may be abbreviated as specified in this paragraph. All other format items in paragraph (a) of this section are required to be addressed in full. After FDA evaluates environmental

information submitted in an EA in which one or more format items are abbreviated, FDA may require the submission of additional information on the subject in question.

(1) For actions to approve food additive petitions for food additives present in finished food-packaging material at not greater than 5-percent-by-weight, the following information is required for the format items specified:

(i) *Format item 6.* For the site(s) of production of the food additive, list the substances expected to be emitted; state the controls exercised; include a citation of, and statement of compliance with, applicable emissions requirements (including occupational) at the Federal, State, and local level; and discuss the effect the approval will have upon compliance with current emissions requirements at the production site(s). For food additives that are present as functional components of finished food-packaging material, estimate the maximum yearly market volume of the additive for the proposed use and the percent of that amount that will be a component of the finished food-packaging material. This information may be used to determine whether the proposed additive has potential for significant environmental introductions at the sites of production and disposal of the food-packaging material. For food additives that are used in the production of and that become nonfunctional components of finished food-packaging material, estimate the maximum yearly market volume of the additive for the proposed use, the percent of that amount that will be a component of the finished food-packaging material, and the concentrations of the proposed food additive expected to enter the environment at the site of production of the food-packaging material. This information may be used to determine whether the proposed additive has potential for significant environmental introductions at the sites of production and disposal of the food-packaging material.

(ii) *Format item 7.* For food additives that become nonfunctional components of finished food-packaging material, report or incorporate by reference physical/chemical and other data relating to the environmental fate of the additive developed for other purposes in the petition and where pertinent data in the scientific literature are known. Examples of such physical/chemical parameters include water solubility, *n*-octanol/water partition coefficient, vapor pressure, etc. These data may be used to make a rough estimate of environmental concentration and mobility of the food additive at the site of production of the food-packaging material. Documentation of environmental fate is normally not required for food additives that are present as functional components of finished food-packaging material at not greater than 5-percent-by-weight.

(iii) *Format item 8.* For food additives that become nonfunctional components of food-packaging material, report or incorporate by reference existing data relating to the environmental effects of the proposed food additive. Toxicity of the proposed food additive to laboratory animals (submitted to satisfy human safety requirements) and information on the toxicity of the product to organisms that may be exposed in the environment, e.g., fish, invertebrates, plants, fungi, and bacteria, known from the scientific literature should be reported. The expected environmental concentrations of the proposed food additive should be compared with the concentrations that caused adverse toxicological effects. Documentation of environmental effects is normally not required for additives that are present as functional components of finished food-packaging material at not greater than 5-percent-by-weight.

(iv) *Format item 9.* Documentation for this item is ordinarily not required if the proposed food additive is intended for the same use as another additive already in use and will not materially change the potential uses of the packaging material to which it is added.

(v) *Format items 10 and 11.* For food additives that are present as functional components of finished food-packaging material at not greater than 5-percent-by-weight, documentation for these items is normally not required. For food additives that become nonfunctional components of finished food-packaging material at not greater than 5-percent-by-weight, these format items are addressed in full.

(2) For approval of food additives to be used as components of food-contact surfaces of permanent or semi-permanent equipment or of other food-contact articles intended for repeated use, the following information is required for the items specified:

(i) *Format item 6.* For the site(s) of production: list the substances expected to be emitted; state the controls exercised; include a citation of, and statement of compliance with, applicable emissions requirements (including occupational) at the Federal, State, and local level; and discuss the effect the approval of the proposed food additive will have upon compliance with current emissions requirements at the production site(s). To determine whether approval of the proposed food additive will result in potentially significant introductions of substances into the environment due to the disposal of food-contact articles containing the proposed food additives, estimate the maximum yearly market volume of the proposed food additive.

(ii) *Format items 7 through 11 and 15.* Documentation for these items is ordinarily not required.

(3) For approval of NDA's for human drugs and approval of licenses for biological products, when the drugs or biological products are intended for the prevention, treatment, or diagnosis of a rare disease or for a similarly infrequent use; for ophthalmic or topical application; or for local or general anesthesia; the following information is required for the items specified:

(i) *Format item 6.* For the site(s) of production: list the substances expected to be emitted; state the controls exercised; include a citation of, and statement of compliance with, applicable emissions requirements (including occupational) at the Federal, State, and local level; and discuss the effect the approval will have upon compliance with current emissions requirements at the production site(s). Estimate the maximum yearly market volume of the drug product to aid in determining whether approval of the application could result in potentially significant environmental introductions from use of the product.

(ii) *Format items 7 through 11 and 15.* Documentation for these items is ordinarily not required.

(4) For approval of NADA's and supplements and amendments to NADA's for animal drugs intended for use under prescription or veterinarian's order; for treatment of a disease occurring in minor species animals, as defined in § 514.1(d); for use in nonfood animals; for ophthalmic or topical application; or for local or general anesthesia; the following information is required for the format items specified:

(i) *Format item 6.* For the site(s) of production: list the substances expected to be emitted; state the controls exercised; include a citation of, and statement of compliance with, applicable emissions requirements (including occupational) at the Federal, State, and local level; and discuss the effect the approval will have upon compliance with current emissions requirements at the production site(s). Estimate the maximum yearly market volume of the drug product to aid in determining whether approval of the application will result in potentially

significant environmental introductions from use of the product.

(ii) *Format items 7 through 11 and 15.* Documentation for these items is ordinarily not required.

(5) When the agency approves or issues, for a substance that occurs naturally in the environment, a food or color additive petition, GRAS affirmation petition, NDA, supplemental NDA, biological product license, NADA, supplemental NADA, or class III medical device, the following information is required for the format items specified:

(i) *Format item 6.* For the site(s) of production: list the substances expected to be emitted; state the controls exercised; and include a citation of, and statement of compliance with, applicable emissions requirements at the Federal, State, and local level; and discuss the effect the approval will have upon compliance with current emissions requirements at the production site(s).

(ii) *Format item 7.* Discuss whether the use of the product can reasonably be expected on the basis of all available evidence to alter significantly the concentration and distribution of the product, its metabolites, degradation products, or its constituent parts in the environment.

(iii) *Format item 8.* Report existing data relating to the environmental effects of substances expected to be emitted into the environment as a consequence of use of the product. Report information obtained from the scientific literature on the toxicity of the product to laboratory animals, e.g., that information which is submitted to satisfy human safety requirements, and to organisms in the environment, e.g., fish, invertebrates, plants, fungi, and bacteria, that may be exposed to the product.

(6) For approval or issuance by the agency of a food or color additive petition, NDA, supplemental NDA, biological product license, NADA, or supplemental NADA for a product that has been approved by the Environmental Protection Agency (EPA) under section 4 or 5 of the Toxic Substances Control Act (TSCA) or under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), the following information is required:

(i) *Format items 7 and 8.* To address these items, rely on environmental information in studies submitted to EPA, in the application/petition submitted for FDA approval, and in the scientific literature. Describe any potential adverse environmental impacts determined by EPA.

(ii) *Format item 15(b).* For studies submitted to EPA or for relevant studies submitted in the application/petition to meet the requirements of the Federal Food, Drug, and Cosmetic Act, test reports may include only a brief description and summary of results of each study in lieu of attaching complete test reports.

§ 25.31b Environmental assessment for withdrawals of approval and other restrictions—Format 2.

For proposed actions to withdraw approval or otherwise restrict or reduce the use of food or color additives, drugs, biological products, animal drugs, and class III medical devices, any environmental assessment prepared by the agency will be in the following format:

Environmental Assessment

1. *Description of the proposed action:* Describe the proposed action, the regulatory authority for the proposed action, the underlying purpose of and need for the proposed action, and how the proposed action addresses the underlying purpose and need for action.

2. *Environmental consequences of the proposed action:* Describe the uses and the magnitude (production volume and/or sales) of such uses for the product(s) for which approval would be withdrawn or otherwise restricted or reduced and for the available substitute products. Determine those uses of the restricted product(s) for which no substitute products are available and the magnitude and essentiality of such uses. Discuss the environmental impacts of (1) reducing or eliminating environmental exposures to the restricted product; (2) natural resources and energy used in producing, distributing, using, and disposing of the restricted product compared with those required for the available substitute products; (3) any expected increased production and use of substitute products; and (4) essential uses of the restricted product for which there would be no substitutes.

3. *Mitigation measures:* Describe measures which would be taken to avoid or mitigate potential adverse environmental effects associated with the proposed action.

4. *Description of regulatory alternatives to the proposed action and the expected environmental consequences:* Describe in detail the environmental impact of reasonable alternatives to the proposed action (including no action), particularly those that will enhance the quality of the environment and avoid some or all of the adverse environmental effects of the proposed action.

5. *Comparative analysis of proposed action and alternatives:* Provide a comparative analysis of the environmental benefits and risks of the proposed action and alternatives. Identify the preferred action based on environmental factors.

6. *List of preparers:* Those persons preparing the assessment and their areas of expertise shall be presented. Persons and agencies consulted shall be listed.

7. *References:* List complete citations for all referenced material. Copies of referenced articles not generally available should be attached.

8. *Appendices:* Append detailed physical, chemical, biological, and environmental data on products that are the subject of the proposed action.

§ 25.31c Environmental assessment format for extramural contracts, grants, or other research agreement—Format 3.

For extramural contracts, grants, or other research agreements subject to environmental assessment, the contractor or applicant shall use the following format:

Environmental Assessment

1. *Date:*

2. *Name of prospective contractor/applicant:*

3. *Address:*

4. *Description of the proposed research activities:* Briefly describe the purpose of the proposed research, the locations where the research activities would occur, and the types of environments present at those locations.

5. *Information on the chemical substances and infectious agents to be used:* Provide the information listed in Table 1 on each of the chemical substances and infectious agents to be used in the research activity, to the extent that they can be identified, either specifically or generically, and including such items as organic solvents as well as the chemicals of major research interest.

TABLE 1.—CHEMICAL SUBSTANCES/INFECTIOUS AGENTS TO BE USED IN THE PROPOSED RESEARCH ACTIVITIES

Chemical infectious agent name (complete scientific nomenclature	Approximate amounts to be used [a]	Hazard code [b]	Emissions controls: (environmental and occupational) [c]
1			
2			
3			

[a] Specify in metric units of mass or volume.

[b] I—infectious, C—carcinogenic, M—mutagenic, T—teratogenic, A—acutely toxic or poison, COR—corrosive, E—explosive or flammable, R-radioactive, O-other hazard, please specify, NH-nonhazardous

[c] Examples include use of fume hoods, use of protective clothing/gear by laboratory personnel, chemical inactivation of wastes, separation of hazardous from nonhazardous wastes, and subsequent disposal by a firm licensed for this purpose

6. *Compliance with Federal, State, and local environmental and occupational requirements.* Cite and include a statement of compliance with applicable emissions requirements (including occupational) at the Federal, State, and local level. Discuss the effect that the proposed research will have upon compliance with these requirements.

7. *List of preparers:* Those persons preparing the assessment together with their qualifications (expertise, experience, professional disciplines) shall be listed. Persons and agencies consulted shall also be listed.

8. *Certification:* The undersigned official certifies that the information presented is true, accurate, and complete to the best of the knowledge of the prospective contractor or applicant submitting the environmental assessment.

(Title)

§ 25.31d Environmental assessment for establishment of tolerances or action levels—Format 4.

For proposed actions to establish tolerances or action levels for unavoidable poisonous or deleterious substances in food for human or animal consumption or in packaging materials intended for use with human food and animal feed, the agency will prepare an environmental assessment in the following format:

Environmental Assessment

1. *Description of the proposed action:* Describe the proposed action, the regulatory authority for the proposed action, the underlying purpose of and need for the proposed action, and how the proposed action addresses the underlying purpose and need for action.

2. *Environmental consequences of the proposed action:* Describe the potential environmental impacts of the proposed action including effects on natural resources and energy, effects on food production, effects on land use, and impacts resulting from increased use and changes in use patterns for chemical substances.

3. *Mitigation measures:* Describe measures which would be taken to avoid or mitigate potential adverse environmental effects associated with the proposed action.

4. *Description of regulatory alternatives to the proposed action and the expected environmental consequences:* Describe in detail the environmental impact of reasonable alternatives to the proposed action (including no action), particularly those that will enhance the quality of the environment and avoid some or all of the adverse environmental effects of the proposed action.

5. *Comparative analysis of proposed action and alternatives:* Provide a comparative analysis of the environmental benefits and risks of the proposed action and alternatives. Identify the preferred action based on environmental factors.

6. *List of preparers:* Those persons preparing the assessment and their areas of expertise shall be presented. Persons and agencies consulted shall also be listed.

7. *References:* List complete citations for all referenced material. Copies of referenced articles not generally available should be attached.

§ 25.31e Environmental assessment for destruction of condemned, enjoined, detained, or recalled articles—Format 5.

For actions to destroy or dispose of articles condemned after seizure, detention, or FDA-initiated recall, or after distribution or use of the article has been enjoined, the person proposing the action shall, at the request of the agency, prepare an environmental assessment in the following format when the method of destruction or disposition results in release of toxic substances:

Environmental Assessment

1. *Purpose of and need for action:* Briefly describe the underlying purpose and need for the article to be destroyed, the proposed method of destruction or disposal, the locations where the proposed destruction or other disposal will occur, and the types of environments present at and adjacent to those locations.

2. *Description of potentially toxic substances present in the article:* Provide complete nomenclature, CAS Registry numbers (if available), molecular weight, structural formulae, physical description, and concentration of the potentially toxic substances in the article.

3. *Introduction of potentially toxic substances into the environment:* For transport of the article to the site(s) of disposition, cite and certify compliance with any applicable Federal, State, and local emissions requirements. List to the extent possible the potentially toxic substances expected to enter the environment at the site(s) of destruction and/or disposal of the article. Describe the approximate concentrations of emissions; state the controls exercised; and include a citation of, and statement of compliance with, applicable requirements at the Federal, State, and local level.

4. *Fate of potentially toxic emitted substances in the environment:* Report physical/chemical and other data in the scientific literature relating to the fate of potentially toxic substances expected to be emitted into the environment as a result of destruction or other disposal of the article. Such physical/chemical parameters include water solubility, solubility in organic solvents, *n*-octanol/water partition coefficient, dissociation constants, vapor pressure, ultraviolet-visible absorption spectrum, ability to form chemical complexes, storage stability, etc.

5. *Environmental effects of potentially toxic substances expected to be emitted into the environment.* Report information on the effects of the emitted substances on animals, plants, humans, other organisms, and effects at the ecosystem level. Compare the expected environmental concentrations of the substances with the concentrations that cause adverse effects.

6. *Description of alternative methods of destruction and/or disposal and the expected environmental consequences:* Describe the environmental impact of reasonable alternatives (including no action) particularly those that will enhance the quality of the environment and that will avoid some or all of the adverse environmental effects of the proposed method of destruction or other disposition.

7. *Comparative analysis of proposed methods of destruction or other disposition and alternative methods:* Provide a comparative analysis of the environmental benefits and risks of the proposed and alternative methods. Identify the preferred action based on environmental factors.

8. *List of preparers:* Those persons preparing the assessment and their areas of expertise shall be presented. Persons and agencies consulted shall also be listed.

9. *References:* List complete citations for all referenced material. Copies of referenced articles not generally available should be attached.

§ 25.32 Finding of no significant impact.

(a) As defined by the CEQ regulations (40 CFR 1508.13), a finding of no significant impact (FONSI) is a document prepared by a Federal agency and stating briefly why an action, not otherwise excluded, will not significantly affect the human environment and for which, therefore, an EIS will not be prepared. A FONSI includes the EA or a summary of it and a reference to any other related environmental documents.

(b) If the EA has been prepared by an applicant or petitioner, the agency may choose to include additional evidence in the FONSI. Any remaining unknowns or uncertainties will be identified.

(c) The agency official(s) responsible for the preparation and approval of the FONSI will sign the document, thereby establishing that the official(s) approve(s) the conclusions not to prepare an EIS for the action under consideration.

§ 25.33 Notice of intent.

(a) As defined by CEQ regulations (40 CFR 1508.22), the Notice of Intent notifies the public that the agency has determined that an EIS will be prepared. This determination may be based on information contained in an EA or on other information available to the agency which indicates that potentially significant effects may be associated with a proposed action.

(b) As required by 40 CFR 1508.22, the Notice of Intent will describe the proposed action, possible alternatives, the agency's proposed scoping process, which may include a request for information or suggestions regarding the scope of the EIS and notice of public meetings, and the identification of persons within the agency to contact for further information.

§ 25.34 Draft, final, and supplemental environmental impact statements.

(a) The CEQ regulations (40 CFR Part 1502) provide detailed requirements for the preparation of an EIS. CEQ's format for EIS's (40 CFR 1502.10) will be followed unless the agency determines that there is a compelling reason to do otherwise.

(b) When chemical substances enter the environment as a result of a proposed action or other regulatory

alternatives, the portion of the EIS format on "environmental consequences" (40 CFR 1502.10(g)) will include discussion of the environmental fates and effects of those substances similar to that described in § 25.31a.

(c) Any final EIS will contain any additional information gathered by the agency after the publication of the draft EIS, a copy of or a summary of the comments received on the draft EIS, and the agency's responses to the comments as required in 40 CFR 1503, including any revisions resulting from comments or other information.

(d) Draft and final supplemental EIS's will conform to the EIS format (40 CFR 1502.10) unless there is a compelling reason to do otherwise.

Subpart D—Agency Decisionmaking

§ 25.40 Procedures for incorporating environmental considerations into agency decisionmaking.

(a) These procedures are to ensure that environmental information is provided to decisionmakers in a timely manner. The NEPA process is an integral part of FDA's decisionmaking. Agency decisionmakers ensure that the policies and purpose of NEPA and CEQ regulations are complied with by:

(1) Completing or assuring the completion of an EA, determining whether an EIS is required and, ordinarily, completing a draft EIS (if one is required) prior to or at the time of proposing an action subject to §§ 25.21 and 25.22.

(2) Including in decision documents and supporting environmental documents a discussion of all alternatives considered in the decision as required by 40 CFR 1502.14. Every action memorandum proposing an agency action included under § 25.21 or § 25.22 will contain an evaluation of the environmental impact of the proposed action and will be accompanied by a draft or final EIS if one is required.

(3) Submitting relevant environmental documents, comments, and responses with other decision documents through the review process.

(4) Including in the records of proceedings any appropriate environmental documents, comments, and responses.

(5) Completing and circulating a final EIS before the decision to implement an action that significantly affects the quality of the human environment.

(b) There are certain regulatory actions which, because of their immediate importance to the public health, make adherence to the requirements of the CEQ regulations and these regulations concerning minimum periods of public review impractical. Compliance with the requirements for environmental analysis under NEPA is impossible where emergency circumstances require immediate regulatory action to safeguard the public health. For such actions, the responsible agency official shall consult with the CEQ about alternative arrangements before the action is taken, or after the action is taken, if time does not permit prior consultation with CEQ.

(c) Certain FDA actions are subject to statutory time limits that sometimes do not provide sufficient time to complete the required environmental document. Should the responsible agency official be unable to complete environmental consideration of the proposed action before a notice of filing of a food or color additive petition is required to be published, and if the subsequent environmental analysis leads to the conclusion that no EIS is necessary, the **Federal Register** document publishing the final regulation rather than the notice of filing shall state that no EIS is necessary and that the FONSI and the EA are available upon request and filed in the FDA Dockets Management Branch. If it is concluded that an EIS is necessary, the final regulation, final EIS, and record of decision shall be made available as prescribed in 40 CFR 1506.10.

§ 25.41 Actions for which a finding of no significant impact and an environmental assessment are prepared.

(a) As required by 40 CFR 1501.4(e), a FONSI is prepared for an individual action or groups of related actions that will not significantly affect the quality of the human environment. If potentially adverse environmental impacts are identified for an action or group of related actions, the EA supporting the FONSI will, as required by 40 CFR 1508.9, include a consideration of any reasonable alternative courses of action that offer less environmental risk or that are environmentally preferable to the proposed action.

(b) FONSI's and EA's will be available to the public in accordance with 40 CFR 1506.6 as follows:

(1) When the proposed action is the subject of a notice of proposed rulemaking or a notice of filing published in the **Federal Register**, the notice shall state that no EIS is necessary and that the FONSI and the EA are available for public inspection at the FDA Dockets Management Branch.

(2) For actions for which notice is not published in the **Federal Register**, the FONSI and the EA shall be made available to the public upon request according to the procedures in 40 CFR 1506.6.

(3) For a limited number of actions, the agency may make the FONSI and EA available for public review (including review by State and areawide information clearinghouses) for 30 days before the agency makes its final determination whether to prepare an EIS and before the action may begin, as described in 40 CFR 1501.4(e). This procedure will be followed when the proposed action is, or is closely similar to, one that normally requires an EIS or when the proposed action is one without precedent.

(c) Program area officials and environmental staff prepare or ensure that the information contained in an EA is complete and accurate, and they prepare the FONSI. The responsible agency official designated in Part 5 examines the environmental risks of the proposed action and the alternative courses of action, selects a course of action, and ensures that any necessary mitigating measures are implemented as a condition for approving the selected course of action.

§ 25.42 Actions for which an environmental impact statement is prepared.

(a) An individual action or group of related actions requires the preparation of an EIS when significant environmental impacts may be associated with one or more of the probable courses of action. The responsible agency official weights any environmental impacts of each alternative course of action, including possible mitigation measures, and selects the course of action that is consistent with the applicable law and the agency's environmental analysis of the action.

(b) For actions for which an EIS is prepared, the public has the opportunity to offer comments and otherwise participate in the NEPA process as set forth in 40 CFR 1506.6 from the time the decision is made to prepare the document as described in this paragraph:

(1) A Notice of Intent to prepare an EIS is prepared for publication in the **Federal Register** and serves as the first public notification that an EIS will be prepared.

(2) The scoping process, as announced in the Notice of Intent, allows the public and Federal, State, and local government agencies to participate in determining the issues to be considered in the EIS.

(3)(i) Draft EIS's are filed with the EPA, sent to parties having an interest

in the document, and are available to the public upon request for the purpose of receiving substantive comment, corrections, and additional information on the issues covered.

(ii) If the subject of a draft EIS is also the subject of a notice of proposed rulemaking, the **Federal Register** notice of proposed rulemaking will state that the draft EIS is available upon request, and will solicit comments from all interested persons.

(iii) If the subject of a draft EIS is not also the subject of a notice of proposed rulemaking published in the **Federal Register**, FDA will publish a notice in the **Federal Register** describing the proposed action and possible alternatives, stating that the draft EIS is available upon request, and soliciting comments from all interested persons.

(iv) FDA will solicit comments from any Federal agency having jurisdiction by law or having expertise on the environmental impact of a proposed action by sending it a copy of a draft EIS.

(v) Two copies of all comments on draft EIS's shall be submitted to the Dockets Management Branch (HFA–305), Food and Drug Administration, Department of Health and Human Services, 5600 Fishers Lane, Rockville, MD 20857 (except individuals may submit one copy) where they will be available for public inspection from 9 a.m. to 4 p.m., Monday through Friday.

(vi) Draft EIS's will be prepared, forwarded to EPA for filing, and made available to the public early enough in the consideration of the proposed action to permit meaningful review of the environmental issues involved. Except in emergencies, no final action will be taken on the proposal earlier than 90 days after a draft EIS has been prepared, forwarded to the EPA, and made available to the public.

(4) The final text of an EIS will be prepared by the responsible agency official after comments on the draft statement have been reviewed and will receive full consideration in the agency's decisionmaking process. The responsible agency official will forward 10 copies of the final statement to the Office of the Secretary of the Department of Health and Human Services and 10 copies to the EPA, and FDA will make copies of the final statement available for public inspection in the Dockets Management Branch. Copies of each final EIS will be available upon request and will be forwarded to those persons who submitted comments on the pertinent draft statements.

(5)(i) The weighing of any environmental impacts of alternatives in selecting a final course of action, as described in paragraph (a) of this section, will be reflected in the agency record of formal decisionmaking as required by 40 CFR 1505.2.

(ii) Except in emergencies, no agency action will be effective earlier than 30 days after the final statement has been filed for public inspection by EPA. If the subject of a final statement is also the subject of a regulation published in the **Federal Register**, this requirement may be met by simultaneous publication of the regulation and of a notice of availability of the final statement and the record of decision, provided that the regulation becomes effective no sooner than 30 days after the date of publication.

(iii) If the subject of an EIS is an FDA action governed by specific time requirements under statute or regulations, those time requirements will be extended, if at all, only as long as necessary to permit the agency to consider or issue an EIS for the action.

(c) As described in 40 CFR 1505.3, the agency may provide for monitoring to ensure that its decisions, any mitigating measures, and other conditions are carried out.

(d) Under the conditions prescribed in 40 CFR 1502.9(c), the agency will prepare a supplement for a draft or final EIS and introduce the supplement into its administrative record.

(e)(1) The agency official to whom authority for the action is delegated in Part 5 will ensure both that there is balancing of environmental impacts with the agency's objective in choosing an appropriate course of action and that the public is involved and notified of the decision, as described in paragraphs (a) through (d) of this section.

(2)(i) The director of each FDA center is responsible for preparing a draft or final EIS on actions delegated to that center by the Commissioner under Subpart B of Part 5 of this chapter or in which the center is a party in an administrative proceeding under Part 12, 13, 14, 15, or 16 of this chapter in which a draft or final EIS is required.

(ii) The Director, Office of Regional Operations, FDA, is responsible for preparing a draft or final EIS on the destruction of articles condemned after seizure, subject to an injunction, under import detention, or under detention or recalled at agency request.

(iii) The Office of the Commissioner of Food and Drugs is responsible for preparing or assigning the task of preparing a draft or final EIS on actions not otherwise assigned in this section.

Subpart E—Other Requirements

§ 25.50 Environmental effects abroad of major agency actions.

(a) In accordance with Executive Order 12114, "Environmental Effects Abroad of Major Federal Actions" of January 4, 1979 (44 FR 1957; January 9, 1977), the responsible agency official, in analyzing actions under his or her program, shall consider the environmental effects abroad, including whether the actions involve:

(1) Potential environmental effects on the global commons and areas outside the jurisdiction of any nation, e.g., oceans and the upper atmosphere.

(2) Potential environmental effects on a foreign nation not participating with or otherwise involved in an FDA activity.

(3) The export of products (or emissions) that in the United States are prohibited or strictly regulated because their effects on the environment create a serious public health risk.

(4) Potential environmental effects on natural and ecological resources of global importance designated under the Executive Order.

(b) Before deciding on any action falling into the categories specified in paragraph (a) of this section, the responsible agency official shall determine in accordance with section 2–3 of the Executive Order whether such actions may have a significant environmental effect abroad.

(c) If the responsible agency official determines that an action may have a significant environmental effect abroad, the responsible agency official shall determine in accordance with section 2–4(a) and (b) of the Executive Order, whether the subject action calls for:

(1) An EIS;

(2) A bilateral or multilateral environmental study; or

(3) A concise environmental review.

(d) In preparing environmental documents under this subpart, the responsible official shall:

(1) Determine, as provided in section 2–5 of the Executive Order, whether proposed actions are subject to the exemptions, exclusions, and modification in contents, timing, and availability of documents.

(2) Coordinate all communications with foreign governments concerning environmental agreements and other arrangements in implementing the Executive Order.

PART 71—COLOR ADDITIVE PETITIONS

3. Part 71 is amended by revising item J in § 71.1(c), to read as follows:

§ 71.1 Petitions.

* * * * *

(c) * * *

J. The petitioner is required to submit either a claim for categorical exclusion under § 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter.

* * * * *

PART 170—FOOD ADDITIVES

4. Part 170 is amended by adding new paragraph (c)(1)(viii) to § 170.35, to read as follows:

§ 170.35 Affirmation of generally recognized as safe (GRAS) status.

* * * * *

(c) * * *

(1) * * *

(viii) A claim for categorical exclusion under § 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter.

* * * * *

PART 171—FOOD ADDITIVE PETITIONS

5. Part 171 is amended:

a. By revising item H in § 171.1(c), to read as follows:

§ 171.1 Petitions.

* * * * *

(c) * * *

H. The petitioner is required to submit either a claim for categorical exclusion under § 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter.

* * * * *

§ 171.6 [Amended]

b. In § 171.6 *Amendment of petition* by removing the third sentence.

PART 312—NEW DRUGS FOR INVESTIGATIONAL USE

6. Part 312 is amended by revising item 15 in § 312.1(a)(2), to read as follows:

§ 312.1 Conditions for exemption of new drugs for investigational use.

(a) * * *

(2) * * *

15. A claim for categorical exclusion under § 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter.

* * * * *

PART 314—NEW DRUG APPLICATIONS

7. Part 314 is amended:

a. By revising § 314.50(d)(1)(iii), to read as follows:

§ 314.50 Content and format of an application.

* * * * *

(d) * * *

(1) * * *

(iii) *Environmental impact.* The application is required to contain either a claim for categorical exclusion under § 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter.

* * * * *

b. By revising § 314.101(d)(4), to read as follows:

§ 314.101 Filing an application.

* * * * *

(d) * * *

(4) The applicant fails to submit a complete environmental assessment which addresses each of the items specified in the applicable format under § 25.31 of this chapter or fails to provide sufficient information to establish that the requested action is subject to categorical exclusion under § 25.24 of this chapter.

* * * * *

PART 511—NEW ANIMAL DRUGS FOR INVESTIGATIONAL USE

8–9. Part 511 is amended by revising § 511.1(b)(10), to read as follows:

§ 511.1 New animal drugs for investigational use exempt from section 512(a) of the Act.

* * * * *

(b) * * *

(10) The sponsor shall submit either a claim for categorical exclusion under § 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter.

* * * * *

PART 514—NEW ANIMAL DRUG APPLICATIONS

10. Part 514 is amended:

a. By revising § 514.1(b)(14), to read as follows:

§ 514.1 Applications.

* * * * *

(b) * * *

(14) *Environmental assessment.* The applicant is required to submit either a claim for categorical exclusion under § 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter.

* * * * *

b. By revising the last sentence of § 514.8(a)(1), to read as follows:

§ 514.8 Supplemental new animal drug applications.

(a) (1) * * * A supplemental application shall be accompanied by either a claim for categorical exclusion under § 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter.

* * * * *

c. In § 514.9 *Supplemental applications for animal feeds bearing or containing new animal drugs* by removing paragraph (d).

d. By adding § 514.110(b)(10), to read as follows:

§ 514.110 Reasons for refusing to file applications.

* * * * *

(b) * * *

(10) The applicant fails to submit a complete environmental assessment which addresses each of the items specified in the applicable format under § 25.31 of this chapter or fails to provide sufficient information to establish that the requested action is subject to categorical exclusion under § 25.24 of this chapter

* * * * *

e. By revising § 514.111(a)(9), to read as follows:

§ 514.111 Refusal to approve an application.

(a) * * *

(9) The applicant fails to submit an adequate environmental assessment under § 25.31 of this chapter or fails to provide sufficient information to establish that the requested action is subject to categorical exclusion under § 25.24 of this chapter.

* * * * *

PART 570—FOOD ADDITIVES

11. Part 570 is amended by adding § 570.35(c)(1)(viii), to read as follows:

§ 570.35 Affirmation of generally recognized as safe (GRAS) status.

* * * * *

(c) * * *

(1) * * *

(viii) A claim for categorical exclusion under § 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter.

* * * * *

PART 571—FOOD ADDITIVE PETITIONS

12. Part 571 is amended:

a. By revising item H in § 571.1(c), to read as follows:

§ 571.1 Petitions.

* * * * *

(c) * * *

H. The petitioner is required to submit either a claim for categorical exclusion under

§ 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter.

* * * * *

§ 571.6 [Amended]

b. In § 571.6 *Amendment of petition* by removing the third sentence.

PART 601—LICENSES

13. Part 601 is amended by revising the next-to-last sentence in § 601.2(a), to read as follows:

§ 601.2 Applications for establishment and product licenses; procedures for filing.

(a) * * * The applicant shall also include either a claim for categorical exclusion under § 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter. * * *

PART 812—INVESTIGATIONAL DEVICE EXEMPTIONS

14. Part 812 is amended by revising § 812.20(b)(9), to read as follows:

§ 812.20 Application.

* * * * *

(b) * * *

(9) A claim for categorical exclusion under § 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter.

* * * * *

PART 813—INVESTIGATIONAL EXEMPTIONS FOR INTRAOCULAR LENSES

15. Part 813 is amended by revising § 813.20(b)(17), to read as follows:

§ 813.20 Application.

* * * * *

(b) * * *

(17) A claim for categorical exclusion under § 25.24 of this chapter or an environmental assessment under § 25.31 of this chapter.

* * * * *

PART 861—PROCEDURES FOR PERFORMANCE STANDARDS DEVELOPMENT

§ 861.26 [Amended]

16. Part 861 is amended in § 861.26 *Offer to develop a proposed standard* by removing paragraph (a)(4) and marking it "reserved."

Effective date. This regulation shall become effective July 25, 1985.

(Sec. 701, 52 Stat. 1055–1056 as amended (21 U.S.C. 371); secs. 351, 354–361, 58 Stat. 702 as amended (42 U.S.C. 262, 263b–264); sec. 102(2)(C), 83 Stat. 853 (42 U.S.C. 4332)).

Frank E. Young,

Commissioner of Food and Drugs.

Dated: January 14, 1985.

Margaret M. Heckler,

Secretary of Health and Human Services.

Part V

Department of Education

34 CFR Parts 350, 352, 358, and 359
National Institute of Handicapped Research; Final Regulations

DEPARTMENT OF EDUCATION

34 CFR Parts 350, 352, 358, and 359

National Institute of Handicapped Research

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary issues final regulations governing some programs of the National Institute of Handicapped Research. These regulations implement certain changes to Titles II and III of the Rehabilitation Act of 1973 made by Pub. L. 98–221, the Rehabilitation Amendments of 1984.

These regulations establish criteria for the evaluation of applications for financial assistance under a new program of Innovation Grants and for a program of Special Projects in Spinal Cord Injury. They also establish conditions under which the Secretary may elect not to terminate funding to a Research and Training Center at the conclusion of its funding period.

EFFECTIVE DATE: These regulations will take effect either 45 days after publication in the **Federal Register** or later if Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Betty Jo Berland, National Institute of Handicapped Research, Department of Education, 400 Maryland Avenue SW., Room 3070, Switzer Building, Washington, D.C. 20202. 732–1139; deaf or hearing impaired individuals may call (202) 732–1198 for TTY services.

SUPPLEMENTARY INFORMATION: The National Institute of Handicapped Research (NIHR), created under Title II of the Rehabilitation Act of 1973, as amended by Pub. L. 95–602, carries out a variety of research and related activities under that statutory authority. On September 10, 1981, the Secretary published final program regulations governing many of those activities (46 FR 45300), and on March 12, 1984 and June 18, revised those regulations (49 FR 9324, 24978). These further amendments to the regulations implement changes to the Act affecting NIHR made by Pub. L. 98–221, the Rehabilitation Amendments of 1984, enacted on February 22, 1984. On November 23, 1984, the Secretary published in the **Federal Register** a Notice of Proposed Rulemaking (49 FR 46244) covering technical amendments to several programs of the National Institute of Handicapped Research.

The amendments to the Act authorize a new program of innovation grants under section 204(b)(13) to test new concepts and innovative ideas; demonstrate research results of high potential benefits; purchase prototype aids and devices for evaluation; develop unique rehabilitation training curricula; and respond to special initiatives of the Secretary. These amendments to the regulations implement this new program authority and include rules to establish eligibility requirements, provide criteria for evaluation of applications, and provide a method for selection of successful applicants.

The Act, as amended, further provides that regulations and administrative procedures with respect to financial assistance under the Innovation Grants program be expedited to the maximum extent possible. These regulations simplify the selection criteria for reviewing applications under this program, and permit periodic peer review and award of funds within a fiscal year to ensure more timely funding of innovative projects under the program.

The Act was also amended to provide that Research and Training Centers (RTCs) need not necessarily be terminated at the conclusion of the project period. These regulations establish criteria and procedures to enable the Secretary to decide whether to continue without competition a specific RTC grant at the conclusion of the funding period.

In adopting this provision, the Congress provided for those exceptional circumstances in which it would be a major disadvantage to discontinue funding a particular RTC. It is the Secretary's understanding that this provision is meant to be invoked only in unusual circumstances, and that competition remains the principal means of obtaining financial assistance under this program.

In addition, the legislation transfers authority for the administration of the special projects and demonstrations program for spinal cord injuries from the Rehabilitation Services Administration (RSA) to NIHR. These amendments to the regulations include provisions, with selection criteria, to implement that program in NIHR.

The Secretary requested public comment on the proposed regulations. A number of comments were received and fully considered in preparation of these final regulations. A summary of comments and responses follows these regulations.

Part 350—Handicapped Research: General Provisions

The Secretary amends §§ 350.1, 350.3, 350.20, 350.30, 350.34, and 350.40 so that appropriate provisions of Part 350, generally applicable to NIHR programs, apply to the new Innovation Grants program and to the Special Projects and Demonstrations for Spinal Cord Injuries program, for which the administrative functions were recently transferred to NIHR.

Part 352—Handicapped Research: Rehabilitation Research and Training Centers

The Secretary amends § 352.10(c) to authorize grantees to use grant funds for faculty support and to require grantees who do so to give priority to the training of students preparing to be rehabilitation personnel. These provisions implement amendments to section 204(b)(1) of the Act made by section 123(a) of Pub. L. 98–221.

A new § 352.33 permits the Secretary to renew a Rehabilitation Research and Training Center grant without competition at the end of the project period on the basis of specified criteria. This section implements a provision added to section 204(b)(1) of the Act by section 123(a) of Pub. L. 98–221.

Part 358—Handicapped Research: Innovation Grants Program

Subpart A—General

Sections 358.1–358.4 describe the purpose of the Innovation Grants program and incorporate provisions of Part 350 relating to eligibility, applicable regulations, and definitions. The Secretary has decided that 34 CFR 75.217(c)–(e) of the Education Department General Administrative Regulations (EDGAR) will not apply to the Innovation Grants Program. Those provisions describe how the Secretary normally selects applications for new grants under the Department's discretionary programs and provide for the creation of a rank ordering of applications based solely on the evaluations of those applications by groups of experts. The Secretary believes that a rank ordering is unnecessary and would be unworkable as applied to the Innovation Grants Program, since applications will be reviewed, and awards made, throughout the fiscal year as provided in proposed § 358.31. While the Secretary exempts this program from the rank ordering requirements of 34 CFR 75.217(c)–(e), the remaining provisions of those regulations have been incorporated into § 358.31.

Subpart B—What Kinds of Activities Does the Secretary Support Under This Program?

Section 358.10 describes specific types of projects and activities that may be supported under the Innovation Grants program.

Subpart D—How Does the Secretary Make a Grant?

Section 358.30 incorporates the peer review procedures of §§ 350.30–350.32.

Sections 358.31–358.33 describe how the Secretary invites applications, the selection criteria used by the peer review panel and the Secretary, and additional factors the Secretary considers in selecting grantees.

Part 359—Handicapped Research: Special Projects and Demonstrations for Spinal Cord Injuries

Subpart A—General

Sections 359.1–359.4 describe the purpose of the program, identify eligible applicants, and incorporate provisions of Part 350 relating to regulations and definitions.

Subpart B—What Kinds of Activities Does The Secretary Support Under This Program?

Section 359.10 describes specific types of projects and activities that may be supported under this program.

Section 359.11 describes certain activities that each grantee must carry out.

Subpart D—How Does The Secretary Make A Grant?

Section 359.30 incorporates the peer review procedures of §§ 350.30–350.32.

Section 359.31 describes the selection criteria by which the Secretary and the peer review panel review applications.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291.

They are not classified as major because they do not meet the criteria for major regulations established in the Order.

Paperwork Reduction Act of 1980

Information collection requirements contained in these regulations (§ 358.31) have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

Assessment of Educational Impact

In the Notice of Proposed Rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based upon the comments on the proposed rule and the Department's own review, it has been determined that the regulations in this document do not require information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects

34 CFR Part 350

Administrative practice and procedure, Education, Educational research, Grant programs—education, Handicapped.

34 CFR Part 352

Education, Educational research, Grant programs—education, Handicapped, Manpower training programs, Vocational rehabilitation.

34 CFR Part 358

Education, Educational research, Grant programs—education, Handicapped, Reporting and recordkeeping requirements, Vocational rehabilitation.

34 CFR Part 359

Education, Educational research, Grant programs—education, Handicapped, Vocational rehabilitation.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these final regulations.

(Catalog of Federal Domestic Assistance No. 84.133, National Institute of Handicapped Research)

Dated: April 22, 1985.

William J. Bennett,

Secretary of Education.

The Secretary amends Title 34 of the Code of Federal Regulations by revising Parts 350 and 352 and adding new Parts 358 and 359 as follows:

PART 350—HANDICAPPED RESEARCH: GENERAL PROVISIONS

1. In § 350.1, paragraph (b) is revised to read as follows:

§ 350.1 Handicapped research.

* * * * *

(b) The Secretary awards financial assistance through nine types of programs:

(1) Research and demonstration projects (34 CFR Part 351).

(2) Research grants for establishment and operation of rehabilitation research and training centers (34 CFR Part 352).

(3) Research grants for establishment and operation of rehabilitation engineering centers (34 CFR Part 353).

(4) Research grants for establishment and operation of model training centers (34 CFR Part 354).

(5) Knowledge dissemination and research utilization projects (34 CFR Part 355).

(6) Research fellowships (34 CFR Part 356).

(7) Field-initiated research projects (34 CFR Part 357).

(8) Innovation Grants projects (34 CFR Part 358).

(9) Special Projects and Demonstrations for Spinal Cord Injuries (34 CFR Part 359).

(Secs. 200 and 204; 29 U.S.C. 760 and 762)

2. In § 350.3, paragraphs (a) and (c) are revised to read as follows:

§ 350.3 What regulations apply to these programs?

* * * * *

(a) The Education Department General Administrative Regulations (EDGAR), established in title 34 of the Code of Federal Regulations in—

(1) Part 74 (Administration of Grants);

(2) Part 75 (Direct Grant Programs), except as noted in 34 CFR 352.33 and 358.3;

(3) Part 77 (Definitions that Apply to Department Programs); and

(4) Part 78 (Education Appeal Board);

* * * * *

(c) The regulations in 34 CFR Parts 351, 352, 353, 354, 355, 357, 358, or 359, as appropriate; and

* * * * *

3. Section 350.20 is revised to read as follows:

§ 350.20 What are the application procedures for these programs?

An applicant for assistance under 34 CFR Parts 351, 352, 353, 354, 355, 357, 358, or 359 shall submit a copy of its application to the State rehabilitation agency for comment in accordance with the procedures in EDGAR, 34 CFR 75.155–75.159.

(Secs. 204(c) and 306(i); 29 U.S.C. 762(c) and 766(a))

4. Section 350.30 is revised to read as follows:

§ 350.30 To whom does the Secretary refer an application?

The Secretary refers each application for a grant under the Handicapped Research Programs to a peer review panel established by the Secretary. Peer review panels review applications for the Secretary on the basis of selection criteria described in 34 CFR 350.34, 358.32 or 359.31, as appropriate.

(Sec. 202(e); 29 U.S.C. 761a(e))

5. The heading of § 350.34 is revised to read as follows, and the table of contents of Part 350 is amended accordingly:

§ 350.34 What selection criteria does the Secretary use in reviewing applications under Parts 351, 352, 353, 354, 355, and 3577

* * * * *

6. In § 350.40, paragraph (b) is revised to read as follows:

§ 350.40 What are the matching requirements?

* * * * *

(b)(1) The Secretary may make grants to pay for part or all of the costs of the following activities:

(i) Establishment and support of Rehabilitation Research and Training Centers, Rehabilitation Engineering Centers, and Model Training Centers.

(ii) Research and other special projects and demonstrations concerned with spinal cord injury.

(iii) Research projects concerned with end-stage renal disease, telecommunications, rehabilitation of handicapped children and handicapped individuals who are aged sixty or older, attracting and retaining rehabilitation professionals in rural areas, producing and distributing captioned video cassettes for deaf individuals, and innovative methods of providing services for handicapped children and their parents.

(iv) Joint projects with other Federal agencies and private industry.

(v) Research to test new concepts and innovative ideas.

(vi) International programs of research, demonstration, training, exchange of experts, and technical assistance.

(2) The Secretary determines at the time of the award whether the grantee must pay a portion of the project or center costs.

(Sec. 204; 29 U.S.C. 762)

PART 352—HANDICAPPED RESEARCH: REHABILITATION RESEARCH AND TRAINING CENTERS

7. In § 352.10, paragraph (c) is revised by adding at the end thereof two sentences to read as follows:

§ 352.10 What types of centers are authorized under this program?

* * * * *

(c) * * * Grantees may also use grant funds for faculty support for teaching of rehabilitation related courses of study for credit and other courses offered by the institutions of higher education affiliated with the Center. Each grantee that uses grant funds for this purpose shall give priority to training of students preparing to be rehabilitation personnel.

* * * * *

8. A new § 352.33 is added to read as follows, and the table of contents of Part 352 is amended accordingly:

§ 352.33 May the Secretary renew a Research and Training Center grant without competition?

(a) Notwithstanding the provisions of EDGAR, 34 CFR § 75.253(d), the Secretary may renew a Rehabilitation Research and Training Center (RTC) grant without competition at the end of the project period if—

(1) The RTC is performing work in an area of continued high priority to the Secretary and is working on long-range solutions to rehabilitation problems;

(2) The RTC has submitted to the Secretary, not later than 15 months before the end of its project period, a formal request for renewal without competition;

(3) The RTC has submitted to the Secretary no later than 12 months before the expiration of its current project period a proposal for the activities to be conducted during the period for which funding is being requested;

(4) The Secretary has determined on the basis of documentation or expert consultation, that the Center may be a unique national resource and to discontinue it might be contrary to the interests of the Government, and that further consideration of the request for exemption from competition is warranted through an independent review of the Center and its application for the ensuing grant period;

(5) An independent peer review panel has reviewed the activities and products of the Center, including an on-site review where necessary, has reviewed the proposal for the new project period, and has made a recommendation to the Secretary on whether the Center should be continued; and

(6) The Secretary has determined, on the basis of the above factors, that to discontinue the work of the Center would result in an irretrievable loss of potential advances in knowledge and of substantial prior investment, and would be contrary to the interests of the Government.

(b) A noncompetitive award may be for a period up to 60 months. No Center may be renewed for more than 60 months beyond its original project period without competition.

(Sec. 204(b)(1); 29 U.S.C. 762(b)(1))

9. A new Part 358 is added to read as follows:

PART 358—HANDICAPPED RESEARCH: INNOVATION GRANTS PROGRAM

Subpart A—General

Sec.
358.1 What is the Innovation Grants program?
358.2 Who is eligible for assistance under this program?
358.3 What regulations apply to this program?
358.4 What definitions apply to this program?
358.5–358.9 [Reserved]

Subpart B—What Kinds of Activities Does the Secretary Assist Under This Program?

358.10 What types of projects are authorized under this program?
358.11–358.19 [Reserved]

Subpart C—[Reserved]

Subpart D—How Does the Secretary Make a Grant?

358.30 How is peer review conducted under this program?
358.31 How does the Secretary select applications for new grants?
358.32 What selection criteria does the Secretary use in reviewing applications under this program?
358.33 What are the priorities for funding under this program?
358.34 What is the maximum amount of a grant for any fiscal year?
358.35–358.39 [Reserved]

Authority: Section 204(b)(13) of the Rehabilitation Act of 1973 (Pub. L. 93–112), as amended by Pub. L. 98–221, 98 Stat. 23–24 (29 U.S.C. 762(b)(13)), unless otherwise noted.

Subpart A—General

§ 358.1 What is the Innovation Grants program?

This program is designed to provide financial support to projects that—

(a) Test new concepts and innovative ideas;

(b) Demonstrate research results of high potential benefits;

(c) Purchase and evaluate prototype aids and devices;

(d) Develop unique rehabilitation training curricula; and

(e) Respond to special initiatives of the Secretary, including projects to conduct feasibility, planning, and evaluation studies, conferences, and other activities to disseminate specific research findings.

(Sec. 204(b)(13); 29 U.S.C. 762(b)(13))

§ 358.2 Who is eligible for assistance under this program?

The agencies and organizations eligible to apply under this program are described in 34 CFR 350.2

(Sec. 204; 29 U.S.C. 762)

§ 358.3 What regulations apply to this program?

The regulations referenced in 34 CFR 350.3 apply to this program, except for 34 CFR 75.217(c)–(e).

(Sec. 204; 29 U.S.C. 762)

§ 358.4 What definitions apply to this program?

The definitions listed in 34 CFR 350.4 apply to this program.

(Sec. 202(i)(1); 29 U.S.C. 761a(i)(1))

§§ 358.5–358.9 [Reserved]

Subpart B—What Kinds of Activities Does the Secretary Assist Under This Program?

§ 358.10 What types of projects are authorized under this program?

The Innovation Grants program provides financial assistance for the following types of projects:

(a) Research, demonstration, and related activities to test new concepts and innovative ideas in rehabilitation of disabled individuals or to demonstrate research results of high potential benefits.

(b) Research, demonstration, and related activities which are responsive to special initiatives of the Secretary, are unique or innovative, or could not be carried out in a timely manner under the Institute's other programs.

(c) Projects to purchase and evaluate prototype aids and devices, or to demonstrate innovative approaches to producing, testing, marketing, and distributing selected aids and devices.

(d) Projects to develop and test unique rehabilitation training curricula, including training for rehabilitation-related research as well as any rehabilitation-related services.

(e) Research, demonstration, or development projects, feasibility studies, planning activities, evaluation studies dissemination of information, conferences, surveys or statistical analyses, or policy studies in areas concerned with improved rehabilitation, especially those which offer timely opportunities for high potential benefit or which must be conducted expeditiously if their potential benefits are to be realized.

(Sec. 204(b)(13); 29 U.S.C. 762(b)(13))

§§ 358.11–358.19 [Reserved]

Subpart C—[Reserved]

Subpart D—How Does the Secretary Make a Grant?

§ 358.30 How is peer review conducted under this program?

(a) The Secretary may, at any time, convene a peer review panel to review an application received in response to an application notice.

(b) Peer review is conducted under this program in accordance with 34 CFR 350.30–350.32, using the selection criteria in § 358.32.

(Secs. 202(e) and 204(b)(13); 29 U.S.C. 761a(e) and 762(b)(13))

§ 358.31 How does the Secretary select applications for new grants?

(a) After the peer review panel evaluates an application, the Secretary reviews and selects an application on the basis of—

(1) Scientific and technical merit, in accordance with the selection criteria in § 358.32;

(2) The priorities in § 358.33, if appropriate; and

(3) Any other requirement that applies to the selection of applications for new grants.

(b) In selecting an application for a new grant, the Secretary may consider the following:

(1) The information in the application.

(2) The evaluation of the application by the peer review panel.

(3) Any other information relevant to a criterion, priority, or other requirement that applies to the selection of applications for new grants.

(c) (1) The Secretary may, at any time, select an application for funding under this part.

(2) If the Secretary does not select an application for funding when it is reviewed under this section, the Secretary may select it for funding at a later date in the same fiscal year.

(Secs. 202(e) and 202(i)(1); 29 U.S.C. 761a(e) and 761a(i)(1))

(Approved by the Office of Management and Budget under control number 1820–0027)

§ 358.32 What selection criteria does the Secretary use in reviewing applications under this program?

The Secretary uses the criteria in this section to evaluate applications under this program. The maximum score for all the criteria is 100 points.

(a) *Importance of the project* (50 points).

The Secretary reviews each application to determine to what degree the proposed activity will address a significant need of the target population and will meet the purposes of this part.

(b) *Project design or methodology* (25 points).

The Secretary reviews each application to determine to what degree the underlying hypothesis or conceptual model is sound; the project design is likely to achieve the desired objectives; and the evaluation plan is appropriate.

(c) *Plan of operation* (25 points).

The Secretary reviews each application to determine the extent to which the qualifications and background of the key personnel, the management and financial plan, and the capability and resources of the applicant organization demonstrate that the applicant will be able to carry out the proposed project.

(Sec. 204(b)(13); 29 U.S.C. 762(b)(13))

§ 358.33 What are the priorities for funding under this program?

The Secretary may give priority to applications that have been awarded a rating of 60 points or more under § 358.32 and meet one or both of the following conditions:

(a) The proposed project represents a unique opportunity to conduct research, demonstrate, evaluate, disseminate, train, or prepare for advances in knowledge to improve rehabilitation services to disabled persons.

(b) The proposed project is particularly pertinent to rehabilitation needs at that time and is likely to contribute important knowledge in a timely manner.

(Sec. 204(b)(13); 29 U.S.C. 762(b)(13))

§ 358.34 What is the maximum amount of a grant for any fiscal year?

The maximum amount of a grant under this program for any fiscal year is $50,000.

(Sec. 204(b)(13); 29 U.S.C. 762(b)(13))

§§ 358.35–358.39 [Reserved]

10. A new Part 359 is added to read as follows:

PART 359—HANDICAPPED RESEARCH: SPECIAL PROJECTS AND DEMONSTRATIONS FOR SPINAL CORD INJURIES

Subpart A—General

Sec.

359.1 What is the Special Projects and Demonstrations for Spinal Cord Injuries program?
359.2 Who is eligible for assistance under this program?
359.3 What regulations apply to this program?
359.4 What definitions apply to this program?

359.5–359.9 [Reserved]

Subpart B—What Kinds of Activities Does the Secretary Assist Under This Program?

359.10 What types of projects are authorized under this program?
359.11 What activities must each recipient carry out under this program?
359.12–359.19 [Reserved]

Subpart C—[Reserved]

Subpart D—How Does the Secretary Make A Grant?

359.30 How is peer review conducted under this program?
359.31 What selection criteria does the Secretary use in reviewing applications under this program?
359.32–359.39 [Reserved]

Authority: Section 311(a) of the Rehabilitation Act of 1973 (Pub. L. 93–112), as amended by Pub. L. 98–221, 98 Stat. 23–24 (29 U.S.C. 777a(a)), unless otherwise noted.

Subpart A—General

§ 359.1 What is the Special Projects and Demonstrations for Spinal Cord Injuries Program?

This program provides assistance to establish innovative projects for the delivery, demonstration, and evaluation of comprehensive medical, vocational, and other rehabilitation services to meet the wide range of needs of individuals with spinal cord injuries.

(Sec. 311(a); 29 U.S.C. 777a(a))

§ 359.2 Who is eligible for assistance under this program?

Public and other nonprofit agencies and organizations are eligible to apply for assistance under this program.

(Sec. 311(a); 29 U.S.C. 777a(a))

§ 359.3 What regulations apply to this program?

The regulations referenced in 34 CFR 350.3 apply to this program.

(Secs. 202(i)(1) and 311(a); 29 U.S.C. 761a(i)(1) and 777a(a))

§ 359.4 What definitions apply to this program?

The definitions listed in 34 CFR 350.4 apply to this program.

(Secs. 202(i)(1) and 311(a); 29 U.S.C. 761(i)(1) and 777a(a))

§§ 359.5–359.9 [Reserved]

Subpart B—What Kinds of Activities Does the Secretary Assist Under This Program?

§ 359.10 What types of projects are authorized under this program?

This program provides assistance for demonstration projects that—

(a) Provide comprehensive rehabilitation services to individuals with spinal cord injuries; and

(b) Conduct spinal cord research, including clinical research and the analysis of standardized data in collaboration with other related projects.

(Sec. 311(a) of the Act; 29 U.S.C. 777a(a))

§ 359.11 What activities must each recipient carry out under this program?

Each recipient, whether administering a project separately under this part or in coordination with other activities supported under Title II of the Act, shall—

(a) Establish a multidisciplinary system of providing rehabilitation services specifically designed to meet the special needs of individuals with spinal cord injuries, including emergency medical services, acute care, vocational and other rehabilitation services, community and job placement, and long-term community follow up and health maintenance. The system must be established on an appropriate geographical basis that reflects patterns of patient flow, and must be administered in close coordination with similar programs of the Veterans Administration, the National Institutes of Health, and other public and private agencies and institutions where appropriate;

(b) Demonstrate and evaluate both the service and cost benefits of a regional service system to those individuals with spinal cord injuries who might be served within that system;

(c) Establish within the system a rehabilitation research environment for the achievement of new knowledge leading to the reduction and treatment of complications arising from spinal cord injury and the development of new techniques of medical management and rehabilitation;

(d) Demonstrate and evaluate the development and application of improved methods and equipment essential to the care, management, and rehabilitation of individuals with spinal cord injury;

(e) Demonstrate methods of community outreach and education for individuals with spinal cord injury in areas such as housing, transportation, recreation, employment, and other community activities; and

(f) Participate as directed by the Secretary in national studies of the benefits of a spinal cord injury service system by contributing to a national database and by other means as required by the Secretary.

(Sec. 311(b); 29 U.S.C. 777a(b))

§§ 359.12–359.19 [Reserved]

Subpart C—[Reserved]

Subpart D—How Does the Secretary Make a Grant?

§ 359.30 How is peer review conducted under this program?

Peer review is conducted under this program in accordance with 34 CFR 350.30–350.32, using the selection criteria in § 359.31.

(Sec. 202(e) and 311(a); 29 U.S.C. 761a(e) and 777a(a))

§ 359.31 What selection criteria does the Secretary use in reviewing applications under this program?

The Secretary uses the criteria in this section to evaluate applications under this program. The maximum score for all the criteria is 100 points.

(a) *Project design* (20 points).

The Secretary reviews each application to determine to what degree—

(1) There is a clear description of how the objectives of the project relate to the purpose of the program;

(2) The research is likely to produce new and useful information;

(3) The need and target population are adequately defined;

(4) The outcomes are likely to benefit the defined target population;

(5) The research hypotheses are sound; and

(6) The research methodology is sound in the sample design and selection, the data collection plan, the measurement instruments, and the data analysis plan.

(b) *Service comprehensiveness* (20 points).

The Secretary reviews each application to determine to what degree—

(1) The services to be provided within the project are comprehensive in scope, and include emergency medical services, intensive and acute medical care, rehabilitation management, psychosocial and community reintegration, and follow up;

(2) A broad range of vocational and other rehabilitation services will be available to severely handicapped individuals within the project; and

(3) Services will be coordinated with those services provided by other appropriate community resources.

(c) *Plan of operation* (15 points).

The Secretary reviews each application to determine to what degree—

(1) There is an effective plan of operation that ensures proper and efficient administration of the project;

(2) The applicant's planned use of its resources and personnel is likely to achieve each objective;

(3) Collaboration between institutions, if proposed, is likely to be effective; and

(4) There is a clear description of how the applicant will include eligible project participants who have been traditionally underrepresented, such as—

(i) Members of racial or ethnic minority groups;

(ii) Women;

(iii) Handicapped persons; and

(iv) The elderly.

(d) *Quality of key personnel* (10 points).

The Secretary reviews each application to determine to what degree—

(1) The principal investigator and other key staff have adequate training or experience, or both, in spinal cord injury care and rehabilitation and demonstrate appropriate potential to conduct the proposed research, demonstration, training, development, or dissemination activity;

(2) The principal investigator and other key staff are familiar with pertinent literature or methods, or both;

(3) All the disciplines necessary to establish the multidisciplinary system described in § 359.11(a) are effectively represented;

(4) Commitments of staff time are adequate for the project; and

(5) The applicant is likely, as part of its non-discriminatory employment practices, to encourage applications for employment from persons who are members of groups that traditionally have been underrepresented, such as—

(i) Members of racial or ethnic minority groups;

(ii) Women;

(iii) Handicapped persons; and

(iv) The elderly.

(e) *Adequacy of resources* (10 points).

The Secretary reviews each application to determine to what degree—

(1) The facilities planned for use are adequate;

(2) The equipment and supplies planned for use are adequate; and

(3) The commitment of the applicant to provide administrative and other necessary support is evident.

(f) *Budget/cost effectiveness* (10 points).

The Secretary reviews each application to determine to what degree—

(1) The budget for the project is adequate to support the activities;

(2) The costs are reasonable in relation to the objectives of the project; and

(3) The budget for subcontracts (if required) is detailed and appropriate.

(g) *Dissemination/utilization* (5 points).

The Secretary reviews each application to determine to what degree—

(1) There is a clearly defined plan for dissemination and utilization of project findings;

(2) The research results are likely to become available to others working in the field;

(3) The means to disseminate and promote utilization by others are defined; and

(4) The utilization approach is likely to address the defined need.

(h) *Evaluation plan* (10 points).

The Secretary reviews each application to determine to what degree—

(1) There is a mechanism to evaluate plans, progress and results;

(2) The evaluation methods and objectives are likely to produce data that are quantifiable; and

(3) The evaluation results, where relevant, are likely to be assessed in a service setting.

(Secs. 202(e) and 311(a); 29 U.S.C. 761a(e) and 777a(a))

§§ 359.32–359.39 [Reserved]

Appendix

This Appendix will not be codified in the Code of Federal Regulations.

Summary of Comments and Responses

Comment: Some commenters stated that there should be no provision for exempting Research and Training Centers from competition at the expiration of their project periods and that all activities funded by NIHR should be funded on the basis of competition.

Response: No change has been made. While the Secretary supports the principle of competition for financial assistance, the Secretary is adopting these amendments to the regulations as required to implement the intent of the statute.

Comment: Several commenters objected to the statement in the preamble indicating that competition would be the preferred means of obtaining financial assistance and that exemption from competition was intended to be used only in exceptional circumstances. They urged that NIHR regard funding without competition as a standard means of funding RTCs in areas of ongoing priorities, while competition would be used in new priorities.

Response: No change has been made. Competition is the standard policy of the Department, and the Secretary believes that competition for financial assistance is generally the best means of assuring high quality of research, affording fairness to the research community, and serving the best interests of disabled people. In providing that RTCs need not be automatically terminated, Congress authorized the Secretary to make exceptions to that policy when circumstances warrant.

Comment: A few commenters stated that the decisions on funding applicants should be made by the Director of NIHR, who is required by law to be knowledgeable about rehabilitation research, rather than by the Secretary.

Response: No change has been made. The Secretary is the chief executive officer of the Department of Education. The Education Department General Administrative Regulations (34 CFR Part 77), define "Secretary" to include an official or employee of the Department of Education acting for the Secretary under a delegation of authority. The Secretary receives advice from other officials of the Department based upon their substantive knowledge and expertise.

Comment: Some commenters suggested that the requirement for on-site reviews in the process of determining whether to exempt RTCs from competition could be burdensome or too costly under some circumstances and that reviews off-site might be sufficient.

Response: A change has been made. The regulations now permit off-site reviews, as well as on-site reviews when necessary.

Comment: A few commenters urged that the evaluation criteria for the Innovation Grants program be made more rigorous and conform to those in the Field-Initiated Research program.

Response: No change has been made. While the Secretary agrees that the quality of funded research should not be diluted, the Secretary is mindful that the law requires that administrative procedures for these grants be expedited as much as possible, and notes that the emphasis of the program is on the support of innovative concepts.

Comment: Several commenters suggested that there should be more attention to the evaluation of research design in the criteria for selection of Spinal Cord Injury applications.

Response: A change has been made. The selection criteria have been modified to provide specific attention to research factors such as soundness of hypotheses, sample selection, data collection, and data analysis.

Comment: Several commenters questioned the requirement that applications be sent to State Vocational Rehabilitation agencies.

Response: No change has been made. The Act authorizing NIHR requires that applicants submit copies of their applications to the cognizant State rehabilitation agency. The State agency may choose to comment or not, and if it does comment, then its concerns are among the factors considered by the Secretary in making the final funding determinations.

Part VI

Department of the Interior

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Final Rules

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Final Rule To Determine Erigeron Rhizomatus To Be a Threatened Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines a plant, *Erigeron rhizomatus* (rhizome fleabane), to be a threatened species under the authority of the Endangered Species Act of 1973 (Act), as amended. Approximately 20 populations are known, all of which are in New Mexico. The total number of individual plants is only about 200. This species' survival is threatened due to the low number of plants, its restricted distribution, and the potential for habitat loss if uranium mining in the area is ever reactivated. This action implements the protection provided by the Act for this plant.

DATE: The effective date of this rule is May 28, 1984.

ADDRESS: The complete file for this rule is available for inspection during normal, business hours, by appointment, at the Service's Regional Office of Endangered Species, 500 Gold Avenue, S.W., Room 4000, Albuquerque, New Mexico 87103.

FOR FURTHER INFORMATION CONTACT: Peggy Olwell, Botanist, Region 2 Endangered Species Staff, see address above (505/766–3972 or FTS 474–3972).

SUPPLEMENTARY INFORMATION:

Background

Erigeron rhizomatus is in the aster family. The species was first collected in McKinley County, New Mexico, by R.C. Barneby in 1943 and was described by A. Cronquist in 1947. Approximately 20 populations are now known from two counties in New Mexico. Populations are known on the Cibola National Forest in areas south of Fort Wingate in McKinley County, and on the Cibola National Forest and adjacent areas administered by the Bureau of Land Management (BLM) northwest of Datil in Catron County. These are the only areas in which this *Erigeron* has been found.

Erigeron rhizomatus is a perennial herb arising from a horizontal underground stem, or rhizome. The leaves are narrow and oblong to linear, up to 1 centimeter (.4 inch) long and 3 millimeters (.12 inch) wide, and dark green. The flower heads are single, 13–16 millimeters (.5–.6 inch) wide, and blue or white. The stems are in clumps 25–45 centimeters (10–18 inches) high, and up to 30 centimeters (12 inches) across (Martin and Hutchins, 1981).

Erigeron rhizomatus grows in a zone of Chinle shale and associated soils in the piñon-juniper association at 2,190 to 2,400 meters (7,180–7,870 feet) elevation. The Zuni Mountain population is found on loose, decaying slopes of the Chinle shale formation. However, the majority of the Datil plants occur in the Baca formation.

Flowering is from May to June. The species appears to be reproducing well, and individuals of all age classes are present. The clumps of plants are all clones. Establishment of new plants by seed is rare, although a large volume of seed is produced (Fletcher, 1978; Sabo, 1981).

Most of the populations are close to inactive uranium claims. If exploration or mining is reactivated, there may be adverse impacts to the plants.

Federal action affecting this species began with Section 12 of the Endangered Species Act of 1973, which directed the Secretary of the Smithsonian Institution to prepare a report on those plants considered to be endangered, threatened, or extinct. This report, designated as House Document No. 94–51, was presented to Congress on January 9, 1975. On July 1, 1975, the Service published a notice in the **Federal Register** (40 FR 27823) of its acceptance of the report of the Smithsonian Institution as a petition within the context of section 4(c)(2) (petition acceptance is now governed by section 4(b)(3)(A)) of the Act), and of its intention thereby to review the status of the plant taxa named therein. On June 16, 1976, the Service published a proposed rule in the **Federal Register** (41 FR 24523) to determine approximately 1,700 vascular plant species to be endangered species pursuant to Section 4 of the Act. This list of 1,700 plant species was assembled on the basis of comments and data received by the Smithsonian Institution and the Service in response to House Document 94–51 and the July 1, 1975, **Federal Register** publication. *Erigeron rhizomatus* was included in the July 1, 1975, notice of review and the June 16, 1976, proposal. General comments received in relation to the 1976 proposal were summarized in the April 26, 1978, **Federal Register** (43 FR 17909).

The Endangered Species Act Amendments of 1978 required that all proposals over 2 years old be withdrawn. A 1-year grace period was given to proposals already over 2 years old. In the December 10, 1979, **Federal Register** (44 FR 70796), the Service published a notice of withdrawal of the June 16, 1976, proposal, along with four other proposals that had expired. *Erigeron rhizomatus*, however, was included in category 1 on the list of plants under review for threatened or endangered classification in the December 15, 1980, **Federal Register** (45 FR 82480). Category 1 refers to taxa for which the Service presently has sufficient information to support the biological appropriateness of their being listed as endangered or threatened species.

The Endangered Species Act Amendments of 1982 required that all petitions pending as of October 13, 1982, be treated as having been newly submitted on that date. The species covered by the December 15, 1980, notice of review were considered to be petitioned, and the deadline for a finding on those species, including *Erigeron rhizomatus*, was October 13, 1983. For *Erigeron rhizomatus*, the petition finding was made on October 13, 1983, that listing was warranted but precluded by pending listing actions in accordance with section 4(b)(3)(B)(iii) of the Act. Such petitions are recycled under section 4(b)(3)(C)(i) of the Act. The Service published a proposed rule to list *Erigeron rhizomatus* as a threatened species on April 24, 1984 (49 FR 17548), constituting the next 1-year finding which would have been required on or before October 13, 1984.

Summary of Comments and Recommendations

In the April 24, 1984, proposed rule (49 FR 17548) and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice was published in the *Gallup Independent* and *The Defensor Chieftain* newspapers on May 24, 1984, that invited general public comment. Six comments were received. Summaries of the comments and the Service's response are discussed below. No public hearing was requested or held.

Comments supporting the listing were received from the New York Botanical Garden, the State of New Mexico Natural Resources Department, the International Union for Conservation of Nature and Natural Resources, the Bureau of Land Management (BLM), and the Forest Service.

The National Park Service stated that the proposed listing has no immediate effect upon it, but that, if the plant should be found on National Park Service lands, the Fish and Wildlife Service will be notified.

The BLM informed Service that a population exists on BLM-administered land adjacent to Cibola National Forest northwest of Datil, New Mexico. This information has been added to the rule. The BLM pointed out that it has no information regarding the reactivation of uranium mining claims; however, if the claims were to be resumed, the species would be protected from activities that would jeopardize its existence. The BLM commented that fire may be an additional threat to *Erigeron rhizomatus*. It said it is doubtful that the rhizome fleabane is adapted to fire, and a hot fire in adjacent areas may destroy or damage plants. In addition, it commented that intensive livestock or recreational use could damage the populations and that these activities might have to be regulated. The final rule has been changed to reflect these comments.

The Forest Service, in addition to supporting the listing of *Erigeron rhizomatus* as threatened, provided 1983 survey data. It commented on the number of populations and individual plants. The Service concurs with the Forest Service that it is difficult to define a single plant because *E. rhizomatus* reproduces by rhizomes and grows in clumps. The reproductive biology of this species should be studied to better understand this process. The Forest Service also commented that the Datil plants are found in the Baca formation (rather than the Chinle). This information has been incorporated into the final rule. The Forest Service believes that the only threat to *Erigeron rhizomatus* is the uranium mining potential and that the only other activity that may disturb the rhizome fleabane's habitat is road construction. However, it believes that road construction can be conducted giving full recognition to the plant without significant problems. The Forest Service stated that the eradication of *E. rhizomatus* by disease is unlikely due to the scattered distribution of the plant in two mountain ranges. The rule has been changed to reflect this comment. It also requested that the provision in the Act prohibiting possession of the plant from areas under Federal jurisdiction not be implemented. It stated that it believes that the prohibition of collecting would hamper the verification of distribution information on *Erigeron rhizomatus*. The Service does not agree that section 9(a)(2) of the Act will hamper verification of the species' distribution nor does it agree that this restriction is not necessary. The Act does provide for issuance of a permit for collection of plants fo scientific purposes. A permit for collection of *Erigeron rhizomatus* may be obtained from the Service for verification of distribution.

Summary of Factors Affecting the Species

After a thorough review and consideration of all available information, the Service has determined that *Erigeron rhizomatus* should be classified as a threatened species. Procedures found as section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (codified at 50 CFR Part 424; as revised to accommodate the 1982 Amendments—See final rule at 49 FR 38900, October 1, 1984) were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1) of the Act. These factors and their application to *Erigeron rhizomatus* Cronquist are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The main threats to *Erigeron rhizomatus* are from habitat disturbance, especially if there is ever a resumption of uranium mining. Most of the populations in the Datil and Sawtooth Mountains occur within or very close to extensive, currently inactive, uranium claims and could be destroyed or severely damaged if the claims are ever reactivated and developed without planning for the species' protection. Road construction and resulting erosion also could have adverse impacts on *Erigeron rhizomatus* (Fletcher, 1978; Sabo, 1981). The population on BLM-administered land occurs on an allotment under moderate cattle grazing use. Trampling and the subsequent erosion could damage the population and its habitat (L. MacIntosh, BLM, pers. comm., 1984). Recreation, such as incidental camping and hunting, presents a potential threat to the species on BLM land.

B. *Overutilization for commercial, recreational, scientific, or educational purposes. Erigeron rhizomatus* is not presently desired by plant collectors. Collection for scientific study and threats from overuse are small (Sabo, 1981). However, plants are more vulnerable than animals to taking pressures and because of the low numbers of *Erigeron rhizomatus* and its restricted range, vandalism poses a threat to the survival of this species.

C. *Disease or predation.* No threat from disease or predation to this species is presently known. The scattered distribution of *Erigeron rhizomatus* reduces its susceptibility to disease. However, if any disease should occur, it might seriously reduce the numbers of the plant.

D. *The inadequacy of existing regulatory mechanisms.* There are no State laws offering protection for *Erigeron rhizomatus*. U.S. Forest Service (USFS) regulations prohibit taking of plants on USFS lands (36 CFR 261.9(b)). These regulations are difficult to enforce in backcountry situations.

E. *Other natural or manmade factors affecting its continued existence.* The limited distribution (two New Mexico counties) and low numbers of plants (approximately 200) make *Erigeron rhizomatus* especially vulnerable to habitat disturbances or other stresses.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list *Erigeron rhizomatus* as threatened.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time a species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for this species at this time. *Erigeron rhizomatus* occurs only on U.S. Forest Service and Bureau of Land Management lands. The Act requires all Federal agencies to carry out programs for the conservation of listed species. The U.S. Forest Service and BLM are aware of where *Erigeron rhizomatus* occurs, and will need to continue to take steps to protect its essential habitat once the species is listed. Also, all Federal agencies, including the U.S. Forest Service and BLM, are bound to avoid any actions that would jeopardize any listed species. Therefore, the determination of critical habitat would not provide any additional benefits for the plants. Critical habitat determinations and publication of detailed maps have the potential of increasing taking pressures or encouraging vandalism. Publication of critical habitat maps for *Erigeron rhizomatus* would enable the public to locate precisely where plants occur, and might lead to vandalism, which could further threaten the species. Because the U.S. Forest Service and BLM know

where *Erigeron rhizomatus* occurs, and will need to continue to protect its habitat, and because a determination of critical habitat might impose further threat to the plants, determination of critical habitat is not considered prudent.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402 and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. *Erigeron rhizomatus* is known only from U.S. Forest Service and BLM lands. There are uranium mining claims in the vicinity of the majority of the populations in both the Datil and Sawtooth Mountains. The claims are presently inactive. If exploration or a resumption of mining were to occur, there is potential for Federal involvement.

The Act and its implementing regulations found at 50 CFR 17.71 and 17.72 set forth a series of general trade prohibitions and exceptions that apply to all threatened plant species. With respect to *Erigeron rhizomatus*, all trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.71, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, or sell or offer for sale this species in interstate or foreign commerce. Seeds for cultivated specimens of threatened plant species are exempt from these prohibitions provided that a statement of "cultivated origin" appears on their containers. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.72 also provide for the issuance of permits to carry out otherwise prohibited activities involving threatened species, under certain circumstances. International and interstate commercial trade in *Erigeron rhizomatus* is not known to exist. It is not anticipated that many trade permits involving plants of wild origin would ever be issued since this plant is not common in the wild and is not presently in cultivation.

Section 9(a)(2)(B) of the Act, as amended in 1982, states that it is unlawful to remove and reduce to possession endangered plant species from areas from Federal jurisdiction. Section 4(d) allows for the provisions of such protection to threatened species through regulations. This protection will apply to *Erigeron rhizomatus* once revised regulations are promulgated. Proposed regulations implementing this prohibition were published on July 8, 1983 (48 FR 31417), and it is anticipated that these will be made final following public comment. *Erigeron rhizomatus* is known only from Federal lands. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–1903).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined by the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Regulation Promulgation

PART 17—[AMENDED]

Accordingly, Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, is amended as set forth below:

1. The authority citation for Part 17 reads as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531 *et seq.*).

2. Amend § 17.12(h) by adding the following, in alphabetical order, under the family Asteraceae, to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

* * * * *

(h) * * *

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 50 FR 12345.

Title 3—

The President

Presidential Determination No. 85–12 of April 10, 1985

Eligibility of Algeria To Make Purchases of Defense Articles Under the Arms Export Control Act

Memorandum for the Honorable George P. Shultz, the Secretary of State

Pursuant to the authority vested in me by Section 3(a)(1) of the Arms Export Control Act, I hereby find that the furnishing of defense articles to the Government of Algeria will strengthen the security of the United States and promote world peace.

You are directed on my behalf to report this finding to the Congress.

This finding shall be published in the **Federal Register.**

Proclamation 5327 of April 25, 1985

National DES Awareness Week, 1985

By the President of the United States of America

A Proclamation

Between 1941 and 1971, a number of pregnant women in the United States were prescribed DES (diethylstilbestrol) to prevent miscarriage. This powerful synthetic hormone was used not only in problem pregnancies but also in some normal pregnancies. As a result, some three million children were exposed to DES while in the womb.

Many scientists fear that exposure to DES may be linked to some forms of cancer. This fear is enough to call attention to the possible health threats faced by past users of DES and their children. Many of the cancers that may be related to DES can be effectively treated if detected at an early, localized stage. Awareness of the threats posed by past DES use should result in increased attention to regular checkups, the first step to effective detection and treatment.

To increase the public understanding of DES exposure, the Congress of the United States, by Senate Joint Resolution 63, has designated the week of April 21 through April 27, 1985, as "National DES Awareness Week" and authorized and requested the President to issue a proclamation calling for observance of this week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week of April 21 through April 27, 1985, as National DES Awareness Week. I call upon all government agencies and the people of the United States to observe this week with appropriate activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 25th day of April, in the year of our Lord nineteen hundred and eighty-five, and of the Independence of the United States of America the two hundred and ninth.

Ronald Reagan

Proclamation 5328 of April 25, 1985

Older Americans Month, 1985

By the President of the United States of America

A Proclamation

Within recent years, older Americans have achieved economic parity with the rest of our Nation's population. This welcome development has meant a true sense of independence for most older Americans.

The tremendous strides that we as a Nation have made in our standard of living and health care have also meant that each succeeding generation of older Americans is proving to be more vigorous and self-sufficient than were its forebears at comparable ages. This translates into a real increase in independence for our Nation's older people.

In the years ahead, we can enhance our personal independence even further by pursuing lifestyles designed to protect our health; by thoughtful planning for our retirement years; and by maintaining strong and close ties with our families, neighbors, and friends.

Our rich heritage of neighbor assisting neighbor continues to thrive not only in its original form, but also as manifested in the emergence of a variety of private helping organizations at the community level. For those older Americans who need outside support to maintain the independence we cherish, it is reassuring to know that assistance is available through a nationwide network of State and area agencies and also private agencies who devote services to the elderly.

Each of us can enrich the lives of others—and ennoble our own lives—by volunteering in whatever way we can to help older Americans in need of assistance. Age is no barrier to this effort, which should involve families, neighbors, and friends, as we help others continue to realize the dream of independence.

When we—each in our own way—strive to maintain our independence and help others to do the same, we will be fulfilling the theme of this year's Older Americans Month, "Help Yourself to Independence."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of May 1985 as Older Americans Month. I ask public officials at all levels, community agencies, educators, the communications media, and the American people to take this opportunity to honor older Americans and to encourage them to do everything they can to make their health last a lifetime.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-fifth day of April, in the year of our Lord nineteen hundred and eighty-five, and of the Independence of the United States of America the two hundred and ninth.

Presidential Documents

Proclamation 5329 of April 25, 1985

Fair Housing Month, 1985

By the President of the United States of America

A Proclamation

1985 marks the seventeenth anniversary of the passage of Title VIII of the Civil Rights Act of 1968, commonly referred to as the Federal Fair Housing Act. That law declared it to be a national policy to provide, within constitutional limits, for fair housing throughout the United States. In particular, that Act prohibits discrimination in housing on the basis of race, color, religion, sex, or national origin.

Fairness is the foundation of our way of life and reflects the best of our traditional American values. Invidious, discriminatory housing practices undermine the strength and vitality of America and her people. In this seventeenth year since the passage of the Fair Housing Act, let us work together to strengthen enforcement of fair housing laws for all Americans so as to make the idea of nondiscriminatory housing a reality.

The Congress, by Senate Joint Resolution 79, has designated the month of April 1985 as "Fair Housing Month" and authorized and requested the President to issue an appropriate proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of April 1985 as Fair Housing Month, and I invite the Governors of the several States, the chief officials of local governments, and the people of the United States to observe this month with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 25th day of April, in the year of our Lord nineteen hundred and eighty-five, and of the Independence of the United States of America the two hundred and ninth.

Rules and Regulations

Federal Register
Vol. 50, No. 82
Monday, April 29, 1985

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 792

Federal Employees' Health and Counseling Programs; Regulatory Requirements for Alcoholism and Drug Abuse Programs and Services for Federal Civilian Employees

AGENCY: Office of Personnel Management.

ACTION: Final regulation.

SUMMARY: The Office of Personnel Management is amending 5 CFR by adding Part 792, which establishes OPM and agency responsibilities to provide prevention, treatment, and rehabilitation services to Federal civilian employees with alcohol and/or drug problems. Part 792 identifies those elements of the alcohol and drug abuse program that are mandatory and binding upon Federal departments and agencies. As a minimum, agencies are required to: (1) Establish and administer short-term counseling and/or referral programs to assist civilian employees with alcohol and/or drug problems; (2) issue internal program instructions; and (3) submit annual fiscal year reports to OPM on their counseling activities.

EFFECTIVE DATE: May 29, 1985.

FOR FURTHER INFORMATION CONTACT: Ruby Giddings, (202) 632–5558.

SUPPLEMENTARY INFORMATION: OPM published an interim regulation on July 9, 1984 (49 FR 27921) that required Federal departments and agencies to operate, at a minimum, programs to assist their employees who experience work related problems associated with the use of alcohol and/or drugs. The regulation clarified those elements of the alcohol and drug abuse program that are essential to meet the statutory requirements of the public laws. The public comment period ended on September 9, 1984. OPM received numerous comments from agencies and unions. There were a number of suggestions for specific improvements in the regulation that have been adopted in the final regulation. Specific comments received and related decisions are summarized below.

Comment: One agency recommended that the reference to employees having "alcohol and drug problems" be changed to "alcohol and/or other drug problems" throughout the regulation to consistently convey the idea that a person with either an alcohol problem or a drug problem or a person with both an alcohol and a drug problem may take advantage of the alcoholism and drug abuse programs and services afforded Federal civilian employees.

Response: OPM agrees in part with this suggestion and has adopted in the final regulation the reference to employees having "alcohol and/or drug problems"; therefore, acknowledging that employees may experience these two problems simultaneously. However, the word "other" has not been adopted as OPM feels that the two public laws are separate in authority and the use of the term "other" confuses two different employee problems.

Comment: One agency recommended that in paragraph (a) of § 792.105 the word "officials" be changed to "persons" to reflect the possibility that an agency may contract out for the program and that there may be no "officials" in the agency who are knowledgeable in counseling and referral services.

Response: OPM agrees that the term "officials" may be misleading but the recommended substitution of the word "persons" is too general. Therefore, OPM has decided to use the term "practitioners" in the final regulation.

Comment: One agency pointed out that the statutory citations should be updated to reflect the recent changes enacted by the Alcohol and Drug Abuse Amendments of 1983 (Pub. L. 98–24). The agency also urged that the statutory requirement contained in the supplementary information portion that encourages agencies to extend, to the extent feasible, these programs and services to the families of alcohol and drug abusers and to employees who have family members who are alcoholic or drug abusers be moved to the body of the regulation.

Response: The final regulation has been revised to reflect the amendments and to incorporate the Federal Government's statutory obligation to the families of alcohol and/or drug abusing employees and to employees who have family members who have an alcohol and/or drug problem in § 792.101 (Statutory requirements).

Comment: One union expressed concern that § 792.102 of the interim regulation, which requires short-term counseling and/or referral, or offers thereof, would be "woefully inadequate" to deal with the serious problems caused by alcohol and/or drug use and recommended that this section be replaced with a requirement for agencies to develop comprehensive programs for the counseling and treatment of these problems.

Response: The regulation is intended to establish only the minimum agency program requirements necessary to assist employees with these problems and does not prohibit agencies from expanding their program activities. Currently, agency programs range from a part-time counselor to units staffed with professional counselors who handle a broad range of employee services. The regulation is intended to provide the basis on which agencies can build their programs according to their particular management and employee needs. This approach also allows agencies the flexibility to provide these services either through internal programs, contractors, or consortia. While the points made are sound, OPM feels that the guidance to implement the regulation will encourage agencies to develop comprehensive, viable programs.

Comment: One agency requested that the regulation contain information on what type of leave would be appropriate for an employee seeking or undergoing treatment.

Response: OPM feels that existing leave regulations and guidance provide agencies with sufficient information and discretion to appropriately administer leave for these purposes. Therefore, emphasis on leave administration in this regulation is not necessary.

Comment: The majority of the comments focused on the content of § 792.105(c). Two agencies found this section to be possibly misleading regarding the responsibilities of the manager/supervisor to identify and refer

employees whose use of alcohol and/or drugs negatively affects conduct and/or performance. In particular, concern was expressed that the language implied that managers/supervisors will make referrals for counseling only when they have the knowledge that an employee's use of alcohol and/or drugs may be contributing to a performance or conduct deficiency. Also, several commenters recommended that the use of the term "rate" in the phrase "rate the employee accordingly and initiate an appropriate performance-based or adverse action at that time" be changed to evaluate. Specifically, concerns were expressed that the use of the word "rate" would infer that agency action would be connected to or dependent upon a formal employee rating under the agency's Performance Appraisal System and does not take into consideration action related to employee misconduct.

Response: With respect to the first point, OPM feels that the regulation should be limited to the required responsibility of the supervisor/manager. Anything other than absolute awareness (i.e., suspects or has reason to believe) should be addressed in guidance where examples can be provided. OPM agrees with the second point and this section has been revised accordingly.

Comment: One agency expressed concern that § 792.105(c) did not establish time limits on when the employee must seek counseling, begin or complete a rehabilitation program, or show improvements. This concern also reflected disappointment that the regulation did not define "rehabilitation," "participation," or "improvement."

Response: OPM feels that it is not feasible or desirable to establish time limits and define what constitutes "rehabilitation," "participation," or "improvement," as the conditions for rehabilitative treatment vary from individual to individual and must be judged on a case-by-case basis depending on the circumstances. Therefore, this type of information is best described in the implementing guidance.

Comment: One agency recommended that a section on prevention be added to the body of the regulation.

Response: While OPM agrees that prevention is an important part of the program and is established by law, it is felt that preventive actions are best handled in the implementing guidance because of the variety of approaches available to agencies to meet this mandate.

Comment: One agency thought that the regulation should clarify the relationship of a management referral of an employee for counseling and a management offer or requirement of a medical examination when an employee asserts that a medical condition is contributing to a conduct or performance problem.

Response: OPM feels that there is no relationship. A medical examination does not apply to a referral to an Employee Counseling Program. However, if an employee alleges a medical condition, the employee may submit medical documentation or the agency may offer the employee a medical examination.

E.O. 12291, Federal Regulation

OPM has determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have significant economic impact on a substantial number of small entities because it only affects Federal employees and their families.

List of Subjects in 5 CFR Part 792

Alcoholism, Drug abuse, Federal employees.

U.S. Office of Personnel Management.

Donald J. Devine,

Director.

Accordingly, OPM is adopting the interim regulation as a final regulation with the following changes:

PART 792—FEDERAL EMPLOYEES HEALTH AND COUNSELING PROGRAMS

1. The authority for Part 792 is revised to read as follows:

Subpart B—[Reserved]

Authority: Sec. 201 of Pub. L 91–616, 84 Stat. 1849, as amended and transferred to sec. 520 of the Public Health Services Act by sec. 2(b)(13) of Pub. L. 98–24 (42 U.S.C. 290dd–1) and sec. 413 of Pub. L. 92–255, 86 Stat. 84, as amended and transferred to sec. 525 of the Public Health Service Act by sec. 2(b)(16)(A) of Pub. L. 98–24 (42 U.S.C. 290ee–1).

2. Section 792.101 is revised to read as follows:

§ 792.101 Statutory requirements.

Sections 290dd–1 and 290ee–1 of 42 United States Code, provide that the Office of Personnel Management shall be responsible for developing and maintaining, in cooperation with the Secretary of the Department of Health and Human Services, and with other Federal departments and agencies, appropriate prevention, treatment, and rehabilitation programs and services for Federal civilian employees with alcohol and/or drug problems. To the extent feasible, agencies are encouraged to extend services to families of alcohol and/or drug abusing employees and to employees who have family members who have alcohol and/or drug problems. Such programs and services shall make optimal use of existing government facilities, services, and skills.

3. Section 792.102 is revised to read as follows:

§ 792.102 General.

It is the policy of the Federal Government to offer appropriate prevention, treatment, and rehabilitation programs and services for Federal civilian employees with alcohol and/or drug problems. Short-term counseling and/or referral, or offers thereof, shall constitute the appropriate prevention, treatment, and rehabilitation programs and services for alcohol abuse, alcoholism, and/or drug abuse required under 42 U.S.C. 290dd–1(a) and 290ee–1(a). Federal departments and agencies must establish programs to assist employees with these problems in accordance with the legislation cited in § 792.101.

4. Paragraphs (a) through (c) of § 792.105 are revised to read as follows:

§ 792.105 Agency responsibilities.

(a) Agencies shall establish and administer programs through which practitioners who are knowledgeable in counseling and referral services can offer and provide employees who have alcohol and/or drug problems short-term counseling and/or referrals for long-term counseling or treatment.

(b) Agencies shall issue internal instructions implementing the requirements of 42 U.S.C. 290dd–1(a) and 290ee–1(a) and this regulation.

(c) Whenever a manager/supervisor becomes aware that a Federal employee's use of alcohol and/or drugs may be contributing to a performance or conduct deficiency, the manager/supervisor shall recommend counseling and refer the employee to the agency counseling program. If an employee fails to participate in any rehabilitative program or, having participated, the employee fails to bring conduct or performance up to satisfactory level, the agency shall evaluate the employee accordingly and initiate an appropriate performance-based or adverse action.

BILLING CODE 6325–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 989

Raisins Produced From Grapes Grown In California; Modification of Procedures To Implement a Raisin Diversion Program

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This action establishes procedures to give raisin producers a chance to submit diversion applications after the current December 20 deadline date, but only if the producer agrees to remove vines. The additional period for receipt of applications would be available only in those years when the tonnage of approved applications is less than the total tonnage declared eligible for diversion by the Raisin Administrative Committee. Interested producers would have to apply by an announced date not later than May 1 and approved subscribers would have to remove the vines not later than June 1, except that these dates may be extended by 30 days in the 1985 calendar year because of the lateness of the season and the need to maximize producer participation in the 1985 program. The raisin industry is faced with an urgent need to reduce long-term production capacity. This action was recommended unanimously by the Raisin Administrative Committee. The Committee works with the Department in administering the marketing order for California raisins.

EFFECTIVE DATE: April 23, 1985. Comments due: May 29, 1985.

ADDRESS: Comments must be sent in duplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, Room 2069, South Building, Washington, D.C. 20250. Comments should reference the date and page number of this issue of the **Federal Register** and will be available for public inspection in the office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Frank M. Grasberger, Acting Chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250, (202) 447–5053.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

It is found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in public rulemaking and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553). The Raisin Administrative Committee approved a raisin diversion program for the 1985 crop to foster production cut-backs and assist growers with their current financial difficulties. The raisin industry desires to utilize these sign-up extension procedures for the 1985 program promptly because the current total tonnage represented by applications approved for 1985 is almost 16,000 tons less than the tonnage declared eligible for diversion by the Committee. Since approval of those applications by the Committee, it has received numerous inquiries from producers wishing to remove vines in 1985. To assure success of the diversion program for 1985, maximize producer participation, and achieve the production cut-backs the industry desires, producers desiring to remove vines should be given another opportunity to subscribe. However, time is running short, and these procedures must be implemented promptly to give producers enough time to plan accordingly, including a determination of the portion of the vineyard to be removed. This action has been discussed extensively by the industry and no useful purpose would be served by providing a period for public input, especially in view of the lateness of the season and the need for prompt implementation.

While this action needs to be effective immediately for the 1985 crop diversion program, the amendments are permanent regulations which may be utilized in future crop years. Therefore, it is appropriate to request comments before determining whether to finalize this modification on a permanent basis for future crop years.

This interim final rule amends § 989.156 of Subpart—Administrative Rules and Regulations (7 CFR 989.102–989.176; 50 FR 3879) by adding a new paragraph (s) to make the raisin diversion program more flexible in the area of producer participation. This subpart is operative pursuant to the marketing agreement and Order No. 989, both as amended (7 CFR Part 989; 50 FR 1830), regulating the handling of raisins produced from grapes grown in California. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

On January 23, 1985, the procedural and operational details of the raisin diversion program were established in § 989.156 pursuant to § 989.56 of the marketing agreement and order program. Section 989.56 was added to the order when it was amended January 8, 1985. The program gives the industry a means of correcting its serious over-supply situation by providing a mechanism whereby producers voluntarily can decrease the quantity of raisin grapes grown for drying into raisins. Under this program, a raisin producer can halt production of raisins, but still have a quantity of reserve raisins (represented by a diversion certificate) to sell to handlers. The tonnage available would be from those reserve raisins previously determined by the Committee to be in excess of projected market needs.

Since implementation, the raisin industry has been striving to assure the success of the 1985 program and programs which may be needed in the future. To maximize opportunities for producer participation, the Committee recommended procedures for additional diversion through vine removal when the total tonnage on approved applications received before December 20 is less than the tonnage declared eligible for diversion by the Committee. The Committee limited diversion under these procedures to vine removal because that method of diversion would reduce production capacity on a more permanent basis than the other methods specified in § 989.156(h). The procedures would provide an additional period for submission of applications, and the tonnage available during the reoffer period would be limited to the difference between the tonnage on originally approved applications and the total tonnage declared eligible for diversion. Producers would have until an announced date not later than May 1 to submit such applications and these would be approved on a first-come, first-served basis.

The Committee further recommended that less than a total production unit may be approved for diversion during the reoffer period. This will provide an incentive for more producers to participate in the program and promote the use of vine removal which is the most direct and most effective way of accomplishing the diversion program objectives. The determination of the tonnage allowed for acreage removed for less than the total production unit

would be computed by multiplying the tonnage produced and verified on the entire unit by the ratio of the acreage removed divided by the acreage contained in the total production unit. After verification of the tonnage on the production unit has been completed and the application approved, the producer would notify the Committee when vine removal is to occur so the Committee can observe the removal. If the removal is not observed, no diversion certificate would be issued by the Committee.

The Committee received over a thousand applications from Thompson Seedless growers willing to divert their 1985 production. Approximately 60,000 tons of raisins representing about 30,000 acres have been approved for the 1985 diversion program. However, the Committee earlier determined that about 76,000 tons of reserve raisins are in excess of projected market needs. Since the close of the application period the Committee has received numerous calls from producers expressing interest in participating in the 1985 program. The Committee believes that the authority for an additional sign-up period for those producers agreeing to remove vines could increase the level of participation and assure the success of the 1985 program. The reoffer period will increase the opportunity for raisin producers to further reduce the 1985 crop through vine removal.

After consideration of all relevant matter presented, including the information and recommendation submitted by the Committee, and other available information, it is further found that the changes hereinafter set forth will tend to effectuate the declared policy of the act.

List of Subjects in 7 CFR Part 989

Marketing agreements and orders, Grapes, Raisins, and California.

PART 989—[AMENDED]

Therefore § 989.156 is amended by adding and reserving paragraphs (q) and (r) and adding a new paragraph (s) to read as follows:

§ 989.156 Raisin diversion program.

* * * * *

(s) *Additional opportunity for vine removal.* (1) The Committee may announce a date later than that provided in § 989.156(b), by which producers, who agree to remove the vines on a production unit, or portion thereof may file an application to participate in a raisin diversion program. The announced date shall be no later than May 1, except this date may be extended 30 days for the 1985 calendar year. The diversion certificates will be issued only for the production units or portions thereof from which the vines are removed. The total tonnage available to such applicants shall not exceed the tonnage determined by deducting the tonnage approved for applications received on or before December 20 from the total tonnage announced as eligible by the Committee for diversion. Applications shall be considered and approved on a first-come, first-serve, basis and shall not be given preference over the tonnage approved for applications received on or before December 20. The vines shall be removed from the production units or portion thereof for which such applications are approved not later than June 1, except this date may be extended 30 days for the 1985 calendar year.

(2) Producers who agree to remove the vines pursuant to this paragraph shall notify the Committee in advance of the date when such vines will be removed in order to allow a representative of the Committee to observe and verify such vine removal.

(3) The determination of the tonnage allowed for acreage removed for less than a total production unit would be computed by multiplying the previous year's tonnage produced and verified on the entire unit by the ratio of the acreage removed divided by the acreage contained in the total production unit.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: April 23, 1985.

Thomas R. Clark,

Deputy Director, Fruit and Vegetable Division.

[FR Doc. 85–10307 Filed 4–26–85; 8:45 am]

BILLING CODE 3410–02–M

Animal and Plant Health Inspection Service

9 CFR Part 94

[Docket No. 85–033]

Swine, Pork, and Pork Products Imported From Norway

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends the regulations concerning the importation into the United States of swine, pork, and pork products by adding Norway to the list of countries in which hog cholera is not known to exist. It has been determined that hog cholera has now been eradicated from Norway. The effect of this rule is to relieve certain restrictions on the importation into the United States of swine, pork, and pork products from Norway.

EFFECTIVE DATE: April 29, 1985.

FOR FURTHER INFORMATION CONTACT: Dr. Dan Sheesley, Import-Export Animals and Products Staff, VS, APHIS, USDA, Room 844AAA, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–8170

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR Part 94 (the regulations) regulate the importation into the United States of specified animals and animal products in order to prevent the introduction into the United States of various diseases, including hog cholera.

A document published in the **Federal Register** on February 27, 1985 (50 FR 7926–7927), proposed to amend §§ 94.9 and 94.10 of the regulations by adding Norway to the lists of countries in which hog cholera is not known to exist. Comments were solicited for a 30-day period ending March 29, 1985. No comments were received. Based on the rationale set forth in the proposal, the regulations are amended as proposed.

The effect of this action is to relieve restrictions on the importation of swine, pork, and pork products from Norway.

Effective Date

This final rule is made effective on the date of publication. The final rule relieves restrictions which have been found to be unnecessary. Accordingly, prompt action should be taken to delete these restrictions.

Executive Order 12291 and Regulatory Flexibility Act

This rule has been reviewed in accordance with Executive Order 12291 and has been classified as not a "major rule." Based on information compiled by the Department, it has been determined that this rule will not result in a significant annual effect on the economy; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will have no significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this rulemaking action, the Office of Management and Budget has waived

its review process required by Executive Order 12291.

It is anticipated that the amount of swine, pork, or pork products imported into the United States from Norway as a result of this action will be less than one percent of the amount of these items imported into the United States annually. Further, the importation of any of these items from Norway is not the primary business activity of any business in the United States.

Under the circumstances explained above, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 9 CFR Part 94

Animal diseases, Imports, Livestock and livestock products, Meat and meat products, Milk, Poultry and poultry products, Hog cholera.

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), NEWCASTLE DISEASE (AVIAN PNEUMOENCEPHALITIS), AFRICAN SWINE FEVER, AND HOG CHOLERA: PROHIBITED AND RESTRICTED IMPORTATIONS

Accordingly, 9 CFR Part 94 is amended as follows:

1. The authority citations for §§94.9 and 94.10 are revised to read:

Authority: 21 U.S.C. 111, 134a, 134b, 134c, 134f; 7 CFR 2.17, 2.51, and 371.2(d).

§ 94.9 [Amended]

2. In § 94.9, paragraph (a) is amended by adding "Norway," after "Northern Ireland," both times it appears.

§ 94.10 [Amended]

3. Section 94.10 is amended by adding "Norway," after "Northern Ireland."

Done at Washington, D.C., this 24th day of April 1985.

B.G. Johnson,

Acting Deputy Administrator, Veterinary Services.

[FR Doc. 85-10306 Filed 4-26-85; 8:45 am]

BILLING CODE 3410-34-M

FEDERAL RESERVE SYSTEM

12 CFR Part 227

[Reg. AA; Doc. No. R-0006]

Unfair or Deceptive Acts or Practices; Credit Practices

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board is publishing a final rule amending Regulation AA (Unfair or Deceptive Acts or Practices) to implement, as to banks, the Credit Practices Rule adopted by the Federal Trade Commission. The Federal Trade Commission Act requires the Board to adopt a rule, subject to certain exceptions, that is substantially similar to the Commission's rule. This rule prohibits banks from entering into any consumer credit obligation that contains certain prohibited provisions, from pyramiding late charges, or from obligating a cosigner without a required notice. The rule also prohibits the enforcement of any prohibited provisions contained in a consumer credit obligation purchased by a bank.

EFFECTIVE DATE: January 1, 1986.

FOR FURTHER INFORMATION CONTACT: Steven Zeisel, Senior Attorney or Richard Garabedian, Staff Attorney, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, at (202) 452-3867 or (202) 452-3667. Regarding the regulatory flexibility analysis, contact: Robert Kurtz, Economist, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, at (202) 452-2915.

SUPPLEMENTARY INFORMATION: (1) *General.* The Board is publishing a final rule to amend Regulation AA (12 CFR Part 227). The rule implements, as to banks, the Credit Practices Rule adopted by the Federal Trade Commission, effective March 1, 1985 (49 FR 7740, March 1, 1984). Under section 18(f)(1) of the Federal Trade Commission Act (15 U.S.C. 57a(f)(1)), the Board must adopt, subject to certain exceptions, regulations substantially similar to those adopted by the Commission under section 18(a)(1)(B) of the Act (15 U.S.C. 57a(a)(1)(B)). The Board must act within 60 days of the effective date of the Commission's rule. This scheme was established by section 202(a) of the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act (15 U.S.C. 57a).

The Board published for public comment, on Novenber 30, 1984 (49 FR 47041), a proposed rule that was substantially similar to the rule adopted by the Commission. The Board solicited public comment on issues believed to be important in assisting the Board in its determination of whether to adopt a substantially similar rule. The Board received 137 comments in response to the proposal, including comments from all the Federal Reserve Banks. About one-half of the commenters addressed the rule as a whole, the majority of which were in opposition. Many commenters merely requested clarification of the provisions in the rule.

The Board is not required to adopt a rule if it finds that such acts or practices of banks are not unfair or deceptive, or if adoption of similar regulations would seriously conflict with essential monetary and payment systems policies of the Board. In its analysis of each of the rule's provisions, the Board has examined the record established by the Commission, the use of the practices by banks, and the concerns raised by the commenters. In so doing, the Board has concluded that neither statutory exception is applicable. Therefore, the Board is adopting a rule substantially similar to the rule adopted by the Commission. However, in promulgating a substantially similar rule, the Board has modified certain provisions, in light of the comments received, to take into account the needs and characteristics of the banking industry. These modifications are discussed under each particular provision of the rule.

The rule prohibits a bank from including certain creditor remedies in its consumer credit obligations and makes unenforceable such remedies when contained in obligations purchased by a bank. The rule also prohibits an accounting practice regarding late charges, prohibits misrepresentation of cosigner liability, and requires a disclosure to be given to cosigners. The prohibited contractual provisions are the following: (1) A confession of judgment clause; (2) a waiver or limitation of statutory exemption from attachment, execution or other legal process; (3) an assignment of wages; and (4) a non-purchase money security interest in household goods. The prohibited late charge practice prevents the deduction from a timely payment of a late charge applicable to an earlier payment, thus causing the timely payment to be delinquent because of non-payment in full. The cosigner provision prohibits misrepresentation of a cosigner's liability and requires that a notice disclosing the nature of the cosigner's obligation be given to the cosigner, either in a separate document or in the credit obligation.

(2) *Scope.* The rule applies to all banks and their subsidiaries, except savings banks that are members of the Federal Home Loan Bank System.

(3) *Definitions. Consumer.* As the definition of consumer makes clear, the rule does not apply to credit extended for the purchase of real property. Dwellings such as mobile homes and houseboats are not considered real property under this definition if they are

deemed to be personal property under state law.

Cosigner. A cosigner includes any person who renders himself or herself personally liable, in any capacity, for the obligation of another person without receiving goods, money, or services. It does not include a person who only pledges collateral for the obligation of another person. Thus, any sole or joint owner of property who merely gives a security interest without personal liability is not a cosigner.

The definition of cosigner has been clarified for open-end accounts. It has been modified from the proposal to exclude any consumer who has the contractual right to draw on an open-end credit obligation, such as a credit card account. This clarification was made in light of concerns raised by the commenters that a bank will not know, at the time that account is opened, whether a consumer will ever draw on the account and therefore not be considered a cosigner.

Household goods. The term "household goods" includes only those items specified in the regulation. Thus, other items of personal property that are not household goods are not subject to the rule's prohibition against taking nonpurchase money security interests. The term does not include such items as fixtures, automobiles, boats, snowmobiles, cameras and camera equipment (including darkroom equipment), pianos, home workshops and the like. As used in the definition of household goods, the term "personal effects" is intended to have its commonly accepted meaning. Items that are clearly personal effects are those which a person would ordinarily carry about on his or her person and possessions of uniquely personal nature, such as family photographs.

(4) *Unfair Credit Contract Provisions.* The first sentence of § 227.13 makes clear that it is an unfair act or practice for a bank either to enter into a consumer credit obligation containing any of the prohibited provisions or to seek to enforce any of the prohibited provisions contained in a consumer credit obligation purchased by the bank. This is a modification from the proposal which prohibited the purchase of an obligation containing a prohibited provision. The Board believes, in light of the comments received and further analysis, that making such provisions unenforceable will achieve the goals of the rule without imposing undue compliance burdens on banks.

Confession of Judgment. This provision prohibits only confessions of judgment that involve anticipatory waivers of procedural due process in the context of credit obligations. It does not prohibit confessions of judgment executed after an action has been instituted on the underlying obligation or after the consumer's default. The rule also does not prohibit powers of attorney given in a mortgage loan obligation or deed of trust for purposes of foreclosure, and the rule does not prohibit powers of attorney given to expedite the transfer of pledged securities, to expedite the disposal of repossessed collateral, or to allow prompt cancellation of insurance in an insurance premium finance contract.

Waiver of Exemption. This provision prohibits the contractual waiver of a property exemption that is provided to a consumer under state law. However, a waiver is permitted if it relates to property which is specifically given as security in connection with the obligation.

Assignment of Wages. This provision prohibits the assignment of wages but allows payroll deduction plans, assignments that are revocable by their terms, and assignments of earned wages. Payroll deductions plans are permitted whether revocable or irrevocable.

Blanket Security Interests. This rule prohibits nonpossessory security interests in household goods, as defined in the rule, in nonpurchase money transactions. Because the rule only prohibits certain nonpossessory security interests, it will not affect a consumer's right to pledge or pawn any household goods.

The rule also does not prohibit nonpurchase money security interests in stocks, bonds, and other non-household goods assets. In addition, it does not prevent consumers from borrowing on the equity in their homes. If a purchase money loan is refinanced or consolidated, the household goods collateralizing the prior loan can continue to secure the new loan, even if the new loan is for a larger amount or is in other respects a nonpurchase money loan.

(5) *Unfair or Deceptive Practices Involving Cosigners.* Section 227.14 (a)(1) prohibits a bank from misrepresenting a cosigner's liability to any person. Section 227.14(b)(1) requires that a disclosure notice be given to the cosigner, prior to becoming obligated, either on a separate document or on the documents evidencing the consumer credit obligation. In either case, the notice must be substantially similar to the specified notice and be clear and conspicuous. In order to be clear and conspicuous, the notice must be distinctive. A notice in the contract might be, for example, in slightly larger type or set off from the contract language. If the notice is on a separate document, additional information may be placed on the document, such as the bank's identity, the identity of the debt in question, the cosigner's acknowledgment of receipt, the date, and any state notice that is required. The alternative of including the notice in the contract documents—suggested by a number of commenters—was adopted to take into account the needs and characteristics of the banking industry. If the underlying contract is in a foreign language, the notice should be provided in the same language.

A "substantially similar" standard has been adopted to allow banks to modify the notice to take into account, for example, such variations as conflicts with state law, default situations, state notice requirements, and loans in which the bank cannot identify the cosigner. In addition, language may be deleted if it is either inapplicable or inaccurately reflects the agreement.

In the case of open-end credit obligations, the notice must be given before the cosigner becomes obligated for any fees or transactions on the account. This modification from the proposal, which required the notice to be given before execution, was added in response to the concerns of commenters that the point of execution may be uncertain in open-end obligations that are consummated through the mail. Requiring the notice before any obligation is incurred will provide sufficient protections.

If state law requires that a notice also be given to cosigners, the bank may include both notices in the credit obligation or on a separate document (either on the same side or on opposite sides), until an exemption is granted.

(6) *Unfair Late Charges.* This rule only prohibits the imposition of a late charge resulting from the failure to pay an earlier late charge. For example, if a consumer makes the January payment 15 days late, but makes the February payment on time and in full, the bank may not cause the latter payment to be considered delinquent by extracting the late charge applicable to the January payment. The rule does not prohibit late charges from being assessed for every period that a payment remains not fully paid. For example, if a consumer fails to make the January payment and then makes the February payment on time, the bank may continue to assess a late charge until the January payment is made; the rule is not intended to permit a consumer to skip a payment and unilaterally extend the term of the loan.

(7) *Regulatory Flexibility Analysis.* The Board's Division of Research and Statistics has prepared a regulatory flexibility analysis. A copy of the analysis may be obtained from Publications Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, at (202) 452–3245.

List of Subjects in 12 CFR Part 227

Banks, banking, Consumer protection, Credit, Federal Reserve System, Finance.

PART 227—[AMENDED]

Text of Proposed Revision. Pursuant to the authority granted in section 18 of the Federal Trade Commission Act (15 U.S.C. 57a), the Board is amending Regulation AA, 12 CFR Part 227, by redesignating the current provisions as Subpart A and adding a new Subpart B, as follows:

Subpart A—Consumer Complaints

* * * * *

Subpart B—Credit Practices Rule

Sec.
227.11 Authority, purpose, and scope.
227.12 Definitions.
227.13 Unfair credit contract provisions.
227.14 Unfair or deceptive practices involving cosigners.
227.15 Unfair late charges.
227.16 State exemptions

Authority: 15 U.S.C. 57a.

Subpart A—Consumer Complaints

* * * * *

Subpart B—Credit Practices Rule

§ 227.11 Authority, purpose, and scope.

(a) *Authority.* This subpart is issued by the Board under section 18(f) of the Federal Trade Commission Act, 15 U.S.C. 57a(f) (section 202(a) of the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act, Pub. L. 93–637).

(b) *Purpose.* Unfair or deceptive acts or practices in or affecting commerce are unlawful under section 5(a)(1) of the Federal Trade Commission Act, 15 U.S.C. 45(a)(1). This subpart defines unfair or deceptive acts or practices of banks in connection with extensions of credit to consumers.

(c) *Scope.* This subpart applies to all banks and their subsidiaries, except savings banks that are members of the Federal Home Loan Bank System. Compliance is to be enforced by:

(1) The Comptroller of the Currency, in the case of national banks and banks operating under the code of laws for the District of Columbia;

(2) The Board of Governors of the Federal Reserve System, in the case of banks that are members of the Federal Reserve System (other than banks referred to in paragraph (c)(1) of this section); and

(3) The Federal Deposit Insurance Corporation, in the case of banks insured by the Federal Deposit Insurance Corporation (other than banks referred to in paragraphs (c)(1) and (c)(2) of this section).

§ 227.12 Definitions.

For the purposes of this subpart, the following definitions apply:

(a) "Consumer" means a natural person who seeks or acquires goods, services, or money for personal, family, or household use other than for the purchase of real property.

(b)(1) "Cosigner" means a natural person who assumes liability for the obligation of a consumer without receiving goods, services, or money in return for the obligation, or, in the case of an open-end credit obligation, without receiving the contractual right to obtain extensions of credit under the account.

(2) "Cosigner" includes any person whose signature is requested as a condition to granting credit to a consumer, or as a condition for forbearance on collection of a consumer's obligation that is in default. The term does not include a spouse whose signature is required on a credit obligation to perfect a security interest pursuant to state law.

(3) A person who meets the definition in this paragraph is a "cosigner," whether or not the person is designated as such on the credit obligation.

(c) "Earnings" means compensation paid or payable to an individual or for the individual's account for personal services rendered or to be rendered by the individual, whether denominated as wages, salary, commission, bonus, or otherwise, including periodic payments pursuant to a pension, retirement, or disability program.

(d) "Household goods" means clothing, furniture, appliances, linens, china, crockery, kitchenware, and personal effects of the consumer and the consumer's dependents. The term "household goods" does not include:

(1) Works of art;

(2) Electronic entertainment equipment (other than one television and one radio);

(3) Items acquired as antiques; that is, items over one hundred years of age, including such items that have been repaired or renovated without changing their original form or character; and

(4) Jewelry (other than wedding rings).

(e) "Obligation" means an agreement between a consumer and a creditor.

(f) "Person" means an individual, corporation, or other business organization.

§ 227.13 Unfair credit contract provisions.

It is an unfair act or practice for a bank to enter into a consumer credit obligation that contains, or to enforce in a consumer credit obligation purchased by the bank, any of the following provisions:

(a) *Confession of judgment.* A cognovit or confession of judgment (for purposes other than executory process in the State of Louisiana), warrant of attorney, or other waiver of the right of notice and the opportunity to be heard in the event of suit or process thereon.

(b) *Waiver of exemption.* An executory waiver or a limitation of exemption from attachment, execution, or other process on real or personal property held, owned by, or due to the consumer, unless the waiver applies solely to property subject to a security interest executed in connection with the obligation.

(c) *Assignment of wages.* An assignment of wages or other earnings unless:

(1) The assignment by its terms is revocable at the will of the debtor;

(2) The assignment is a payroll deduction plan or preauthorized payment plan, commencing at the time of the transaction, in which the consumer authorizes a series of wage deductions as a method of making each payment; or

(3) The assignment applies only to wages or other earnings already earned at the time of the assignment.

(d) *Security interest in household goods.* A nonpossessory security interest in household goods other than a purchase money security interest.

§ 227.14 Unfair or deceptive practices involving cosigners.

(a) *Pronhibited practices.* In connection with the extension of credit to consumers, it is:

(1) A deceptive act or practice for a bank to misrepresent the nature or extent of cosigner liability to any person; and

(2) An unfair act or practice for a bank to obligate a cosigner unless the cosigner is informed prior to becoming obligated of the nature of the cosigner's liability.

(b) *Disclosure requirement.* (1) A clear and conspicuous disclosure statement shall be given in writing to the cosigner prior to becoming obligated. The disclosure statement shall be

substantially similar to the following statement and shall either be a separate document or included in the documents evidencing the consumer credit obligation.

Notice to Cosigner

You are being asked to guarantee this debt. Think carefully before you do. If the borrower doesn't pay the debt, you will have to. Be sure you can afford to pay if you have to, and that you want to accept this responsibility.

You may have to pay up to the full amount of the debt if the borrower does not pay. You may also have to pay late fees or collection costs, which increase this amount.

The bank can collect this debt from you without first trying to collect from the borrower. The bank can use the same collection methods against you that can be used against the borrower, such as suing you, garnishing your wages, etc. If this debt is ever in default, that fact may become a part of *your* credit record.

This notice is not the contract that makes you liable for the debt.

(2) In the case of open-end credit, the disclosure statement shall be given to the cosigner prior to the time that the cosigner becomes obligated for fees or transactions on the account.

(3) A bank that is in compliance with this paragraph may not be held in violation of paragraph (a)(2) of this section.

§ 227.15 Unfair late charges.

(a) In connection with collecting a debt arising out of an extension of credit to a consumer, it is an unfair act or practice for a bank to levy or collect any delinquency charge on a payment, when the only delinquency is attributable to late fees or delinquency charges assessed on earlier installments, and the payment is otherwise a full payment for the applicable period and is paid on its due date or within an applicable grace period.

(b) For the purposes of this section, "collecting a debt" means any activity, other than the use of judicial process, that is intended to bring about or does bring about repayment of all or part of money due (or alleged to be due) from a consumer.

§ 227.16 State exemptions.

(a) *General rule.* (1) An appropriate state agency may apply to the Board for a determination that:

(i) There is a state requirement or prohibition in effect that applies to any transaction to which a provision of this subpart applies; and

(ii) The state requirement or prohibition affords a level of protection to consumers that is substantially equivalent to, or greater than, the protection afforded by this subpart.

(2) If the Board makes such a determination, the provision of this subpart will not be in effect in that state to the extent specified by the Board in its determination, for as long as the state administers and enforces the state requirement or prohibition effectively.

(b) *Applications.* The procedures under which a state agency may apply for an exemption under this section are the same as those set forth in Appendix B to Regulation Z (12 CFR Part 226).

By order of the Board of Governors of the Federal Reserve System, April 23, 1985.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 93

[Docket No. 24255]

Special Federal Aviation Regulations (SFAR) Temporary Suspension of Subpart L of Part 93

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule, request for comments.

SUMMARY: This Special Federal Aviation Regulation (SFAR) temporarily suspends Subpart L of Part 93 of the Federal Aviation Regulations (FAR) in order to conduct an evaluation of the continued need for that rule. Affected operations will be covered by the appropriate provisions of Part 91, General Rules, during the effective period of this SFAR. Should a determination be made that there is a need to retain Subpart L, this SFAR will be appropriately revoked. On the other hand, if revocation of Subpart L is indicated by the evaluation, this SFAR will be extended until general rulemaking actions are initiated and subsequently finalized.

DATES: Effective April 29, 1985. The FAA will receive comments on this SFAR beginning May 29, 1985 through January 29, 1986.

ADDRESSES: Comments on this temporary suspension may be mailed or delivered in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGC-204), Docket No. 24255, 800 Independence Avenue, S.W., Washington, D.C. 20591. The official docket may be examined in the Rules Docket, Room 916, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. Also mail or deliver comments in duplicate to: Director, Federal Aviation Administration, Southwest Region, Attention: Manager, Air Traffic Division, Docket No. 24255, Federal Aviation Administration, P.O. Box 1689, Forth Worth TX 76101. This informal docket may be examined during normal business hours at the office of the Southwest Region Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Mr . Brent A. Fernald, Airspace and Air Traffic Rules Branch, ATO-230, Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Office of the Associate Administrator for Air Traffic, Federal Aviation Administration, 800 Independence Avenue, S.W., Washington, D.C. 20591; telephone (202) 426-8626.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in this operational evaluation by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions. Communications should identify the regulatory docket number and be submitted in duplicate to the addresses listed above. Commenters wishing the FAA to acknowledge receipt of their comments must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 24255." The postcard will be date/time stamped and returned to the commenter. All comments received between the specified opening and closing dates for comments will be considered before taking action on any further rulemaking. All comments submitted will be available for examination in the Rules Docket, Washington, D.C., and in the office of the Southwest Region Air Traffic Division, Forth Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Background
